## Student-athlete is Queen's newest Rhodes scholar

By CELIA RUSSELL

Sprinter-hurdler and computer science student Susan Bartlett has been selected as a Rhodes scholar for 2003.

Ms. Bartlett, 22, will take up her scholarship next fall at Oxford University, England.

She is the second Queen's Track and Field athlete to win

this prestigious recognition. Bob McGill won the same award in 1997.

"I'm very pleased, of course. There's nothing like jamming a Rhodes scholarship in between your exams," she said jokingly. "I'm planning to read PPE (Philosophy, Politics, and Economics). It will be my

third bachelor's degree, but it's the quintessential Oxford program. Plus, the system is very different over there, so there will be a lot of independent study."

She intends her course of study to prepare her for a career engaged in shaping public policy respecting new and emerg-

ing technologies.

Ms. Bartlett, a Riverview, NB resident, received a Bachelor of Arts degree in English Literature from Queen's University in May, 2002 and will complete an Honours Bachelor of Science degree in software design in May, 2003.

Ms. Bartlett is on the

Queen's University Varsity Track Team competing in hurdles, sprints and relays. She is a three-time, academic all-Canadian and is on the Dean's Honour List for both English and Computer Science.

The Rhodes Scholarship is not awarded, however, on the

### 'TIS THE SEASON

CELIA RUSSELL

Writing implements in hand, undergraduate exam-writers file into Jock Harty Arena on a frosty December morning last week. Exams end Dec. 19, and classes will resume on Jan. 6, 2003.

## Trustees question Athletics changes

By CELIA RUSSELL

The number of varsity teams will decrease from 40 to 24, effective September 2003, a fact that concerns some Board of Trustee members.

Although they will maintain competitive club status, they will not retain the same funding status as varsity teams.

"There is no support for coaching in competitive clubs," Trustee Joan Stevenson told fellow trustees at their quarterly meeting Dec. 7.

Students are very much concerned about the future of their athletic programs, she said. "In light of our reputation in the *Maclean's* rankings, is there an opportunity to subsidize Athletics and Recreation in different ways?" said Professor Stevenson, a faculty member in Physical and Health Education and Rehabilitation Therapy.

Part of the program restructuring was to support activity in the intramural program, the largest in the country, Principal Bill Leggett said.

At the Oct. 24 Senate meeting, Janice Deakin, Director of the School of Physical and Health Education, said the proposal to reduce the number of clubs was based on a model that examined the number of athletes involved

## "Always interesting, sometimes provocative"

### ATTENDANCE KEEPS GROWING FOR ANNUAL BUSINESS FORECAST LUNCH

By MEGAN EASTON

Now grown to a sold-out event, the annual Queen's Business Forecast has forged a relationship between the Kingston business community and the university's business school - a rare development in most university

towns, says the event's founder.

"It shows the local business people that the business school at Queen's exists and that we are actually prepared to come down and talk to them and answer their questions," says Merv Daub, Professor Emeritus and panel moderator. "Many people here will tell you that it's the only time they see a group of Queen's professors together, let alone talking about something that interests them."

Still the only event of its kind among Canadian universities

after more than two decades, this year's 21st annual forecast luncheon earlier this month saw attendance almost triple that of the inaugural meeting more than two decades ago.

Richard Kizell, a long-time member of the Kingston business community and president of the financial planning company Money Concepts, has been going to the luncheon every year for about 12 years, always signing up early because tickets go fast.

"It's always interesting,

sometimes provocative. Hearing an academic gives you a different point of view and more of a long-range forecast that contrasts with the newspapers where it's often very short-term. There's always something useful that you go away with."

He says he and his colleagues appreciate the chance to interact with the professors on the forecast panel. "It gives you an opportunity to meet people at the university, hear what they have to say and either agree or disagree with them."

See BUSINESS FORECAST: Page 7

continued from page 1

basis of academic distinction alone; Cecil Rhodes stipulated in his will that the recipients of the scholarship must also have integrity of character, vigor, interest and a respect for their fellow beings, the ability to lead and the energy to use their talent to the full.

Originally, the scholarship was open to men only. The terms of the Rhodes trust were varied so that since 1977 women have been eligible for and awarded Rhodes Scholarships. In 1995 restrictions on married applicants were dropped.

Scholarships are awarded throughout the Commonwealth, and the United States and in Germany. The scholarship provides for all expenses for travel to and study at Oxford University for two years, with an option for a third year. The current value of the scholarship is more than \$100,000.

CELIA RUSSELL

Susan Bartlett addresses the audience at a ceremony recognizing the opening of the School of Computing earlier this fall at the University Club.

### ADVERTISING POLICY

The Queen's University Gazette is a newspaper published by the University's Department of Marketing and Communications ("Publisher") for the primary purpose of internal communication to its faculty and staff members.

All advertising is subject to the Publisher's approval. The Publisher reserves the right to revise, reject, discontinue or omit any advertisement, or to cancel any advertising contract, for reasons satisfactory to the Publisher without notice and without any claim for penalty.

The Publisher does not accept liability for any loss or damage caused by any error in accuracy in the printing of an advertisement beyond the amount paid for the space actually occupied by that portion of the advertisement in which the error occurred.

The advertiser agrees to indemnify the Publisher for any losses or costs incurred by the Publisher as a result of publishing any advertisement, which is libelous or misleading, or otherwise subjects the Publisher to liability.

The Publisher may insert the word "advertisement" above or below any copy.

The Publisher will not knowingly publish any advertisement which is illegal, misleading or offensive to its readers.

The Publisher will not knowingly publish any advertisement which violates the University's internal policies, equity/human rights policies or code of conduct. Further, the Publisher will not publish any advertisement which contravenes the best interests of the University directly or indirectly.

## Trustees

continued from page 1

in the sport, availability of leadership, competitive opportunities, demand on resources and possible savings. (Details of the changes can be found in the University Council on Athletics report to Senate available on the University Secretariat website.)

In the larger context, the restructuring reflects the signs of budget stress seen in all Queen's programs, Trustee Dan Burns said.

Trustee Heino Lilles expressed concern that the Board of Trustees had not been

made aware of Athletics and Recreation's decision to reduce the number of varsity teams before it took effect.

"I'm genuinely concerned with the process, that this change could be made without the involvement of the Board, and without broad discussion or input," said Mr. Lilles, a member of the 1968 Golden Gaels football team that won the Vanier Cup.

"It is a lot easier to drop programs than it is to reinstate them." [www.queensu.ca/secretariat](http://www.queensu.ca/secretariat)

## Queen's meets enrolment target

Student numbers for 2002-2003 is virtually on target, and varies less than one per cent from the Senate-approved enrolment plan.

The report, prepared by University Registrar Jo-Anne Brady and included in the most recent Board of Trustee and Senate agenda packages, comprises figures taken as of Nov. 1, 2002.

The university grew by approximately 450 full-time students or three per cent, to a total full-time enrolment of 15,143 students. Total full- and part-time enrolment is 18,649.

Nearly 27,000 applications were received for about 3,100 full-time places in direct-entry undergraduate programs. As of Nov. 1, total full-time year 1 enrolment is 3,121, with total full-time undergraduate enrolment in direct- or second-entry professional programs at 12,827. Master's enrol-

ment in the School of Graduate Studies and Research increased five per cent (1,027 students) and doctoral enrolment increased seven per cent (757 students).

Male students represent fewer than 50 per cent of the total university population, only 34.8 per cent in Arts and Science and 25 per cent in Education. In contrast, 77 per cent of the Engineering program and 60 per cent of full-time graduate students are male. Most other programs show a close 50:50 ratio of men to women.

The number of students 17 years and younger increased 45 per cent over 2000 and represent 11 per cent of the first-year class. The youngest registered student is 15 and the oldest is 80.

International full-time enrolment increased 3 per cent over 2001 to nearly 500 students. [www.queensu.ca/secretariat](http://www.queensu.ca/secretariat)

## Other news from the Dec. 7 meeting of the Board of Trustees

In other news, the Board

- Heard an update from Principal Leggett on administrative searches. The search committee for a new Vice-Principal (Operations) will review a list of recommendations in January; the search for a new School of Business Dean has been narrowed to two candidates, with the formal recommendation coming this month; the search for a new Information Technology Services director has been advertised nationally and has yielded a large field of interested applicants.
- Approved naming and dedication opportunities in The Cancer Research Institute, Goodes Hall, Harkness Hall (to Harkness International Hall) and Macdonald Hall.
- Ratified Senate approvals to establish the Bracken Chair in Genetics & Molecular Medicine in the Faculty of Health Sciences; the Connell Professorship in Palliative Care Medicine in the Faculty of Health Sciences and the Human Mobility Research Centre as a university centre.
- Amended the gift acceptance policy and the naming policy.
- Approved the health and safety and environmental management policy statement.
- Approved the statement of investment policies and procedures for the revised pension plan of Queen's University.
- Approved an allocation of up to six per cent (or \$50 million CDN) of the Queen's Pension Plan's assets to high-yield bond investments managed within a highly-diversified fund of high-yield bonds, subject to the Pension Committee finding a suitable means to keep the Queen's Pension Plan on-side with respect to the Federal Government's foreign property rules.
- Approved the hiring of Seix Investment Advisors (of Woodcliff Lake, New Jersey) to manage the high-yield bond investment component of the Queen's Pension Plan.

