Dr. Alfred Bader
924 East Juneau, Suite 622
Milwaukee, WI 53202

Dear Alfred:

It was a pleasure speaking to you and Isabel yesterday. I'm sorry we couldn't be of help regarding Strickland. With your determination, I'm sure you will find the information you need.

Your reimbursement is being processed and you will receive payment within the next two weeks.

Enclosed is my personal check for \$30. Dr. Munk's postdoctoral fellow, Mark Madison, paid for one of the books (cash) and Omar's student also paid me (cash). I will hold the remaining book here for approximately two weeks. If no one purchases it, I will mail it back to you by "book rate."

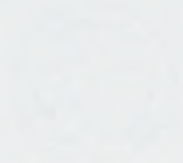

Again, it was great pleasure to see you and Isabel and to be of assistance to you.

With sincere best wishes,

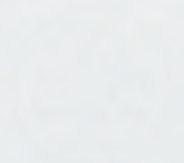

A handwritten signature in cursive script, appearing to read 'Betty Landon'.

February 7, 1998

Dear Dr. Bader,

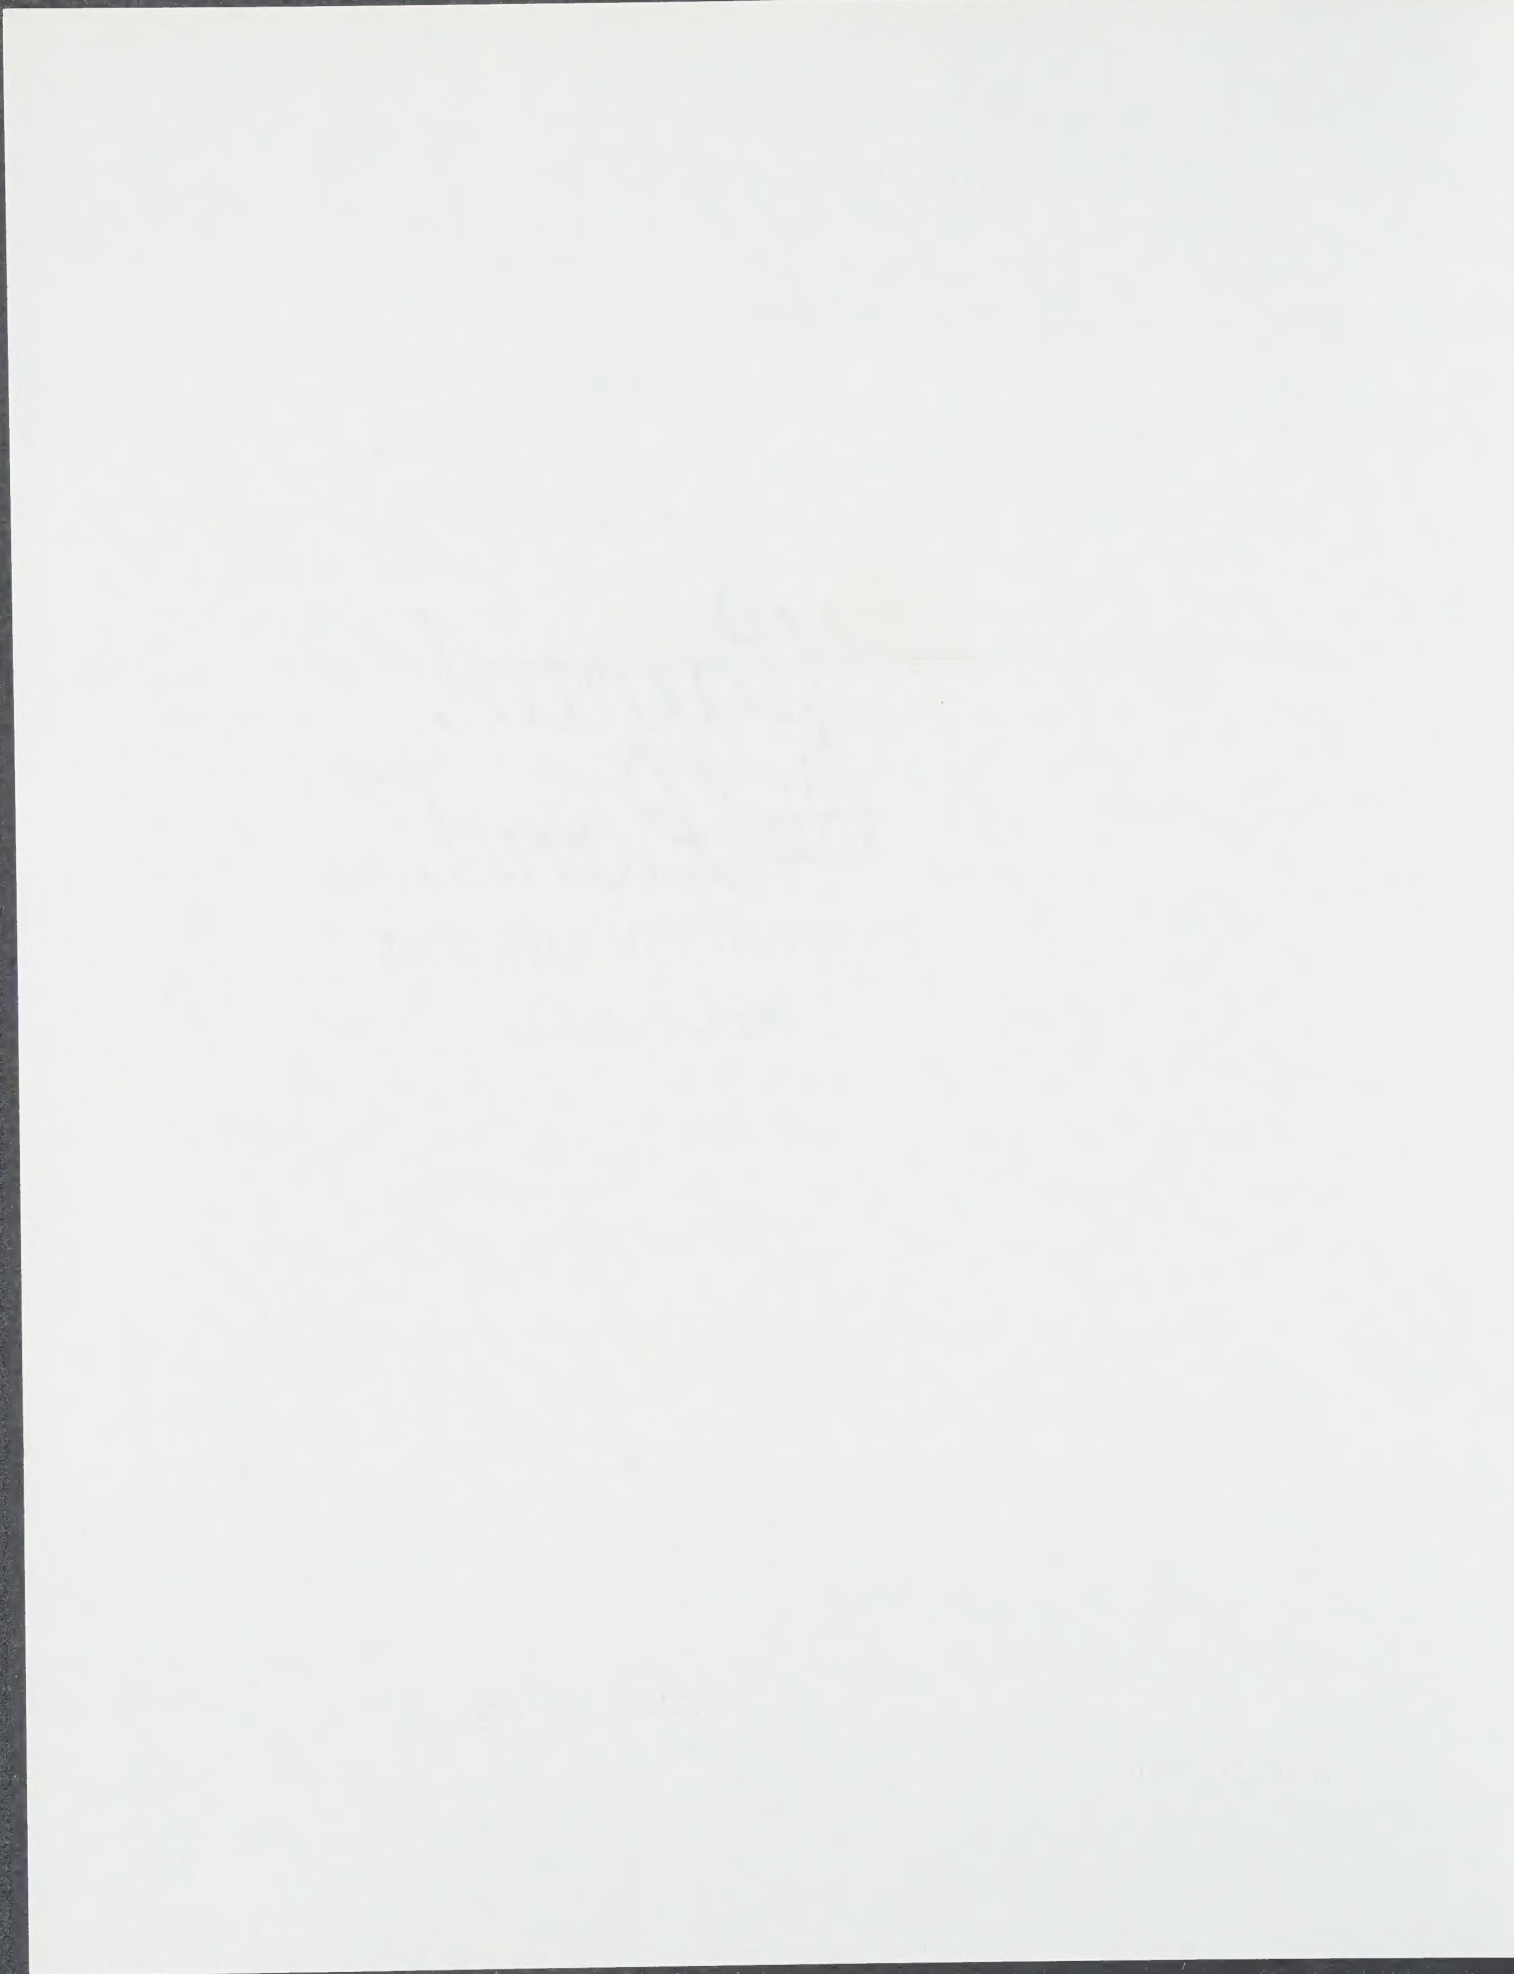

I appreciate your willingness to let me take a copy of your book after your talk yesterday about Couper, Anschütz, and Loschmidt at Arizona State University and send a check later to cover the cost of the book. You may be interested to know that I presented a copy of this book (which I purchased during your visit to Arizona State Univ. about two years ago) to Prof. Hans Trüper, the current director of the institute in Bonn where Kekulé (and presumably Anschütz) worked. This is now a Microbiology and Biotechnology Institute, the chemists having since moved to other quarters in Bonn, but Kekulé is still memorialized there by a statue in front of the Institute.

I found the parts of your book describing the development of Aldrich^{and} its interactions with other suppliers of chemicals for chemical and biochemical research to be particularly interesting, since these are companies from which I purchase supplies for my work on protein chemistry at the university. It was a pleasure to read your book, and I am pleased to now have an autographed copy.

Sincerely,

Dan Brune

Dr. Alfred Bader
924 East Juneau, Suite 622
Milwaukee, WI 53202

Dear Alfred:

I am delighted that you and Isabel will be able to spend some time with us next February.

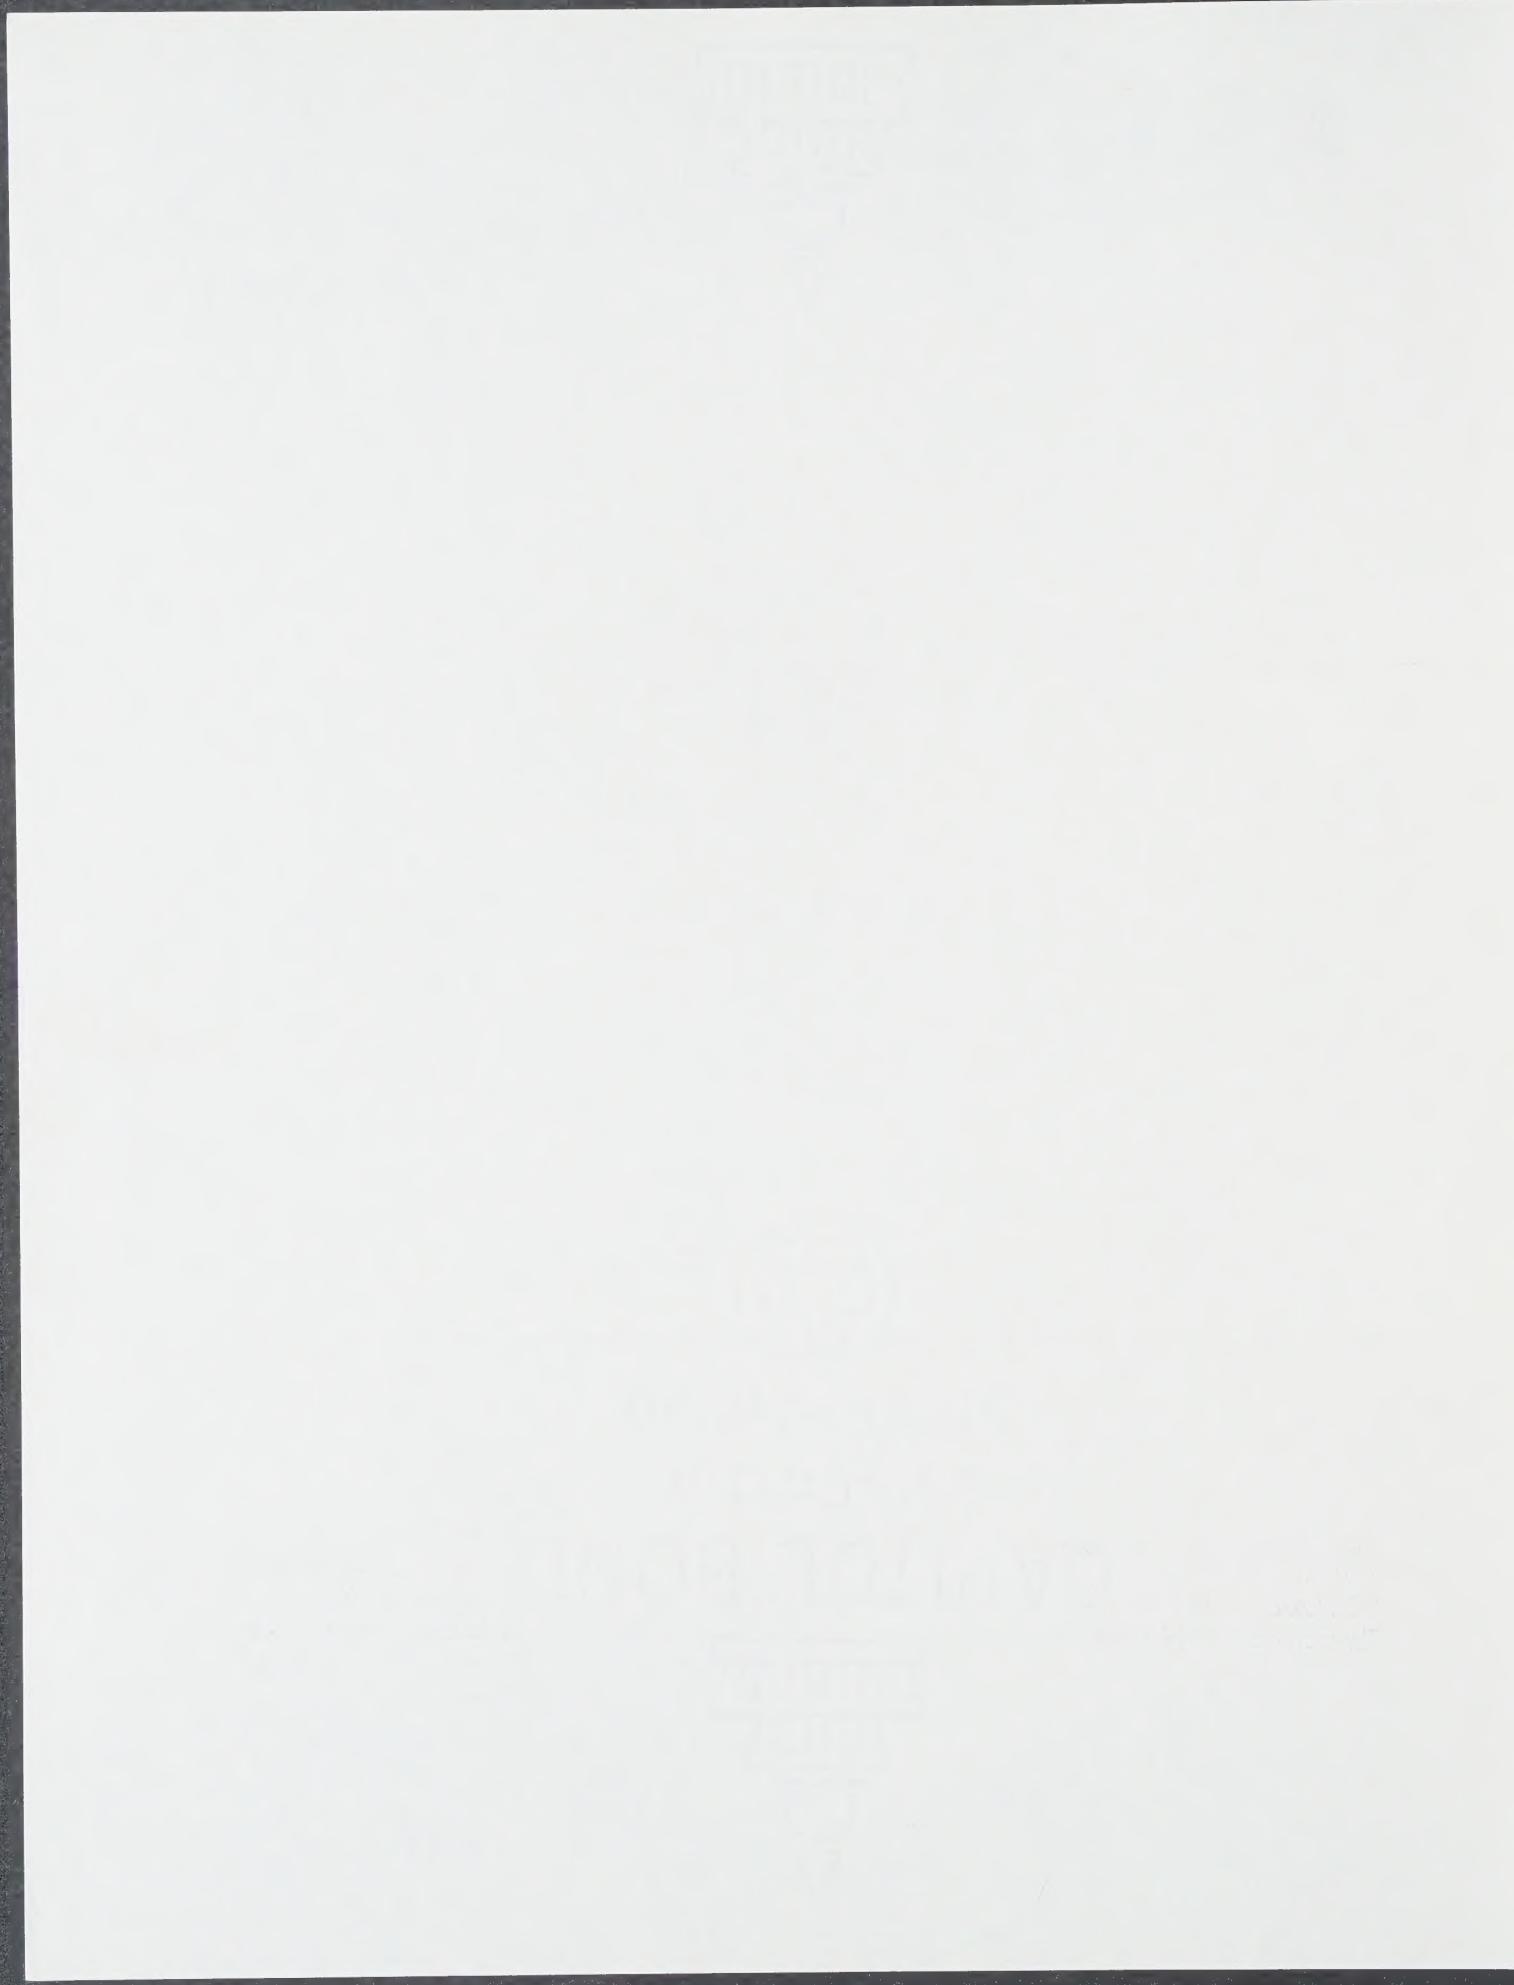

I will be out of the country for the summer but will contact you when I return to begin to arrange a lecture schedule. I am contacting the School of Art now to arrange a time for your lecture there.

Warmest regards.

Sincerely,

A handwritten signature in cursive script, appearing to read 'Morton E. Munk'.

