Ontario asks Queen's to study double cohort

BY ANNE KERSHAW

The Ontario government has asked Queen's education researchers to study the effects of the expected surge in university enrolment in two years, the phenomenon known as the double cohort.

The province's shift to a fouryear secondary school curriculum, which will result in a significant bulge in student applications to colleges and universities, has some serious longterm funding implications for higher education institutions.

"It's important that colleges and universities are as prepared as possible to meet the needs of this group of students, to anticipate the demands on classrooms and other university resources and to allocate resources in the most effective manner," says Dr. Alan King, of the Social Program Evaluation Group (SPEG).

The Queen's researchers will use provincial education data-

bases of marks and credits, student surveys of interests and plans, and college/university application data to estimate both the projected increase in post-secondary applicants and the demands on capacity in 2003.

SPEG, which has received \$78,265 from the Ministry of Education to conduct the study, is a multidisciplinary group based in Queen's Faculty of Education and Health Policy Research Unit. It has conducted policy research, program and curriculum evaluations, needs assessments, and nation-wide surveys since its inception in 1980. Much of SPEG's work relates to education, including health education programs and social studies curriculum development.

The double-cohort study is being done in co-operation with Dr. Jean Claude Boyer from the University of Ottawa, who will lead the analysis of the francophone students' data.

Barb Fletcher, manager of the Glaxo-Wellcome Clinical Education Centre joins with Paul Lucas, CEO of Glaxo-Wellcome, in demonstrating the centre's new facilities to Principal Bill Leggett. More than 450 members of the Kingston community volunteer as mock patients for health sciences students at the centre, which officially opened on Nov. 11.

Queen's hits top three again in Maclean's 10th annual survey

Students, faculty take firsts in 10th annual universities survey

Queen's has once again placed in the top three in the annual *Maclean's* survey. The university placed third in the prestigious medical/doctoral category, reserved for those universities that offer both undergraduate and PhD programs as well as medical schools.

Queen's maintained or improved its standing in 18 of the 22 categories, including firstplace showings in average entering grade, proportion of students with 75 per cent or higher, proportion of students who graduate, scholarships and bursaries as a action to maintain and enhance this quality."

The move to third place, from last year's tie for second with UBC, appears to be largely the result of a slight drop in the two research-grant categories (SSHRC and NSERC-MRC), which together are worth 11 per cent of the total ranking.

The results may be more reflective of the breadth of reporting parameters than it is of actual funding, says Sandra Crocker, Acting Director, Research Services. "These are relative rankings," she explains. "The reality is that we have more absolute dollars coming in to campus over last year. SSHRC grants are up from \$1.4 million last year to \$2.04 million this year, and NSERC-MRC grants are up from \$22.52 million to \$23 million this year." Queen's overall research budget reached an all-time high this year, increasing from \$69 million to \$77 million.

In the reputational rankings, Queen's climbed to first place (from second in 1999) for Highest Quality in the medical/doctoral category. Reputational rankings are determined by the votes of guidance counsellors, academic administrators and CEOs of major corporations across the country. The Highest Quality category combines with two others to produce the Best Overall reputational ranking, which again put Queen's second.

Since Maclean's rankings were introduced in 1991, Queen's has consistently ranked as one of the top three universities in Canada in the medical/doctoral category, a distinction shared only by U of T. Leading Queen's in the medical/doctoral area were University of Toronto and University of British Columbia in first and second respectively; McGill ranked fourth.

Discussion paper seeks input on Orientation

The Senate Orientation Activities Review Board is looking for the university community's thoughts on the future of Orientation at Queen's.

"It has been 10 years since the university last took a major look at Orientation," explains Kathy Jackson, co-chair of SOARB. "We felt it was time to look at the bigger issues surrounding the week, and that is what we are asking the university community to do SOARB report to Senate, and included dialogue with more than 50 individuals and groups on and off campus over the past year.

The paper seeks input in two broad areas: Orientation's goals and objectives; and its responsibilities and structure.

"From our observations, in addition to the responses we were hearing, it was obvious that there was a lot of room for interpretation in what the orientation goals mean," Ms. Jackson says. The consultations also highlighted problems in the structure and the responsibilities of the many groups that oversee Orientation in various capacities. While there are currently several groups on campus with varying responsibilities for Orientation, the paper notes, SOARB "has been put in the impossible situation of managing, policing and reviewing Orientation," resulting in an "untenable" workload for

in our discussion paper."

The discussion paper, which appears as a special insert in today's *Gazette*, is the next stage in a lengthy consultation process that started following the 1999

Free flu shot clinic this Thursday

Looking to beat the flu this winter? Queen's, in conjunction with the Kingston, Frontenac, Lennox and Addington Health Unit, offers a free Flu Shot Clinic for faculty and staff this Thursday, Nov. 23 in Mackintosh-Corry Hall, outside the cafeteria, from 10 am to 2 pm. Health unit staff will be on site to administer the vaccine. You must show your health card to receive the vaccine. □

Letter

Quantifying enlightenment

In their fall 2000 pamphlet, a "Report to Taxpayers" entitled "Learning for Life," the Ontario government has announced "a new approach to funding postsecondary institutions." A threeper-cent portion of this year's annual operating grant to each Ontario university or college is now to be linked in some manner to the success rate of its graduates in obtaining employment. And this percentage is apparently to be increased gradually in succeeding years.