## A roof over their heads

STUDENTS SHOULD BE ABLE TO FIND ADEQUATE HOUSING THIS FALL, OFFICIALS SAY

By CELIA RUSSELL

Despite the arrival of the double cohort, students should have no problem finding a place to live next September, says Dean of Student Affairs Bob Crawford.

"There should be no housing crisis," he told the Nov. 28 meeting of Senate, referring to statistics from the apartment and housing listing service.

Even with increased enrolment this fall, there were still 650 available beds in mid-September.

The double cohort is the final group of five-year OAC students graduating together next spring with the first group from the new four-year secondary program.

"We are not projecting a very

large increase for next year, only about 200," said Suzanne Fortier, Vice-Principal (Academic), responding to a concern that lecture halls already seemed cramped. "Crowding is not a huge issue because we have handled the enrolment increases (to accommodate the double cohort) through small

**"Crowding is not a huge issue because we have handled the enrolment increases through small increments over the past few years."**

increments over the past few years."

This year Queen's accepted

about 300 more new undergraduate students than last year for a current Year 1 total of 3,121. The current first-year-undergraduate enrolment targets for 2003-04 and 2004-05 are 3,315 for each year.

Additionally, two new residences on Albert and Stuart streets will provide 548 new beds. The \$47.5 million project is scheduled for completion in time for the start of the 2003-04 academic year.

"We will continue to take every opportunity to look at all the possibilities," said Associate Dean of Student Affairs Roxy Denniston-Stewart. "Our plan is to ensure that we have adequate housing."

As for off-campus housing, the City of Kingston planning and adjustment committees have agreed to strike a committee with the university to look at issues surrounding intensification in the student housing area surrounding the main campus, Dean Crawford said.

## Other news from the Nov. 28 Senate meeting

Senate approved:

- a one-year MBA for students holding an undergraduate degree in business or management;
- an MSc (OT) and MSc (PT) in the School of Rehabilitation Therapy;
- the Human Mobility Research Centre (HMRC) as a university centre;
- revisions to the policy on identification of students on final examinations. Effective December 2002, the use of student numbers rather than names will be used to identify participants on final examinations. The exception is machine-scored, multiple-choice final examinations, on which students would have to write their names.
- degrees, diplomas and certificates for 2002 Convocations. This year, Queen's conferred 4,802 degrees, diplomas and certificates (4,033 in the spring and 769 in the fall), as compared to 4,728 in 2001 (3,941 in the spring and 787 in the fall).
- the election of the following to Senate committees – Campus Planning and Development, Donna Lounsbury (staff); Internal Academic Review, Timothy Smith (faculty); Orientation Activities Review Board, Jo-Ann Brierley (non-student), Ayaz Hyder, Freda Kwon and Thomas Woodhall (students); University Promotions, Kevin Lai (student).

## Documenting treasures of campus history

By CELIA RUSSELL

Paulette Jenner would be the ideal person to assist those who have lost their way on campus.

Chances are she could also give you the complete history of the building or room you were looking for, along with the details of portraits, plaques or sculptures that might also be there.

For four months this past summer, the Classics student, armed with clipboard and camera, scoured the hallways, rooms and even storerooms and closets of every building on campus, documenting evidence of the university's rich heritage. She then created the university's first-ever database of more than 1,500 digital photos and a

comprehensive inventory, including detailed descriptions and conditions of all commemorative plaques, artwork and other historical memorabilia.

University Secretariat staff are putting the finishing touches on the database, which will be an invaluable tool for several departments and units on campus.

"Her endeavour is crucial for maintaining institutional memory," says Associate University Archivist Paul Banfield, whose department is among several that will be using the database.

As part of the project, Ms. Jenner created a website on the history of the campus and its people. Browsable by build-

ing or person, it contains links to individual departmental history pages.

"The website also is an important way to recognize people," Ms. Jenner says. "Preserving institutional memory is particularly important with the retirement of many faculty and staff within the next 10 years."

The idea was sparked by Professor Emeritus Stewart Webster, who was concerned that the campus history is a mystery to many of those who work and study here, says University Secretary Georgina Moore.

The information will be an essential resource for offices such as Donor Relations and Stewardship in the Office of Advancement with reference to naming opportunities; Campus Planning and Development on the location of plaques and other forms of dedication. The Agnes Etherington Art Centre for tracking donated artwork and monitoring its condition. For Archives, the information will help with inquiries such as, "Thirty years ago, my mother gave the university a painting and I would like to go and look at it."

The University Secretariat used the 2002 Student Work Experience Program (SWEP) through Career Services to hire Ms. Jenner, who is now taking third-year studies as an exchange student at the University of St. Andrews, Scotland.

It took an exceptionally skilled person – part investigator, part historian and part computer guru – to do the job, says Ms. Moore.

"She was a delight to work with – an extremely bright, intelligent and engaging young woman – a 21st-century person in her grasp of the uses of technology but a Renaissance person in the breadth of her interest in the past and how to make it current and available to students of today. St. Andrews is very fortunate to have her for this year."

[www.queensu.ca/secretariat/History/index.html](http://www.queensu.ca/secretariat/History/index.html)

Kathleen Ryan (1906-1995) is among those whose biographies are featured in a new campus history website.

## VIEWPOINT

BRIAN YEALLAND  
University Chaplain

# Merry generic holiday

LET'S FIND A WAY TO CELEBRATE HOLY DAYS AND TRADITIONS THAT EMBRACES ALL RELIGIONS

**M**any people are annoyed that the words and symbols of Christmas are being suppressed in favour of generic references to the holiday season.

Is this just political correctness? Or are there good reasons to change our words and symbols, at least, in the public domain?

For many religions, the time around the winter solstice is sacred. The days cease getting shorter and begin getting longer. Thus, the tendency to see it as the end of an old year and the beginning of the new.

Both the Shinto and the Wiccan traditions celebrate the solstice, Jews celebrate Hanukkah, the Festival of Lights, Muslims celebrate the end of Ramadan, the month of daily fasting during this time, this year and Zoroastrians, the death of Zarathustra.

The African American celebration of Kwanzaa is marked by seven days of candle lighting, and Christians have moved, yes moved, the birth of Jesus to this time to locate it near the solstice.

We must assume this if shepherds were in the fields keeping watch over their flock by night, which they would not be doing in the dead of winter.

Aboriginals, Baha'is, Sikhs and Jains also have holy days in December.

We are right to recognize this diversity of spiritual celebration in a country like Canada by not referring to it exclusively as Christmas.

But I once heard an Imam say in a talk on religious pluralism that the enemy of any religion is not another religion; the enemy is the dismissal of religion.

What we need is a way for each religion to celebrate its holy days and traditions in a way that recognizes and embraces those of other religions.

In other words, don't take away Christmas or change the tree to a holiday tree.

Instead, add a recognition of the symbols and traditions of all religions which celebrate at this time of year.

The world needs more, not less, of the spiritual wisdom at the heart of our religious traditions.

Rev. Brian Yealland is the University Chaplain.

**The world needs more, not less, of the spiritual wisdom at the heart of our religious traditions.**

## Viewpoint Policy

The *Queen's Gazette* welcomes submissions for Viewpoint from the Queen's community. Articles should be no more than 600 words and should address issues related to the university or higher education in general. Speeches related to issues of interest to the university community are also welcome. Email submissions to [gazette@post.queensu.ca](mailto:gazette@post.queensu.ca). The editor reserves the right to edit or reject any submission that does not comply with policy. Opinions expressed are those of the writer.

## Letters

## Reader identifies two in 1972 photo

I am responding to the Queen's Flashback 1972 photograph (Nov. 18, 2002). The person on the left is Father Bill Burns. He was chaplain at Newman House and may possibly have been on the board of St. Mary's of the Lake Hospital at that time. The second person from the left is the late Sister Mary Hagan (her religious name had been Sister Mary Lalemant.) She was an administrator of St. Mary's of the Lake Hospital and a member of the Sisters of Providence of St. Vincent de Paul.