Morton E. Munk
Chair

The Jewish Studies Program at
Arizona State University
cordially invites you to a presentation
by Alfred Robert Bader on

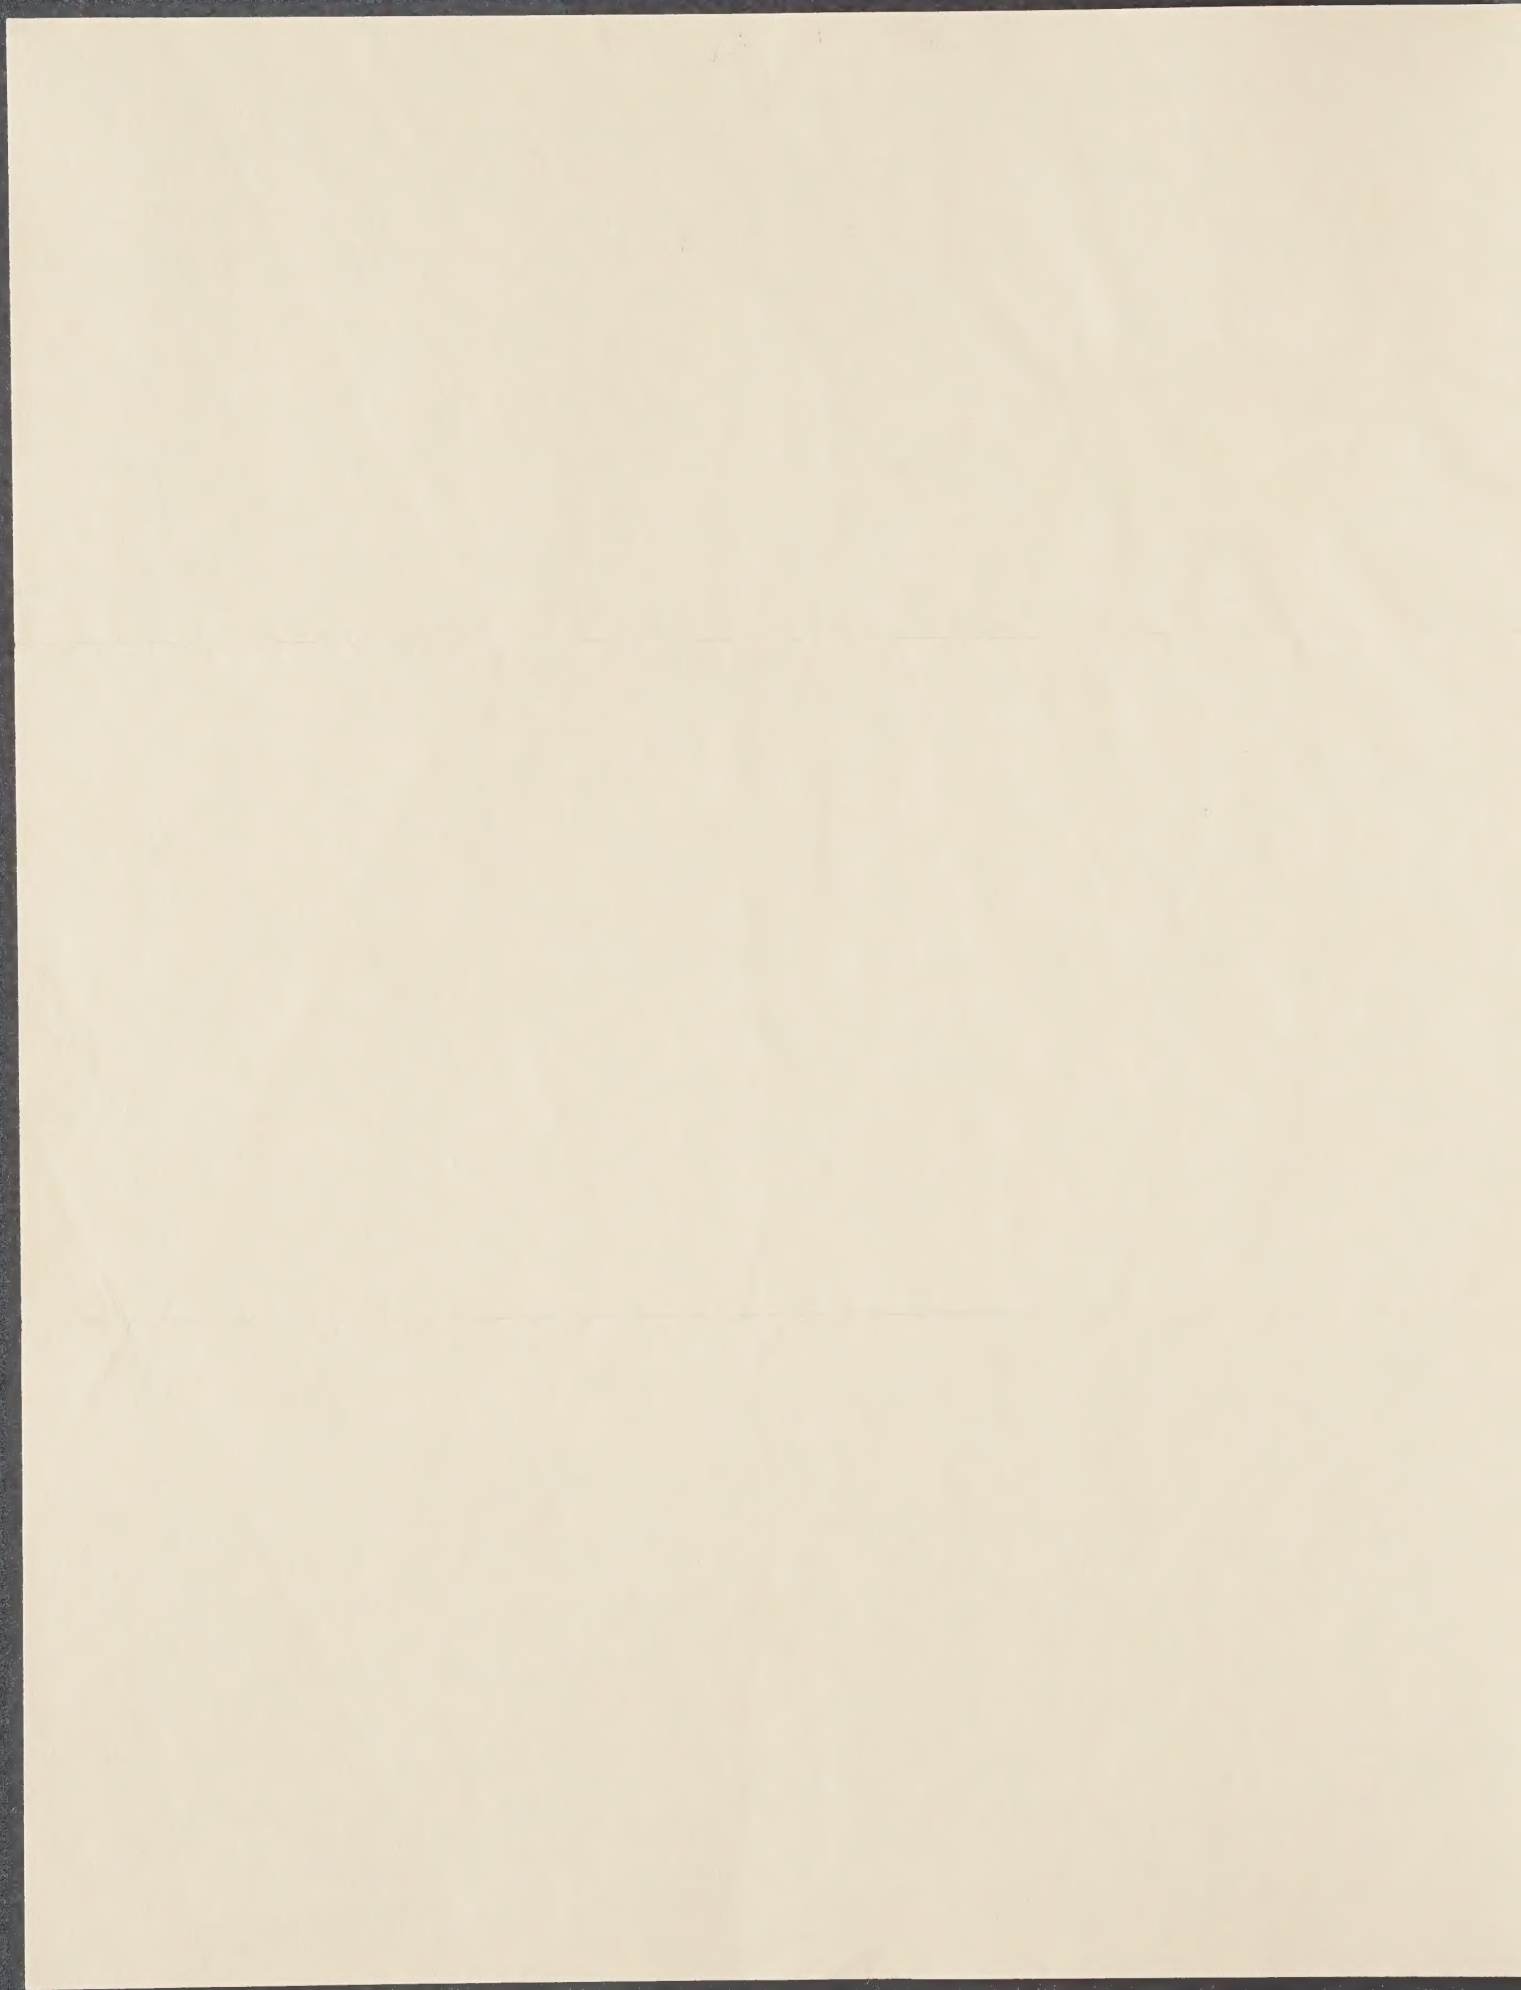

Rembrandt and the Jews

Wednesday, February 4, 1998
at the home of Gordon Weiner and Allison Couderc
241 E. 15th St.
Tempe, Arizona
at 7:30 p.m.

Mr. Bader was born in Vienna, and after the rise of the Nazi fled from there to England at age 14. He received a B.A. in History from Queens University in Ontario and a Ph.D. in Chemistry from Harvard University, and for four decades served as the head of Aldrich Chemical Company. He also has been a collector of art for many years, having sold paintings worth millions of dollars to numerous museums throughout the world.

He has published through Weidenfeld and Nicholson, an autobiography entitled *Alfred Bader, Adventures of a Chemist Collector*

Dessert will be served

A Chemist Helping Chemists

May 13, 1997

Professor Morton Munk
Department of Chemistry & Biochemistry
Arizona State University
PO Box 871604
Tempe, AZ 85287-1604

Dear Morton:

Thank you so much for your gracious invitation for next February, which Isabel and I accept with great pleasure.

We will have to check whether flights are much cheaper if we fly on Saturday, January 31st, rather than Sunday, February 1st, and then stay with you until Thursday, February 5th. Our calendar for February is completely open, and if you would prefer our arriving, say, on Monday the 2nd and then leaving on Saturday the 7th, that would be fine with us also. Though, again, we would have to check on the cost of the flights, which are so much cheaper when they are not during the week.

I enclose a menu of my talks and would, of course, be happy to give at least two a day.

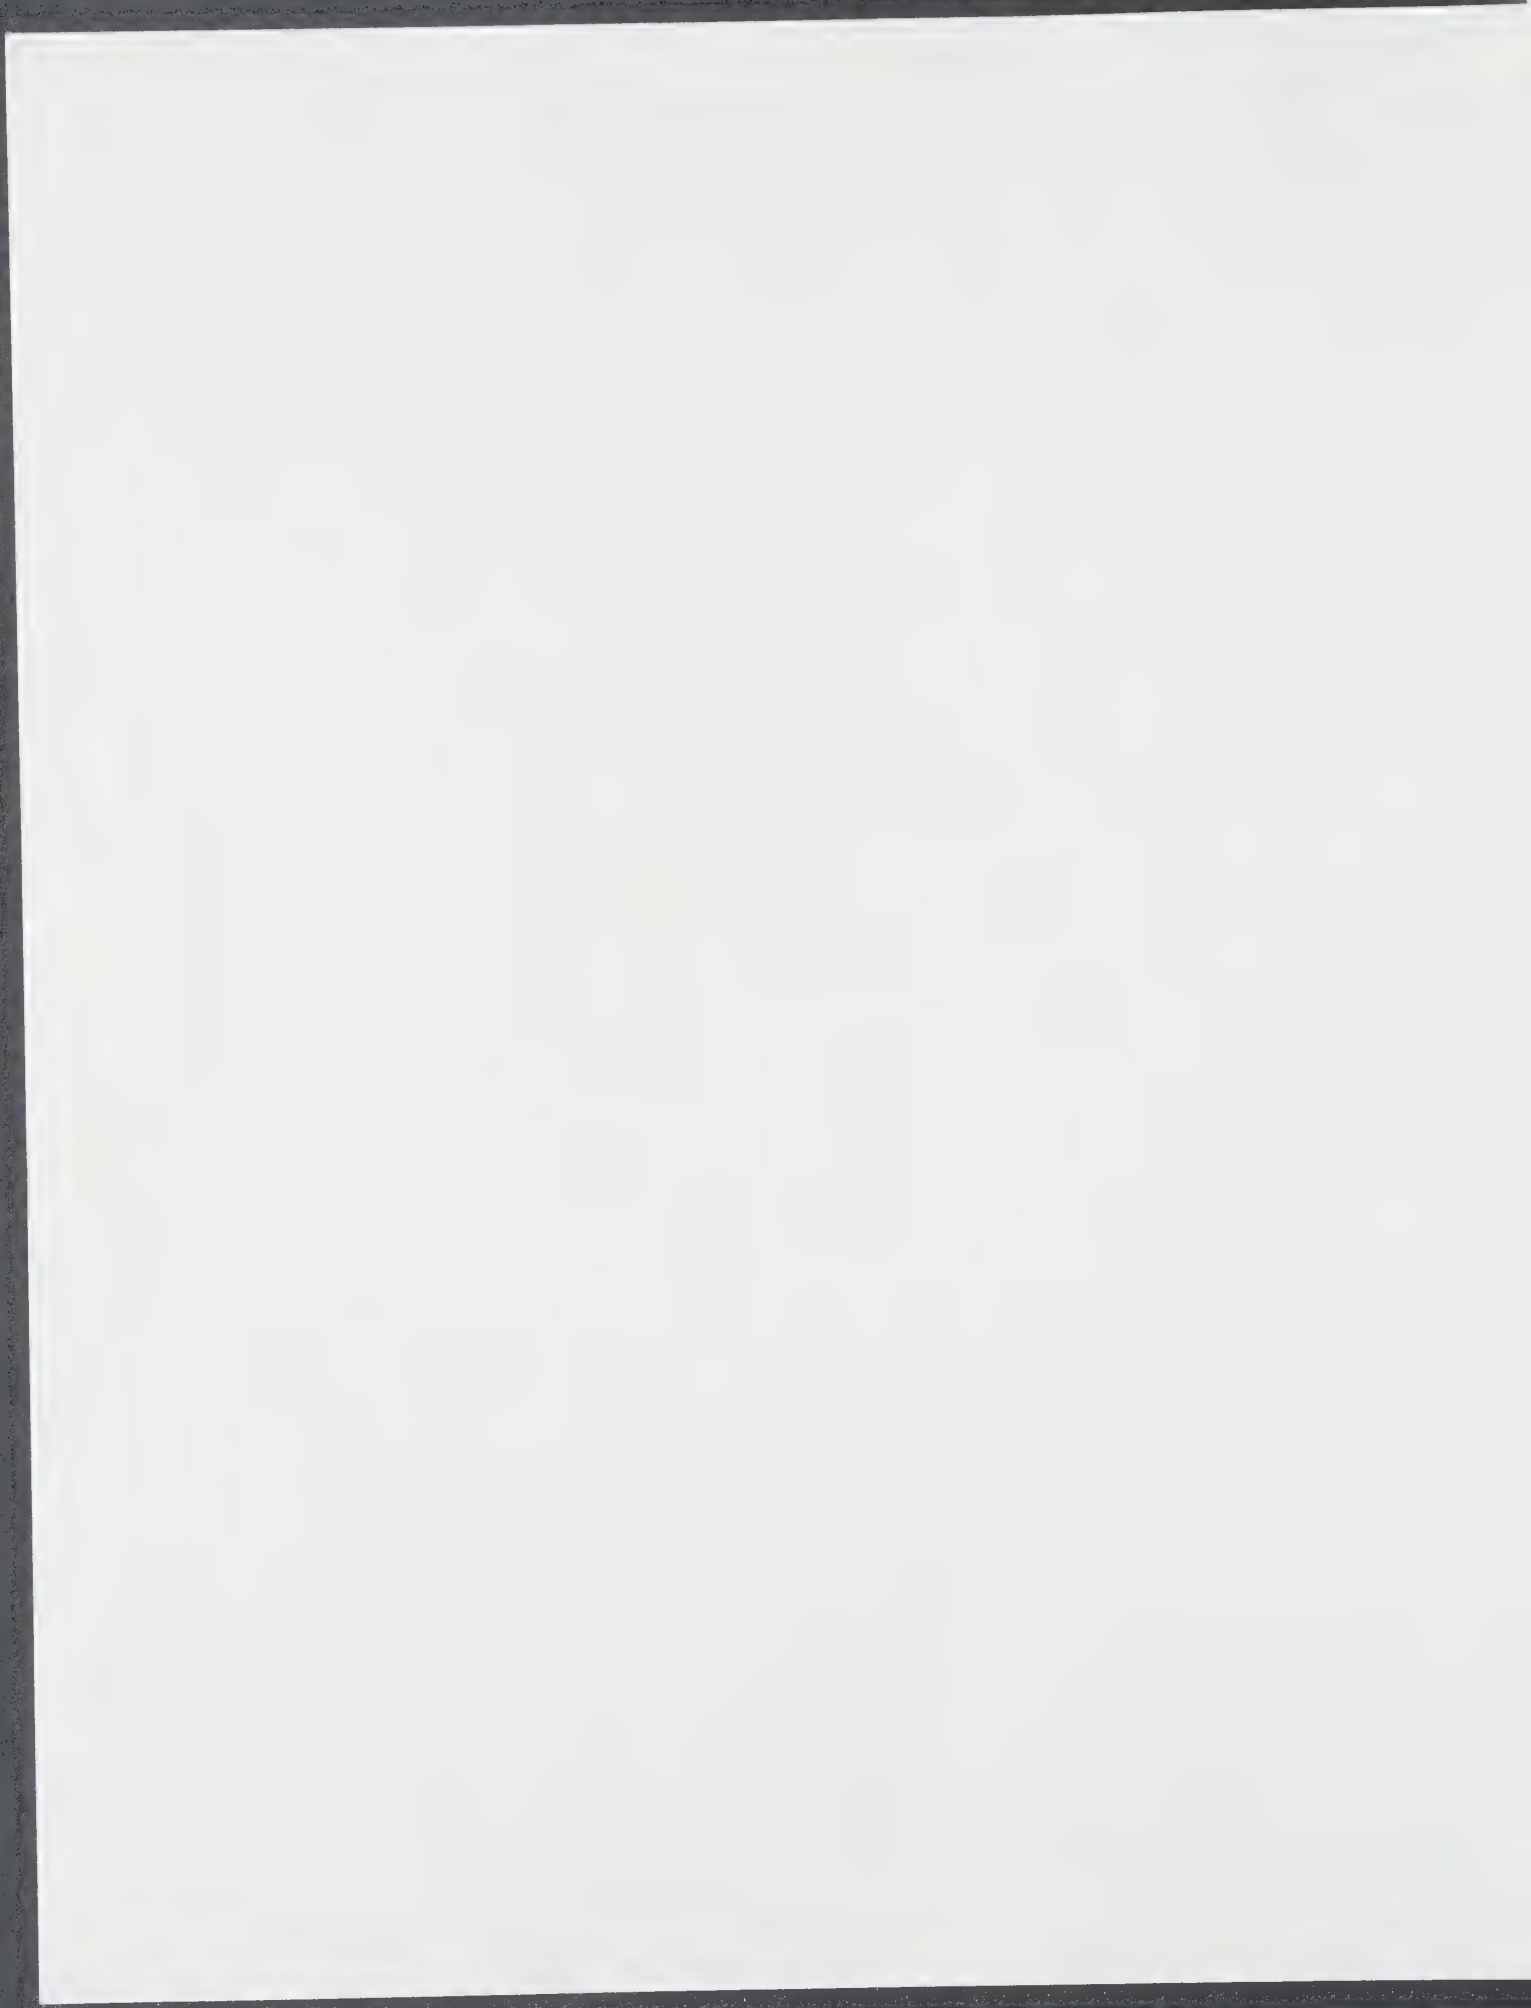

It may, of course, be that the Tempe market for my book is completely saturated, and yet we would be happy either to send or to bring a few books.

