Dear Dr. Simon:

As you perhaps know, I was dismissed from Sigma-Aldrich some two years ago, and the two enclosures will outline the story.

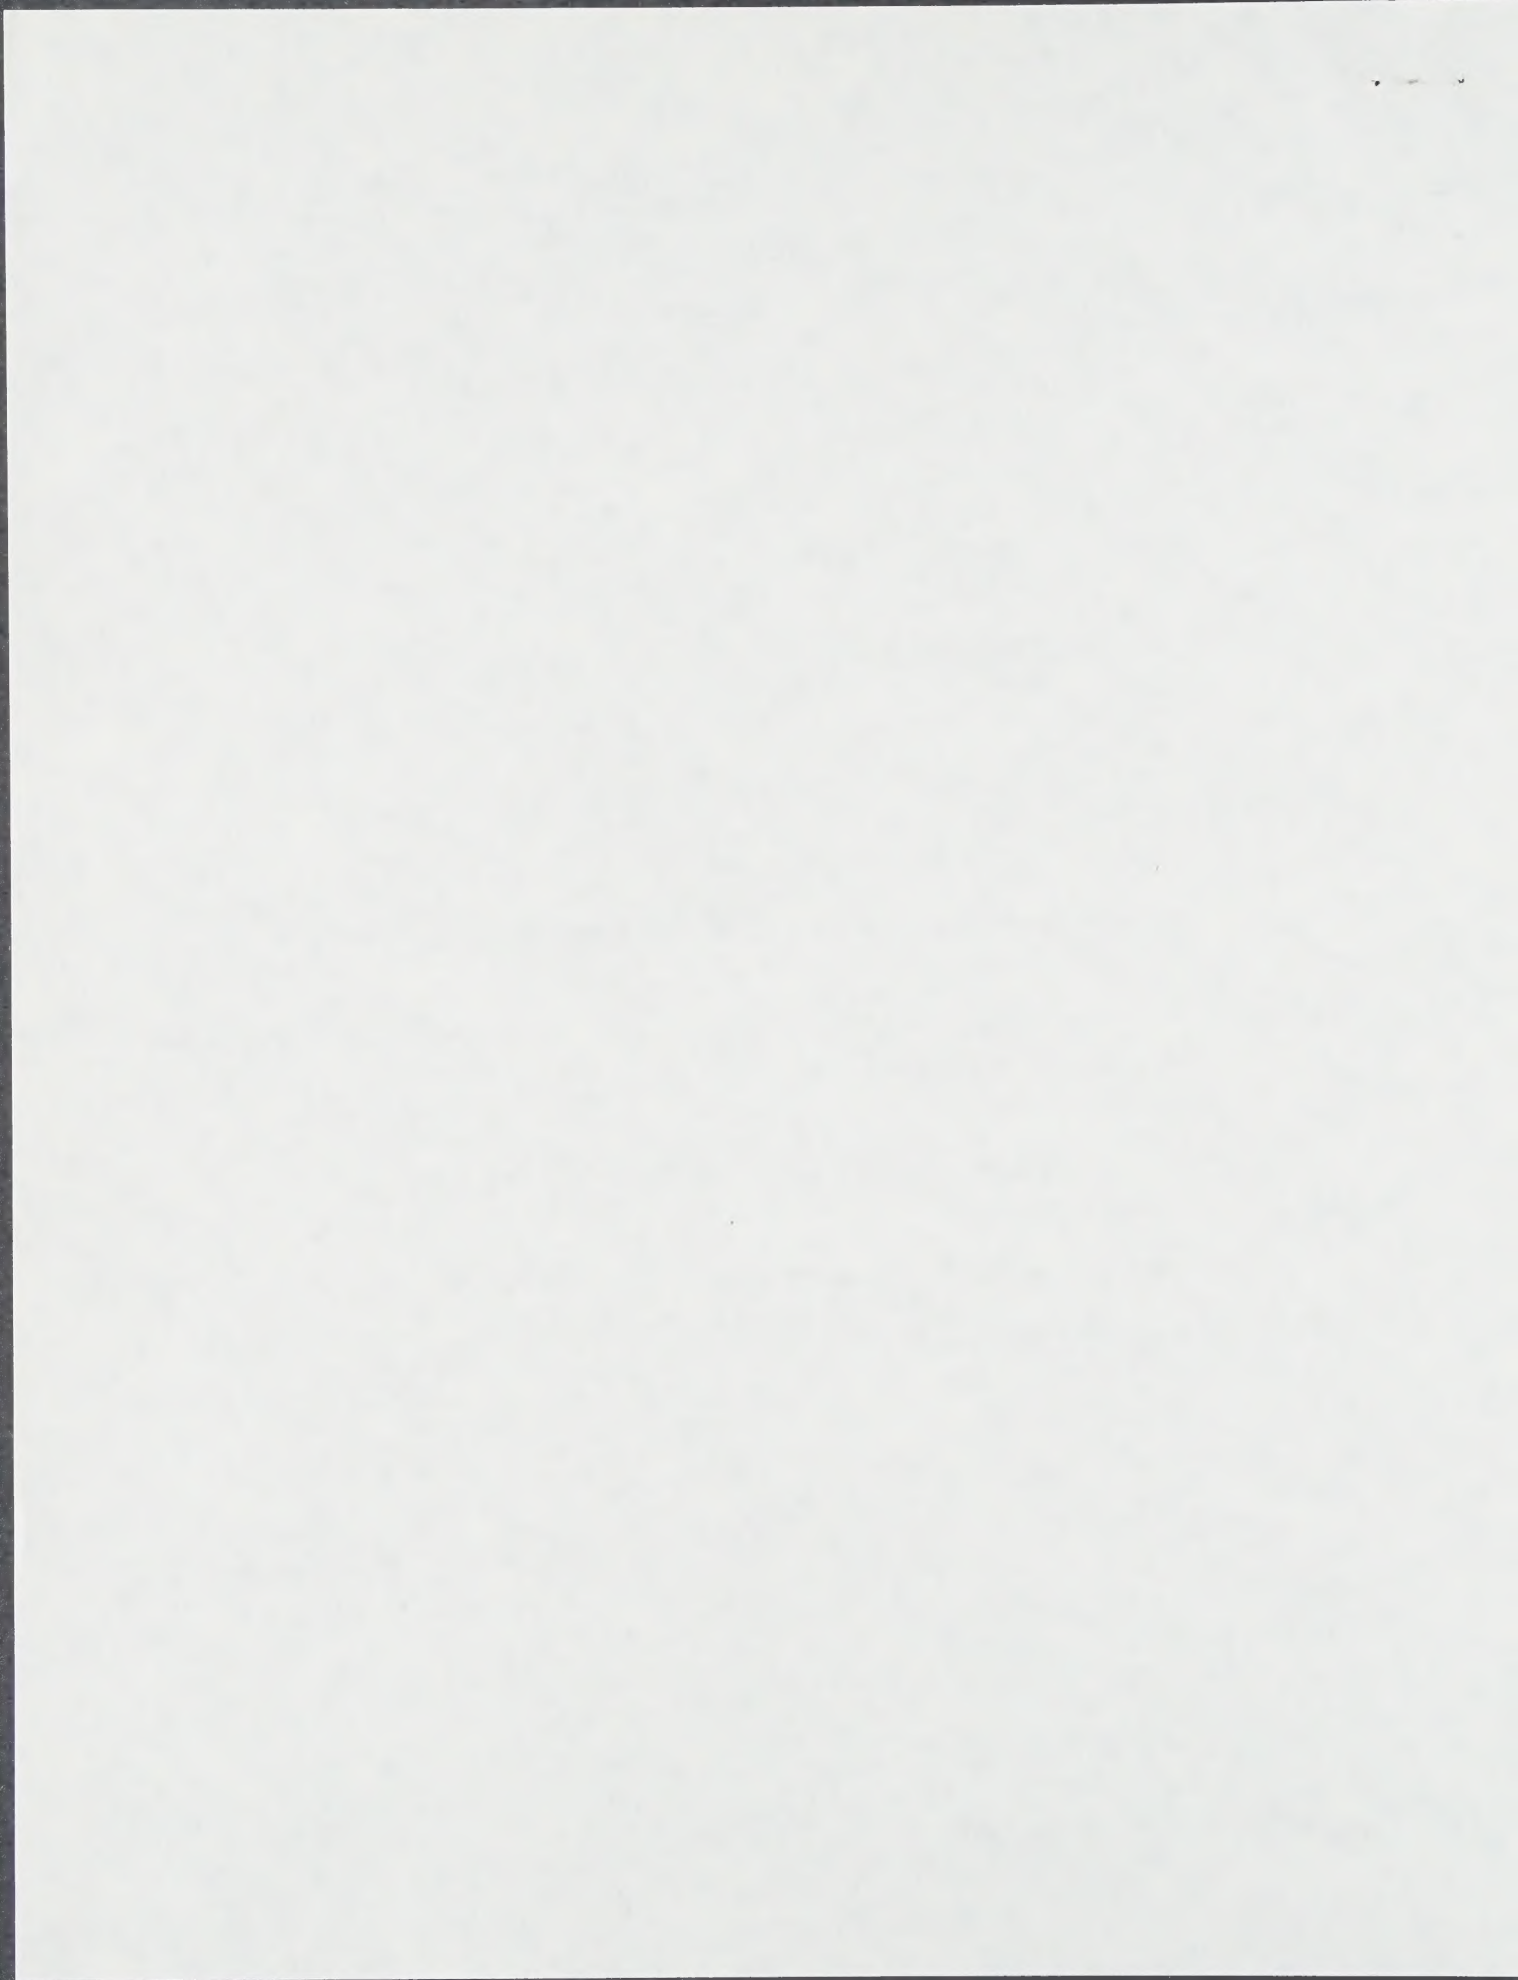

Since then I have divided my time three ways, namely, writing two books, dealing in paintings, helping small to medium sized chemical companies, and investing in some of them.

Naturally I would be happy to work with your company, provided that I really feel that I could help.

Please do let me know what you do and how you think I can help.

I look forward to hearing from you.

Best regards,

NCP

ATT : DR ALFRED BADER

Dear Dr Bader

We are in the process of setting up a fine chemicals business. While we are making some headway, this is a difficult process for us as we are climbing a very steep learning curve particularly as we are only just starting to re-enter the global chemical area. We feel that we could make much faster progress if we could call on the resources of someone who has already encountered and overcome many of the obstacles and pitfalls involved in such a venture.

Would you be interested in taking an active role or providing consultation services in our endeavour?

Yours sincerely

CLIVE D SIMON (Dr.)
PRINCIPAL CHEMIST : R&D