Gayle Desarmia, SP  
Archivist  
Sisters of Providence of St.  
Vincent de Paul

## Father Burns identified

I refer to the Queen's Flashback 1972 photo in the Nov. 18 issue. The fellow to the left of the nun is Father Bill Burns who was on the board of Hotel Dieu Hospital. He was also at the time the pictures, was taken, I believe, the pastor at St. John's Catholic Church in Kingston. In the late 1970s and 1980's, he was pastor at St. Thomas More Parish. He is now at St. Luke's Catholic Church in Thornhill.

Michael Stephenson  
Kingston

## Positive i.d. on Craine Building

The photo in the Nov. 18 *Gazette* (Flashback 19??) is of a lab on the top floor of the Craine Building. The Craine Building housed Biochemistry before the department moved to Botterell Hall in the early 1980s.

Pat Caulfeild  
Physical Plant Services

## Windows offer clue

The photo in the Nov. 18 *Gazette* (Flashback 19??) could have been taken in the Craine Building. Having worked there for many years from 1968 to 1984, I recognize the windows. My student lab in Biochemistry occupied the first floor. Pharmacology

was on the third floor then. Maybe this might help in the search for a date!

Ralph Koolen  
Biochemistry

## In the lab

In the Nov. 18 Flashback 19?? my wife and I independently identified the woman on the right as Margaret DeWolfe. She was in the Biochemistry department for four to five years in the early 1950s.

Alex Bryans  
Professor Emeritus

## Letters Policy

The *Queen's Gazette* welcomes letters to the editor from members of the university community and other readers about matters related to content in the *Gazette*, the university or higher education in general. Letters must be original and addressed to the editor. Opinions expressed are those of the writer. The *Gazette* does not publish anonymous letters. Please include your name, affiliation and phone number. Email or disk is preferable. Letters should be submitted by noon to [gazette@post.queensu.ca](mailto:gazette@post.queensu.ca) on the Monday before publication. The *Gazette* reserves the right to edit letters to address style, length and legal considerations.

# Get the latest on technology research with IEEE Xplore

Looking for information on microwave medical devices, or worried about the security of online/internet banking/shopping? Check out Queen's library's latest on-line information resource, the IE Library.

Queen's University researchers can now access the IEEE/IEE **Electronic Library** via the IEEE Xplore interface ([ieexplore.ieee.org/](http://ieexplore.ieee.org/)). The IEEE Xplore is also available from the list of Indexes and Databases of the library's homepage.

IEEE, the acronym for Institute of Electrical and Electronics Engineers, is a leading authority in technical areas ranging from computer engineering, biomedical technology and telecommunications, to electrical power, aerospace and consumer electronics. Through its technical publishing, conferences and standards activities, the IEEE produces nearly 30 percent of

WENYAN WU

Books & Bytes

and the IEEE conference proceedings from 1988 to the present. In addition, it also provides the full text for all the active IEEE standards.

The web-based interface is simple and straightforward. One can either browse tables of contents or perform online searches. The table of contents can be browsed according to the categories, namely, journals, proceedings and stan-

also sign up to receive email notification of recently posted journals and magazines. Each email contains a direct link to the table of contents of the latest issue. If interested, one can also sign up to receive the monthly email newsletter covering industry trends, emerging technology and career development advice.

In addition to IEEE Xplore, Queen's researchers in the subject areas of electrical, electronics, computer engineering and information technology can also access other on-line information resources such as: The ACM Digital Library, which includes the full-text of all the journals, magazines, transactions and proceedings published by the Association for Computing Machinery; INSPEC, which is the world's largest bibliographic database in the field of physics, electrical engineering and electronics, computers and control engineering and information technology covering 4,000 journals with 2,000 conference proceedings added each year; and COMPENDEX Plus which is the online version of the print Engineering Index that covers all aspects of engineering.

IEEE Xplore is accessed in the same way as other resources licensed to Queen's. Off campus access is through the Queen's Webproxy service (if Queen's is not the internet access provider). For further details about Queen's Webproxy services, click on the link *Help with Off Campus Access* on the Queen's Library home page ([library.queensu.ca](http://library.queensu.ca)).

Faculty and students are encouraged to try new resources and send feedback to the library. Engineering and Science librarians are pleased to offer instruction tailored for classes, courses or individuals. For details, call ext. 36981 or email [webeng@library.queensu.ca](mailto:webeng@library.queensu.ca).

## Electronic Library (IEL)

Full-text 1988-present  
<http://ieexplore.ieee.org/>

- Conference Proceedings
- Journals
- Standards
- Conference Proceedings
- Journals

Questions? Contact [webeng@library.queensu.ca](mailto:webeng@library.queensu.ca)

the world's published literature in electrical, computers and control technology. The organization holds more than 300 major conferences annually and has nearly 900 active standards with 700 under development. For years, those proceedings and standards have been lacking in our library collections due to their size and cost.

The IE Library provides full texts of all IEEE and IEE journals, transactions, magazines

and the IEEE conference proceedings from 1988 to the present. In addition, it also provides the full text for all the active IEEE standards. The online search can be made in three ways. The author search is very straightforward. The basic search, through the pull-down menus, can be conducted in the most frequently searched fields such as title, author and subject. Boolean operators are also available for term combinations. For more sophisticated searches, the advanced search option is available.

Through the Email Alert from the IEEE Xplore, users can

# Building learning communities at Queen's

With the approaching double cohort and the accompanying class size increases, Learning Technology Faculty Associates invite faculty members to a coffee hour series on how to build learning communities in large classes, and how to use educational technologies to help do this.

The next coffee hour - Building learning communities in large classes - takes place Jan. 22 at 2:30 pm in the Learning Technology Unit, B176 Mackintosh-Corry Hall (board room). With increasing class sizes, how can we help students make connections with each other? How can we connect with our students without becoming inundated? Come and talk about how learning communities, together with technology, could help.

On March 12 at 2:30 pm (same location), the topic will

BY ITSERVICES STAFF

Plugged In

be collaborative activities in large classes. "Collaborative learning" is an instruction method in which students work together in small groups for mutual benefit. Join the group to discuss how learning communities foster collaborative learning and vice versa, and how technology can help.

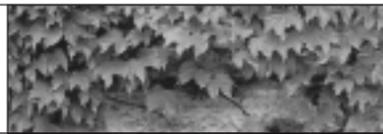

For details and registration, go to [www.its.queensu.ca/ltfa/coffeehour/](http://www.its.queensu.ca/ltfa/coffeehour/).

It pays to call first. Customers who bring or send their computer to the service depot in the Campus Computer Store (Dupuis Hall) without first contacting the IT Support Centre (ITSC, 533-6666), will be charged a look-at fee of \$30 for desktop computers and \$60 for laptops. Calling the support centre first is advantageous because:

- Because fewer computers go to the Dupuis service depot, service turnaround will be faster;
- The standard "look-at" fee can sometimes be avoided;
- Most problems can be resolved by phone or via an on-site visit.

## UNIVERSITY ROUNDUP

### Diversity spurs economic growth

Economic growth is not just a matter of entrepreneurial energy and technological advancement. Creativity drives economic wealth and universities play a central role in the new creative age, says Richard Florida, author of *The Rise of the Creative Class: and how it's transforming work, leisure, community and everyday life*. Because universities must attract and retain talented faculty and accept different lifestyles and sexual orientation, "they also create an environment that is open not just to new ideas but also to tolerance," says the economics professor from Carnegie Mellon University. His creativity ranking includes indices to measure innovation, high technology and the gay population (as a measure of tolerance) and his studies have found that cities which do best in the creativity ranking all have strong universities and research institutions.

*University Affairs (January)*

### Why reporters go south

"I don't believe people at American institutions are any smarter than Canadians. But there's one enormous distinction: Americans answer their own phones, answer your questions in a friendly way and offer their home numbers just in case. Canadians are, on average, more circumspect. A great many are helpful, of course. But many just won't answer a call. Some others answer questions with questions. Why are you asking me this? How did you get my number? Will you submit a list of your questions in writing? Can I edit what you write?"

*Excerpted from a commentary written for the Canadian Council for the Advancement of Education by Ottawa Citizen science reporter Tom Spears on why Canadian reporters often go south when they need information for news stories*

### Frank Zappa inspires gene name

When it comes to the naming the human genes, some world scientists are letting their imaginations run wild. The Human Genome Organization gene nomenclature committee, based at University College London, has assigned internationally recognized names and symbols to close to half of the 30,000 genes thought to make up humankind. Most are simply serviceable abbreviations aimed at facilitating communications between scientists. But some are more off the wall (e.g. Sonic Hedgehog, lunatic fringe, yippee and van Gogh). One U.S. scientist, in naming a bacterium gene ZapA, made a point of acknowledging "the late Frank Zappa for inspiration and assistance with genetic nomenclature."