The portion involved may seem small, but this announcement signifies a new, and more direct and specific, intervention by the government in the operation of our universities. There is, however, nothing new in this narrow and simplistic view of the role of universities as primarily that of training students for employment.

Yet the employers themselves have recently denied that they regard this as the sole purpose of

undergraduate studies. Indeed they are on record as seeking graduates of all kinds, not merely those with specific skills. This shows that they, together with many others, appreciate the worth of the university experience itself, and for its own sake.

It is hard to define, let alone to assess, this experience, this exposure to a new diversity of knowledge and to the expertise and opinions of both instructors and fellow students. Obviously the few years spent at a university are not a complete preparation for a lifetime. But an institution where subjects of sufficient variety are studied can supply not merely a "meal ticket" but also the essential introduction to values other than purely material. It would be difficult to quantify, in percentage terms, the success rate of a university in its main role, that of enlightenment.

ueen's researchers who work with vast amounts of electronic data will soon reap the benefits of a campus data network upgrade, thanks to \$2.3-million from the Canada Foundation for Innovation and the Ontario Innovation Trust.

The grants will go toward replacing 15-year-old network wiring in 30 campus buildings. The goal is to increase the network capacity to deliver 100 megabits (one hundred million bits per second), and eventually one gigabit (one billion bits per second) to the desktop from the current 10 megabits.

The changes won't happen overnight, says Stan Yagi, Director, Information Technology Services. "It will take place over three years. We could do it over the summer, as we did when campus residences were wired (in 1996). But that would be disruptive and would displace people working in those buildings."

In particular, those involved in physics, genetics, mechanical engineering, economics, computing science, pharmacology and toxicology, psychology, biochemistry, mathematics and statistics and mining will ultimately be able to use and transfer large

University takes exam precautions

As exam weeks approach, Queen's is taking extra precautions to ensure both students' safety and to protect the integrity of the exam process, says Suzanne Fortier, Vice-Principal (Academic). "We experienced a number of disruptions to exams last spring, which have had serious consequences for students and the exam process in general, and we are taking these disruptions very seriously," she says.

She has set up a working group, chaired by John Dixon, Associate Vice-Principal (Academic) to review the delivery of exams in a broad context. While extra safety measures are in place for the December exams, it would be prudent for instructors for put plans in place in the event of exam disruptions, Dr. Fortier says. Forum

Deregulation: Quality of education must come first

Editor's note: This is the latest in a series of discussions around

Principal Bill Leggett's recent proposals for a new vision for the university.

BY EDDY CAMPBELL

My reaction to Principal Bill Leggett's vision for Queen's is mixed. On the one hand, his vision is inspiring and exciting. In my new job as Associate Dean of Arts and Science, there is no greater pleasure than the discussion with my colleagues of the

Opinions expressed in Forum are those of the author and do not necessarily reflect the opinions of the Gazette or Queen's University. The Gazette welcomes your opinions on the above or any other issue of interest to the Queen's community. Send your comments to the Gazette, 107 Fleming Hall; e-mail gazette@post.queensu.ca You can also express your views

directly to the principal, at principa@post.queensu.ca

steps necessary to realize those goals. And I expect the dialogue opened up by the principal will continue with considerable vigour for the foreseeable future, as we attempt to understand how to make his vision a reality. Indeed, our Dean Bob Silverman has established a Quality of Education Task Force, which will provide a detailed plan for improvement.

How can we deliver the best quality of education possible to the best students in Canada? We need smaller classes where they matter most and faculty with time to spend with students, and time to develop and enhance their reputations as world-class scholars and researchers. We need additional caring staff members in support of both our teaching and research. And we need physical facilities and technology that measure up, including modern classrooms and laboratories.

On the other hand, it is clear that the Faculty of Arts and Science, the heart and soul of the university, is in distress. More than a decade of underfunding by the governments of three different parties - has had a significant impact. To date, our students have been protected from much of the impact by faculty and staff who have worked harder and longer, larger classes aside. However, this spring saw a two-per-cent budget cut to all faculties.

The principal's message comes not a moment too soon. The quality of the education we offer our students is the single most important factor in our reputation as one of the very best Canadian universities.

The scope of the problem is not small. Budget cuts reduced our staff complement by a quarter. Improving our student-to-faculty ratio just to that of 1990/91 would require more than 130 additional faculty members in Arts and Science. These additions to our personnel, faculty and staff, would total more than \$10 million in additional funding annually.

All of this leads to the key question: where will we find the resources to make vitally needed improvements? We have wonderful people working for us in Advancement, and an aggressive new capital campaign which has already brought us most of the \$200 million goal. Such fundraising activities will be an important part of our future. Our

'The quality of the education we offer our students is the single most important factor in our reputation as one of the very best Canadian universities'

> faculty members bring in the eighth-largest amount of research funding in the country, in spite of the fact that our faculty complement is 25th. These revenues form a significant portion of our budget, and speak to the outstanding accomplishments of our faculty.

In addition, many believe that

the federal government will provide for the indirect costs of research in the near future. We have a very good "commercialization" arm in PARTEQ, which will also bring significant revenue in the longer term. However, we all recognize that commercialization comes with risks. Our plans must be very carefully formulated so that these real and potential sources of funds will help us to take our place among the leading universities in the world.

