Dear Dr. Bader:

With the development of high throughput screening technology in recent two years, the acquisition of chemical samples by collection and combinatorial synthesis now become the bottleneck in the process of new drug discovery. I know this because I worked on several drug discovery projects at Ciba-Geigy (E.g., S.-K. Lin, V. Rasetti, Synthesis of Benzospiro[5,6]undecane Derivatives as Inhibitors of Steroid 5- α -Reductase, *Helvetica Chimica Acta*, 1995, 78(4), 857-865).

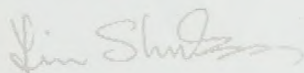

MDPI will carry out a coordinated, world-wide collection of chemical compounds. In collaboration with Springer Verlag AG we will publish quickly by utilising electronic editions (Online monthly and CD-ROM and complete print edition yearly) the journal *Molecules* (ISSN 1420-3049) to promote this activity. The idea of this program is to supply both chemical information as well as the chemical substances themselves and to preserve molecular diversity created by all of us, chemists around the world. MDPI has made substantial progresses. The related information can be found in our advertisement (SYNTHESIS, Sept., Oct., 1995). Please visit our www home page. I have already set up MDPI centers in the US, Asia and Europe, and have 25 senior chemists (including a Noble Laureate, Prof. Barton) to serve on the Editorial Board of *Molecules*.

Surely you are the pioneer and activist in rare compound collections.