*The Times Higher Education Supplement (Nov. 22)*

### Avoid deletion

If you want your email read and not routinely deleted as electronic junk mail, take heed when composing a subject line that a single line of capitalized words is universally recognized as a spam characteristic.

*From 20 tips to avoid having your email filtered in Ralph Wilson's Web Marketing Today article at [www.wilsonweb.com/wmt8/spamfilter\\_avoidance.htm](http://www.wilsonweb.com/wmt8/spamfilter_avoidance.htm), as reported by the Higher Education Marketing Newsletter.*

### Back to the big picture...

"The more science learns about the origin and history of the cosmos and of life on earth and of Homo sapiens, the more it reveals how staggeringly improbable we are. The big bang theory represents a profound insight into the history and structure of the cosmos, but it cannot tell us why creation occurred in the first place...Honest physicists will admit that they have no idea why there is something rather than nothing. After all, what produced the quantum forces that supposedly made creation possible?"

*Excerpt from an article entitled Between Science and Spirituality published in The Chronicle of Higher Education's The Chronicle Review (Nov. 29)*

### Fears grow about vulnerability of university computer systems

The number and severity of Internet-based assaults on university computer systems have escalated in recent months, says a senior systems analyst with the University of Saskatchewan's Information Technology Division. Terry Roebuch, who recently attended a high level Washington, D. C. conference on how to prevent university computer networks from being used to disrupt vital communications, transportation and even power supplies systems, says: "Universities in general are targeted often, for a variety of reasons — there are a lot of desktops, most connected on-line using high-capacity communications channels, usually on, usually not used at night, the servers have lots of space, there's a lot of older software and equipment and staff are often too overworked to provide adequate security."

# Japanese university chooses Queen's as research model

By NANCY DORRANCE  
News and Media Services

Reduced government funding. Increasing emphasis on applied research. The need for more university/industry partnerships, and international training.

Sound familiar? While this could easily be a summary of the Canadian university scene, the description comes from Japan.

That's why one of Japan's leading research-intensive universities, Gifu, has looked to Canada for expertise in addressing these urgent issues – and their search has led them to Queen's Vice-Principal (Research) Kerry Rowe.

"The administrators at Gifu are aware of our reputation for excellent research and success in technology transfer," says Dr. Rowe, who recently returned from a five-day visit to the Japanese university. "With govern-

Rowe

ment restructuring of the National Universities, there is a need to find other sources of funding, and developing research collaborations with industry has been recognized as an important way to do this."

Although it has only half the number of undergraduate students as Queen's, Gifu has almost as many faculty members, and is ranked 23rd in research funding of the nearly 600 universities in Japan. The city of Gifu is located 400 km from Tokyo in central Japan.

Dr. Rowe gave a five-hour presentation to senior administrators at Gifu and spent the next four days answering questions.

An article about his visit in the Japanese newspaper, *Chunichi*, entitled "Gifu University learns strategy about collaboration for academy/industry/government from advanced Canadian university" reported that: "Queen's University is the top ranked university in Canada, located in the province of Ontario..."

This Wednesday, three representatives of Gifu University's Collaborative Centre for Academic/Industry/Government Liaison and their Office of International Affairs will visit Queen's. They have asked to meet with representatives from PARTEQ Innovations, the Office of Research Services, the Queen's Centre for Enterprise Development, and the Department of Marketing and Communications.

"After digesting the information from our initial sessions, they are coming to Queen's to

discuss additional questions about developing industrial research partnerships," says Dr. Rowe. These areas include technology transfer, protection of intellectual property, licensing, contract research, the initiation of start-up companies, training of people to work in a global environment, and communication of university research and expertise to the public.

As one of Japan's almost 100 national universities formerly supported by the national government, Gifu is faced with the challenge of becoming more competitive in the wake of financial restructuring that will drastically reduce its government funding. Part of this challenge will be to shift emphasis from government-funded basic research to a greater proportion of industrially-funded applied research. As well, the Japanese

institutions would like to emulate the Canadian example of collaboration among top research-intensive universities, Dr. Rowe notes.

"The city of Gifu already has the space and the facilities needed for an excellent industrial research park: in that respect they are well ahead of Kingston," he says. "Their big challenge is to develop the companies that can make effective use of these excellent facilities."

"With regard to technology transfer and development of industrial partnerships, Gifu University is now at the stage Queen's was in the 1980s when PARTEQ was established," says Dr. Rowe. "We will be happy to provide any assistance that we can in helping them learn from the success of the Queen's-PARTEQ model."

## Don't look now, we're being followed!

### ASTRONOMERS DISCOVER ASTEROID ON EARTH'S ORBIT

By NANCY DORRANCE  
News and Media Services

A recently discovered asteroid is the first known object to follow Earth's orbit around

the Sun, says astronomer Paul Wiegert.

As part of an international research team, partially funded by the Natural Sciences and Engineering Council, Dr. Wiegert (Physics), helped to plot the asteroid's reversing, horseshoe orbit that brings it near Earth every 95 years. Although other co-orbital asteroids follow the

planets Jupiter and Mars, asteroid 2002 AA29 is the first one known to follow the Earth's orbit.

The next close encounter will happen Jan. 8, 2003 – but there's no need to worry about a collision, says Dr. Wiegert.

"The combination of Earth's and Sun's gravity works so that even as Earth pulls in the asteroid, it speeds up and

moves away from the Earth. The asteroid will be much further away than the Moon, and only detectable using large telescopes."

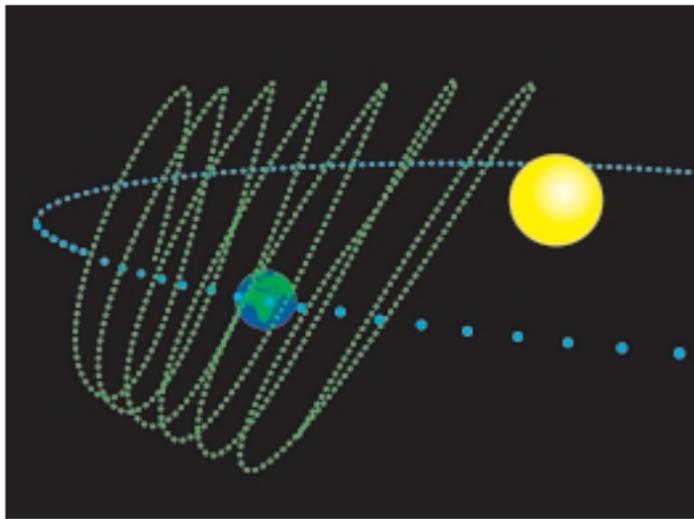

The researchers' findings are reported in a recent issue of the journal *Meteoritics and Planetary Science*, which notes that such asteroids may offer a potential target for future space missions.

Dr. Wiegert's team also discovered that in about 600 years, asteroid 2002 AA29 will become a "quasi-satellite" of the Earth.

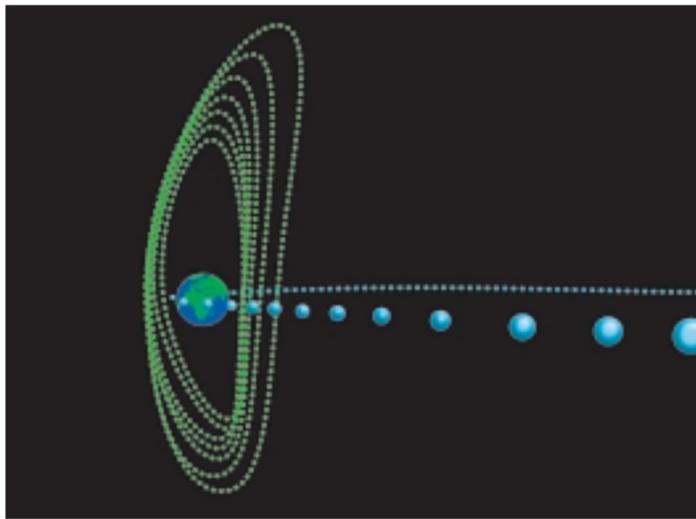

For about 50 years the asteroid will act like a second Moon, orbiting our planet once a year. This peculiar motion has also occurred at intervals in the past.

"When in its quasi-satellite state, both the Earth and the asteroid still orbit the Sun," he says. "But the relative looping motion of the asteroid in some ways resembles a satellite orbit, with a period of one year. The asteroid becomes, for a time, a companion to the Earth and Moon in their journey around the Sun."

[www.astro.queensu.ca/~wiegert/AA29/AA29.html](http://www.astro.queensu.ca/~wiegert/AA29/AA29.html)

PAUL WIEGERT

PAUL WIEGERT

Asteroid 2002 AA29 (far left) goes into "quasi-satellite" mode. The Earth, rather faint in this image, is in the middle of the asteroid's loops, and the Sun is in the background. The blue dots outline the Earth's orbit. Another view (near left) looks along the Earth's orbit. The Sun is off the image to the right here.