Finally, faculties with deregulated tuition fees have seen significant improvements in quality. In addition to the other sources of revenue I've described above, the deregulation of tuition fees in Arts and Science would be a significant tool in realizing the vision put forward by the principal. Increases in tuition fees may well have an impact on the diversity of our student body. The extent of that impact is open to question, and our plans must be very carefully made, but, for me, the quality of the education that we offer is an overriding consideration.

Eddy Campbell is Associate Dean of Arts and Science and a professor in the Department of Mathematics and Statistics.

Teaching Issues

A monthly column of teaching tips and ideas from the Instructional Development Centre

Transdisciplinary teaching teams: A model

BY PEGGY A. PRITCHARD

At the heart of academic inquiry is the expectation that ideas will be communicated. The ability to do so effectively is important for all students, regardless of academic level or program. However, it is students in the sciences who seem least skilled in the art of communicating. The challenges they face become exacerbated in a graduate program. At the very least they are expected to give seminars and produce a thesis; some also publish papers and present their work at conferences. Most find these challenges daunting. For a few, they are immobilizing. In response to their concerns about this problem for both the students and the university, members of the Department of Microbiology and Immunology recently introduced MICR 809*/909*, Communication Skills for the 21st Century. Developed and co-ordinated by Andrew M. Kropinski and Peggy A. Pritchard, this course exposes students in the first term of their graduate

work to the intellectual and technological skills they'll need to communicate effectively in their work at Queen's and beyond.

Students examine the larger philosophical, ethical and economic contexts of their studies, through lectures on the nature of science, critical thinking, ethics, issues relating to the business of science, and career management. They learn information literacy and data literacy skills that will enable them to retrieve, evaluate, analyse, organize, manage, disseminate and present information effectively. By the end of the course they will have produced a 20-page review of the literature that may form the basis of the introduction to their thesis, created a professional web page and CV, and delivered a seminar to an audience of peers.

The transdisciplinary teaching team

What is unique about this initiative is the transdisciplinary nature of the teaching team; it truly crosses traditional departmental and faculty-staff boundaries. The 14 faculty, librarians, counsellors and staff members represent eight different departments, centres and units across campus. They have co-ordinated their efforts to ensure that the message delivered is consistent, and whenever possible, have used examples from microbiology and immunology. Their commitment to this initiative is remarkable, especially since their participation in this course is a voluntary addition to their regular duties in their respective units.

ble cohort will soon enter higher education; funding is not keeping pace. How will Queen's cope?

Communication Skills for the 21st Century clearly demonstrates that a high degree of co-operation and commitment already exists within the Queen's community to meet the needs of students and the demands of other stakeholders. But it is not a panacea. As a model for the delivery of curriculum across a larger student population, for example, it would present a few challenges, not the least of which involves addressing the issues of workload, remuneration and recognition for work done outside the traditional departmental bounds. For more information, visit the

course website: www.queensu

JDUC renovations give higher profile to student governments

\$1.3 million in improvements breathes new life into old spaces

BY CELIA RUSSELL ANDERSEN

Queen's undergraduate student government has pitched in \$750,000 towards \$1.3 million in badly needed renovations to the John Deutsch University Centre (JDUC).

Student government officials are now seeing a return on their investment in improved room layout, greater visibility and more comfortable conditions for student clubs.

For years, the Alma Mater Society offices have been tucked down a long hallway off the ground floor at the rear of the JDUC. After extensive renovations this fall and early winter, they will move to the southwestern end, off the JDUC Ceilidh.

Although the JDUC has a daily traffic rate of 9,000 students, the poor layout of the building has hampered access to student government, says Paul Heisler, AMS president. "The vast majority of students can go their four years at Queen's never knowing where their student government is located," he says. "There are so many volunteer opportunities and basic services that they pay for and don't often know about. The AMS thinks it's important to have increased visibility and greater access to the students they serve."

A broader concern is that the student life facilities are inadequate for a university of Queen's size, Mr. Heisler says. "There has been a growing awareness of this problem over the last few years. It is critical that we develop enough space for these activities."

The total price tag for the three renovation phases is \$1.3 million, says Jack Sinnott, JDUC Director. Funding comes from student activity fees, \$300,000 from the cold beverage exclusivity deal with Coca-Cola, and \$107,000 from the Millennium Fund (now known as the Campus Community Campaign). Work phased in last summer and is slated for completion early in the new year, he says.

"We're breathing some life into the place," says Mr. Sinnott. "We're looking at this as the first step in creating the student life centre, the ongoing revitalization of the JDUC."

Phase 1, which included the opening up of the ground floor entrance off Union Street and the elevator lobbies, and renovations to the Society of Graduate and Professional Student Association office, is now complete.

After a temporary move to the Polson Room on the first floor of the JDUC, the SGPS now has a higher, more visible profile in the JDUC.

"It's about time we pulled ourselves out of the corner," says SGPS President Kathleen Cowick. "The biggest benefit with the expansion is that our members will be able to find us more easily. We will also be able to offer the services they expect from us as their student government more efficiently. The air quality and lighting improvements, as well as the exposure of the reception area to the Lower Ceilidh will provide a safer environment for our staff and volunteers."

Phase I also included the relocation of the Earth Centre, Queen's Entertainment Agency along with the SGPS office from the lower southeast corner of the JDUC.