With all good wishes, I remain,

Yours sincerely,

AB/cw

A Chemist Helping Chemists

February 2, 1998

Page 1 of 2

To: Professor Morton Munk
Chairman
Department of Chemistry & Biochemistry
Arizona State University

Fax: 602/965-8607

Dear Morton:

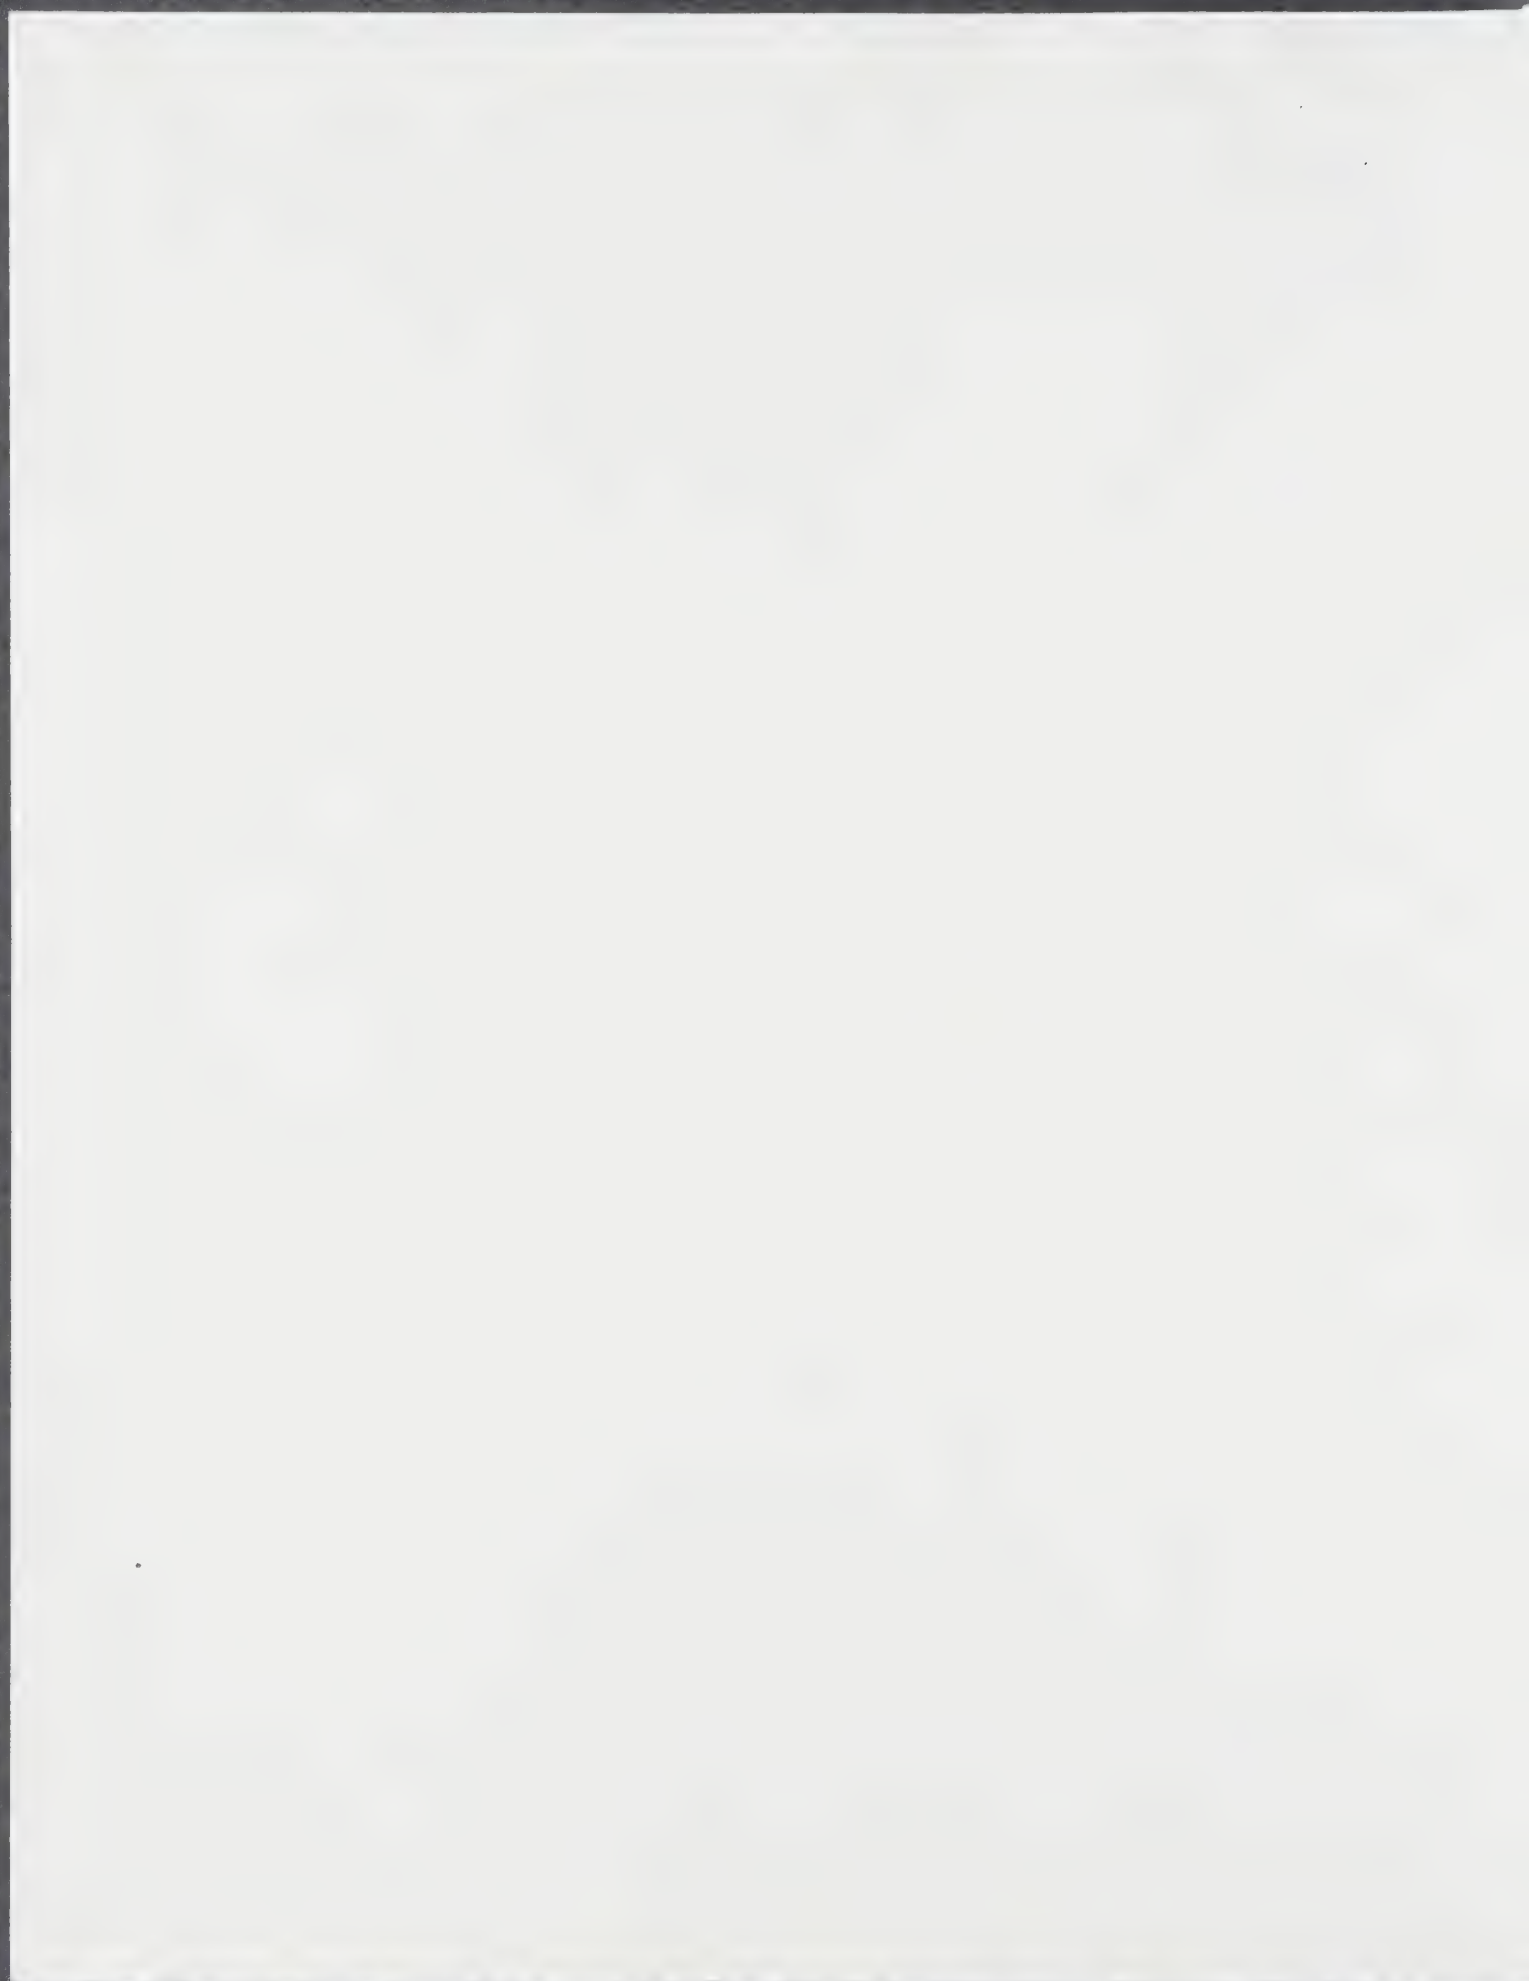

As you know, we just returned from the East late Friday night and so I have only just seen your proposed schedule of lectures.

I sure wish that we had had a chance to discuss the schedule in some detail before this week because it poses some real difficulties.

First of all, the second last and last talks, on "Loschmidt: The Father of Molecular Modelling" and "Anschütz, Couper and Loschmidt ..." overlap a great deal and I would like to suggest that you allow me to give only the talk entitled "Anschütz, Couper and Loschmidt: A Detective at Work." You will, I think, find this a very intriguing story, very much of a detective story which will even interest non-chemists.

The first and second talks "The Adventures of a Chemist Collector" and "The Detective's Eye" deal with different paintings, each before and after restoration, and I would like to ask you to replace one of these with the talk entitled "The Joys of Collecting: Building a Collection."

I am glad that the talk on Wednesday evening is on "The Bible Through Dutch Eyes; Rembrandt and the Jews" because that will certainly be of interest to the Department of Religion and Jewish Studies.

Professor Morton Munk
February 2, 1998
Page two

However, I always like to have at least half an hour just to lie down after the second lecture and before dinner. Will that be possible if the second talk ends at around 5 p.m.?

There is also a good deal of overlap in the first two talks planned for Thursday, namely, "Chemophobia" and "The History of the Aldrich Chemical Company." The latter is, I think, considerably more interesting.

Not included in your schedule is what I think is one of my most interesting talks, that entitled "The Rembrandt Research Project and the Collector" and I am wondering whether you couldn't fit that in somehow. Of course I realize your difficulties as we are now on Monday morning and the talks are to begin on Wednesday.

What I am suggesting is that I give six lectures, of course in any order you wish, of which two deal with chemistry, "The History of Aldrich and Sigma-Aldrich" and "Anschütz, Couper and Loschmidt: A Detective at Work;" one bridges chemistry and art, namely "The Detective's Eye," and three deal with paintings. These three would be "The Joys of Building a Collection," "The Rembrandt Research Project and The Collector" and "The Bible Through Dutch Eyes; Rembrandt and the Jews." The last bridges art and the bible.

Of course I do hope that you will find six talks, rather than seven, satisfactory.

I will be in my office all day today and as so much work has piled up I do not plan to go out for lunch. Please call me at your convenience. Isabel and I much look forward to seeing you.

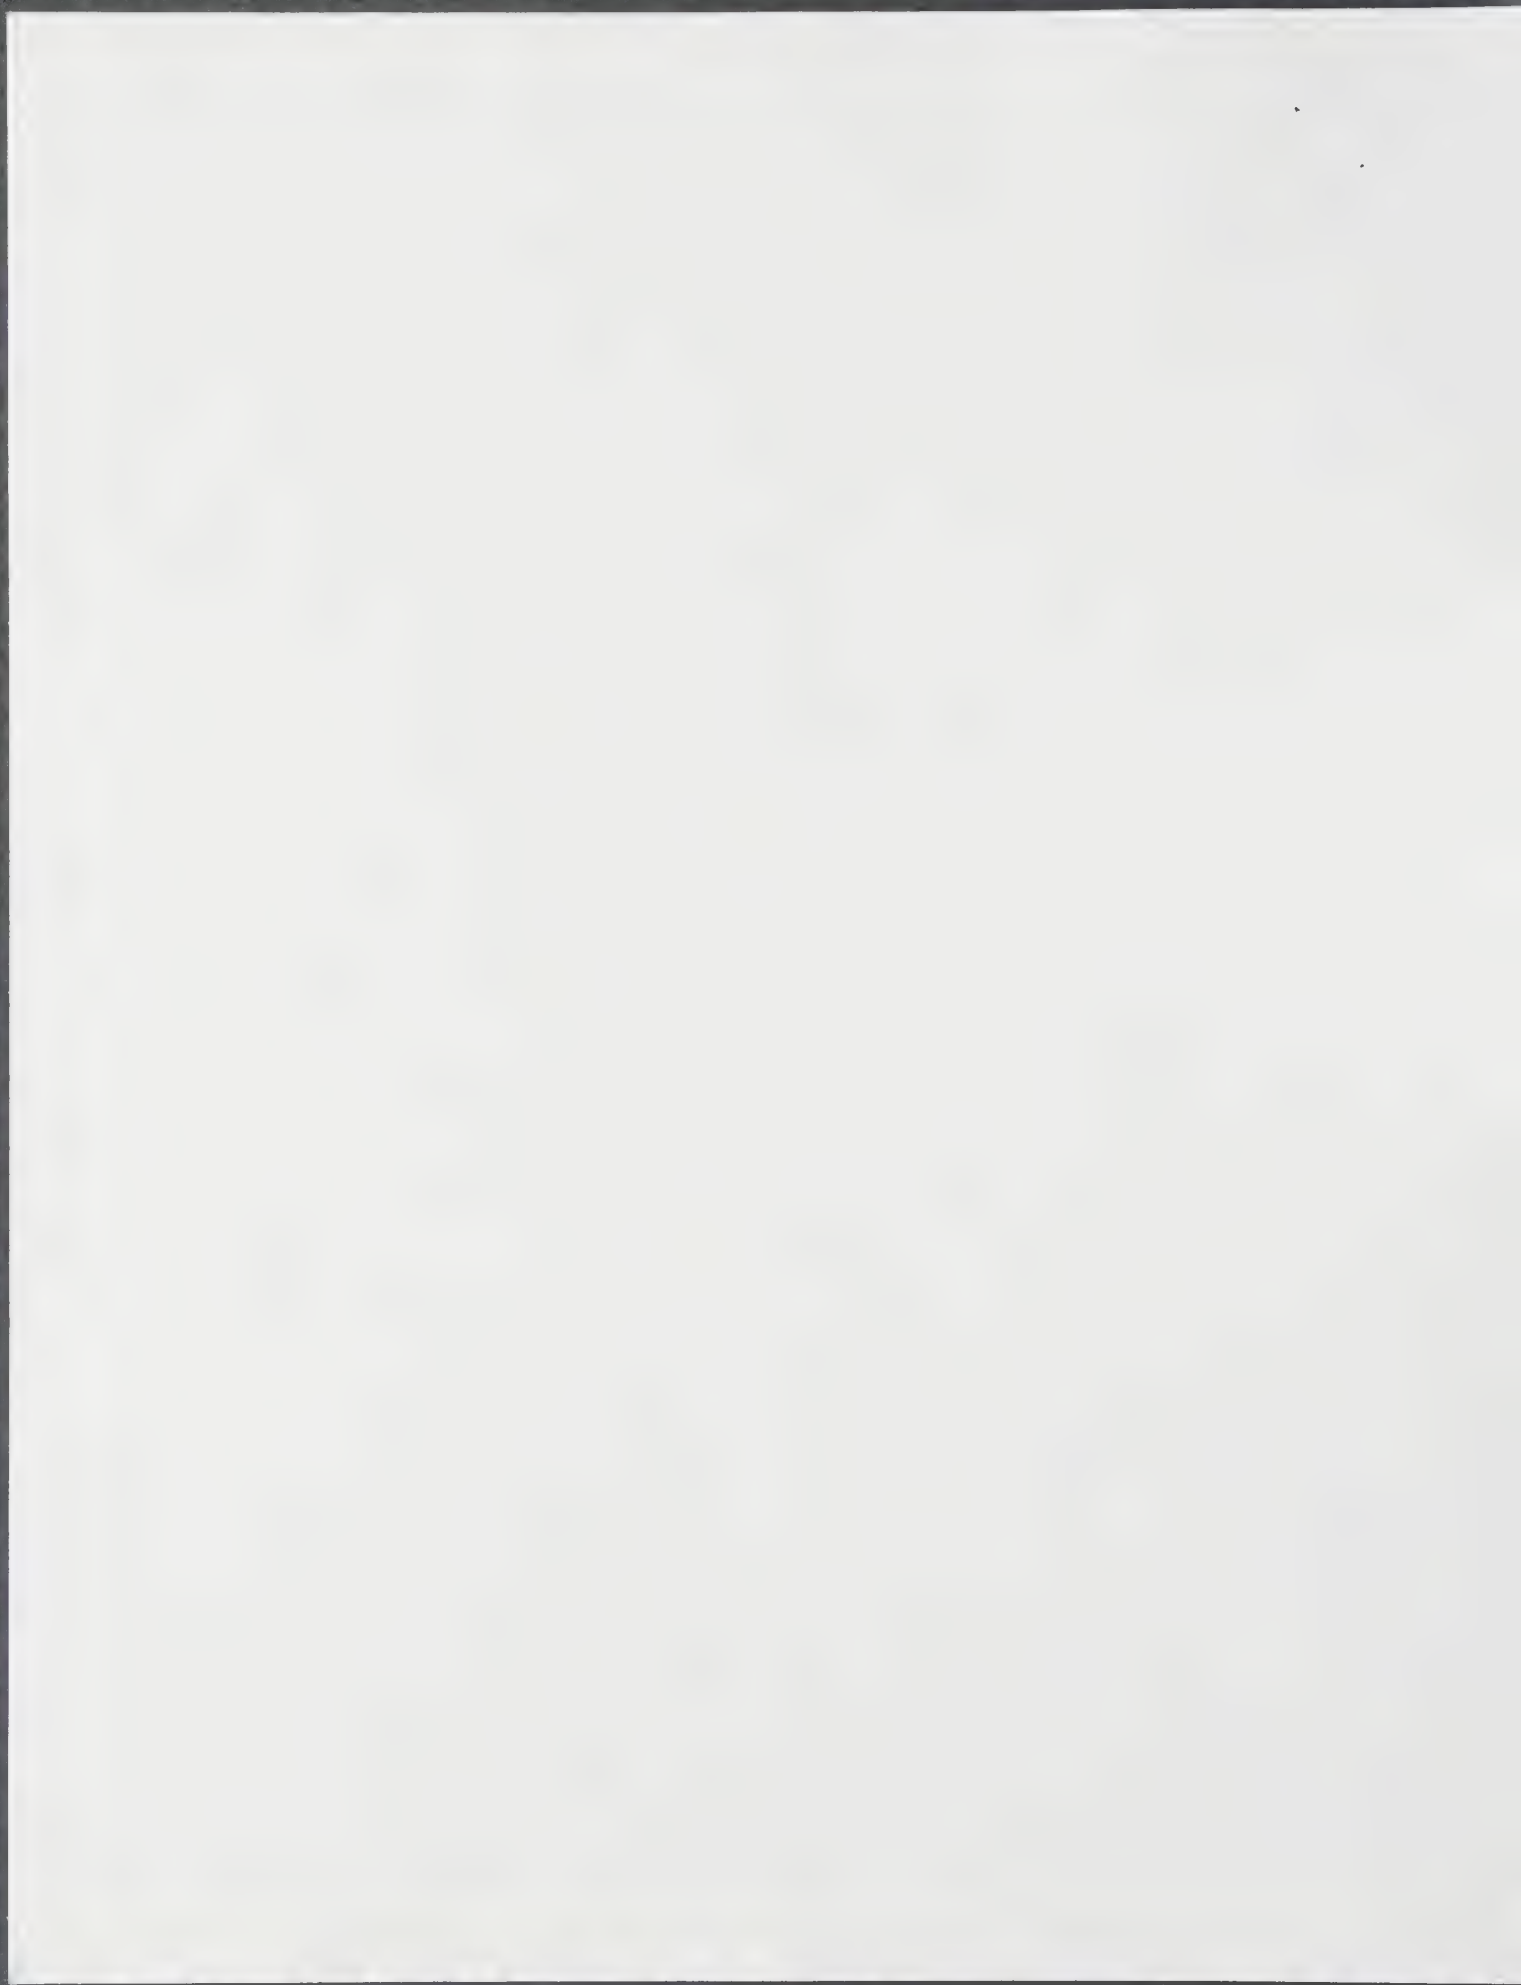

With all good wishes to you and Betty, I remain,

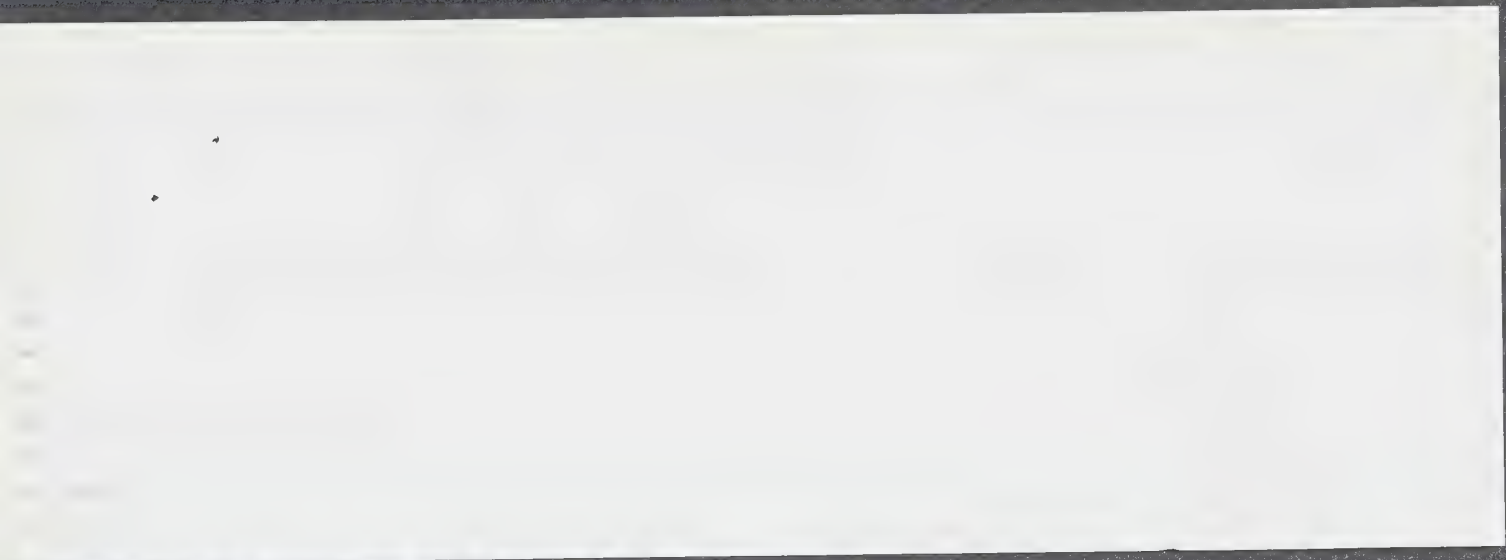

Yours sincerely,

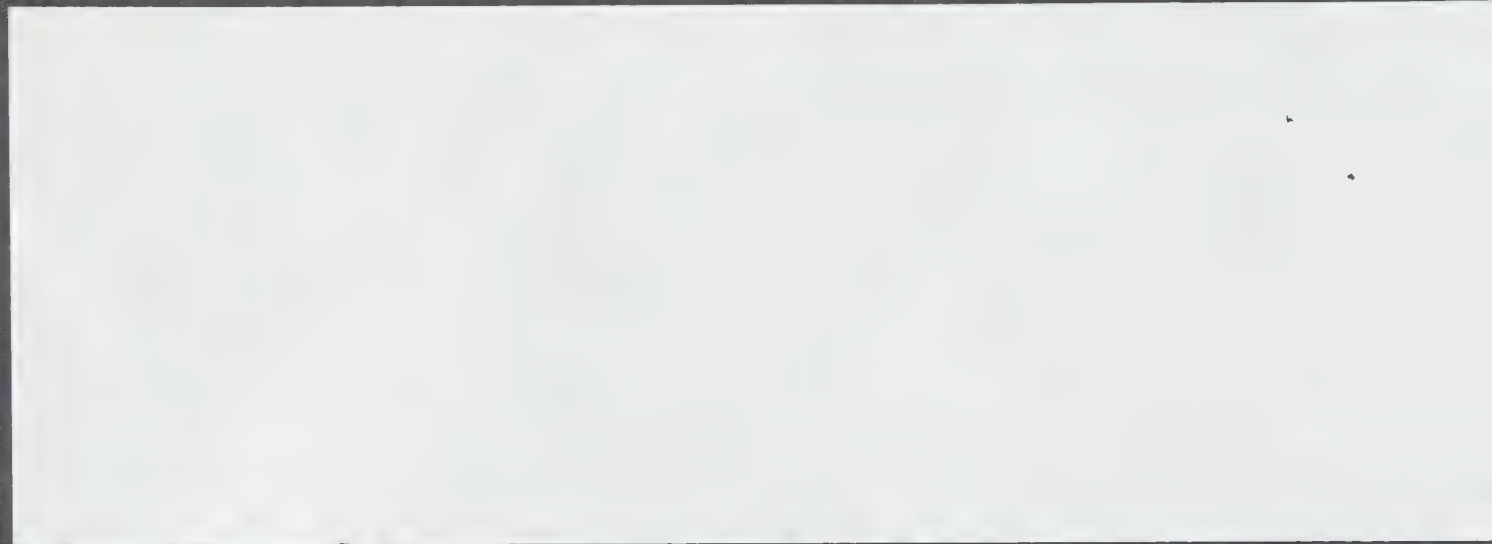

AB/nik

Dr. Alfred Gaby
924 East Juneau, Suite 622
Milwaukee, Wisconsin 53212

Dear Alfred:

I was very pleased to receive your letter and learn that it will be possible for you and Isabel to return to ASU for a visit. I would have responded sooner, but Rosalyn has had some medical problems which required my attention and I have fallen behind in my work. However, I have spoken to Julie Codell, Director of the School of Art, and looked at our own departmental seminar schedule for the first week in February. We do have a speaker on Friday of that week, but the early part of the week is available for a speaker. I hope that is convenient for you. It would be a pleasure to have you and Isabel visit at that time and stay as long as you wish. We can provide a well-equipped office for your use, parking and access to our library holdings. I am currently on sabbatical leave and away from the University, but I would welcome another lecture by you. I will work with Julie Codell, Director, to make the arrangements. Also, I will contact the Director of the Jewish Studies program at ASU to see if he can help the situation a little to the Phoenix Jewish community.

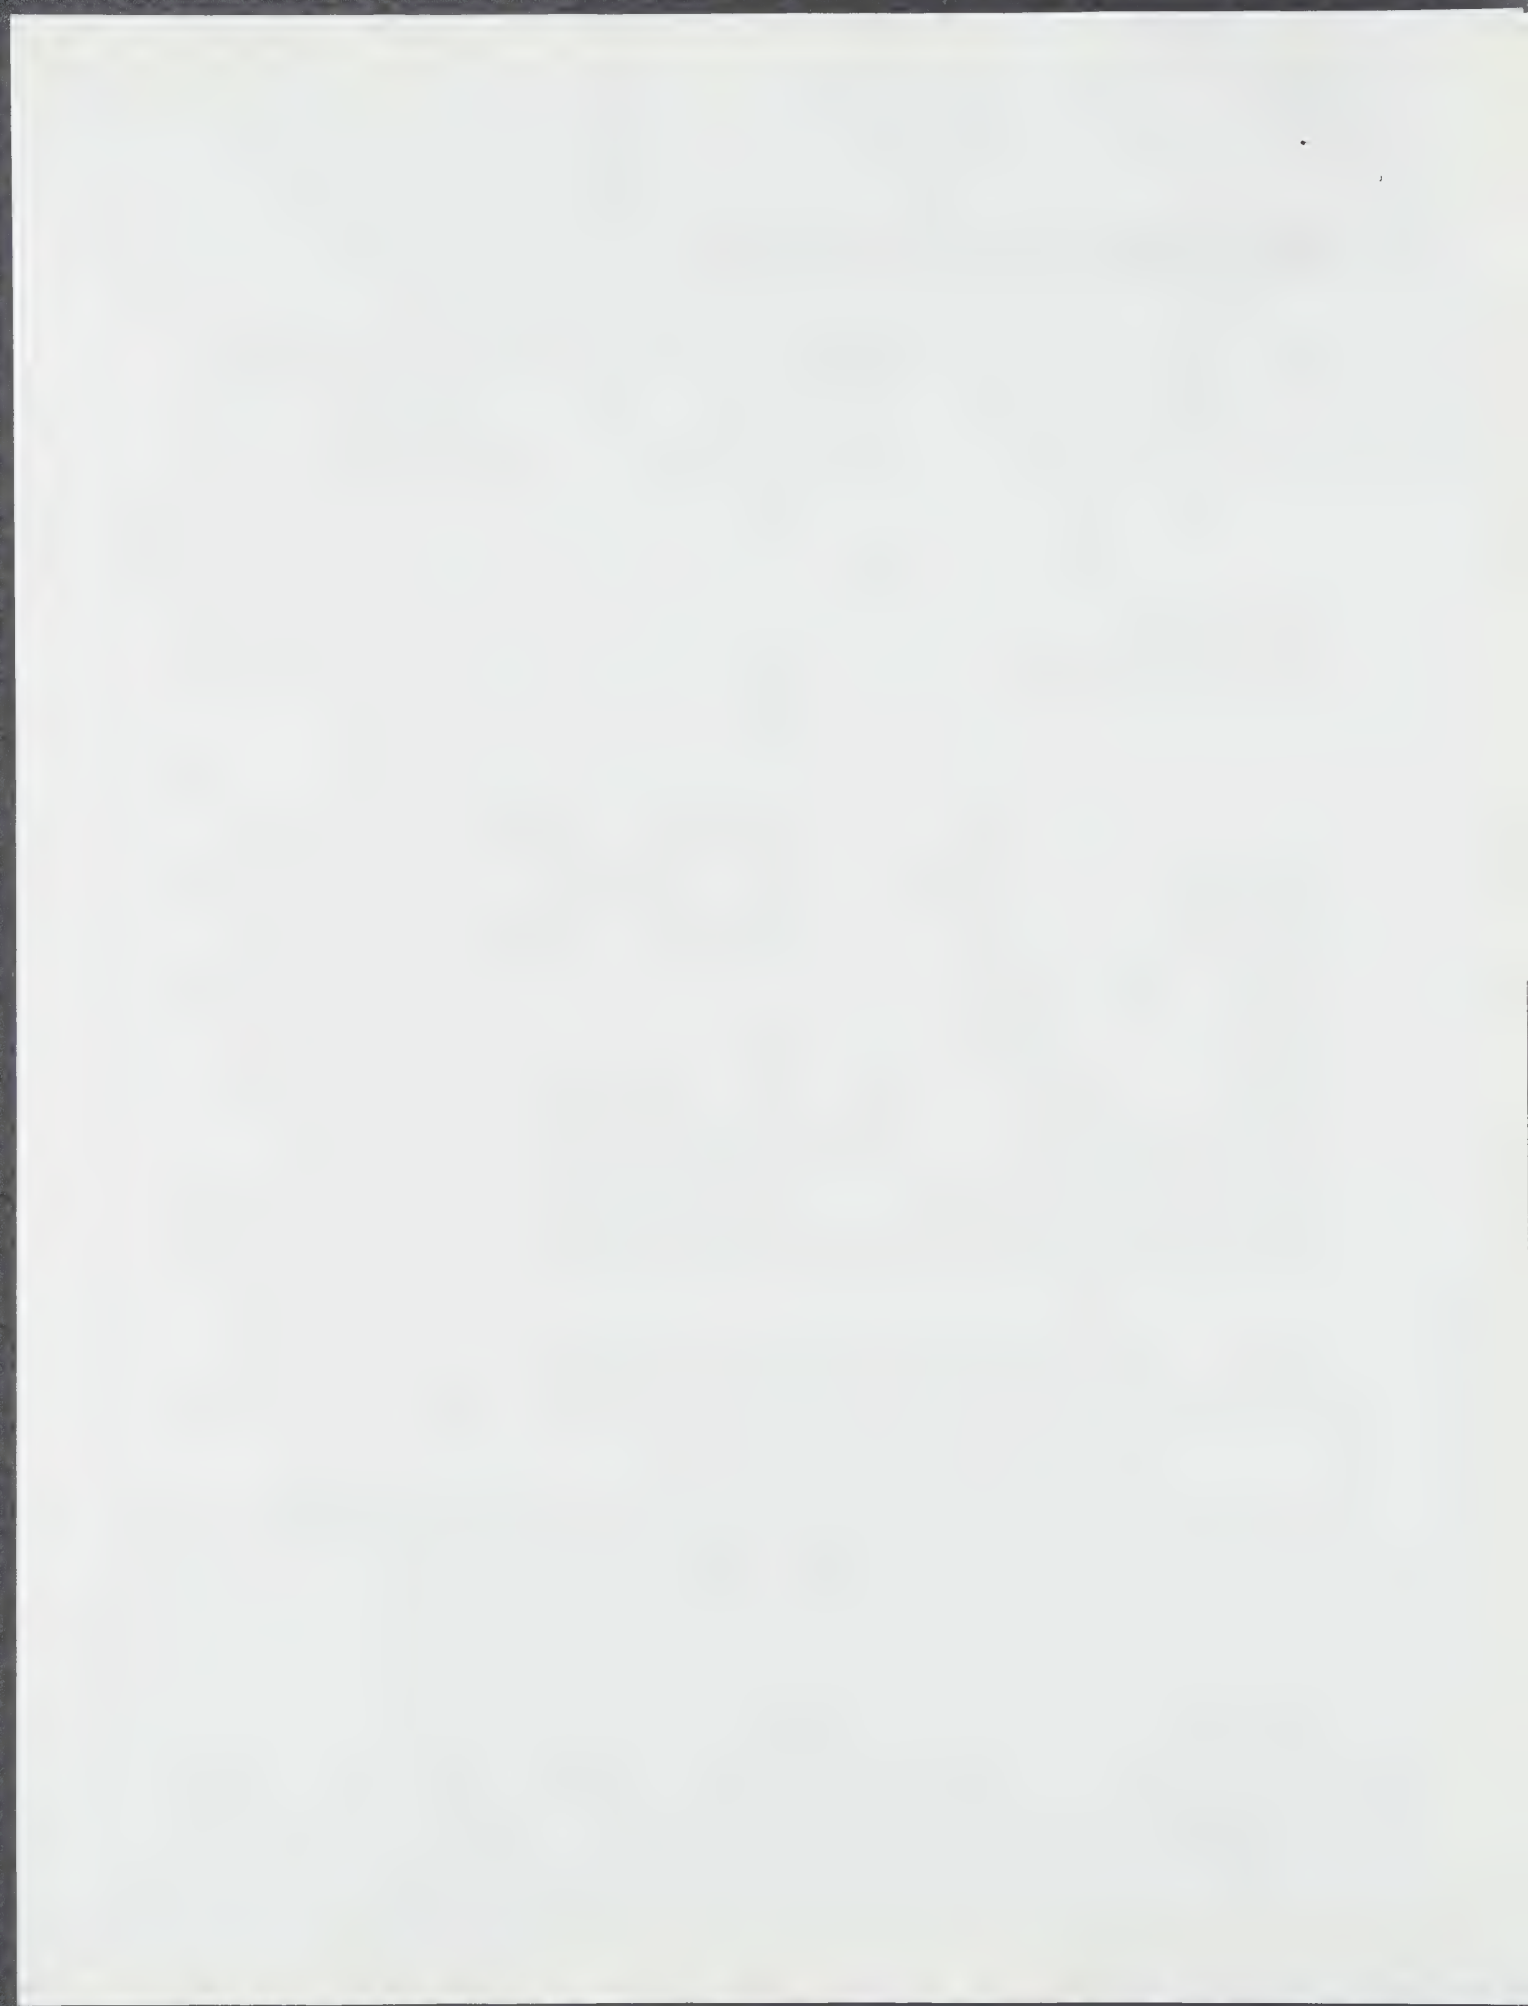

During your last visit you gave two lectures in chemistry classes. These were well received by students and faculty alike and I have been asked by several members of the faculty to see if you are willing to do some of this again.

Once we settle on dates for your visit we can work out a lecture schedule. Regarding your book, we would be pleased to have you bring additional copies. As I believe you know, there was an enthusiastic response last year.

Kindest regards,

Sincerely,

Morton E. Munk

October 13, 1997

Dr. Morton Munk
Chairman, Department of Chemistry & Biochemistry
Arizona State University
PO Box 871604
Tempe, AZ 85287-1604

Dear Morton:

As you know, Isabel and I much look forward to being with you in February.

For a good many years now, we have attended the old master sales in New York, which have generally been held around the middle of January. This year however, to mix customers up, the major sales are on Thursday, January 29 and Friday, January 30. And to make matters worse, the Sotheby's sale on the 30th will include a Rembrandt portrait which I would love to acquire.

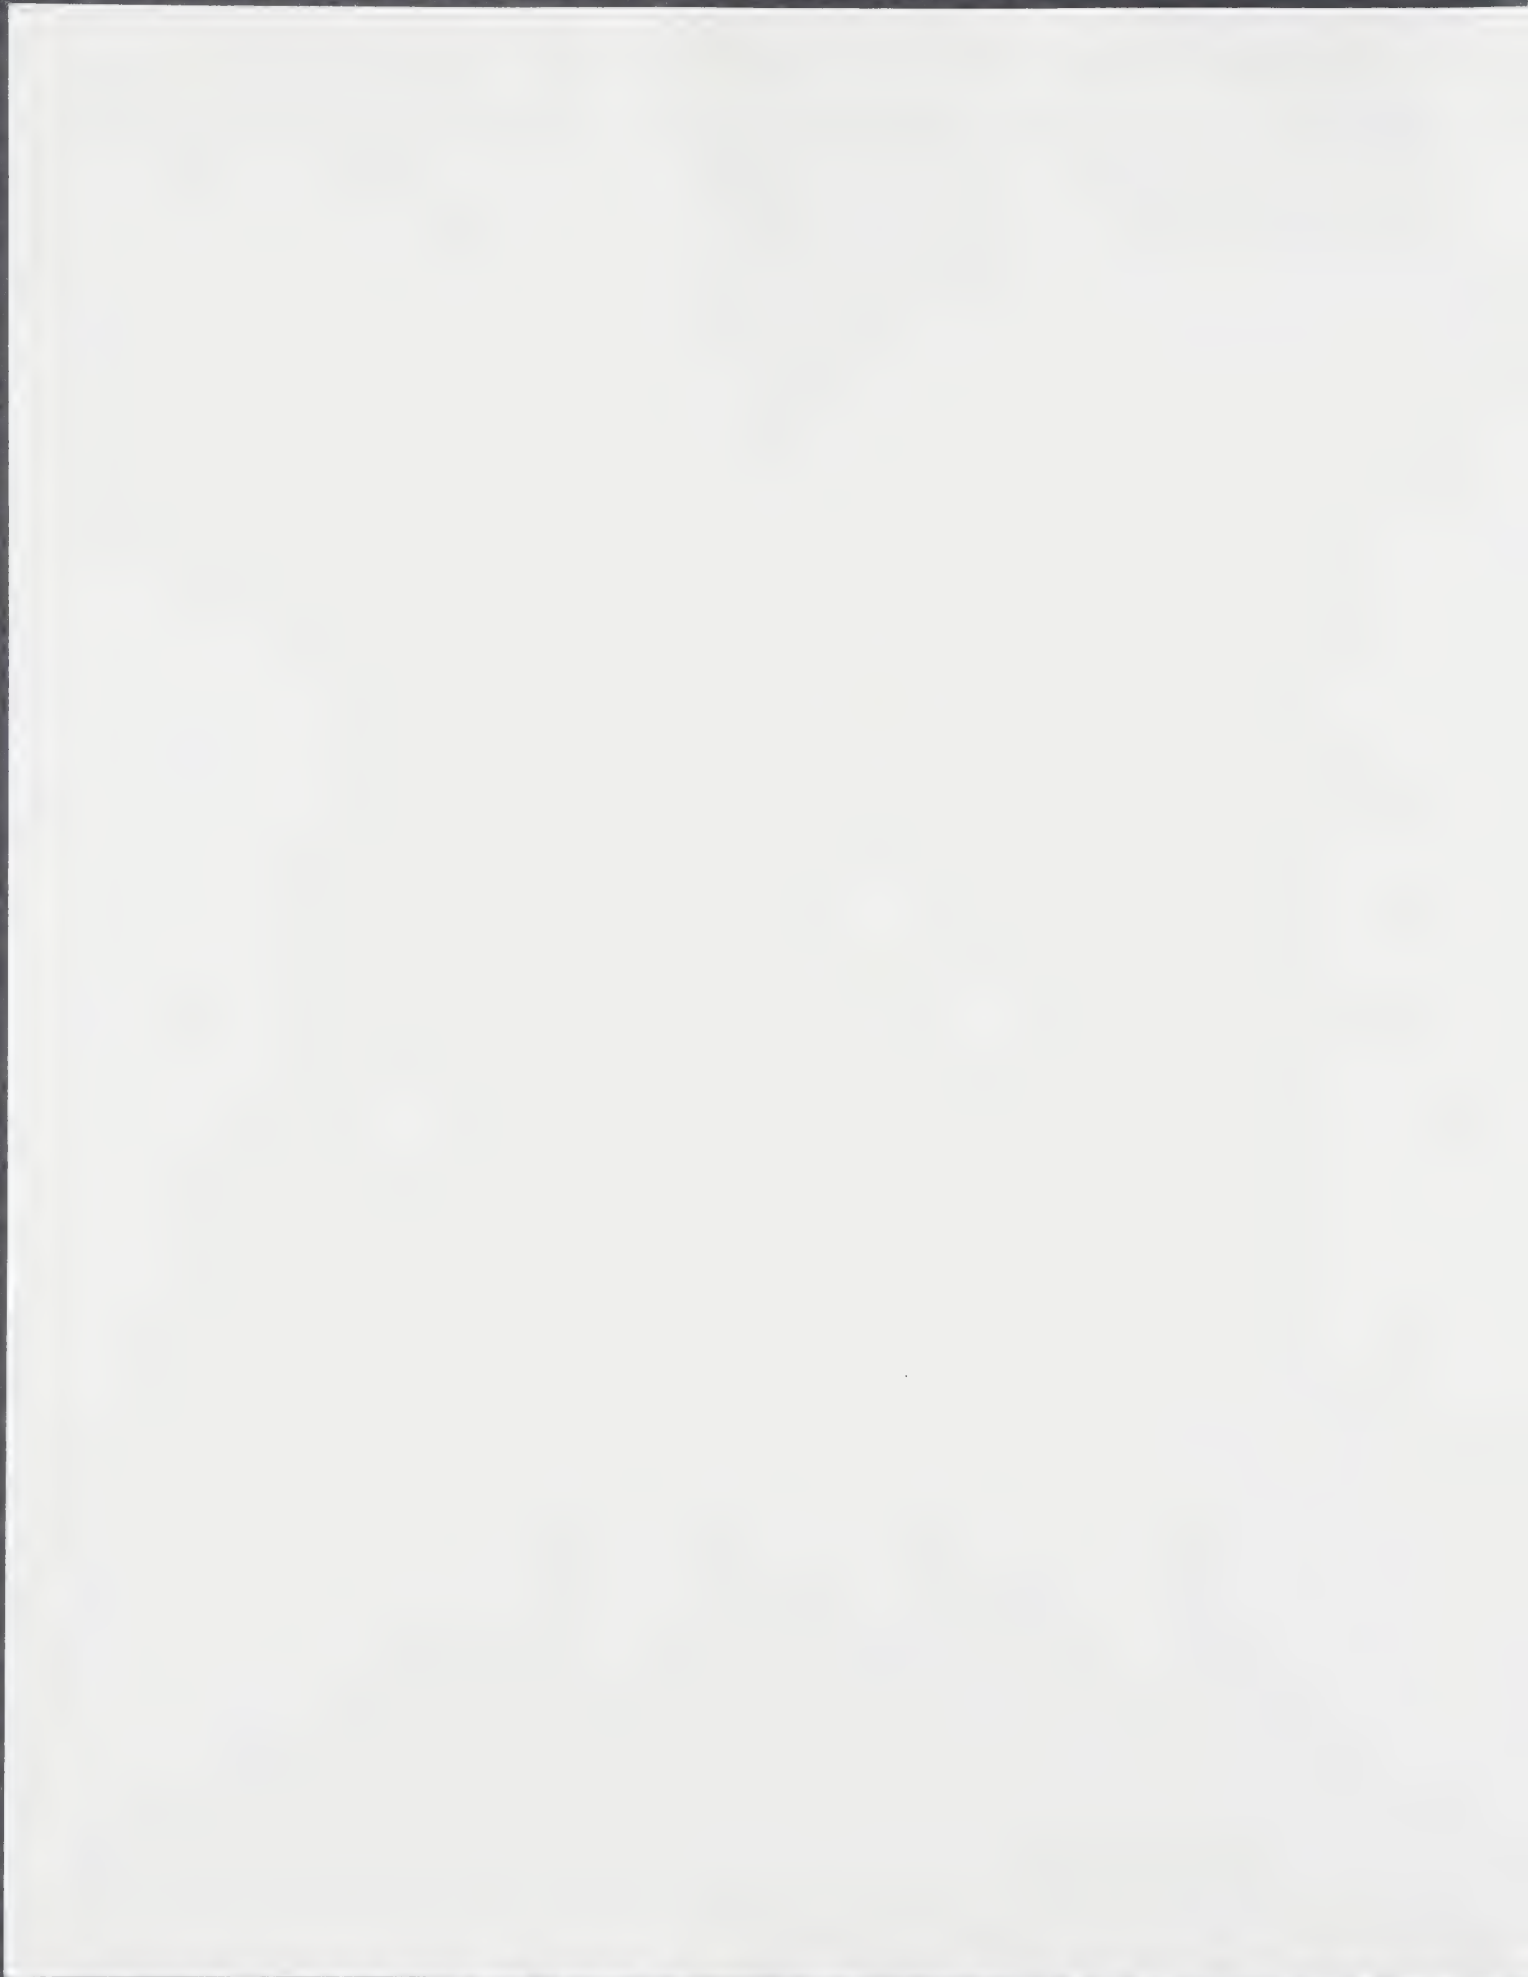

Would it be possible to move my talks by one day so that I could have one working day, Monday, February the 2nd, in Milwaukee?