## Chemist wins highest Lithuanian award

Victor Snieckus, the Bader Chair in Organic Chemistry, has won the highest state honour of Lithuania for his work in bringing recognition to chemical research in the Baltic States.

Dr. Snieckus recently received the award – The Order of Grand Duke Gediminas – from Lithuanian president Valdas Adamkus. The citation reads, in part: "for services rendered to the State of Lithuania and efforts to promote Lithuania in the world."

A native of Lithuania, Dr. Snieckus is an internationally-

renowned chemist whose research focuses on the development of new methods and strategies in organic synthesis, with increasing emphasis on biological molecules. He came to Queen's in 1998 as the university's first Bader Chair in Organic Chemistry and in 2001 was awarded a prestigious Kilmam Research Fellowship.

Dr. Snieckus has been active in raising awareness of chemical research in the Baltic States (including Estonia and Latvia), independent from communist occupation since 1991. In 2001

he organized an international conference on organic synthesis hosted by Vilnius University in Lithuania, featuring 2001 Nobel Prize recipient Barry Sharpless.

"In addition to its focus on 'green' chemistry, the conference provided a forum for Baltic chemists to present their research to the Western world," says Dr. Snieckus. "It helped to forge ties between the Baltic chemistry community and Western chemists, both academic and industrial."

[www.chem.queensu.ca/people/faculty/snieckus/group\\_members/snieckus/snieckus.ht](http://www.chem.queensu.ca/people/faculty/snieckus/group_members/snieckus/snieckus.ht)

COURTESY OF VICTOR SNEICKUS

Wearing the medal he received from the President of Lithuania, Victor Snieckus stands in front of a portrait of the Grand Duke Vytautas at the presidential palace. Vytautas is shown leading a charge against the Teutonic (Germans) in 1410 at the Battle of Bagrai.

## Business forecast

continued from page 1

This year's attendees met some new Queen's faces. Professor Daub was the only member left of the original panel and this was his last year as a participant. It was Marc Busch's second year on the panel. John McHale and Peter Sephton were newcomers. Acting dean of the School of Business Lewis Johnson and Peggy Cunningham rounded out the panel.

The group's forecast for 2003 was generally optimistic. They agreed that the economy will experience another year of reasonable growth, where prices and interest rates will likely rise somewhat. Unemployment will remain relatively stable, and the Canadian dollar may increase slightly.

All of the panel members accounted for a possible U.S. war with Iraq in their forecasts, though they said it's impossible to predict the actual economic consequences. "The whole thing could blow up and have sizeable impacts," Professor Daub told the audience. The oil issue is key, he said, since in a modern economy it's a crucial commodity price.

A possible stumbling block in the positive outlook for Canada's economy would be a decline in the American economy caused by war or other international events, said Professor McHale. "The Canadian economy has outperformed the U.S. economy over the last seven quarters, but if the U.S. slowed down again it would certainly have an impact in Canada."

Locally, the panel said that the Kingston economy has above average prospects. "The double cohort is going to push growth at both Queen's and St. Lawrence College," said Professor Cunningham, since greater enrolments are increasing the demand for housing and other services. The building boom at Queen's, including new residences and academic facilities, has benefited sub-contractors and other Kingston businesses, said Professor Daub. "It's going right back into the local community, and it has a multiplier effect."

After noticing that none of the usual sources of year-end economic predictions (i.e. the major banks, the Conference Board and other institutions), ever came to Kingston, Professor Daub gathered the first group of colleagues from the School of Business for the inaugural 1981 forecasting luncheon and presentation for local business people at the Holiday Inn downtown. A respected Canadian authority on the accuracy of economic forecasts, Professor Daub modelled the event on a similar annual forecast at the University of Chicago, where he did his graduate work.

While the accuracy of the Queen's forecast—which is always an average of individual panel members' predictions—has fluctuated over the years, Professor Daub says "overall we've done pretty well." Last year the panel underestimated Canada's economic growth rate while seriously overestimating the strength of the stock markets.

"Economists make people working at the Weather Network look great," joked Professor Sephton in describing these miscalculations. Economic growth in Canada, as measured by the change in the real Gross Domestic Product, was much higher than forecast for 2002, he says, despite the downturn in the American economy. "It turns out that the economy was much more robust than we expected."

In keeping with the event's community outreach mandate, the venue has always been in a central location, mostly in hotels—a way, he says, to "bring the university to the business community."

While the event only broke even in its early years, rising ticket sales in the last decade have left the organizers with a surplus. They decided to use the funds to create the Business Forecast Luncheon Award for an undergraduate business student with high academic standing. The first award was handed out last year. This year's winner, Cynthia Lee, received \$1,000.

### Track Record on 2002 Predictions

|                     | 2002 Prediction | Actual 2002 | Error   |
|---------------------|-----------------|-------------|---------|
| Economic Growth     | 0.9%            | 3.2%        | -2.3%   |
| Inflation           | 1.5%            | 2.3%        | -0.8%   |
| Unemployment Rate   | 7.8%            | 7.6%        | +0.2%   |
| Prime Interest Rate | 4.8%            | 4.5%        | +0.3%   |
| Exchange Rate       | \$0.61          | \$0.63      | -\$0.02 |

### Forecast for 2003

|                     |        |                   |
|---------------------|--------|-------------------|
| Economic Growth     | 3.3%   | -stable from 2002 |
| Inflation           | 2.5%   | -up from 2002     |
| Unemployment Rate   | 7.5%   | -stable from 2002 |
| Prime Interest Rate | 5.4%   | -up from 2002     |
| Exchange Rate       | \$0.65 | -up from 2002     |

## ANOTHER QUEEN'S FIRST

JERI HARMSSEN

Queen's professors emeriti Dolf Harmsen (Biology) and Willem Vreeken (Geography), along with students (clockwise from top left) Laura Bolt, Bethany Lindsay, Barbara Sobota and Jessica Greguol are all smiles as they emerge after weathering an intense sandstorm in a Tuvan yurt on the Mongolian border. Dr. Harmsen led the first-ever Canadian field course in Siberia, studying the area's ecology, earlier this fall. The Queen's-coordinated half-credit course, organized through the Ontario Biology Field Course Program, attracted 14 students from Queen's, Windsor, McMaster, Waterloo, Hong Kong, Australia, Switzerland, Britain and the United States.

## Expert comments on Romanow report implications

### QUEEN'S IN THE NEWS

Highlights of Queen's experts in the media

■ Nov. 27 – Dec. 10

**Sam Shortt** (Centre for Health Services and Policy Research) is interviewed by *CBC Radio's Ontario Morning* on the implications of the Romanow Commission report on health care.

Little

**Margaret Little** (Political Studies) is interviewed on *CBC Radio Ontario Morning* about the privacy implications of questions on Revenue Canada's Child Tax Benefits form. Her comments are also covered by *Kingston Whig-Standard* and the *Edmonton Journal*

**Duncan Sinclair's** (Policy Studies) views on Canada's shortage of doctors and the role of nurse practitioners and other health professionals are reported in the *Globe and Mail*.

**Daniel Thornton** (School of Business) comments in the *National Post* and *Ottawa Citizen* on proposed changes to regulation of the accounting industry in Ontario.

In an article on biblical scholarship, *Maclean's* notes that **Donald Akenson** (History) describes rival scholars as going for one another like "a pack of feral canines."

A study of changes in Canadian political culture issued by Queen's **Institute for Intergovernmental Relations** is quoted in the *Windsor Star*, *Vancouver Sun*, *Victoria Times-Colonist* and *Montreal Gazette*.

**Roel Vertegaal** (School of Computing) is interviewed on *Discovery TV*, *CBC-Radio's All in a Day*, and by the *Ottawa Citizen* about his research into the links between eye gaze, conversation and video conferencing.

**Bill Forbes** (Pensions, Investment and Insurance) comments in the *Globe and Mail* on the

effect of the slumping stock market on university investments.

**Ross Finnie** (Policy Studies) comments in the *Globe and Mail* on a survey he conducted that shows high-income Canadians are six times more likely than poorer Canadians to abandon the country for work elsewhere.

**Tom Kent's** (Policy Studies) comments to the House of Commons standing committee examining ownership of newspaper and broadcast outlets are reported in the *Ottawa Citizen*.

The key role of **Jeremy Heaton** (Urology), **Alvaro Morales** (Urology) and **Michael Adams** (Pharmacology and Toxicology) in developing the new sexual dysfunction drug *Uprima* is reported in the *Toronto Star*.