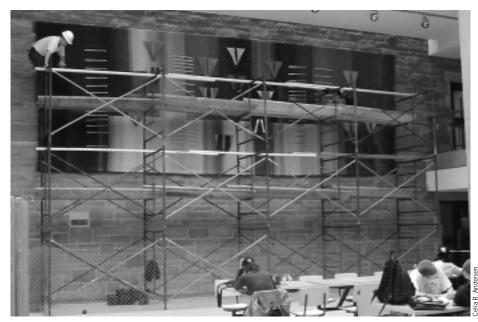

Work has now started on Phase II, which will include moving the AMS offices to the southwest corner of the JDUC, at the bottom of the stairs to the Ceilidh and renovations to the Rector and Chaplain's offices (the Chaplain's office will move from the Physical Education Centre). Much-needed improvements to air circulation and electrical systems will also be made.

"I think it's tremendously exciting," says Mr. Sinnott. "The SGPS and the AMS will now have visibly accessible store fronts. The student governments will be much more in the students' faces, where they belong."

Contingent upon material delays, Phase II renovations should be completed by the end of December. Phase III involves the renovation of the current AMS offices and the second floor of the graduate residences, now part of the JDUC for student organizations and clubs. It should be completed early in 2001.

Renovations to the clubs area was badly needed, says Mr. Heisler. For example, the Queen's Muslim Association now has its own space and room for a prayer room after having to share space with another club.

"It's the biggest renovation project to this part of the JDUC in 23 years and it's about time," says Mr. Heisler. $\hfill \Box$

Workers remove 'Lifescape', a tapestry by artist Helen Frances Gregor honouring the contributions of Queen's former principal John Deutsch, in preparation for renovations. The tapestry, currently being stored at the Art Centre, returns to the JDUC in January.

Raffaello Petracchi, Vice-President Internal, Society of Graduate and Professional Students, takes the helm at the SGPS's new storefront location in JDUC.

\$6 million in renovations targets elevators, roofs, classrooms

Physical Plant Services spends about \$6 million annually to repair and renovate campus buildings, says Construction Manager Pat Caulfeild. This is nowhere near the 1 to 2 per cent value of the physical plant that maintenance experts recommend should be spent, he noted.

Future capital construction projects

- Three emergency radio phones, poles and blue lights at Richardson Stadium, \$22,000
- Power door openers installed at accessible entrances in Louise D. Acton Building and Ontario Hall, \$11,000
- Partial roof replacement, Mackintosh-Corry Hall, \$300,000
- Registrar Admissions, Student Recruitment move from Victoria School to Richardson Hall and Stauffer Library, as a result of new School of Business construction, \$300,000 and \$100,000 respectively
- Goodwin Hall roof, \$150,000
- Theological Hall, slate roofwork, \$150,000
- Goodwin Hall room 737 conversion to lab, \$150,000
- Fuel unloading station at heating plant, \$135,000
- Carruthers Hall reroofing, \$130,000

include the building of a new student residence as well as \$7 million to expand and improve Leonard Hall dining facilities in 2002.

The following is a brief list of some of the non-capital repair and renovations projects Physical Plant Services carried out this year. Accessibility and safety improvements include:

- Elevator installed, University Club, \$180,000
- Elevator to be installed, Rideau Building, \$160,000 - \$180,000
- University building exterior signage, \$50,000
- Vertical stair lift replacement on the student street, Mackintosh-Corry Hall (to accommodate both wheel-chairs and scooters), \$42,000

Other major projects over the past year:

- Replacement windows, Victoria Hall, \$1.2 million
- Roof replacement, School of Policy Studies, \$700,000
- Servery enhancement by Sodexho-Marriott food services, Mackintosh-Corry Hall, \$602,000
- Goodwin Hall, floors 5, 6, 7, alterations and renovations to labs, \$570,000
- Alterations for Student Health services in the LaSalle Building, \$450,000
- Upgrades to the sloped lecture theatres in Jeffery Hall, \$431,000
- Retrofit 40-year-old mechanical system heating/domestic water, Morris Hall, \$390,000

- ResExpress Mart built in Victoria Hall, \$295,000
- Waldron Tower residence exterior repairs, \$274,000
- Daycare renovations to 184-186 Union St., (moved from Queen's Crescent as a result of Chemistry building construction) \$270,000
- Five network switches replaced, main campus, \$250,000
- Jean Royce Hall, West Campus reroofing, \$250,000
- Additional practice rooms in 220 Harrison-LeCaine Hall (former Music Library, now in Douglas, \$225,000
- Victoria Hall carpet and painting, \$180,000

- Common Ground Coffee House, second floor, John Deutsch University Centre, \$130,000
- Jean Royce Hall interior improvements, \$117,000
- Department moves precipitated by the new Chemistry building construction: Career Services to MacGillivray-Brown Hall, Barrie Street, \$100,000; Four Directions Aboriginal Centre to 146 Barrie St., \$40,000; McGill-Queen's University Press to 144 Barrie St., \$40,000
- Research labs moved preceding classroom alterations, Dupuis Hall, \$75,000

Lecture, display, launch book devoted to 18th-century 'enigma'

Mandeville essay collection continues run of publishing successes by Queen's history students

BY MARY ANNE BEAUDETTE

A collection of essays compiled and dedited by a Queen's PhD candidate in history is currently on standing order at 350 academic libraries around the world.