That is, if possible we would very much like to leave on Tuesday morning, February the 3rd and then return either on Saturday or Sunday, February 7 or 8, to take advantage of the much lower fares if you straddle a Saturday.

I much look forward to hearing from you, and remain,

With best regards,

AB/nik

Arizona State University
PO Box 871604
Tempe, AZ 85287-1604

Dear Morton:

I have checked with our travel agent regarding flights to Phoenix for our visit next February.

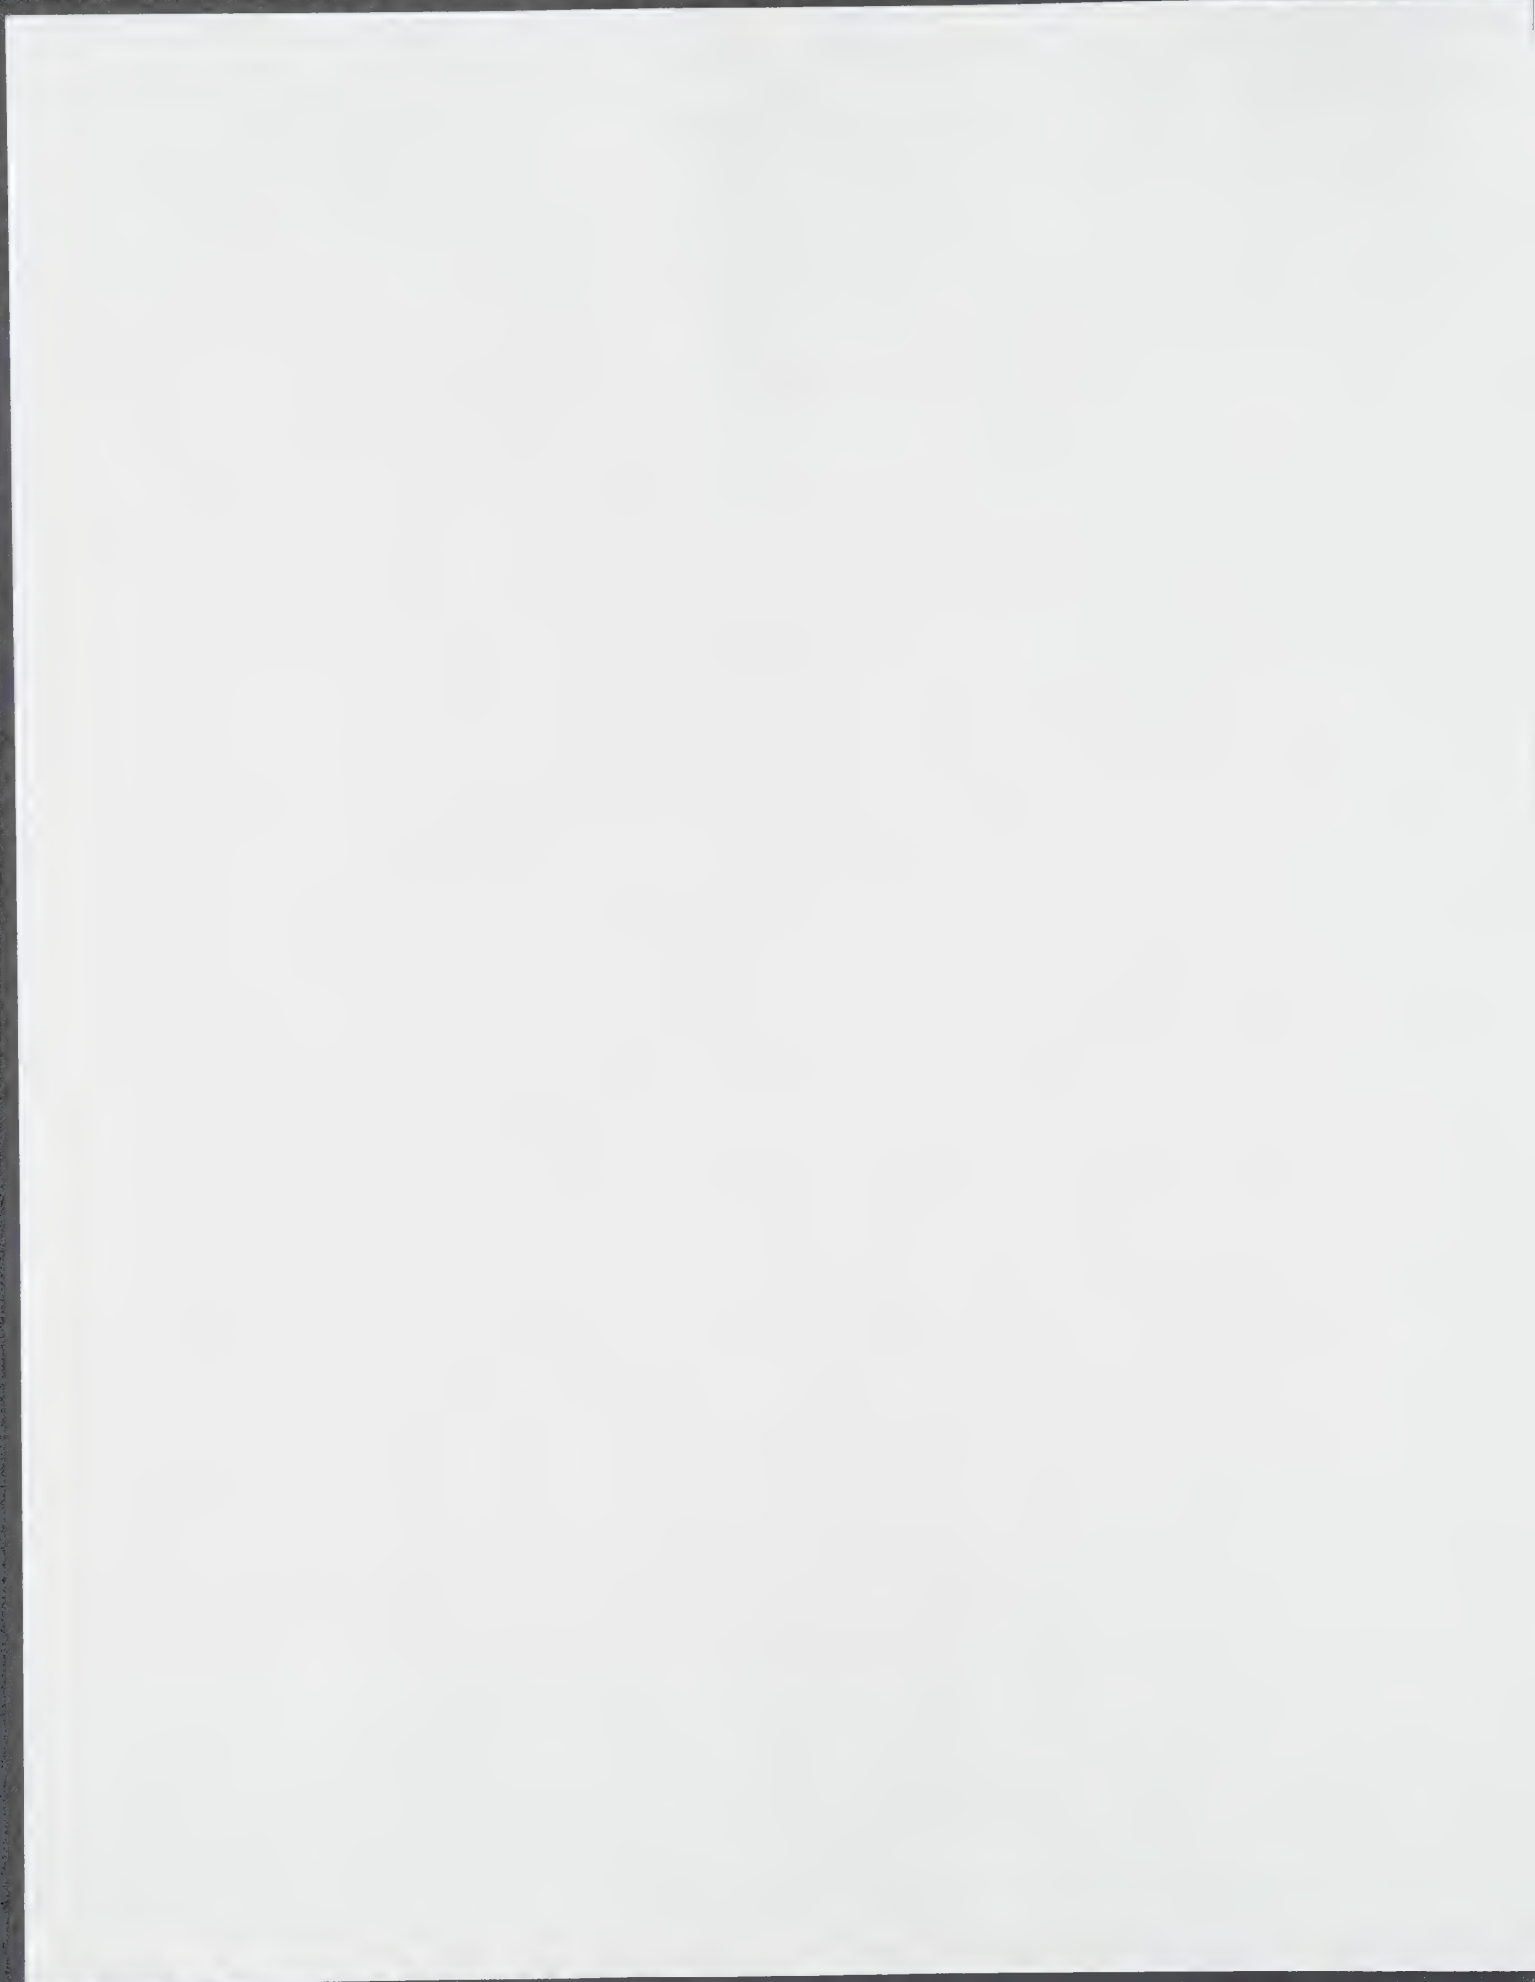

She indicates that both America West and Midwest Express (the best airline in the U.S.) both fly non-stop between Milwaukee and Phoenix. However, schedules and fares for next February won't be available until June. She also says that there are frequent sales on fares to Phoenix and so advises that we wait a bit before settling on the exact days and flights.

Please let me talk to you about this when I return from England and the Continent, next August.

With all good wishes, I remain,

Yours sincerely,

AB/cw

PO Box 871604
Tempe, AZ 85287-1604

Dear Morton:

Of course Isabel and I still remember with great pleasure your wonderful welcome to your department and we would love to come back.

Would the first week of next February be a good time?

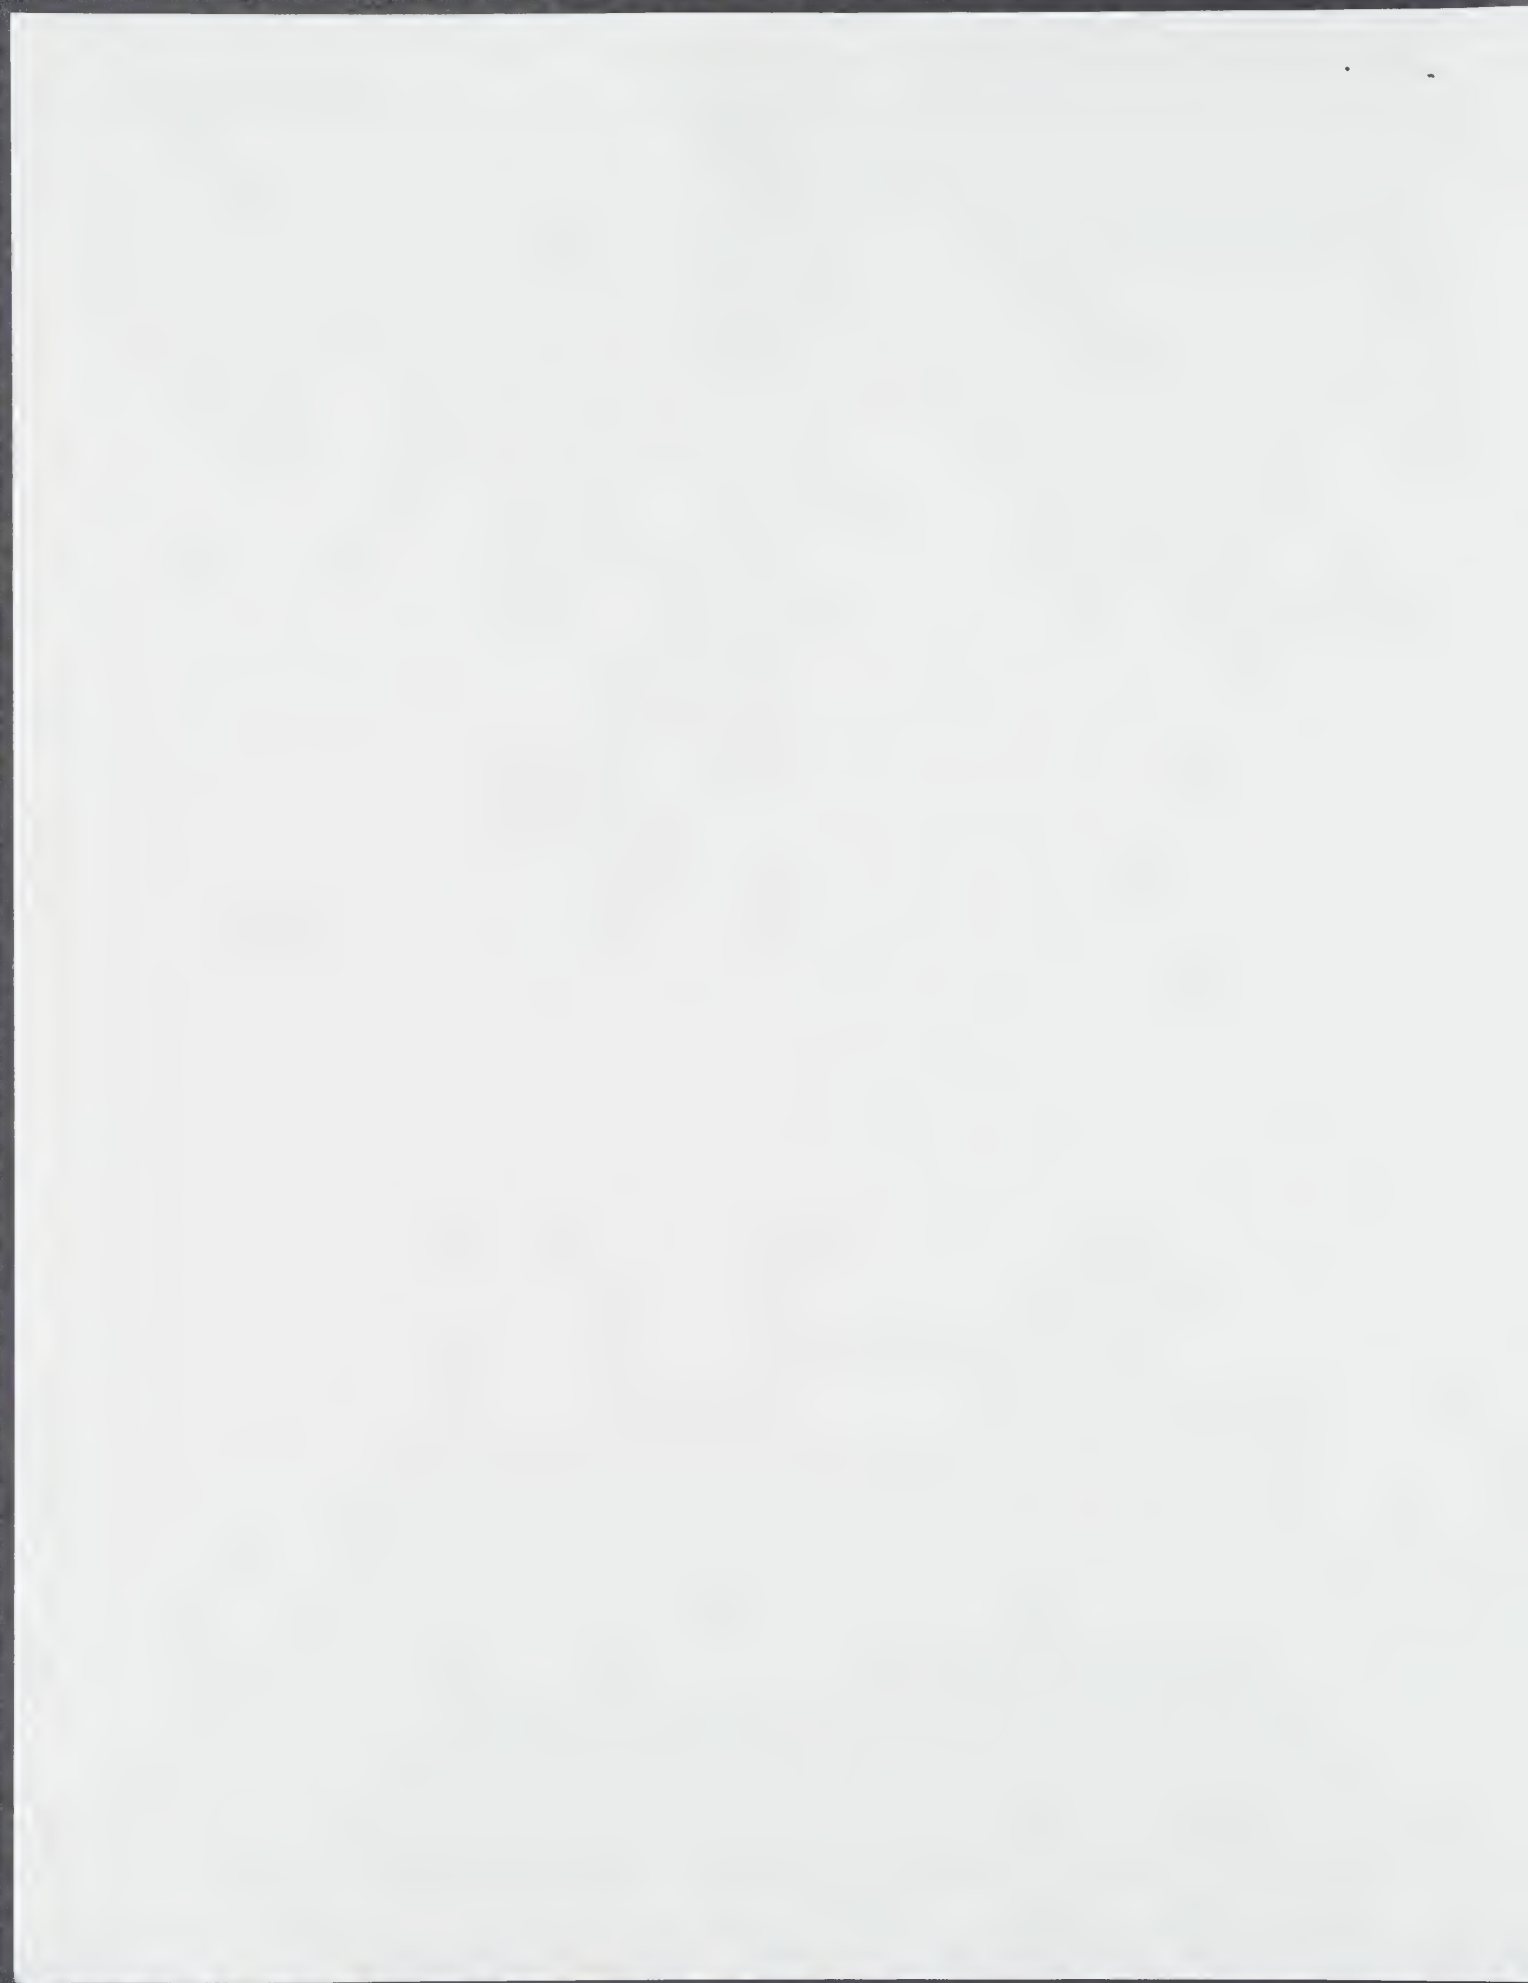

As you will see from the enclosed, my menu of talks has expanded somewhat; do take your pick.

For reasons that I don't quite understand, we have found that my autobiography actually sells better now than it did one or two years ago. Would you allow me to bring some more books for book signings?

