21st. June - 1988

Dear ~~Alfred~~ and Isabel;

How are you? I hope you are not too tired after your journey through Spain.

First of all to say that I'm very glad you enjoyed your short, too short, stay in Murcia. But you can't imagine how happy we were to have you with us.

I don't know how to start to explain you all the process. Maybe I should say first that you have meant "the end of an era" in my behaviour, specially in the area of my "outside image".

There is always some part of your own personality that by some kind of fate is always struck by other people.

Then you think that it's not all fate but that it's not as good as you think it is, or that you give an image about it very different from the one you think you give.

That's what has happened with me and my idea and behaviour about the ideal scientist.

Inside the University I have been considered an heterodox or even an apostate because of my activities.

I was advised both by teachers and other students that the only hobby or mental affair allowed to a scientist is science.

But from the beginning I knew they were not right. Those nonsense people that could talk only about enzymes, genes and all that rubbish (it is not rubbish) always told me that I'd never go too far, that I should tell my soul to test tubes, and I should stop sporting, reading and all these things straight away.

So what I did was hide that part and barden it knowing that I would be attacked on that side.

I armed myself against
adversity and tried to avoid
some fanatics walking around me.

Anyway I kept on my own line.

I realize that at home everything
pointed on my own way.

So ~~Alfred~~ came here let's say
like the King of Science and he
happens to be an heterodox!

Oh my god! That is just a
little bit more ~~of~~ than they expected.

I was delighted just astonished.

For the first time in my life
a hard scientist as they call in
Spain to Chemists, Physicians
Biologists and Mathematicians,
really suited my dynamic model
about "how I would like to be
when I'm old".

Suddenly my armour fell
apart. And I was just mentally naked
in front of you.

It was a funny psychological

situation for me. I had thought about it many times and when everything came true I wasn't ready.

I felt unsure about it all but I sat when you went and I thought about it, now never forever.

It was unpleasant at first but in a couple of days I was recovered from the shock and adapted to my new situation in which I will allow myself to give some part of my imagination and time to culture, painting, reading etc without feeling guilty about it all.

Hence I'll let myself freedom to talk freely in this wild country of Eretz Sphered.

Anyway I have to ~~back~~ to science because I like it too, and maybe more than those fanatics of HPLC and biochemical processes. I don't need to tell one hundred people every day that I'm in love with biology. She knows it and that's what matters to me and to her.

So I remember you write
warm thoughts.

Keep well and be happy.

Yours.

Marcos Egea

I'll write you again when
everything settles back on me.

FAX FROM

DR. ALFRED R. BADER
Suite 622
924 East Juneau Avenue
Milwaukee, Wisconsin 53202
Telephone 414-277-0730
Fax No. 414-277-0709

January 28, 1994

To: Mr. Carlos Calpe

Via Fax 341 310 3733

Dear Carlos,

Thank you so much for your 3-page fax of January 27th, describing the background of your dismissal.

I fear that technically Sigma-Aldrich had the right to dismiss you. I am sure that if you could live your life over again you would simply have informed the company that you owned a 10% interest in Logitrans and that you would use your ownership influence to make certain that Logitrans gives better service than their competitors.

I don't think there is anything you can do now other than getting on with your life. If Logitrans is really doing well, you might like to stay with them and help them succeed. The fact that Lufthansa is working with Logitrans is a very good omen.

If, on the other hand, you don't find your work with Logitrans promising, then consider re-entering the chemical business. You will have seen my letter to Paul Meister. If Fisher Scientific interviews you, be sure to explain exactly what happened.