Mandeville and Augustan Ideas: New Essays, by Charles Prior, contains edited papers from a 1997 Queen's conference honouring Bernard Mandeville, the 18thcentury philosopher, doctor, and poet. Organized by Mr. Prior, the conference attracted Mandeville scholars from three continents. Mr. Prior collected his Bachelor's degree the following weekend and went on to complete his Master's degree while editing the conference proceedings for his book, which came out this fall.

Mr. Prior's book brings to three the number of works published by graduate students in the history department in recent years. Michael Dawson's *The Mountie from Dime Novel to Disney* (Between the Lines Press) and Bay Ryley's *Gold Diggers of the Klondike* (Watson & Dwyer Publishing) were both published in 1998.

His book's acceptance by a scholarly press was doubly gratifying, Mr. Prior says, not only because few works by graduate students are accepted for publication by scholarly presses, but because it gives renewed prominence to a worthy subject. The last major collection of essays on Mandeville appeared in 1975, he says.

The book was peer-reviewed before being accepted for publication, and received "very, very positive reports" from its readers, Mr. Prior says. Published in the University of Victoria's English Literary Studies Monograph Series, the book will be launched this Friday, Nov. 24, with a lecture by Mr. Prior. He will speak on "Bernard Mandeville: An Augustan Mind," in the W. D. Jordan Special Collections and Music Library (level 3, Douglas Library) at 5:30 pm, with a reception following at the Grad Club. Copies of the book will be on sale.

Mr. Prior also curated a display of rare books and political pamphlets from Queen's Libraries Special Collections relating to themes in the book, including religion, politics, society and Mandeville's sources and influences. The display continues until month's end in the W.D. Jordan Special Collections and Music Library.

A witty and wide-ranging author and social commentator as well as a medical man (one of his pamphlets was subtitled 'Entertaining Remarks on the Modern Practice of Physicians and Apothecaries, Very useful to all that have the Misfortune to stand in need of either'), Mandeville himself is something of an enigma, says Mr. Prior. "There are only two letters in existence written by him, and no likenesses," Mr. Prior explains. "He was immensely popular in his time, but Benjamin Franklin is the only person we know of who ever said he'd met him."

The Fable of the Bees, Mandeville's bestknown work, reflected his basic belief that people were motivated by self-interest and greed, and set him against the conventional thinkers of his age, who saw society as intrinsically good. His writings, which explored subject matter ranging from political thought to human psychology, were reflected in the works of many of the great thinkers of the day, including Rousseau, Voltaire, Hume and Adam Smith.

"He's known for his ideas, rather than for himself," Mr. Prior explains. With so little known about the man behind the ideas, the only way for scholars to learn about him is to examine the social, politi-

Libraries' catalogue migration means limited services

Queen's Libraries will ring in the new year with Endeavor's library management system, Voyager and a brand new look for its online public access catalogue (QCAT), scheduled to be unveiled on Jan. 2.

The new system offers a catalogue with more search options and search parameters and hypertext links to any available electronic journals with full-text articles. An improved electronic request service will allow patrons to place holds and recalls and renew books electronically in real time.

The migration from Notis to Endeavor over the next six weeks will result in some down time. Queen's Libraries will be offering limited services as noted below from today until the catalogue launch on Jan. 2. cal and religious contexts of his time, he says. "By examining the subjects about which he wrote, you realize the depth and breadth of his thinking. He looked at society in all its complexities." The book display also reflects Mr. Prior's doctoral research, which looks at religious influence on political thought in the 17th century. $\hfill \Box$

Charles Prior: Celebrating the ideas of a provocative 18th-century thinker.

News Notes

Queen's presents A Christmas Carol

Queen's volunteers are once again hosting the annual CBC reading

annual CBC reading of Charles Dickens' A Christmas Carol. A fund-raising event for local feed the hungry programs, this year's reading features

CBC commentators Rob Clipperton and Erika Ritter, along with Kingstonians Heather Bonham and Don Dawson, and David Rankine of Queen's Bands. The event takes place Saturday, Dec. 2, 7:30 pm, in Chalmers United Church. Tickets are \$12.50 and are available from Liz Gorman (ext. 32060) gormane@post .queensu.ca, or Doug Puffer (ext. 75501), pufferd@post.queensu.ca. The audience is asked to bring a canned food contribution for the Partners in Mission Food Bank.

transcends disciplinary boundaries to encompass architecture, philosophy, psychology, cultural studies, queer theory, feminism and critical theory, has been said to represent a "ground-breaking moment in the debates surrounding bodies."

Tomorrow, Dr. Grosz speaks at noon at the Ban Righ Centre's Brown Bag Lunch series on Histories of a Feminist Future. She presents a public lecture on Wednesday, Nov. 22, on Feminist Utopias, at 7 pm in the Robert Sutherland Room, JDUC, and on Thursday, Nov. 23, she addresses a Women's Studies seminar on Inhuman Forces, 1-2:30 pm in Room D211 Mackintosh-Corry Hall.

For information, contact Terrie Easter Sheen, Institute of Women's Studies, 533-6318.

Teaching forum focuses on technology

The Future of Educational Technology at

Temporary service limitations

Newly Catalogued Material: As of **Dec. 6**, items catalogued on Voyager will not be available for circulation until Jan. 2.