Bala

**Nicholas Bala** (Law) comments in the *Ottawa Citizen* on the Crown's attempt to have a 15-year-old Ottawa-area boy tried as an adult in the slaying of

two retired teachers. He also comments on proposed changes to the wording of Canada's Divorce Act in newly announced legislation in the *National Post*, *Ottawa Citizen*, *Vancouver Province*, *Montreal Gazette* and *Edmonton Journal* and on *CBC Radio Ottawa*, *Choral Radio Network (Calgary, Kitchener & Kelowna)*, *CKLW Radio Windsor* and *CKBT Radio St. Catharines*.

The annual financial forecast by School of Business professors **Peggy Cunningham**, **Peter Sephton**, **Marc Busch**, **Lewis Johnson** and **John McHale** is reported in the *Kingston Whig-Standard*.

**Douglas Reid's** (Business) views on the fallout from United Airlines' declaration of bankruptcy are quoted in the *National Post*, *Ottawa Citizen*, *Montreal Gazette*, *Edmonton Journal*, *Kingston Whig-Standard* and *Hamilton Spectator*. He also comments in the *Toronto Star* on businessman Robert Deluce's plan to create a new airline flying out of the Toronto Island airport.

Research by **Rena Uptis** (Education) and **Katharine Smithrim** (Education) into how using the arts in the classroom enhances students' scores in math is reported by the *National Post*, *Toronto Star*, *Edmonton Journal*, *Windsor Star*, *CBC-Radio's The World at Six*, *Regina Leader-Post*, *London Free Press*, *CBC Winnipeg*, and *WNYC Public Radio, New York*.

**William J. Egnatoff's** (Education) views on whether computers in the classroom improve student achievement are reported in the *National Post*.

A study by **Kristan Aronson** (Community Health and Epidemiology) and **Katharine Wynne-Edwards** (Biology) into potential hormonal causes of breast cancer in women is covered by the *Kingston Whig-Standard*, *CKWS TV*, the *Ottawa Sun*, *Ottawa Citizen*, *The Globe and Mail* and *CBC-Radio's Ontario Morning*.

Taylor

**Peter Taylor** (Math and Statistics) is one of the teachers interviewed in an article titled *Passion & Preparation: Top Teachers in Action*, which appears in the winter 2002 edition of *Kingston Life* magazine.

**John Meisel** (Political Studies) comments in the *Ottawa Sun* on Premier Ernie Eves's reversals of former Premier Mike Harris's policies.

The research of **Paul Wiegert** (Physics) related to asteroid-like space rocks that he and an international team of astronomers recently discovered orbiting the earth is covered in the *Ottawa Citizen*.

The *Toronto Star* quotes a recent report by **Alan King** (Education) that says the new Ontario Ministry of Education practical "applied" and "essential" level courses are too hard for many teens.

To inform us of your latest research findings or upcoming journal publications, call Nancy Marrello, Coordinator, News & Media Services, ext. 74040 or Nancy Dorrance, Writer, News & Media Services, ext. 32869.

Queen's News and Media Services identifies newsworthy faculty expertise and research to bring to the attention of the national media. Visit Queen's News Centre at [www.queensu.ca/newscentre](http://www.queensu.ca/newscentre) for daily Queen's in the News updates.

## Racz wins toxicology distinction award

### PEOPLE

**William Racz** (Pharmacology and Toxicology) was presented with the Award of Distinction of the Society of Toxicology of Canada in Montreal this month. The award honours outstanding and sustained contributions to the science of toxicology in Canada and/or the Society of Toxicology of Canada.

**Samuel Ludwin** (Associate Dean- Research, Faculty of

Health Sciences, Pathology and Vice-President (Research Development) Kingston General Hospital was keynote speaker at the recent Biennial Combined Congress of the European & Americas Committees for Treatment and Research in Multiple Sclerosis, Baltimore, Md. He was also invited guest lecturer at the Symposium on Multiple Sclerosis at the Canada Association of Neuropathology Meeting, Vancouver. He has also been selected as the Saul Korey Distinguished Lecturer at the Annual

Meeting of the American Association of Neuropathologists to be held in Orlando, Fla. in June 2003.

**Jacalyn Duffin** (Hannah Professor of the History of Medicine) was the 2002 Joanne Goodman Lecturer at the University of Western Ontario. She delivered a series of lectures entitled *Lovers and Livers: Disease Concepts in History: The Disease Game, Lovesickness: Its Rise and Fall? and Hepatitis: Or Fifty Ways to Lose Your Liver*.

## PEOPLE

# Bibles old and new highlighted in comprehensive exhibit

**Susan Rohland** (Radiation Oncology Research Unit, Queen's University/KGH), a full-time staff member, has won the W.T. MacClement Prize for the student who achieved the highest standing in a spring term/summer term philosophy course.

**Donald Akenson** (History) delivered the 31st Robinson T. Orr Lecture at Huron College, University of Western Ontario, and also the 2002 Morris Lecture at Lakehead University.

**Ireneus Zuk** (Director, School of Music), presented a lecture-recital at the 24th International Piano Conference in Namur, Belgium, in August as a member of the Zuk Piano Duo (with Luba Zuk, McGill University). The presentation, titled "Exploration of Sonority in Works for Piano Duo by XXth-century Canadian Composers" featured works by Wolfgang Bottenberg, John Burge (Queen's), George Fiala, and David Keane (Queen's). He also served as a member of the international jury at "Les rencontres Internationales des Jeunes Pianistes" at Vresse-sur-Semois (also in Belgium), and at the Ibla Grand Prize International Piano Competition in Italy.

Bibles from around the world – one as small as a finger, are featured in the current exhibit at the W.D. Jordan Library.

Through Jan. 26, come and view selected items from the library's collection of about 1,200 Bibles, representing many of the historically significant versions of the Holy Scriptures.

Included are facsimiles of early illuminated manuscripts and printed editions from 1491 to 2001 in various translations and versions in 60 languages, with and without illustration, in formats large and small.

The Bibles Through the Ages exhibit honours the work of Daniel Fraikin (Queen's University Theological College) who created an electronic database of the collection over the last three years.

Dr. Fraikin will present a public lecture on the exhibit on Thursday Jan. 9, 2003 at 3:30 pm in the Jordan Library to which all are invited.

About 60 Bibles (or parts of Bibles) are exhibited in seven cases arranged in categories by chronology, language, version or other feature. A few items are also on display in Stauffer Library.

There are several brilliant

W.D. JORDAN LIBRARY

An early Greek Bible from Bibles Through the Ages, currently on view at the W.D. Jordan Library.

reproductions of manuscripts, early Canadian imprints, a tiny, "finger" Bible and many others.

The Jordan Library is located on the 2nd floor of the Douglas Library building,

## CAREERS

### Appointment

**Bonnie Beresford, University Veterinarian and Director of University Animal Care**

On the recommendation of the selection committee, Kerry Rowe, Vice-Principal (Research), is pleased to announce the appointment of Bonnie Beresford, PhD, DVM, as University Veterinarian and Director of University Animal Care for five years from Jan. 2, 2003.

Dr. Beresford received her Doctor of Veterinary Medicine from the Ontario Veterinary College, Guelph, in 1993 and a Doctor of Philosophy, Medical Sciences, in 1979. She has a strong research background and more than 12 years of investigative experience in the neurosciences, embryology, immunology and microbiology. Through her work as a clinical veterinarian in private practice and as a research associate at the University of Guelph, Dr. Beresford has acquired experience with a broad range of animal species and has maintained an active network with colleagues in veterinarian medicine.

In making this announcement, Vice-Principal Rowe expresses his appreciation to Dr. Morag McMurray, who has been Acting University Veterinarian and Director of University Animal Care since August 2002.

### Committees

**Headship search Department of Economics**

Frank Lewis's term as head of the Department of Economics ends on June 30, 2003. In accordance with the collective agreement between Queen's University Faculty Association and Queen's University, the principal has appointed a selection committee to advise him in making a decision on the headship.

Elected members: M. Abbott, R. Boadway, A. Gregory, A. Head, S. Seitz.

Appointed members: T. Brennan, J. Fenske, B. Paterson, W. Craig.

Non-voting members: R. Silverman, Dean, Faculty of Arts and Science; M. Singh, Associate Dean, School of Graduate Studies and Research.

Chair: Gordon E. Smith, Associate Dean, Faculty of Arts and Science.

Faculty, students and staff are invited to submit their comments on the present state and future prospects of the Department of Economics, and the names of possible candidates for the head, to the chair of the committee, Associate Dean Smith, <[smithg@post.queensu.ca](mailto:smithg@post.queensu.ca)> by Friday, Jan. 11, 2003. All letters will be reviewed by the selection committee and will become part of the record of decision-making.