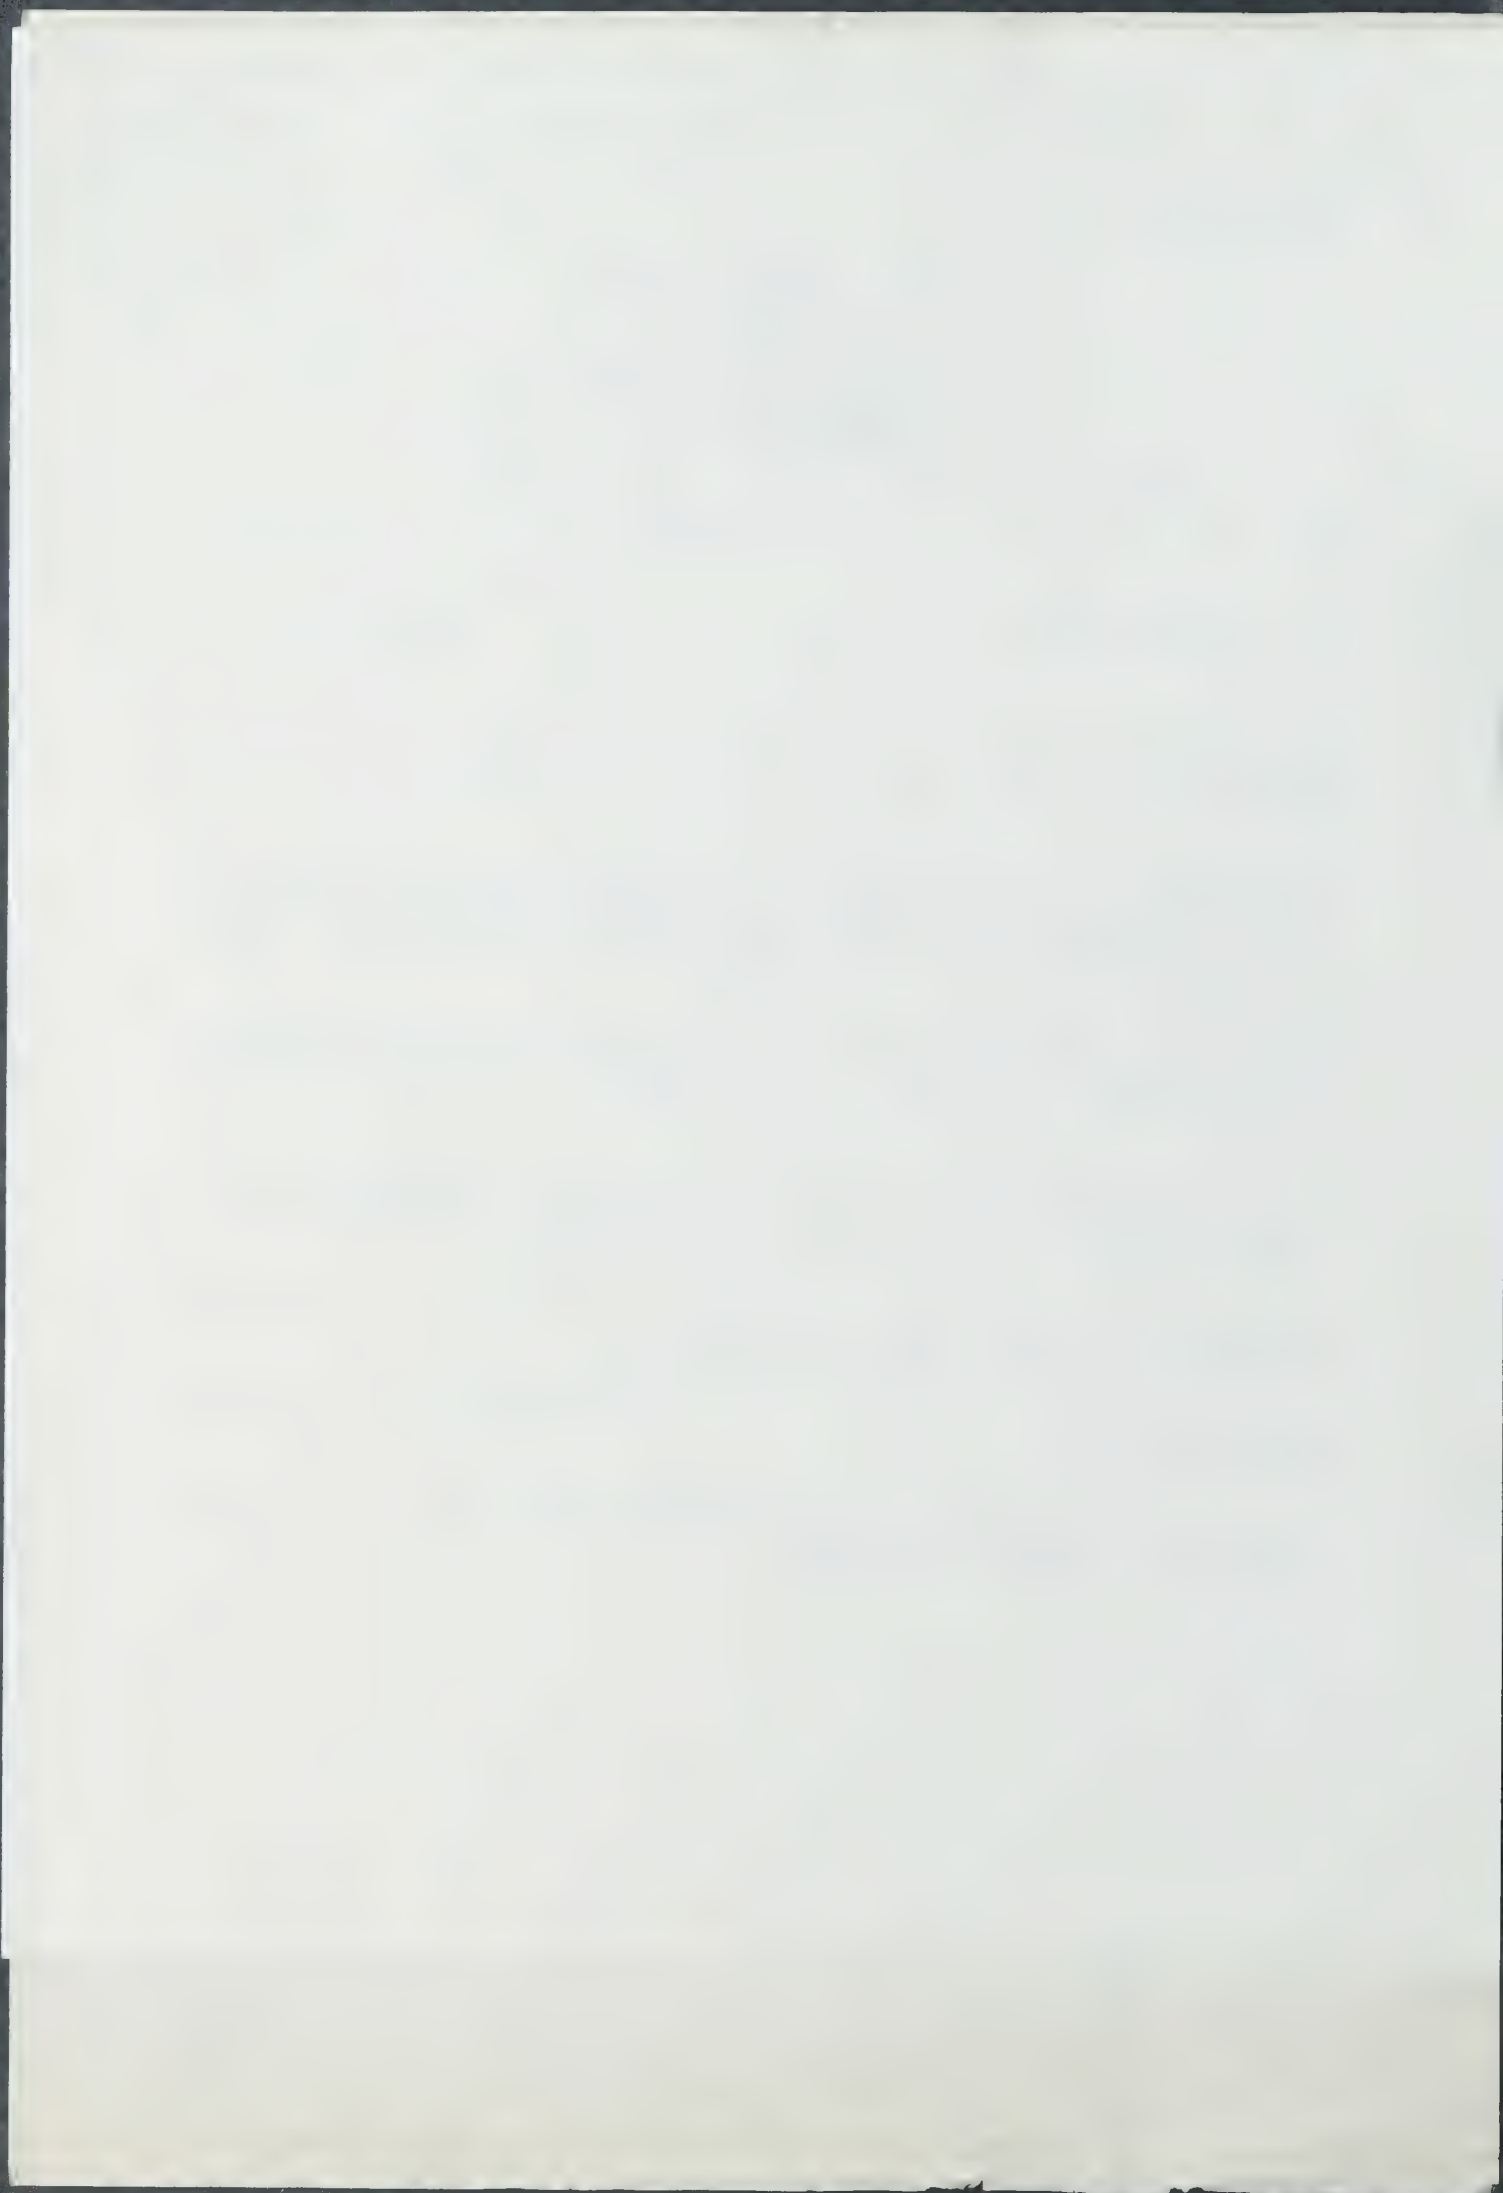

I think that you may well be right and Logitrans was a good reason for your