With all good wishes, I remain,

Yours sincerely,

Dr. Alfred Bader
924 East Juneau, Suite 622
Milwaukee, Wisconsin 53202

Dear Alfred:

I am writing to extend a cordial invitation to you and Isabel to visit Arizona State University once again this spring. All of us in the department thoroughly enjoyed your lectures last year and the opportunity to meet with you. My colleagues join me in the hope that I can persuade you to visit us again and present some lectures of your choice. I have spoken to Julie Codell of the School of Art and she is equally enthusiastic about another visit and lecture. I would also try very hard to arrange a lecture at the Phoenix Art Museum and somewhere within the Jewish community if you wish.

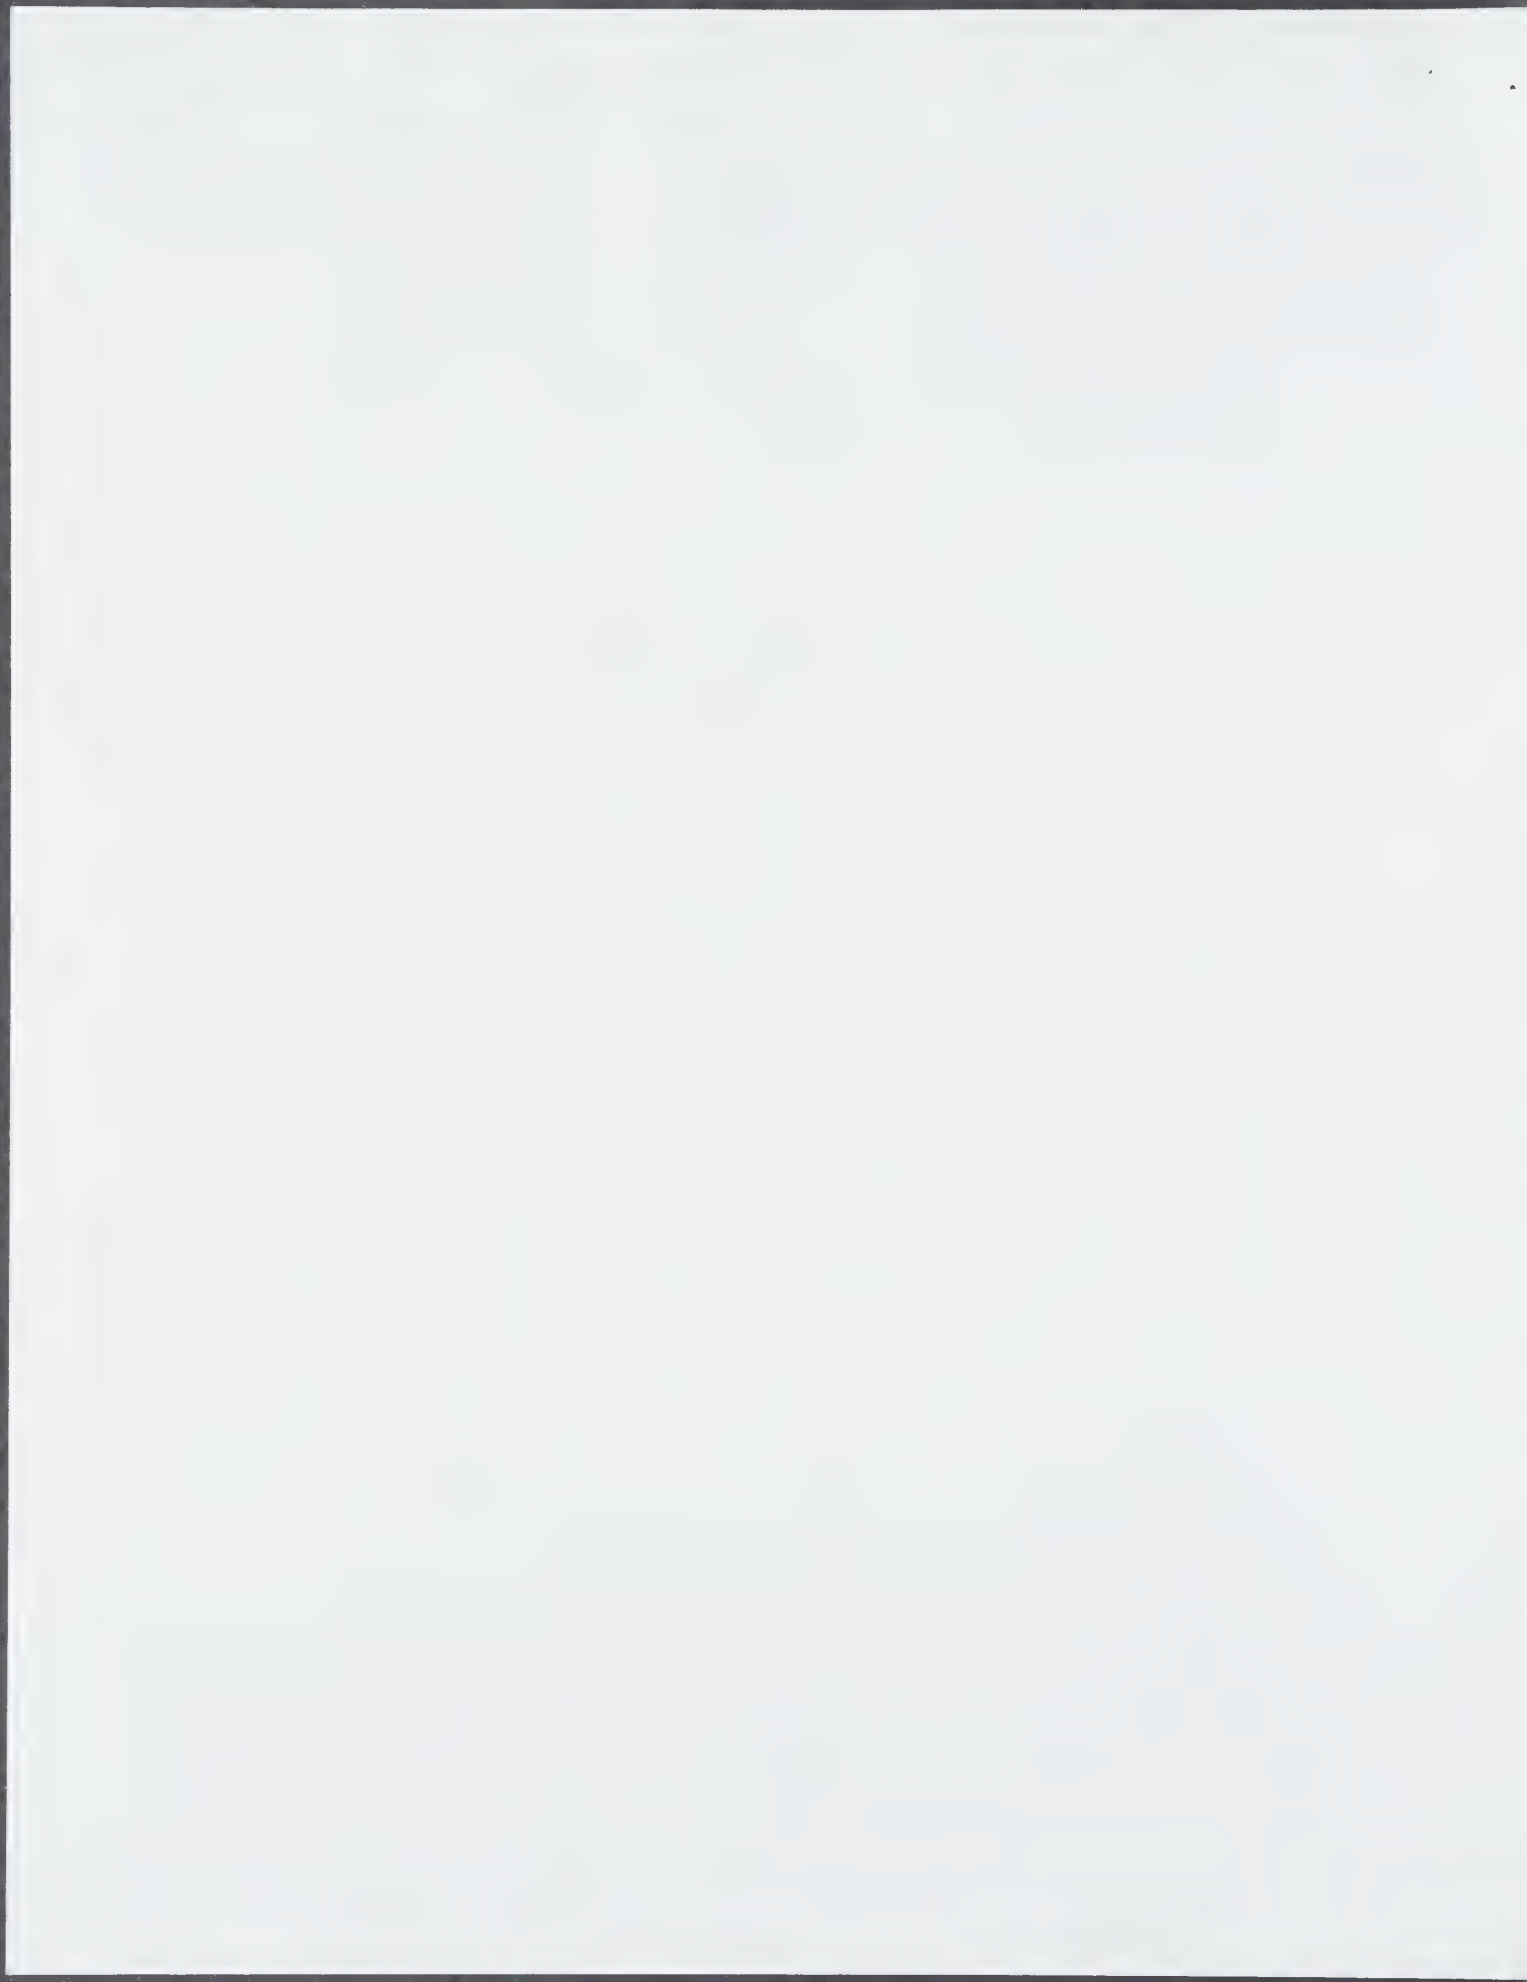

I do hope that it will be possible for you to accept our invitation. I can assure you and Isabel of a warm welcome. We will try to arrange a time convenient for you.

Best wishes for a healthy and rewarding New Year.

Sincerely,

Morton E. Munk

May 3, 1996

Dr. Morton Munk
Chairman, Chemistry Department
Arizona State University
PO Box 871604
Tempe, AZ 85287-1604

Dear Morton:

I am sorry that two lecture trips to Illinois and San Diego have delayed my responding to your gracious letter of April 16th.

There is no question in my mind whatever that the Actinobolin belongs to you. Parke, Davis gave it to you over 30 years ago, and of course, you are free to do with it whatever you like.

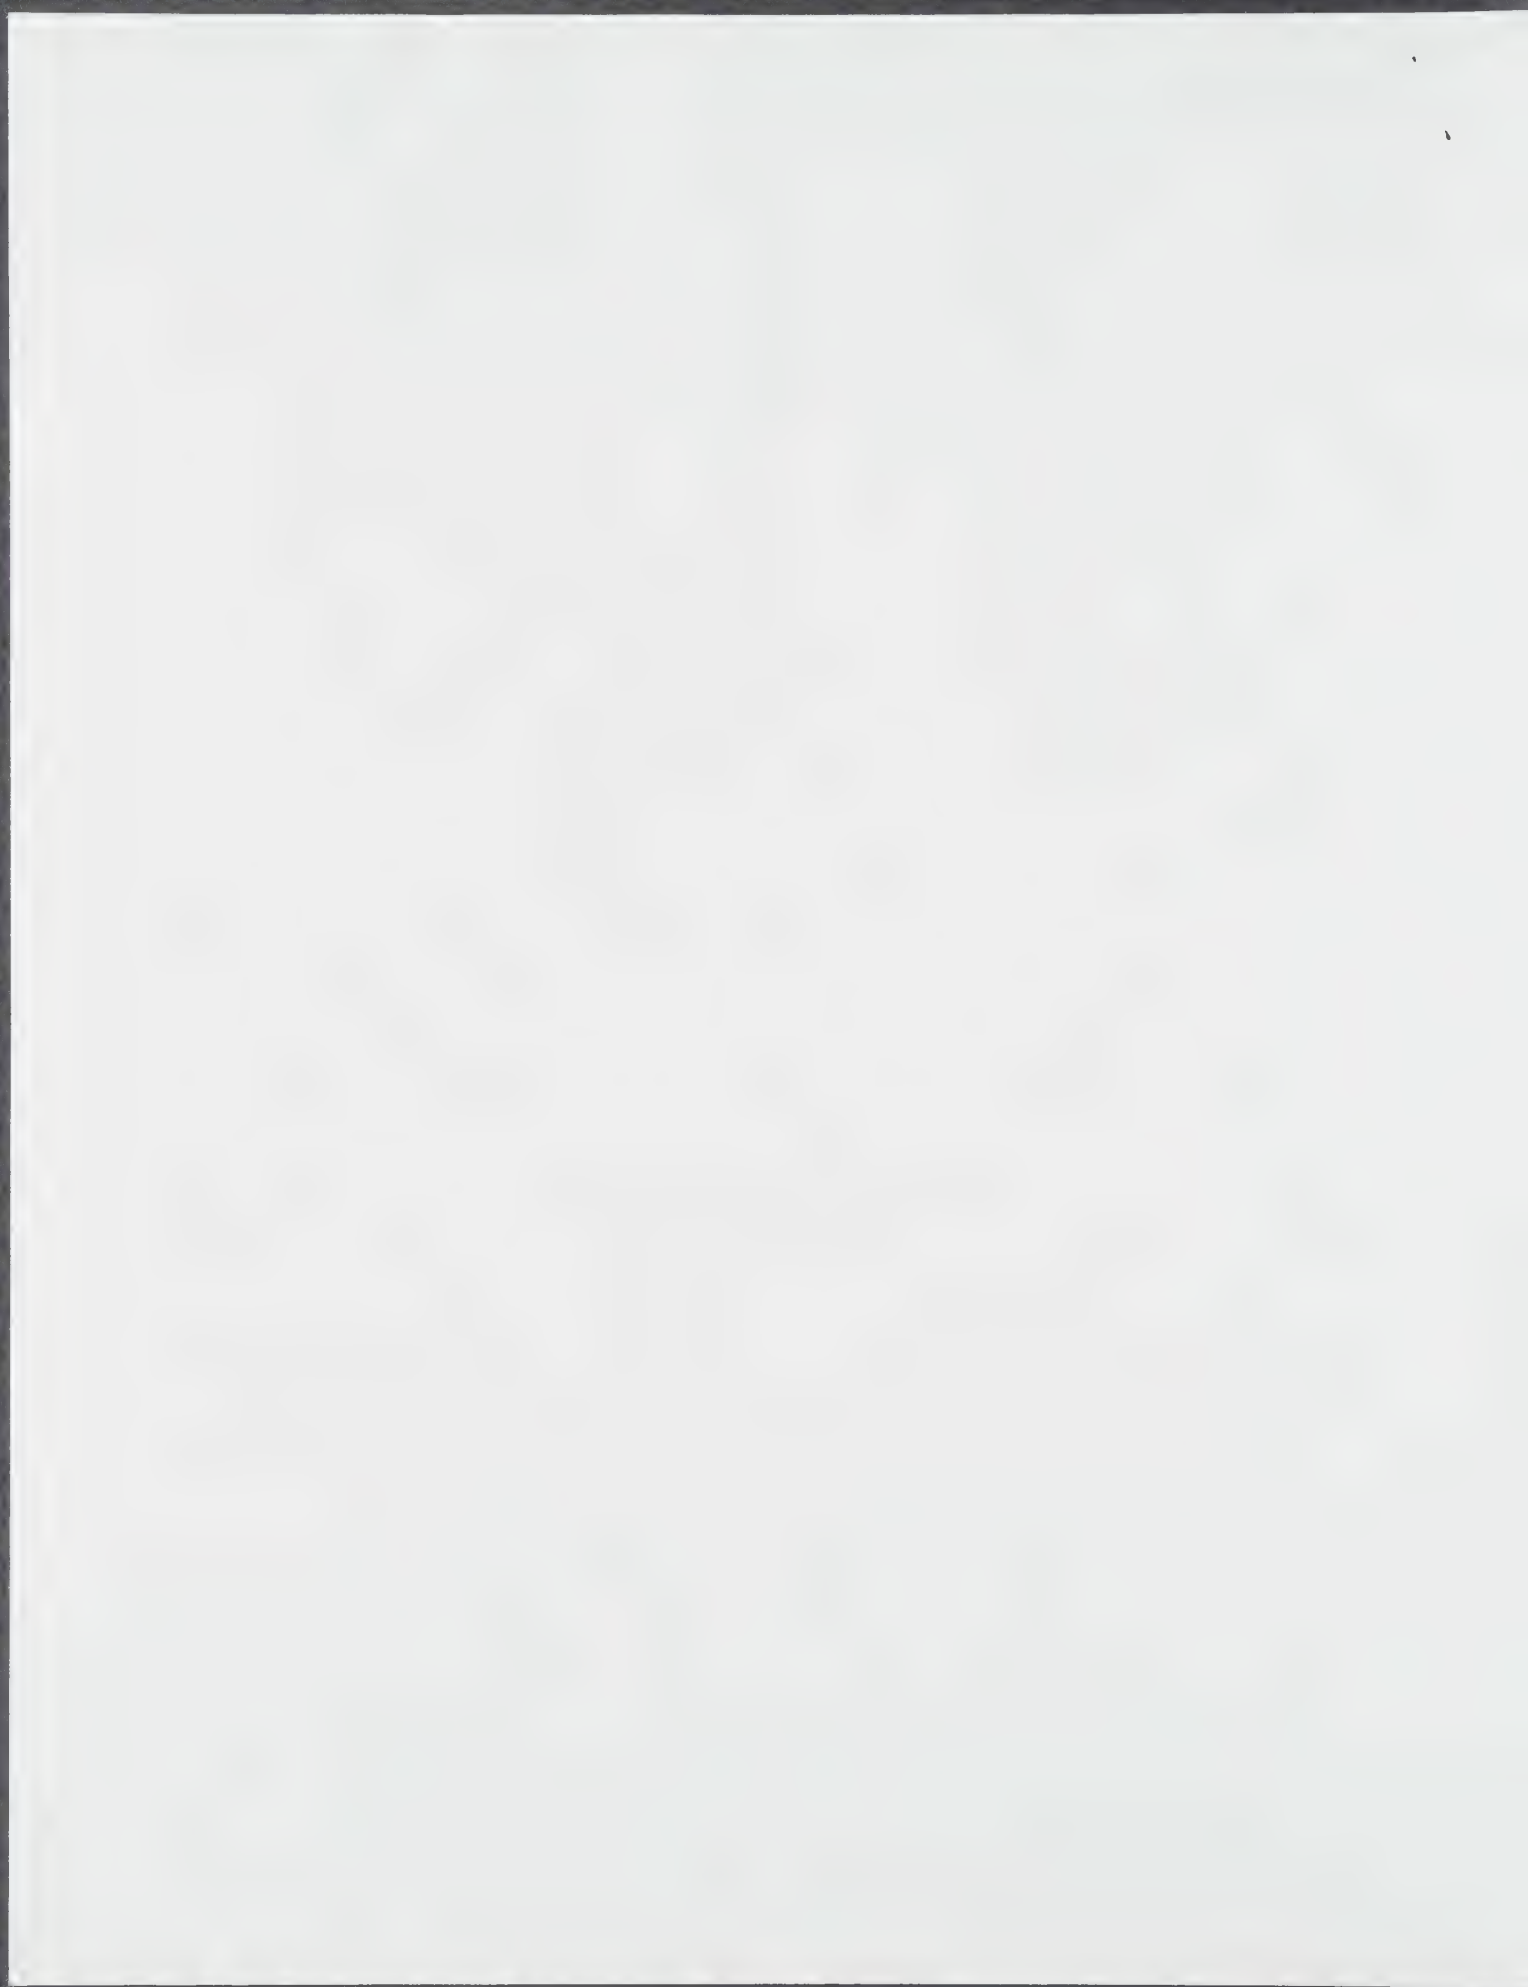

It is a very interesting compound that should, I believe, be listed - albeit in small quantities - by Aldrich and perhaps also with Sigma. I have discussed this with Dr. Steven Branca, the vice president at Aldrich working on the acquisition of new products, and he will be in touch with you regarding a purchase.

With all good wishes to you, Rosalind and Betty, I remain,

Yours sincerely,

AB/cw

c: Dr. Steven Branca

16 April 1996

Dr. Alfred Bader
924 East Juneau, Suite 622
Milwaukee, WI 53202

Dear Alfred:

On behalf of the Department of Chemistry and Biochemistry, I want to express my deep appreciation to you for the series of lectures presented to faculty and students and for taking some extra time to meet informally with some of our graduate and undergraduate students. It is not often enough that our students can personally meet and talk face-to-face with successful scientists from the industrial sector, especially someone with your experience and insight. It was a wonderful opportunity for the students and I had very positive feedback from them. But, overall, the most important events of your visit were the many lectures you delivered in the department. They were timely, interesting, pertinent and superb.

I saw Julie Codell yesterday for the first time since your lecture in the School of Art. She told me that she received very favorable comments about your lecture.

On a more personal level, it was a great pleasure to meet and spend some time with you and Isabel. I can tell from meeting the two of you, and from your book Alfred, that you are a very special couple.

I was pleased to provide a small sample of Actinobolin for the Aldrich Library and I would be willing to increase that by 100-200 grams. Actinobolin was isolated by Parke, Davis and Company. They gave me a large sample for structure studies back in 1961 or 1962. What I now have left is from that original sample. My concern is this: Is that material still their property? Do I have the right to sell some to Aldrich without their approval? Please share your thoughts on this matter with me.

Once again, let me say how fortunate we were to have you as a guest lecturer. If I have my way, we will be equally fortunate next year.

Kindest regards.

Sincerely,

Morton E. Munk
Chair

To: DR. MORTON MONK
Chairman, Chemistry Department
Arizona State University

Fax: 602/965-8607

Dear Professor Monk:

Isabel and I very much look forward to being with you from March 23rd through the 27th. As you know, we plan to arrive by America West Flight #656 at 6:41 pm on Saturday and to leave at 6:11 pm on Wednesday.