Circulation Services:

As of **Dec. 15**, NOTIS circulation activity will be restricted to charge, discharge and renew functions. It will not be possible to process holds or recalls.

Last day for fine payments is **Dec. 13**. However, between Dec. 13-Jan. 2, patrons will not be blocked (nor reported to the Registrar's Office) from borrowing materials if they have outstanding fines.

Reserve Services:

Reserve processing continues on NOTIS until the end of exams.

Rush Cataloguing Services:

Personal rush requests will continue to be catalogued in NOTIS until **Dec. 5**. Rush cataloguing services will NOT be available from **Dec. 6** to **Jan. 2**. Patrons may continue to submit requests through the existing webforms, and items will be available at circulation services desks on Jan. 2, when Queen's Libraries "goes live" with Voyager circulation.

Current Serial Issues:

After **Nov. 20**, new journal issues will be received and processed, and sent to their library destinations for immediate shelving. Although NOTIS will not reflect accurately the receipts and status of these issues, the material will be available to patrons for browsing and in-library use. A note will be added to the catalogue to indicate that the record is not completely up to date.

Bound Journal Volumes:

From now until **Jan. 2**, bound journals being returned from the bindery will be processed and shelved in those locations where bound journals do not circulate. Although NOTIS will not reflect the status accurately, the volumes will be available to patrons for in-house use.

For information, or to text-drive the new catalogue, please see:

library.queensu.ca/webopac or contact Jane Philipps, Ext. 36846, Phillipj@post.queensu.ca

Philosopher probes space/time

An internationally renowned philosopher who is International Visiting Scholar in the Institute of Women's Studies will also be Scholar-in-Residence. Elizabeth Grosz is recognized for her work in philosophical aspects of corporeality and space/time. Her publications include Jacques Lacan: A Feminist Introduction (1990), and Volatile Bodies: Toward a Corporeal Feminism (1994) and Space, Time and Perversion (1995). Dr. Grosz has also co-edited, with Elspeth Probyn, Sexy Bodies: The Strange Carnalities of Feminism (1995); her most recent work is Virtual Architectures (MIT Press).

Dr. Grosz recently left Australia to hold the Julian Park Chair in the Humanities in the Department of Comparative Literature, State University of New York at Buffalo. Her work, which Queen's is the focus of this year's Cross-Faculty Teaching Forum, to be held Monday, Dec. 4. Historically, forum has provided faculty from across the university with the opportunity to discuss broad-based teaching and learning issues. This year's keynote speaker is Tony Bates, Director of Distance Education and Technology, Continuing Studies, University of British Columbia.

The university's Learning Technology Faculty Associates are holding the event with the aim of developing guidelines that can help set the direction for future use of technology to enhance teaching and learning at Queen's.

For information and registration, view the program at:

http://www.its.queensu.ca/Itu/CFTF/

Please Note:

- · Departments requiring casual hourly paid secretarial or clerical assistance should contact Patti Evaristo in Human Resources, 533-2070
- Requisitions for staff replacement, with appropriate approvals, must reach the Human Resources Department by noon of the Monday one week prior to the date of issue.
- Applications received from internal candidates will be acknowledged by the Department of Human Resources. The results of each competition will be posted under the Gazette heading "Appointments" as soon as possible after the conclusion of the recruitment and selection process.
- Closing date for the following positions is Tuesday, Nov. 28, 2000 at 4:30 pm. Late applications will not be accepted. Please submit a letter of application indicating the specific position desired and a detailed resume including your employee number.

Resumes will be accepted from Queen's employees with Internal Status ONLY unless the position specifically invites External applications.

Queen's University has an employment equity programme, welcomes diversity in the workplace and encourages applications from all qualified candidates including women, aboriginal peoples, persons with disabilities and racial minorities.

Milestones

Compiled by Faye Baudoux

If you have a milestone of 5, 10, 15, 20, 25, 30, 35, 40 years or more of continuous service coming up and you do NOT wish your name to be included in the listing, please contact Faye in Human Resources at 77791.

Congratulations to those who reached the following milestones in November 2000.

30 years: Janie Haig, Education Library; Dennis Hannah, Chemistry; Bonnie Lawrie, International Centre; Linda Thomas, **Oueen's Health Policy**

25 years: Lee Boudreau, Pathology; Candy Randall, Continuing and Distance Studies.

20 years: Elaine Bevens Caird, Apartment and Housing; Angelo D'Alessandro, PPS; Roger Healey, Institutional Research and Planning; Reginald Manual, Biochemistry; Onno Oosten, Mechanical Engineering.

15 years: Terry Burns, PPS; Gordon Crawley, PPS; Leonel De Matos, PPS; Darlene Gaffney, Civil Engineering;

Stephen Graham, PPS; Henry Lee, Physics; Wayde McMachen, PPS; Ronald Oomen, PPS; Barbara Saunders, Pathology; Reinolde Van Weringh, Cataloguing/Technical Services.

10 years: Mary Lou Chapman, Industrial Relations Centre; Kathie Granger, Office of the University Registrar; Brenda Johnston, Urology; David Lynch, PPS; Janet MacDonald, Postgraduate Medical Education; Angela Phelan, School of Business; Lisa Rodrigues, School of Business; David White, PPS.