**Principal's Advisory Committee for the Queen's National Scholars 2002/2003 Competition**

Principal William C. Leggett is pleased to announce the composition of the principal's advisory committee for the Queen's National Scholars. The membership of the committee is as follows: Ana Da Silva, Associate Professor, Civil Engineering; Stephen Scott, Associate Professor, Anatomy and Cell Biology; Mary Margaret Dauphinee, University Advisor on Equity; Janice Deakin (Chair), Director and Associate Professor, School of Physical and Health Education; Mike Lindsay, President, Alma Mater Society (AMS); Rebecca Luce-Kapler, Associate Professor, Faculty of Education; Leslie Monkman (Secretary), special advisor to the principal; Laura Murray, Associate Professor, Department of English; Christopher Peltzer, President, Society of Graduate and Professional Students; Alan Richardson, Professor, School of Business; Mark Walters, Professor, Faculty of Law.

The committee will review and provide advice on the applications received by the principal. Faculty offices will be notified of the principal's decisions no later than Jan. 31, 2003.

### Staff Appointments

Budget Analyst and Coordinator,  
Financial Services 2002-126

**Robert Cooke**

## Staff Vacancies

Departments requiring casual  
hourly paid secretarial or clerical  
assistance should contact the  
Department of Human Resources,  
533-2070.

Requisitions for staff replace-  
ment, with appropriate  
approvals, must reach the  
Human Resources Department  
by noon of the Monday before  
publication.

**Applications received from  
internal candidates will be  
acknowledged by the Depart-  
ment of Human Resources. The  
results of each competition will  
be posted under the *Gazette*  
heading "Appointments" as  
soon as possible after the con-  
clusion of the recruitment and  
selection process.**

Closing date for the following  
positions is **Friday, Jan. 3, 2003  
at 4:30 pm. Late applications  
will not be accepted.** Please sub-  
mit a letter of application indicat-  
ing the specific position desired  
and a detailed resumé including  
your **employee number.**

Resumés will be accepted from  
Queen's employees with inter-  
nal status ONLY, unless the  
position specifically invites  
external applications.

**Queen's University has an  
employment equity program,  
welcomes diversity in the  
workplace and encourages  
applications from all qualified  
candidates, including women,  
aboriginal peoples, persons  
with disabilities and racial  
minorities.**

Following the completion of the  
Queen's Job Evaluation (QJE)  
review for positions in Grades  
2 - 9, we have included the clus-  
ter in the following job ads  
which represents the job family,  
branch and grade (e.g., ADMG5  
is Administration Family, General  
Branch, Grade 5). Generic posi-  
tion overviews for clusters can be  
found on the HR website at  
www.hr.queensu.ca

**Specific job overviews for posi-  
tions advertised under Staff  
Vacancies, with the exception  
of CUPE Local 229 postings,  
continue to be available in the  
HR department.**

If you wish to be considered for  
the following positions apply in  
writing to **Pat Eaton** in Human  
Resources.

## Storeskeeper Physical Plant Services 2002-141

This is a term appointment  
working 37.5 hours per week  
until April 30, 2004. The suc-  
cessful candidate must be will-  
ing to work overtime.

**Major responsibilities:** order  
inventory and non-inventory  
material from suppliers; accept,  
receive and enter information  
into the Maximo computer sys-  
tem; monitor existing supplier  
partnerships; organize and con-  
solidate purchases for store-  
rooms; operate a forklift;  
receive and coordinate place-  
ment of items into various stor-  
age areas; drive supplies, equip-  
ment and personnel to various  
sites on-campus; maintain a  
safe work environment in  
storeroom locations; work  
within the Physical Plant Ser-  
vices operational and safety  
policies.

**Requirements:** inventory con-  
trol, materials handling and  
purchasing skills with related  
experience in a MRO (mainte-  
nance, repair and operational)  
environment; minimum three  
to five years of experience;  
high school diploma, PMAC  
level I; must be a team player  
with a positive attitude and  
involved in the daily inter-  
action with customers and sup-  
pliers; self-starter with the abili-  
ty to multitask efficiently;  
ability to work well under pres-  
sure and meet deadlines; atten-  
tion to detail essential; strong  
problem-solving skills; good  
working knowledge of purchas-  
ing principles and techniques;  
proficiency in MS Word and  
Excel computer systems; excel-  
lent communications and  
interpersonal skills; ability to  
maintain confidentiality;  
knowledge of Queen's Universi-  
ty campus an asset; valid  
Ontario driver's licence with a  
good driving record.

This position falls under the  
jurisdiction of the Canadian  
Union of Public Employees,  
Local 229.

**Hourly rate:** \$19.96

## Computing Systems Administrator Department of Physics 2002-142

This is a term appointment for  
a period of one year.

**Major responsibilities:** report  
to the Administrative Assistant;  
responsible for the administra-  
tion and maintenance of the  
department's heterogeneous  
computer network system to  
provide maximum computing  
service support for research,  
teaching and administration;  
provide technical support and  
advice regarding network sys-  
tems, hardware and software;  
provide software training as  
needed; evaluate and recom-  
mend the acquisition of new  
systems and software; act as  
departmental computing repre-  
sentative; advise the Physics  
Computing Committee on  
future directions for the system.

**Requirements:** three-year  
post-secondary program in a  
computer-related field (e.g.,  
computer science, computer  
network administration), with  
substantial relevant experience,  
or equivalent training and  
experience (B.Sc. preferred);  
training and experience in  
UNIX support and network

administration; in-depth working  
knowledge of operating systems  
such as Windows NT, Windows  
98/XP, Linux, AIX and Solaris;  
ability to integrate technology  
into the work environment to  
maximize efficiency and accu-  
racy; demonstrated analytical,  
problem-solving, communica-  
tion, interpersonal and organiza-  
tional skills; knowledge of vari-  
ous university information  
systems and networking environ-  
ments, and Queen's policies and  
procedures; ability to learn and  
apply new technology as it  
emerges; ability to delegate work,  
be proactive and work independ-  
ently; understanding of database  
design and maintenance.

**Minimum hiring salary:**  
\$39,548 Salary Grade 7 – ITUS7

## Web Developer and Technical Support Industrial Relations Centre 2002-143

This is a term appointment for a  
period of one year.

**Major responsibilities:** report to  
the Manager of Communications  
and Development; assist in the  
planning and evaluation of the  
Industrial Relations Centre (IRC)  
World Wide Web site by provid-  
ing strategic input to and ensur-  
ing the delivery of planned com-  
munications services (advise on  
strategic and operational plans,  
coordinate the process of adding  
and updating information, col-  
lect and analyze user feedback,  
promote the site, evaluate the  
site's effectiveness); stay current  
with e-learning trends and advise  
on how they can be applied to  
IRC programs; provide technical  
assistance to co-workers and cus-  
tomers; troubleshoot problems  
with hardware, software, installa-  
tion and upgrades.

**Requirements:** three-year post-  
secondary program with proven  
experience in www site develop-  
ment and management in the  
areas of communications, mar-  
keting and customer service (or  
an equivalent combination of  
education and experience); fluen-  
cy in HTML and other interactive  
languages, including Java,  
JavaScript, Shockwave, and Direc-  
tor, as well as multimedia devel-  
opment tools, applications and  
production processes; ability to  
program forms and implement  
scripts, using languages such as  
Perl, CGI, Java, C, C++, Visual  
Basic; sound knowledge of major  
computer systems (Queen's pre-  
ferred); knowledge of SPSS or SAS  
an asset; proven initiative and  
ability to work productively with  
design and content-generating  
teams; excellent communication,  
interpersonal and analytical  
skills; experience with communi-  
cations project coordination and  
the ability to remain aware of  
long-term goals while producing  
immediate solutions.

**Minimum hiring salary:**  
\$39,548 Salary Grade 7 – ITUS7

## Manager of Information and Communication Technology Faculty of Education 2002-144

**Major responsibilities:** report to  
the Budget and Human Resource  
Manager; coordinate the opera-  
tions of the Education Comput-  
ing Services (ECS) Unit which  
includes supervising all ECS staff,  
ensuring optimal utilization of  
resources and developing appro-  
priate policies and procedures;  
plan and monitor budget alloca-

tions; plan and oversee major  
projects and initiatives which  
includes applying project man-  
agement techniques, prioritizing  
competing needs within con-  
strained resources, ensuring com-  
pliance with budget and regular  
reporting on progress; coordinate  
and oversee provision of techni-  
cal support to administrative staff  
and faculty to facilitate integra-  
tion of information technology;  
participate in the Information  
Technology Management Group.