Thus far, I believe only three talks have been set up, namely Talk #3 for Monday, Talk #5 for Tuesday and Talk #2 for Wednesday.

However, there is a fair amount of overlap between Talks #2 and #3, and if both are to your Chemistry Department, I wonder whether you might not like to change the talk on Wednesday to Talk #1 on the history of the Aldrich Chemical Company.

Beyond that, I would very much like to be able to give more than just one talk a day. Thus, for instance, Talk #4 would be of interest to art historians, students of the Bible, and the Jewish community. Talk #7 would be appropriate for your art museum.

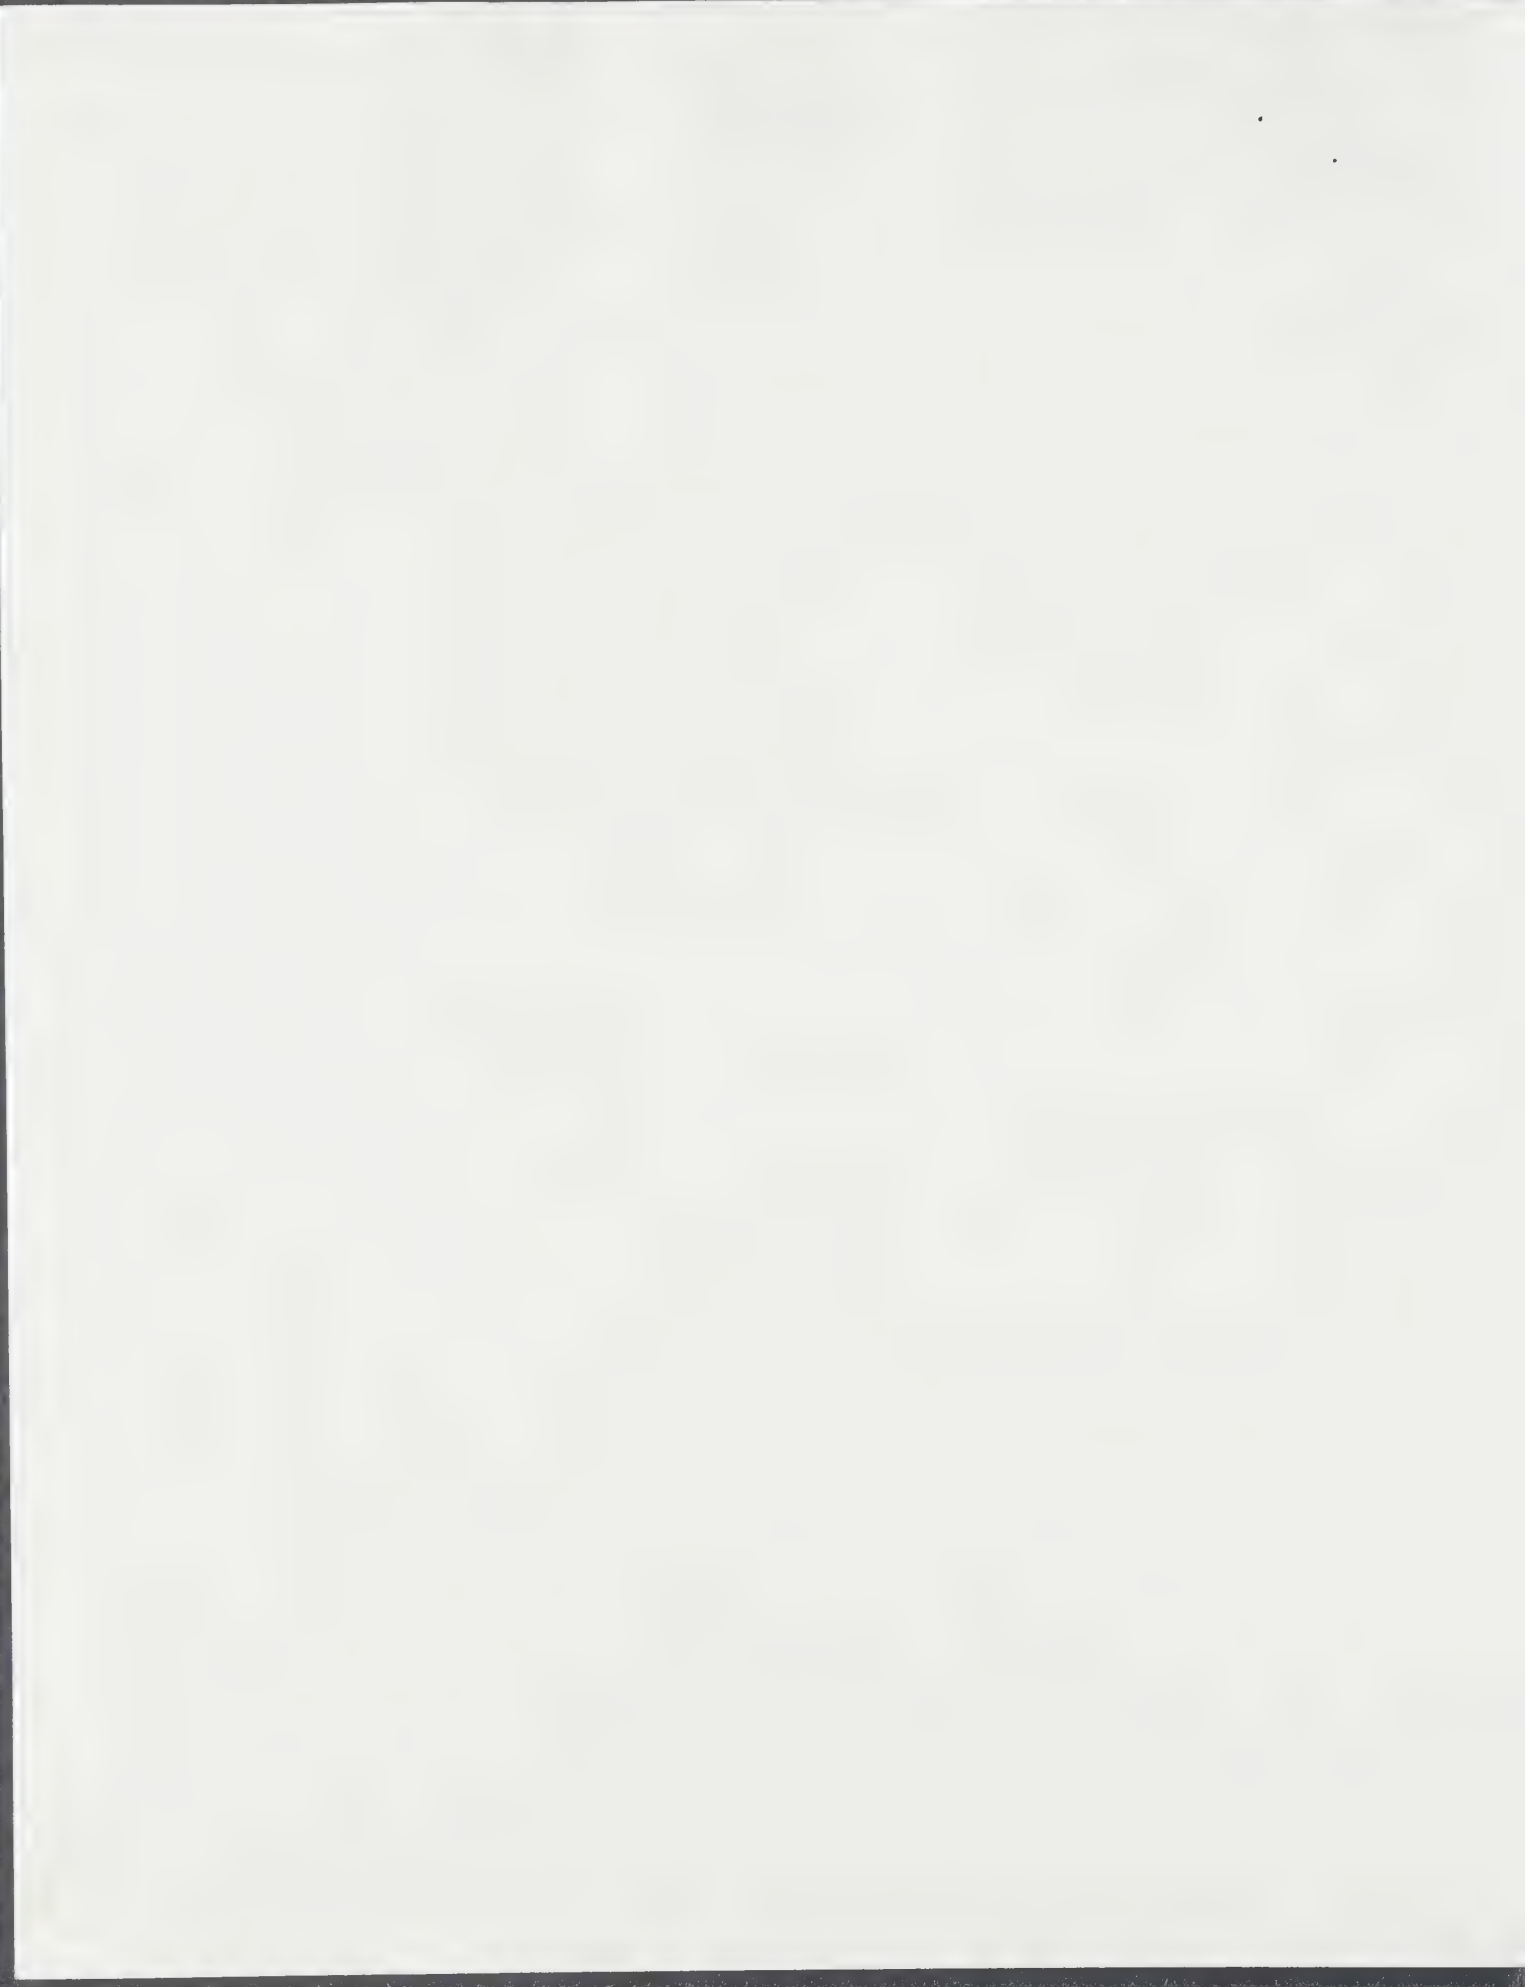

I have often given six to seven talks in a three-day period and much prefer being kept busy.

Also, you may recall that in my letter to you of January 4th, I inquired about the possibility of having a book-signing of my autobiography. However, you never replied to tell me how many books we should take along. We could carry up to 20 fairly easily, and if all sold, your department would earn \$250. If, however, you think that more might be required, then we should make a UPS shipment soon.

I much look forward to hearing from you and remain,

Yours sincerely,

AB/cw

January 4, 1996

Dr. Morton Munk
Chairman, Chemistry Department
Arizona State University
Main Campus
PO Box 871604
Tempe, AZ 85287-1604

Dear Professor Munk:

Further to your correspondence with Ms. Cheryl Weiss, I have penciled in March 25-27 for possible lectures at your University.

Of course, I hope that you will be able to invite me to give several lectures. I am often invited to give between three and seven, and the enclosed reviews of talks given at the University of Alberta last April are relevant.

I understand from your office that you will not be back until the week of January 15th, and I look forward to discussing the details of my trip with you then.

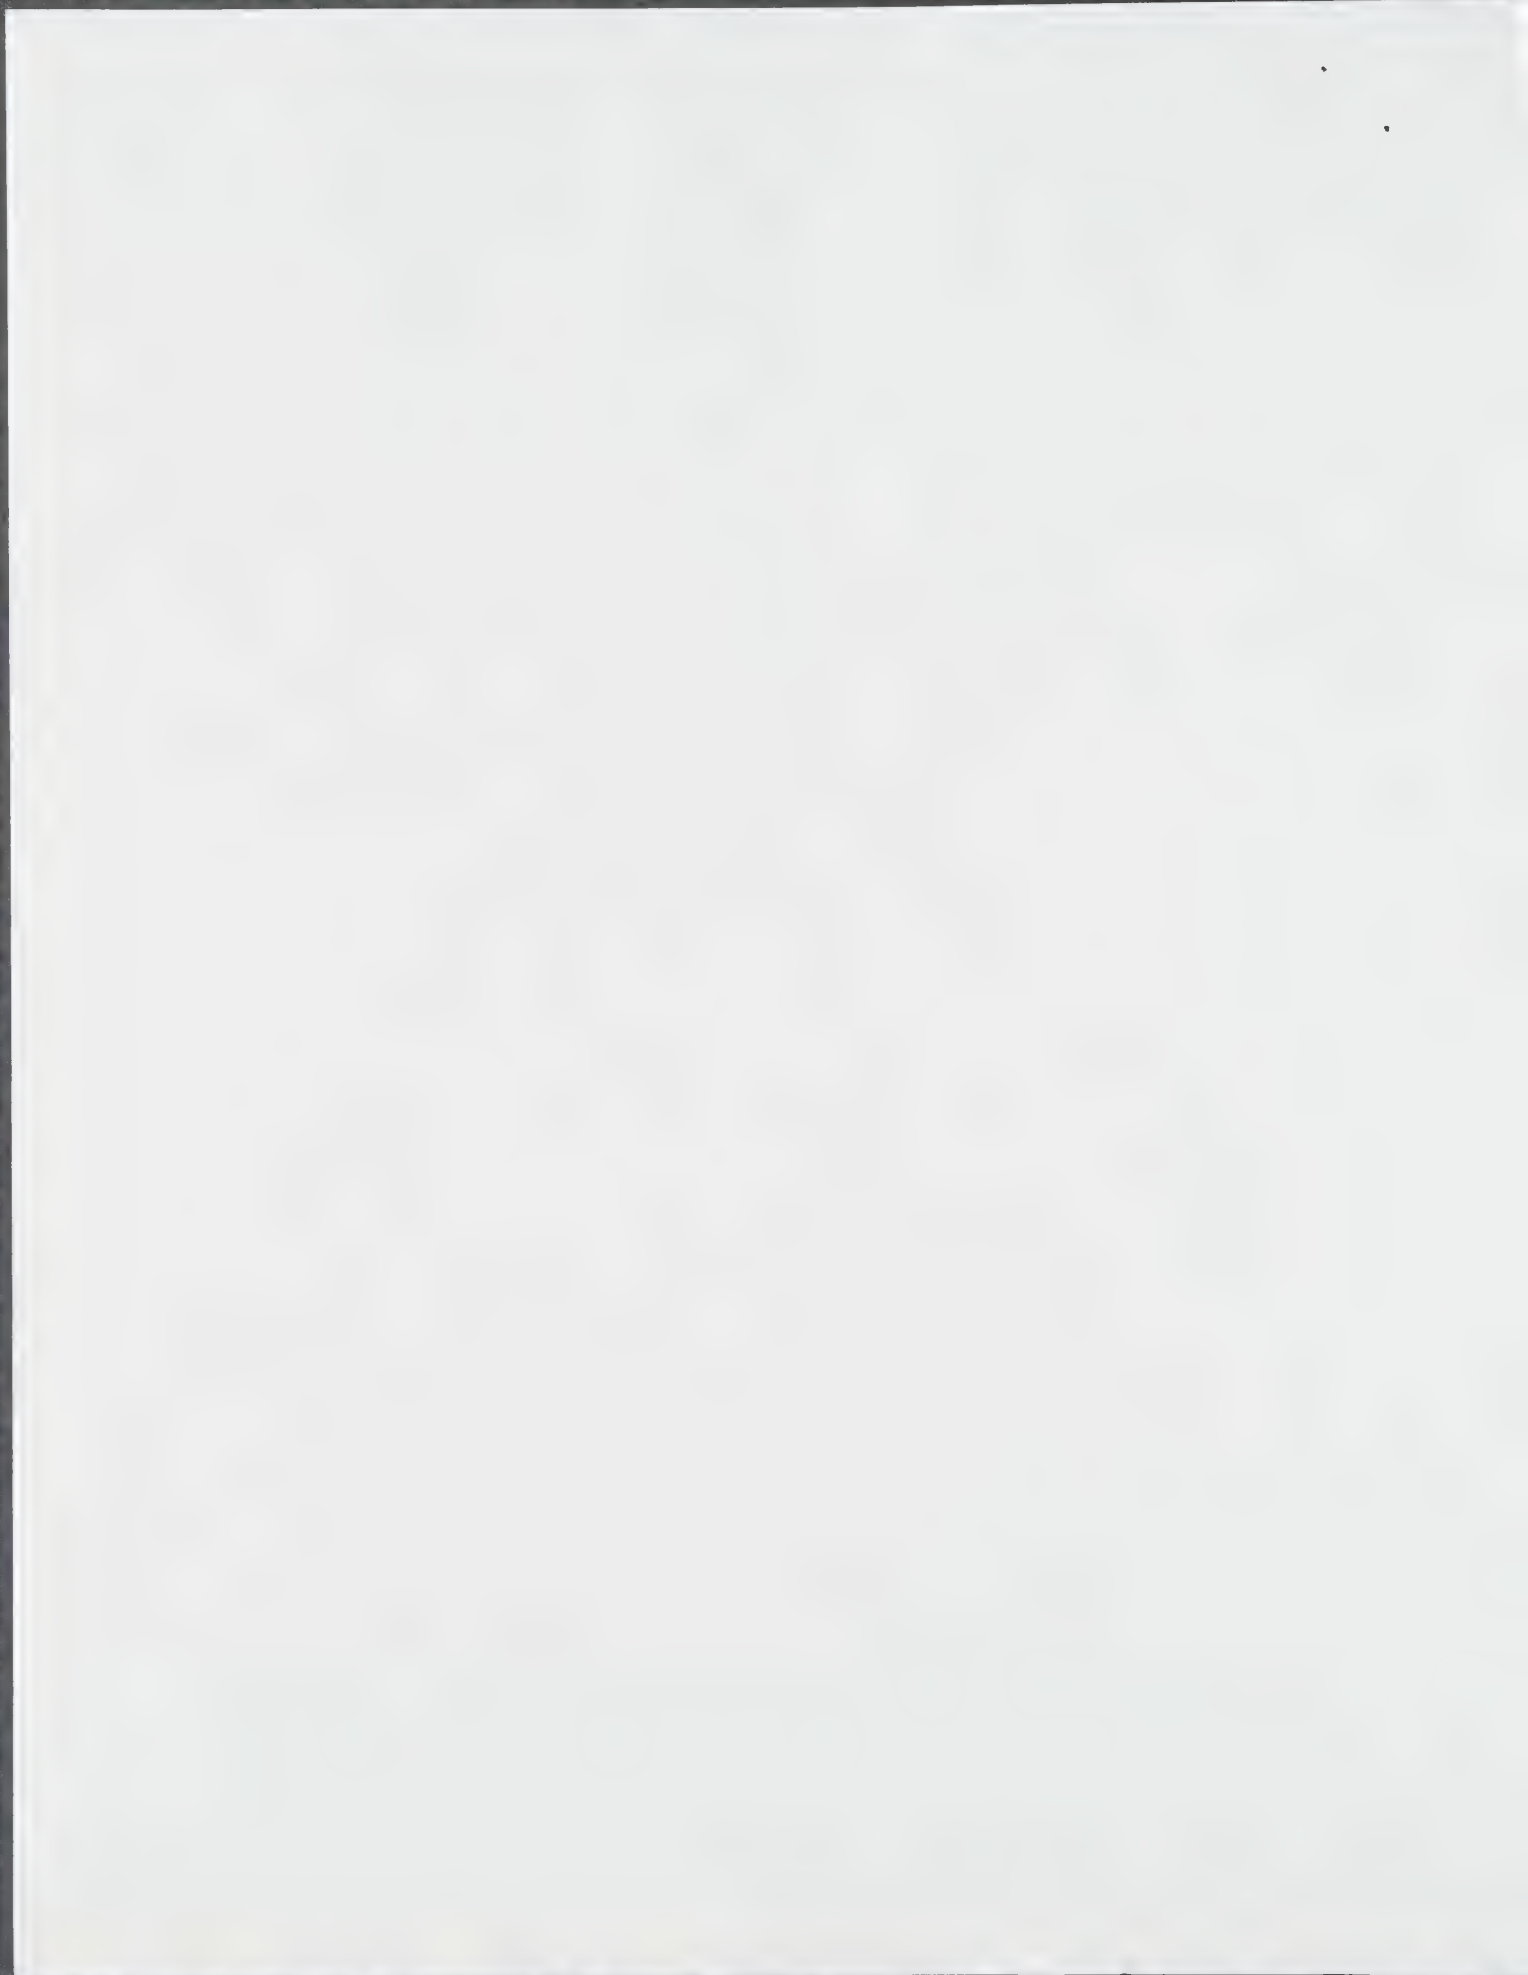

I hope that you will understand that I would like to travel with my wife, Isabel, and travel expenses would be considerably lower if we could stay with you over a Saturday. Hence, consider the possibility of talks also on March 23rd and 24th.

You might also like to consider book-signings of my autobiography, and I enclose two book reviews. The books would be sold at \$25.00 each, but the selling organization would pay only \$12.50, thus contributing towards the expenses involved.