Five years: Bogumil Mekarski, PPS.

Bulletin Board

Appointments

Nominations for Director, International Programs Office, Faculty of Arts and Science

The previous Director, Uli Scheck has been appointed Dean of Graduate Studies and Research, and Bill James is Acting Director of the International Programs Office until June 30, 2001. Faculty members, staff and students are invited to submit nominations and/or self-nominations of members of faculty within the Faculty of Arts and Science to serve as Director of the International Programs Office. Nominations should be to Dean Robert Silverman, sent ras6@post.queensu.ca by Friday, Dec. 1, 2000.

Awards

Call for nominations, 2001 Prizes for Excellence in Research

Nominators should submit the curriculum vitae of the nominee, a covering letter and a maximum of five letters of reference. Nominations should address the nominee's achievements in research, and the importance of their contributions to the discipline. Members of the Queen's community are invited to submit nominations to the Director, Office of Research Services by Feb. 5, 2001. Terms are available at http:// www.queensu.ca/vpr/excguide.htm.

Chancellor Richardson Memorial Fund

The Advisory Committee of the Chancellor Richardson Memorial Fund invites departments and other university agencies involved in Canadian studies to submit proposals for the purchase of Canadiana teaching and research materials. Under the terms of the university's agreement with the Richardson Company, the fund shall be used for the following purposes:

1 The acquisition by and for the university, and the maintenance, of teaching and research material in the field of Canadian studies and within the followAll proposals submitted for consideration by the Advisory Committee should include the following information:

- 1 a clear indication whether the proposal has been considered by a departmental committee or an informal group or whether it is the submission of one individual.
- 2 as clear and specific a description as possible of the materials proposed for acquisition. 3 a clear statement of the gap in the
- Canadian collection which the proposed acquisition would fill, relating this to existing holdings and to current collecting policies.
- 4 an indication of any research projects which would be facilitated by the proposed acquisition.
- 5 the probable costs of acquiring the proposed acquisition,
- 6 an indication of the probable costs of preserving and protecting the proposed acquisition.
- 7 an indication whether the desired materials are currently available for purchase, and an indication of whether part or all of the desired material is available in other than original form, e.g., microfilm, reprint or xerox copy.
- 8 an indication whether the purchase of the desired materials might be financed in whole or in part from sources outside the university, e.g., Canada Council or other research foundations.

During the past few years the fund has supported the purchase of a variety of materials including specific research material, and acquisition projects to develop Canadiana collections. These purchases have included: 1 microfilm copy of newspapers from all provinces

- family papers of representative Canadians 2 3 monograph material illustrating the social and cultural development of Canada
- 4 original drawings and photographs of buildings in the Kingston area
- 5 sets of data relating to Canadian studies 6 records and scores by Canadian composers
- Canadian art, particularly items which 7 have local interest or complement drawings or paintings held in the art centre.

Committees

Advisory Committee, Director of the Agnes Etherington Art Centre David McTavish's term as Director of the Agnes Etherington Art Centre ends Aug. 31, 2001. Dr. McTavish has indicated that he does not wish to consider another term as director

A committee chaired by Suzanne Fortier, Vice-Principal (Academic), will be established to advise the principal on the present state and future prospects of the art centre and on the selection of the director. Suggestions for membership on the advisory committee are requested and should be submitted in writing to the Office of the Vice-Principal (Academic) by Dec. 4, 2000.

Members of the university community are also invited to offer comments on the present state and future prospects of the Agnes Etherington Art Centre and its leadership. These comments should be submitted in writing by Dec. 20, 2000 to Suzanne Fortier, Vice-Principal (Academic) and respondents are asked to state whether they wish to have their letters shown, in confidence, to the members of the advisory committee

Advisory Committee, Director, School of Industrial Relations

Carol Beatty's term as Director of the School of Industrial Relations and the Industrial Relations Centre ends June 30, 2001.

In accordance with the terms of the Collective Agreement between Queen's University and the Queen's University Faculty Association, a selection committee will be formed to consider the present state and future prospects of the school and centre. Members of the School of Industrial Relations will elect five faculty members from the school to serve on the selection committee.

Faculty members, staff and students are invited to nominate staff and students from the School of Industrial Relations and the Industrial Relations Centre and faculty members from cognate disciplines for membership on the advisory committee. Send nominations to the Chair of the Committee. Eric Moore, Acting Dean of Graduate

Rosen Lecture sub-committee seeks suggestions

The Irving and Regina Rosen Public Lecture Series sub-committee seeks suggestions for distinguished visitors to participate in the Jewish Studies program by giving a public lecture and meeting with students, faculty, staff and community members. The visitor should be a noted figure in the field of lewish thought and tradition, or a related area, who can present a lively public lecture of interest to members of the Queen's and greater Kingston communities. Suggestions for up to two visitors for the 2001-2002 academic year are welcome. Contact Allan Manson, Faculty of Law, Queen's University, mansona@gsilver.gueensu.ca. by Nov. 30, 2000.

- c French-Canadian Material: books, documents, poetry, broadsides and pamphlets, fiction and non-fiction.
- d Old, rare and, in some cases, unique items; early explorations and travels, maps and atlases, fine editions and expensive sets.
- 2 The acquisition of library resources for the university, in the form of books, aids to study or research, and information storage and retrieval systems and services.