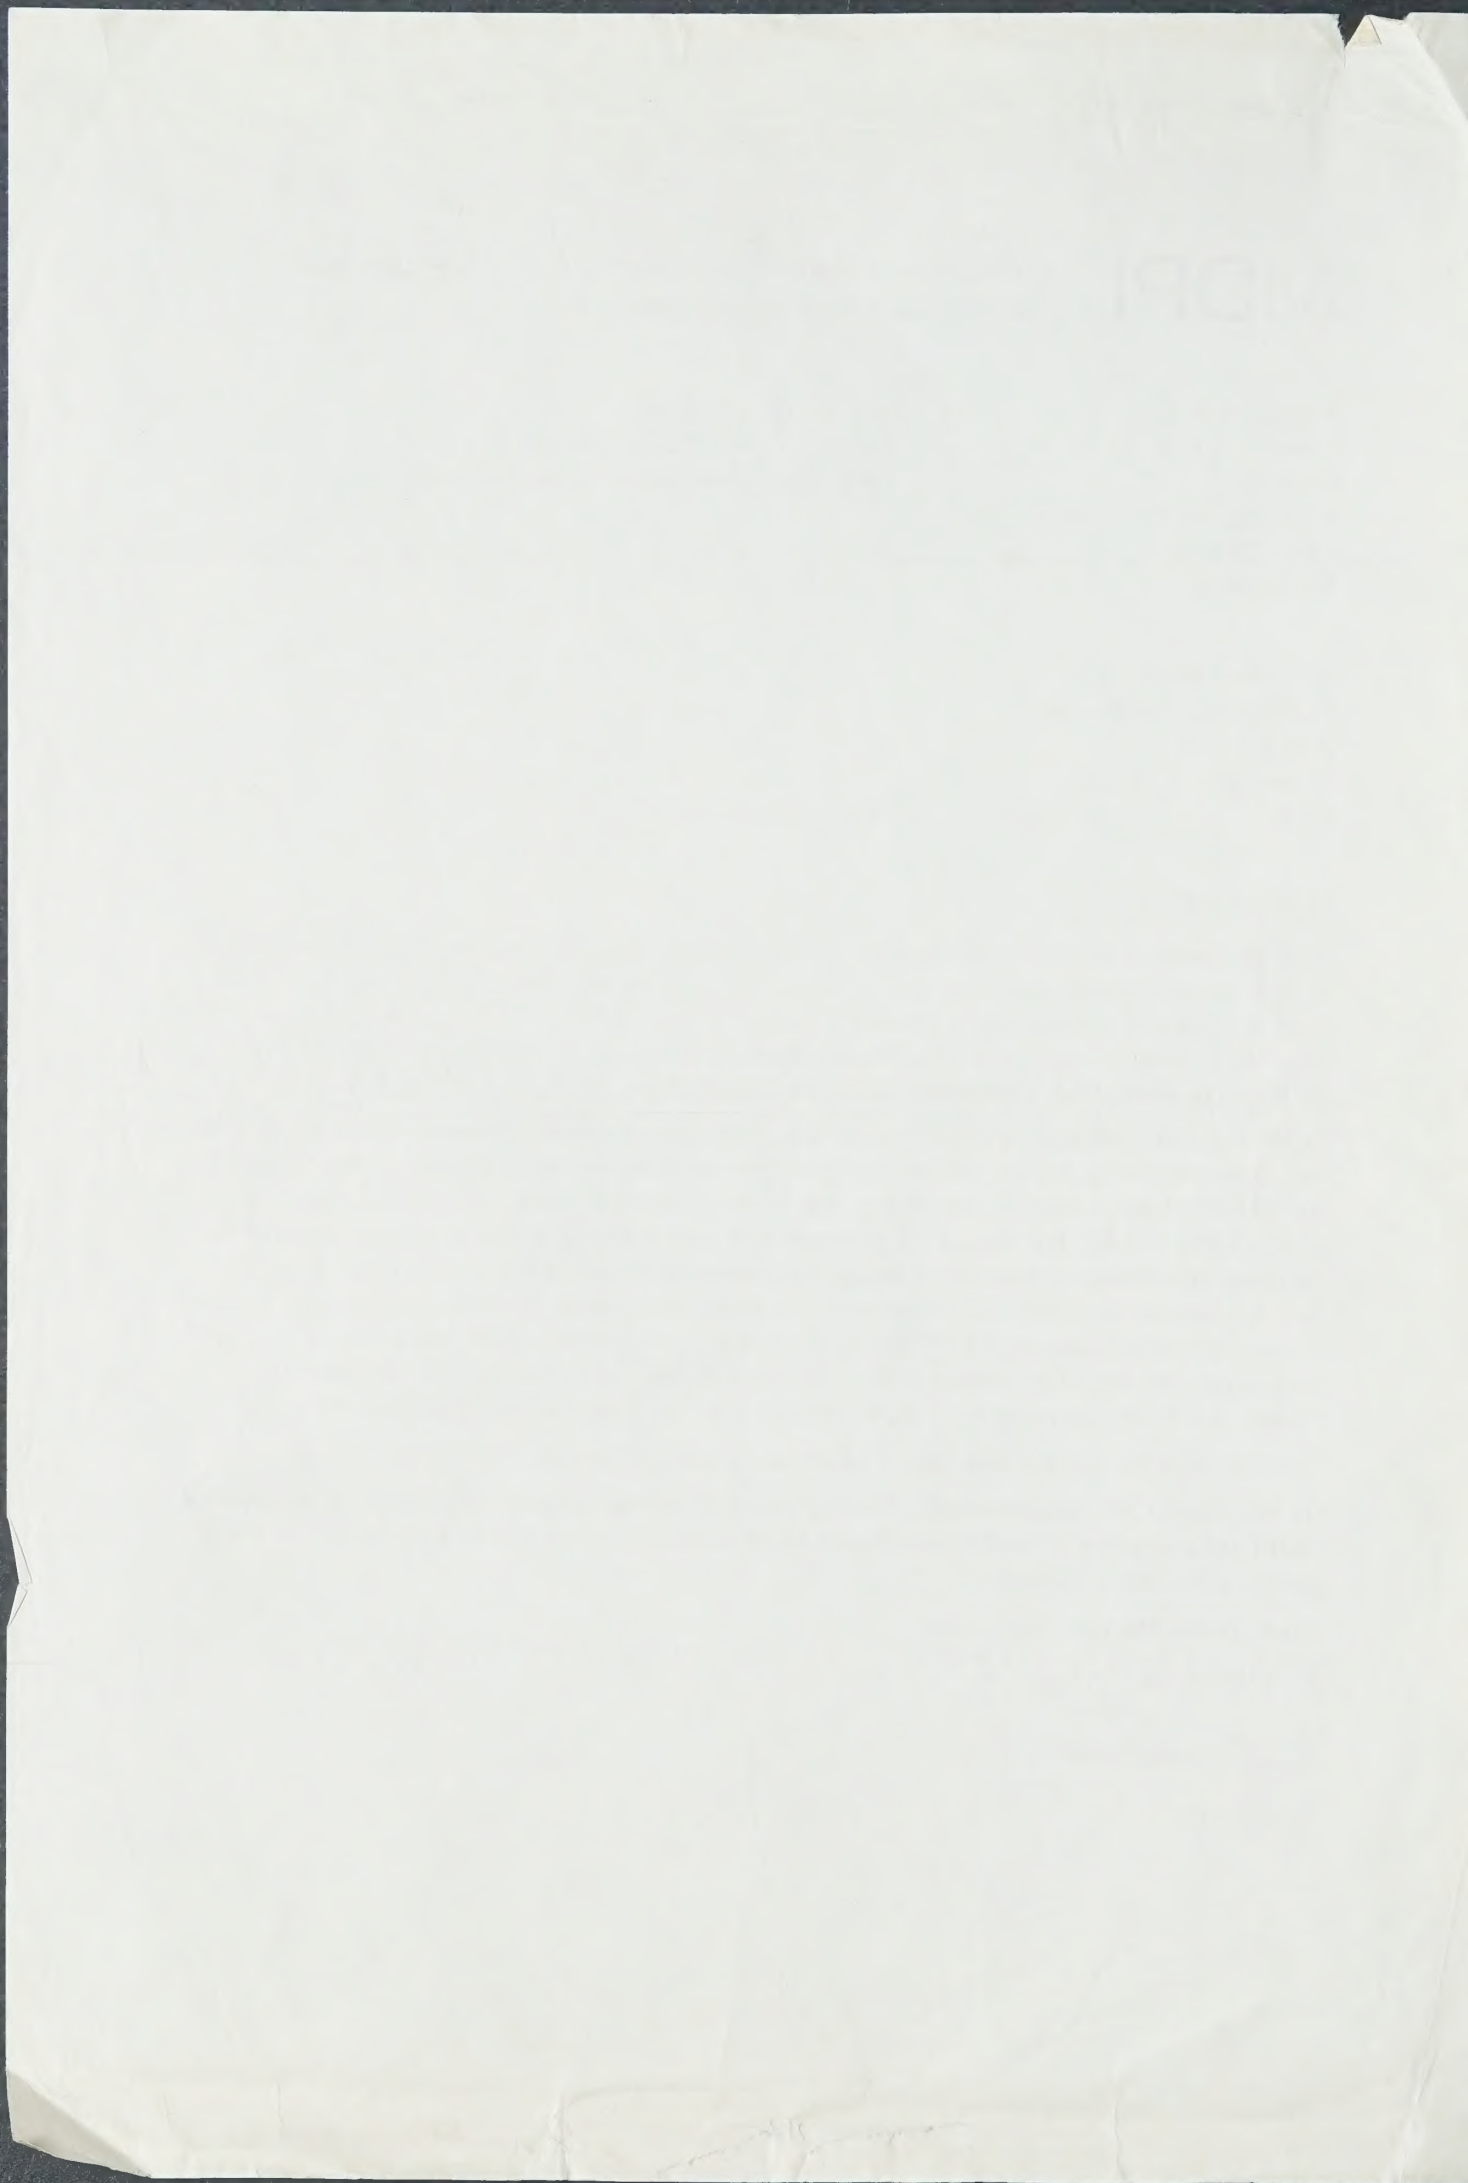

On behalf of MDPI, and personally, I would like to invite you to become the Senior Consultant of MDPI and a member of the Editorial Board of *Molecules*. These would be honorary titles. I will greatly appreciate your support.

I look forward to your reply soon.

Sincerely yours,

Shu-Kun Lin

TO DAVID HARVEY

Please call me to discuss
this morning - we are leaving
for Warwick early afternoon.

Above looks like a couple of
interest to me

Dear Dr. Lin

I have read with great interest your fax of November 13, your recent paper in the *Spectrochimica Acta* and MIP's advertisement in *Synthesis*.

I am honored by your invitation but cannot accept.

Best regards

Alfred Bader