With all good wishes for 1996, I remain,

Yours sincerely,

AB/cw

Dr. Morton Monk
Chairman, Chemistry Department
Arizona State University
Main Campus
PO Box 871604
Tempe, AZ 85287-1604

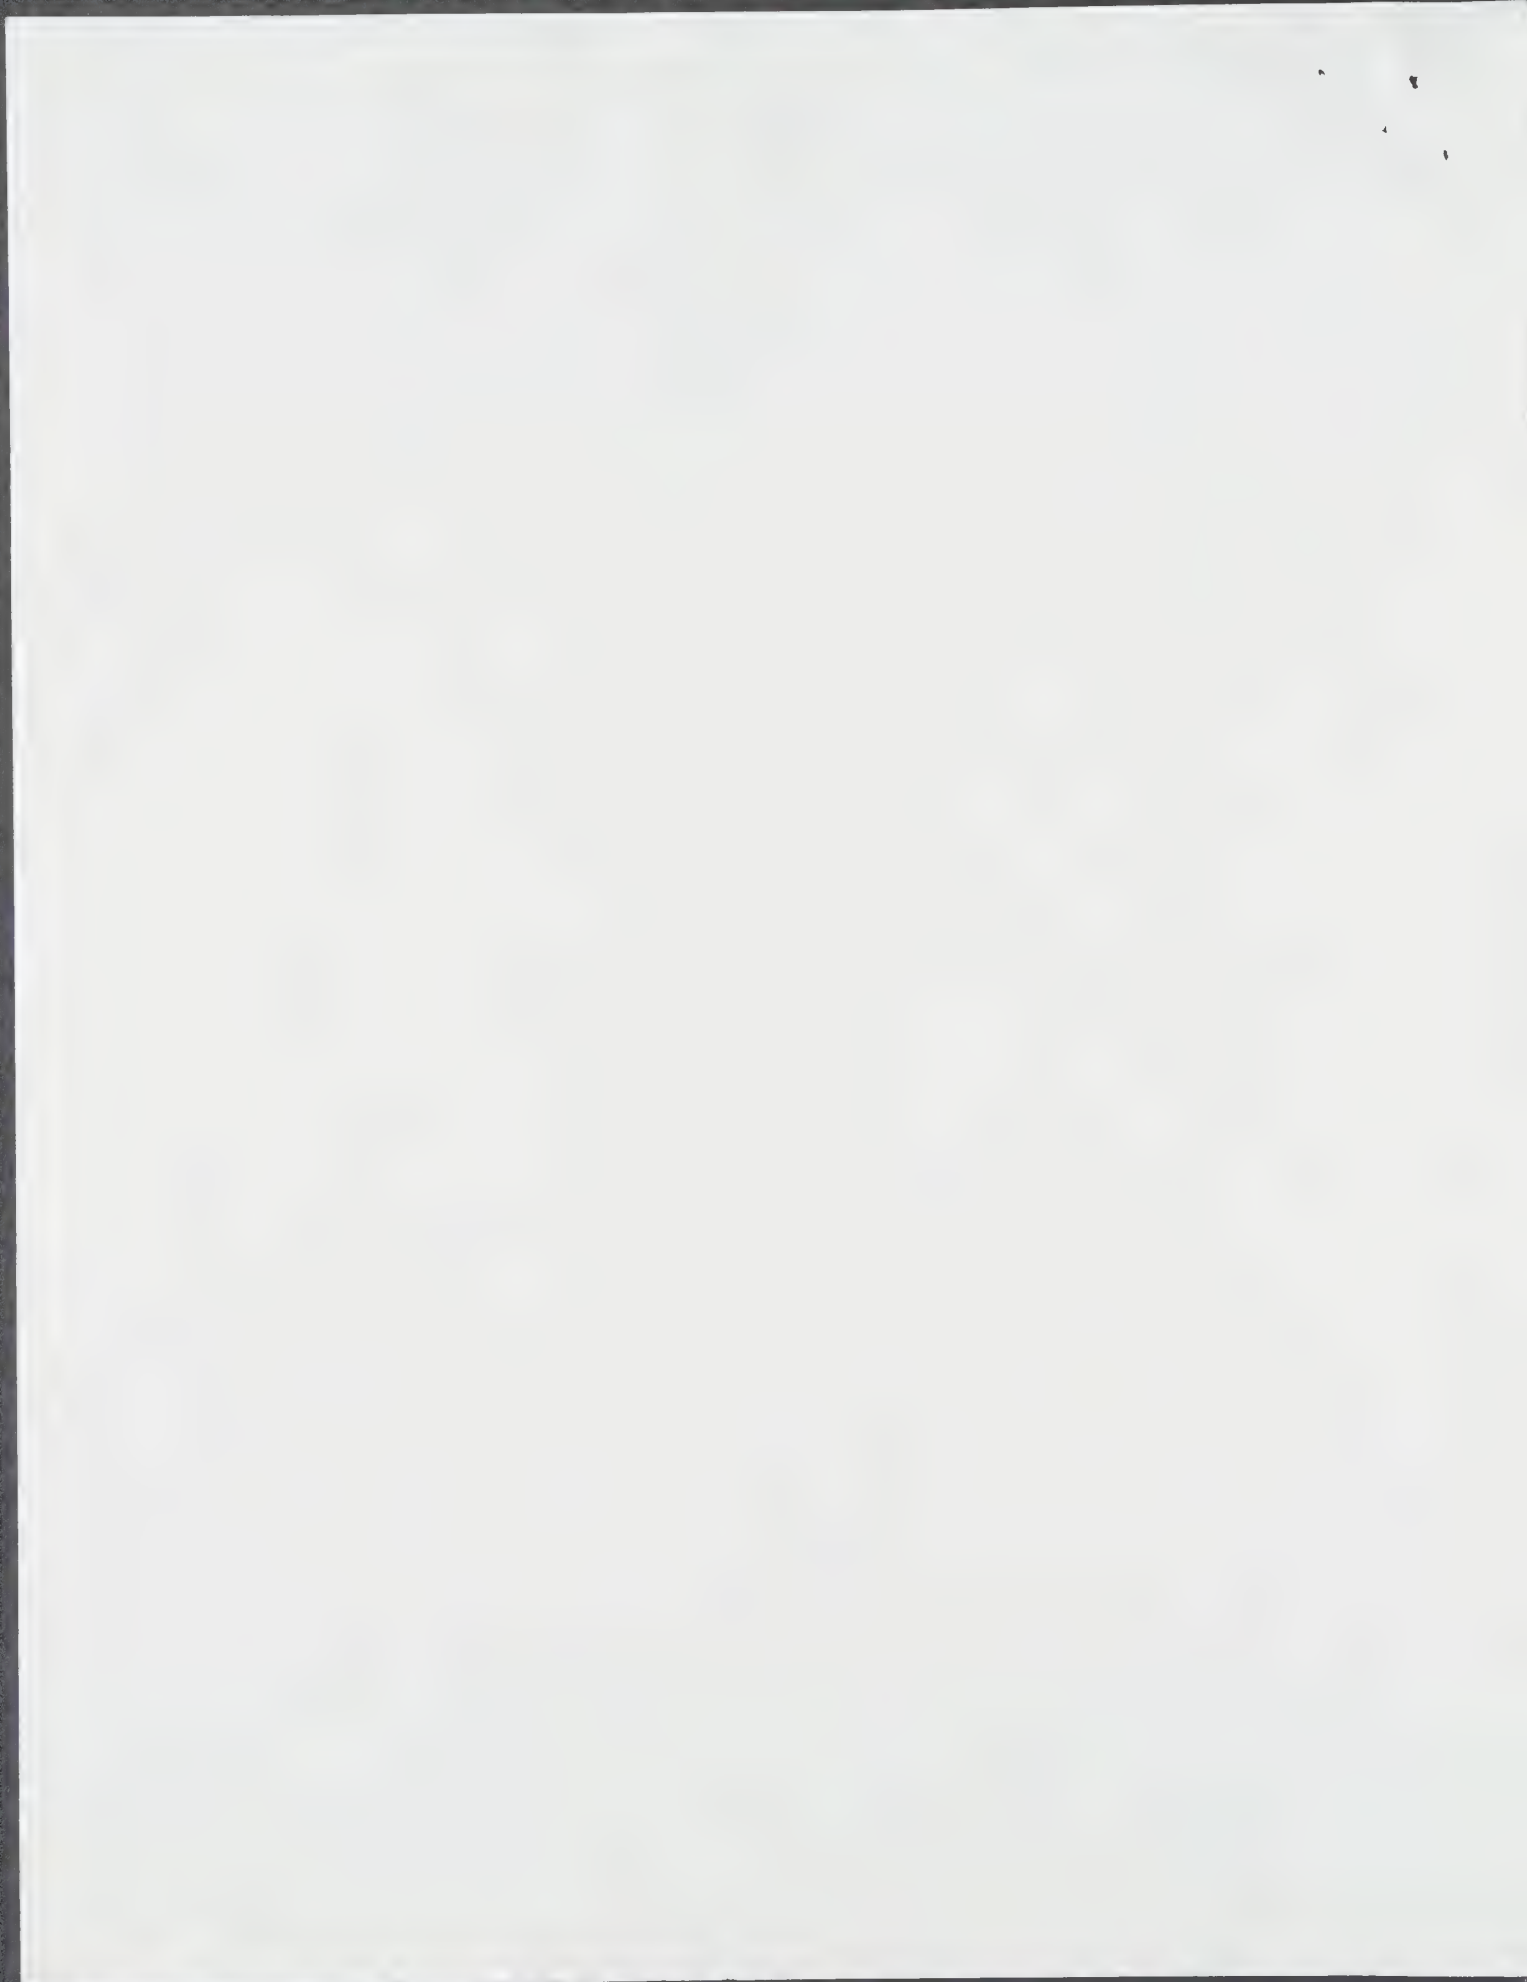

Dear Dr. Monk:

Thank you for your letter of November 29th to Dr. Bader regarding his visit to ASU.

As you know, he is in England through the end of December and will be in contact with you personally upon his return to Milwaukee to finalize the details of his trip.

Best wishes,

Cheryl Weiss
Office Manager

To: DR. MORTON MONK
Chairman, Chemistry Department
Arizona State University
Fax: 602/965-8607

Dear Dr. Monk:

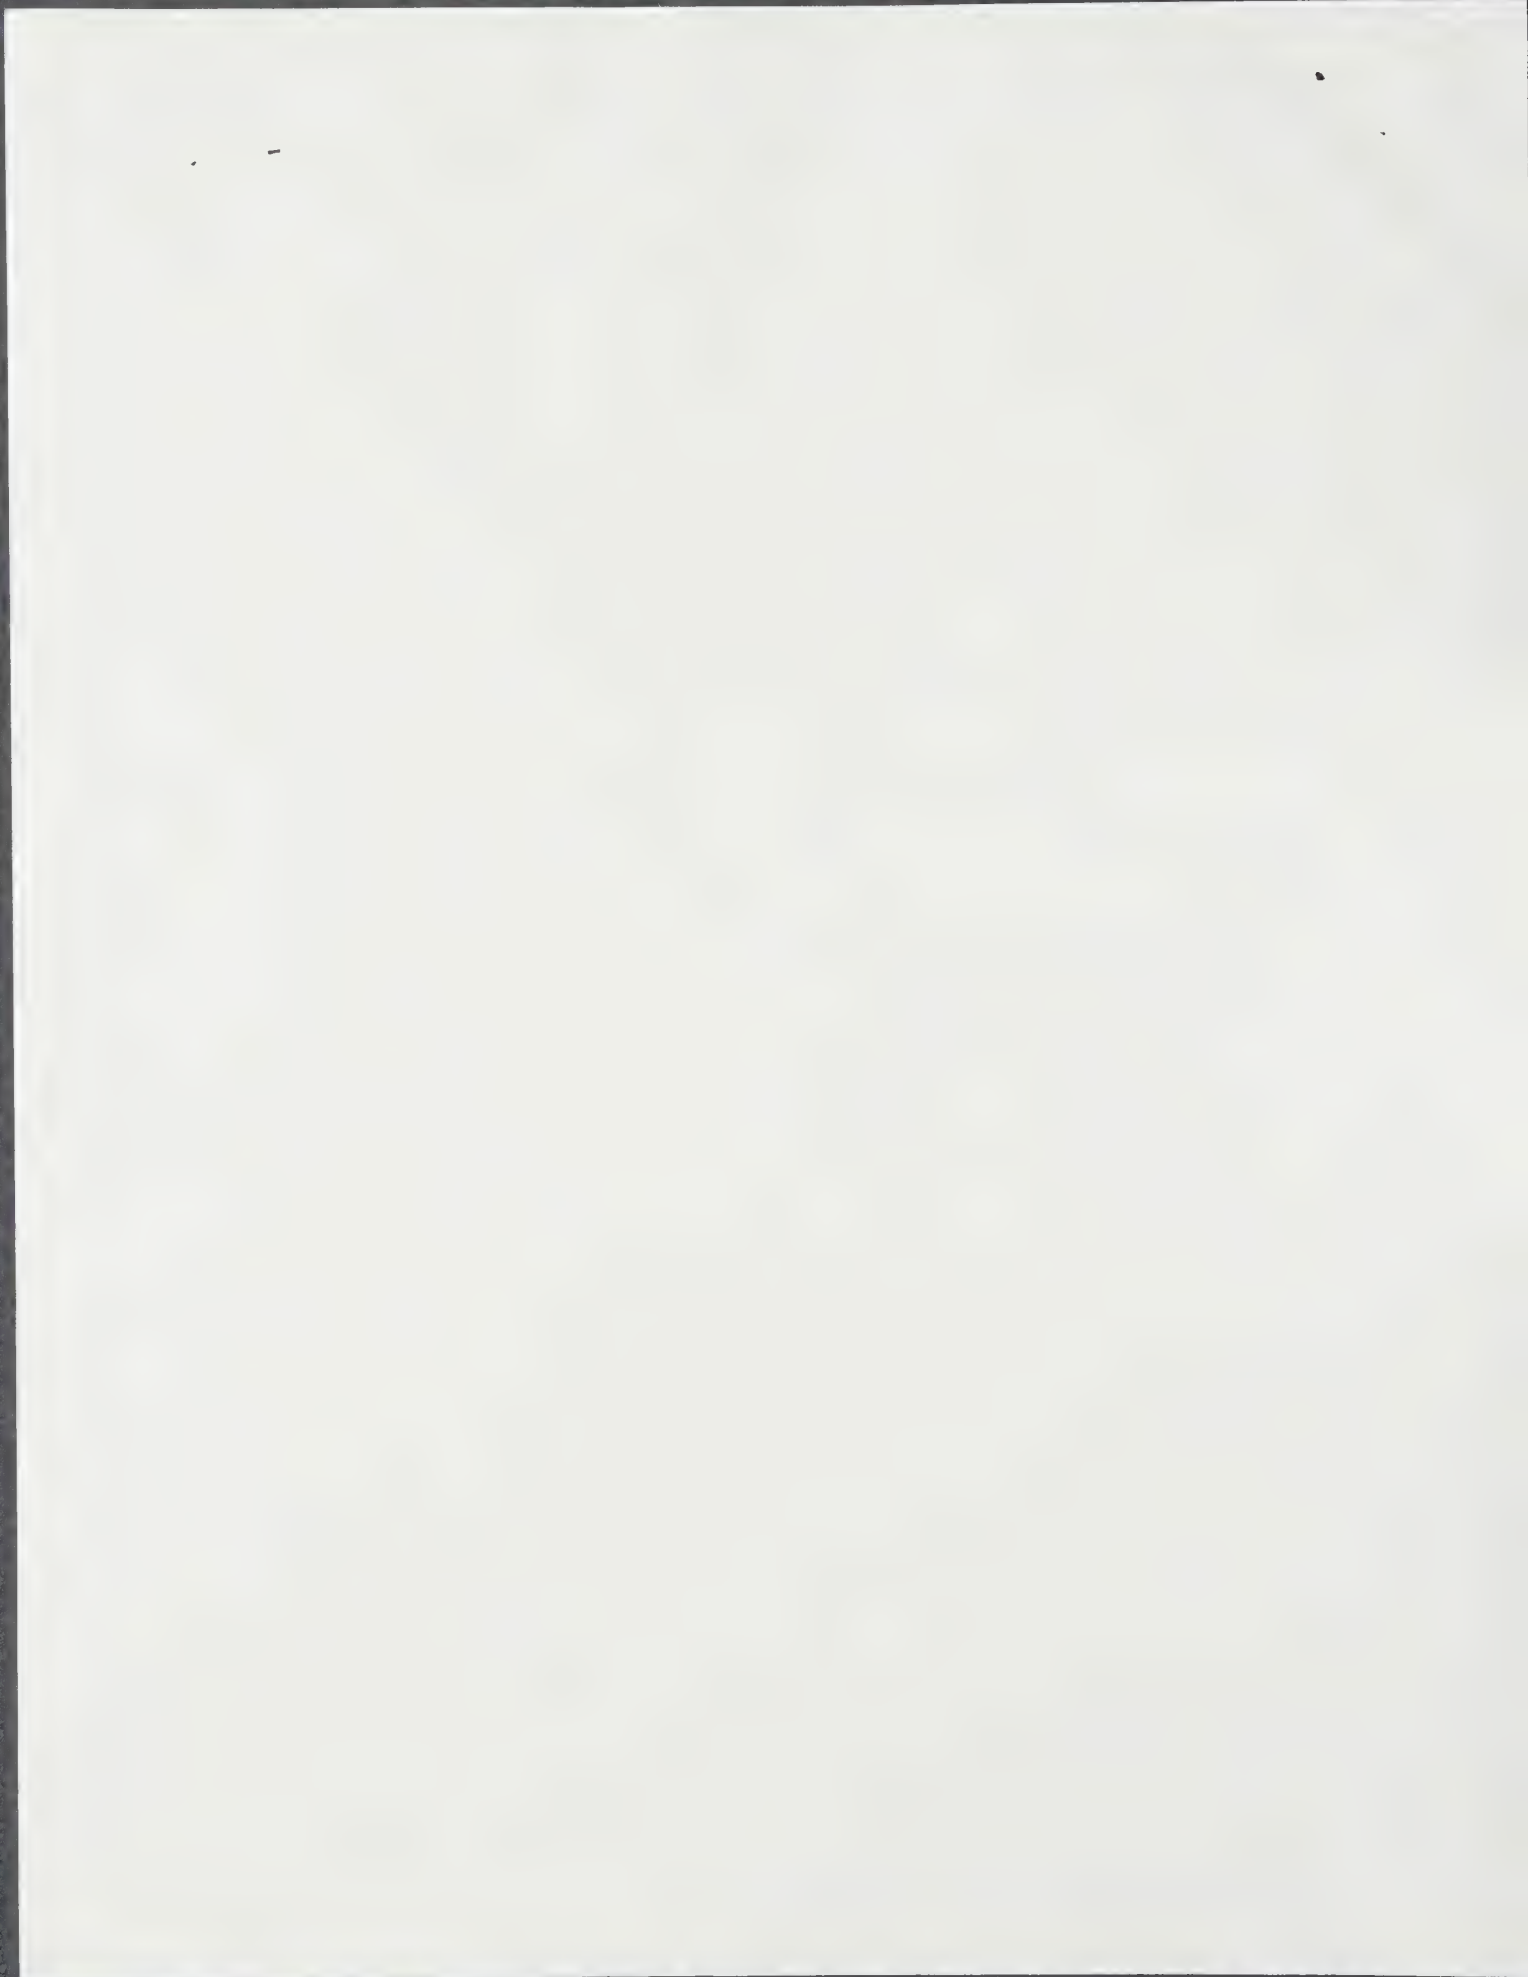

I spoke with Dr. Bader today, and he asked me to relay the following information to you.

He said that April is filled, but he is available either 03/24-27 or the week before that. Do either of those timeframes work with your schedule?

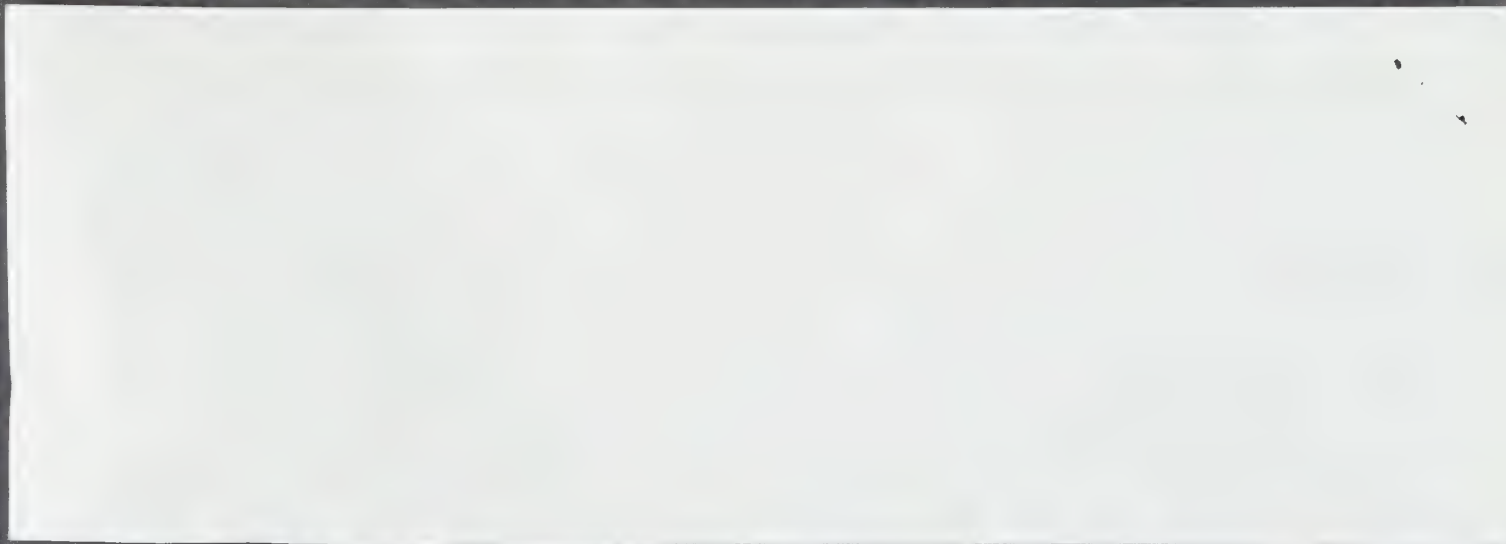

I will be out of the office for Thanksgiving tomorrow and Friday (as I presume you are too), but I will be back in the office all next week. Please let me know if I can be of further assistance.

With best wishes for a Happy Thanksgiving,

Cheryl Weiss
Office Manager

Handwritten text on a lined page, possibly a ledger or account book. The page features a header section with a decorative border of small crosses. Below this, there are several rows of text, some of which are separated by horizontal lines. The handwriting is cursive and somewhat faded. The page is numbered '7' in the left margin.

Dear Professor Monk:

Could you please fax me the name, address and telephone number of the motel at which we will be staying?

We have an old friend living near Phoenix, and we would like to give him our address to meet sometime on Sunday.

With many thanks, I remain,

Yours sincerely,

AB/cw