**Requirements:** university degree  
(Master's preferred) in Education,  
Computer Science, or a related  
area, with proven relevant expe-  
rience in the successful use of  
learning technology; familiarity  
with organizations comparable to  
the Faculty of Education; effec-  
tive supervisory skills; extensive  
knowledge of computer systems  
and other technological equip-  
ment; proven ability to integrate  
technology into the workplace;  
advanced knowledge of all appli-  
cable software applications;  
strong interpersonal and commu-  
nication skills including the abili-  
ty to explain technical terms,  
concepts and systems in a man-  
ner easily understood by novices;  
strong organizational and facili-  
tation skills; proven skills in  
planning, delivering and evaluat-  
ing workshops on learning tech-  
nology; working knowledge of an  
assorted range of learning tech-  
nology resources; supervisory,  
leadership and human resources  
skills; good judgement, tact and  
foresight.

**Minimum Hiring Salary:**  
\$47,679 Salary Grade 9 – ITUS9  
(A supervisory premium may be  
applied to this salary.)

## Employee Development

For upcoming workshops please  
visit our Human Resources web-  
site at www.hr.queensu.ca

### Milestones

*Compiled by Faye Baudoux*

If you have a milestone of 5, 10,  
15, 20, 25, 30, 35, 40 years or  
more of continuous service com-  
ing up and you do NOT wish  
your name to be included in the  
listing, please contact Faye in  
Human Resources at 77791.

Congratulations to those who  
reached the following milestones  
in **December 2002.**

**35 years:**  
Eileen Potts, Graphic Design  
Services.

**20 years:**  
Victor Evans, Physical Plant  
Services.

**15 years:**  
Cherrilyn Yalin, History of  
Medicine.

**10 years:**  
Malcolm Anderson, Physical  
Medicine and Rehabilitation;  
Anne Mitchell, Admission Ser-  
vices; Elvira Posthumus, Econom-  
ics; John Samis, Pathology.

**Five years:**  
Eric Bevens, Apartment and  
Housing; Jacoba Franks, Medi-  
cine; Elizabeth Gorman, Alumni  
Affairs; Stephen Hornsby, Devel-  
opment; Annette Keyes, Chem-  
istry; Pamela LeBlanc, Art; Nancy  
McTague, Residences; Mary  
Nolan, Apartment and Housing.

### Employee Assistance Program

For off-campus professional  
counselling call toll free: 1-800-  
387-4765 (français 1-800-361-

5676). This service can be  
reached 24 hours a day, seven  
days a week. Further informa-  
tion is available on the following  
website: www.queensu.ca/eap/

### December holiday closing

This year, normal university  
operations for most (but not all)  
departments will close from  
noon, Tuesday, Dec. 24, 2002  
to Wednesday, Jan. 1, 2003  
inclusive.

### Human Resources Early Closing

The Human Resources depart-  
ment will close at 12:30 pm on  
Friday, Dec. 20, 2002 for its annu-  
al holiday luncheon.

### Holiday Greetings

The staff of Human Resources  
would like to extend best wishes  
for the holiday season and the  
New Year.

### Other Positions

#### Summer Fellowship Museum of Health Care

The Museum of Health Care is  
seeking applicants for a 12-week  
summer fellowship relevant to  
the history of health and health  
care. See our website: www.muse-  
umofhealthcare.ca or call 548-  
2419 for details.

#### Program Coordinator SPS Policy Forum

**Term:** Full-time, one-year con-  
tract, with possibility of renewal.

Cover letters and resumé to:  
Sharon Alton, Office of the  
Director, School of Policy Studies,  
Queen's University (533-6555).

degree. Background in public pol-  
icy issues and a knowledge of  
university systems are assets.  
Consideration given to  
equivalent combination of educa-  
tion and experience. Excellent  
managerial, interpersonal and  
writing skills essential, as is a  
mastery of computer technology,  
including word processing,  
spreadsheets, databases and pres-  
entation packages.

**Salary:** Grade 7 (\$39,548)

#### ESL instructor School of English

**Term:** Approx. Feb. 24 to April  
11, 2003

**Deadline:** Jan. 10, 2003

The Queen's University School of  
English is looking for an experi-  
enced instructor to teach English  
as a second language.

**Responsibilities:** eighteen hours  
of instruction per week, Monday  
through Friday.

**Requirements:** an undergraduate  
degree, TESL qualifications and,  
preferably, teaching certification.

Apply with resumé and refer-  
ences to the School of English,  
96 Albert Street, Kingston ON,  
K7L 3N6. Applications may also  
be faxed to 533-6809 or emailed  
to soerecep@post.queensu.ca

Only those candidates selected for  
an interview will be contacted.

## Awards and Grants

### Alumni Achievement Award

Do you know a graduate of Queen's University you would like to nominate? This award is presented annually by the Queen's University Alumni Association to an alumna or alumnus who has demonstrated the high ideals imparted by a university education through a significant contribution to the arts or sciences, to the public service, to leadership in business, industry or a profession and to community, charitable or volunteer work. A detailed resumé or biography of the candidate must be included with the nomination letter. Please submit nominations to Deborah Shea, Department of Alumni Affairs, Summerhill, by Feb. 28, 2003. For more information about the award, please contact Deborah at ext.74008.

## Notices

### Retirement

Dec. 16 - Dec. 20 7 am - 10 pm

#### December holiday hours

Saturday, Dec. 21 8 am - 4:30 pm  
 Sunday, Dec. 22 noon - 4:30 pm  
 Monday, Dec. 23 7 am - 7 pm

Tuesday, Dec. 24 7 am - noon  
 Jan. 2, Jan. 3 7 am - 10 pm  
 Saturday, Jan. 4 8 am - 10 pm  
 Sunday, Jan. 5 noon - 10 pm

\* Regular building hours will resume Monday, Jan. 6, 2003

The Jock Harty Arena and indoor track will be closed Dec. 2 to Jan. 6, 2003.

## Surplus Items

### Information Technology Services offers for sale:

1990 Dodge Van, Model B150, 127" wheelbase, 3 speed automatic, 3.9 - 6 cyl. EFI engine, AM/FM radio, approx. 50,000 km, (body needs work).

Minimum bid: \$2,000.

This vehicle is in good running condition. For information or to view, please call Richard at 533-2817.

Submit sealed bids marked "I.T. Services" to Patti George, Purchasing Services, by 4 pm on Dec. 23, 2002. Please mark bids "confidential."

### Purchasing Services offers for sale:

12 Intel Pentium 200 Mhz computers with mouse and keyboard

6 Intel Pentium 166 Mhz, computers with mouse and keyboard

Open bid. All machines were purchased late in 1998 and all are in good working order. When submitting a bid, please include the serial number(s) of the machine(s) you are bidding on. For details, go to our web site at: <http://www.notes.queensu.ca/finance.nsf>, click on the news link and then

follow the used equipment link. If you have any questions, please contact Patti @ 74233.

Submit sealed bids marked "Purchasing Services" to Patti George, Purchasing Services by noon, Dec. 18, 2002. Please mark bids "confidential."

Queen's University is not responsible in any way for the condition of any item(s) it has made available, nor for any damage or injury that may occur due to use or removal of the item(s).

All identification signs, lettering or decals must be removed from the vehicle before ownership can be transferred.

Queen's University reserves the right to reject any or all of the bids. Only successful bidders will be notified.

## Volunteers

### Androgen levels study

The Department of Urology needs 17 final-year male medical students to take part in a research study to assess serum androgen levels. The study also requires healthy males, 20-35, working regular daytime hours (not shift work or night shift) as controls for the study. Volunteers will be compensated for their time. For more information contact Angela Black RN at Department of Urology. Telephone: (613) 549-6666 x3848.

### Family volunteers

Queen's Clinical Education Centre needs families with children six months old through school

age to help health science students learn interviewing, physical examination and developmental assessment skills. This will help Queen's medical, nursing and rehabilitation students to become caring and competent health care professionals, sharing with your children a sense of community contribution. Parking/transportation provided. Contact: Cheryl Descent, 533-2380 or [grossc@post.queensu.ca](mailto:grossc@post.queensu.ca)

### Rehabilitation therapy study

If you have symptoms in your hand, wrist, forearm or elbow that are interfering with your occupation or school work, you may be eligible to participate in a study by the School of Rehabilitation Therapy. Compensation will be provided. For more information, please contact Sarah at 549-6666 x 4348.

### Testosterone study

The Department of Urology is looking for volunteers for a research project on testosterone deficiency. Men under the age of 50 with manifestations of testosterone deficiency (decrease in sexual interest/ability, tiredness, irritability, depression) and healthy men over the age of 60 WITHOUT these symptoms are eligible. Participation requires completing three short questionnaires (total time about 20 minutes) and providing a sample of blood. Men who qualify and complete the requirements will receive a small nominal fee for their time. For more information contact Angie Black, R.N. at tel.549-6666, ext.3848.