For details contact Brian Osborne, or Deborah Shea, ext. 74008, shea@post. queensu.ca.

Submit proposals to: Deborah C. Shea, Department of Alumni Affairs by Jan. 14, 2001

Alumni Award for Excellence in Teaching

The Alumni Teaching Award Committee invites students, faculty and alumni to submit nominations for the Alumni Award for Excellence in Teaching. It is maintained by the Queen's Alumni Association and was instituted twenty years ago to promote superior teaching at Queen's. A candidate must be a teacher at Queen's University who has the primary responsibility for organizing and presenting the material for a course offered to registered Queen's students. Previous award winners are not eligible.

Nomination forms must be signed by five students, faculty or alumni and submitted to the Assistant to the Director of Alumni Affairs, Queen's University, by Jan. 26, 2001. For details, contact: Deborah C. Shea, Department of Alumni Affairs 533-6000, ext. 74008, shea@post.queensu.ca.

Studies and Research by Dec. 20, 2000.

Principal's Advisory Committee for the Queen's National Scholars -January 2001

Principal William C. Leggett is pleased to announce the composition of the Principal's Advisory Committee for the Queen's National Scholars. Members are: Michael Adams, Pharmacology & Toxicology; Yolande Chan, Business; Kathleen Cowick, Society of Graduate & Professional Students (SGPS); Mary Margaret Dauphinee, University Advisor on Equity; Janice Deakin, Physical & Health Education; Paul Heisler, Alma Mater Society (AMS); Larry Miller, Education; Leila Notash, Mechanical Enginering; Christine Sypnowich, Philosophy; William McLatchie, (Secretary), Special Advisor to the Principal: David Mullan (Chair), Professor, Faculty of Law. The committee will review and provide advice on the applications received by the principal. Faculty Offices will be notified of the principal's decisions no later than Jan. 31, 2001.

PhD examinations

Members of the regular staff at the university may attend Ph.D. oral thesis examinations.

Wednesday, Nov. 22

Paul Tschirky, Civil Engineering. Waves and Wetlands: An investigation of wave attenuation by emergent, freshwater, wetland vegetation. Supervisors: K. Hall and D. Turcke. 212 Ellis Hall, 9:30 am.

Friday, Nov. 24

Ruediger Mueller, German. Prostitution and the Prostitute (1892-1912) in Arthur Schnitzler's "Reigen", Frank Wedekind's "Die B(chse der Pandora" and Ludwig Thoma's "Moral" and "Magdalena". Supervisor: U. Scheck. 406 Kingston Hall, 9 am.

Monday, Nov. 27

Daniel Doucet, Biology. Antifreeze proteins from the spruce budworm, Choristoneura fumiferana: characterization of isoform diversity, gene structure and expression . Supervisors: V. Walker and P. Davies. 3110 Biosciences Complex, 10:30 am.

Bulletin Board continued

Friday, Dec. 1

Edward Thommes, Physics. On the formation of Uranus and Neptune. Supervisor: M. Duncan. 201 Stirling Hall, 2:30 pm.

Research offices closure

The Office of Research Services, the Office of the ORDCF/CFI Taskforce and the Office of the Vice-Principal Research will be closed the morning of Dec. 19, 2000 from 8:30 until noon due to a strategic planning session. Offices will open 2 - 5 pm.

SWEP 2001 is on-line

Need help with summer projects? We offer you enthusiastic students, easy administration, wage subsidy. We need from you: career-related summer jobs, commitment to enhance students' skills, shared funding, if your budget permits. Complete the online proposal form at http://www.careers. queensu.ca/facultyframe.htm

Proposal deadline: Nov. 24.

Volunteers Needed

Irritable Bowel Syndrome sufferers Patients with Irritable Bowel Syndrome are needed for a research study to examine the use of acupuncture as a treatment. If you have been diagnosed with Irritable Bowel Syndrome, have active symptoms and have never had acupuncture you may be eligible. Call Tracie Marko at Hotel Dieu Hospital 544-3400 ext. 2440 for details.

Post-menopausal women

Post-menopausal (45 to 65 years old) are needed to participate in a research study conducted by the School of Physical and Health on the benefits of physical activity. Subjects must be non-smokers, not on hormone replacement therapy, and exercise less than two hours a week. Call Tracey

O'Sullivan at 533-6000 ext 75102 (Kingston), or email tracey.osullivan@sympatico.ca.

Pregnancy and work study

The Clinical Mechanics Group at Queen's University is looking for volunteers to participate in a study on back pain in working pregnant women (you do not have to have back pain to participate). Contact Heather Lockett, Clinical Mechanics Group, Queen's University at 548-2356, email pregnancyandwork@hotmail.com.

Volunteer translators

The International Centre is looking for Queen's staff or faculty members who will volunteer to have their names stand as translators for emergency calls from Queen's students overseas. The university has programs in more than 40 different countries including those where Cantonese, Dutch, Finnish, French, German, Greek, Hindu, Italian, Japanese, Mandarin, Norwegian, Portuguese, Russian, Spanish, Swahili, Swedish, Thai and Turkish are spoken. Those fluent in one or more of these languages, please contact Cathy Lemmon, ext. 74650, cl4@post. queensu.ca or Wayne Miles, mylesw@post. queensu.ca

Calendar