dismissal and the fact that you are so helpful to Spanish chemists the real reason.

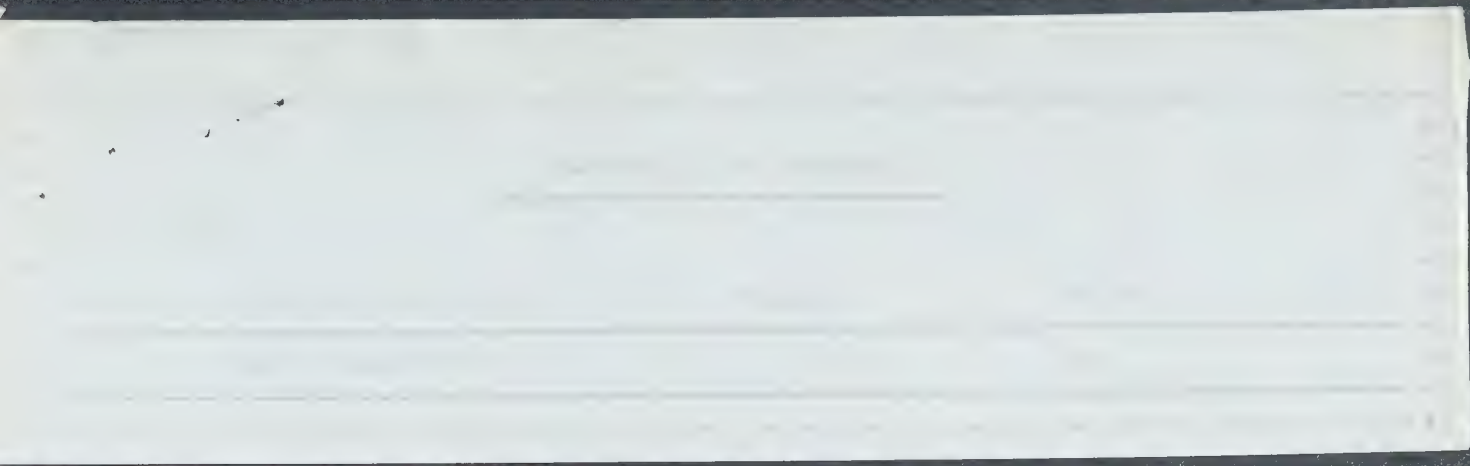

But that is all in the past. Just do your very best, and if you ever need someone to recommend you highly, think of me.

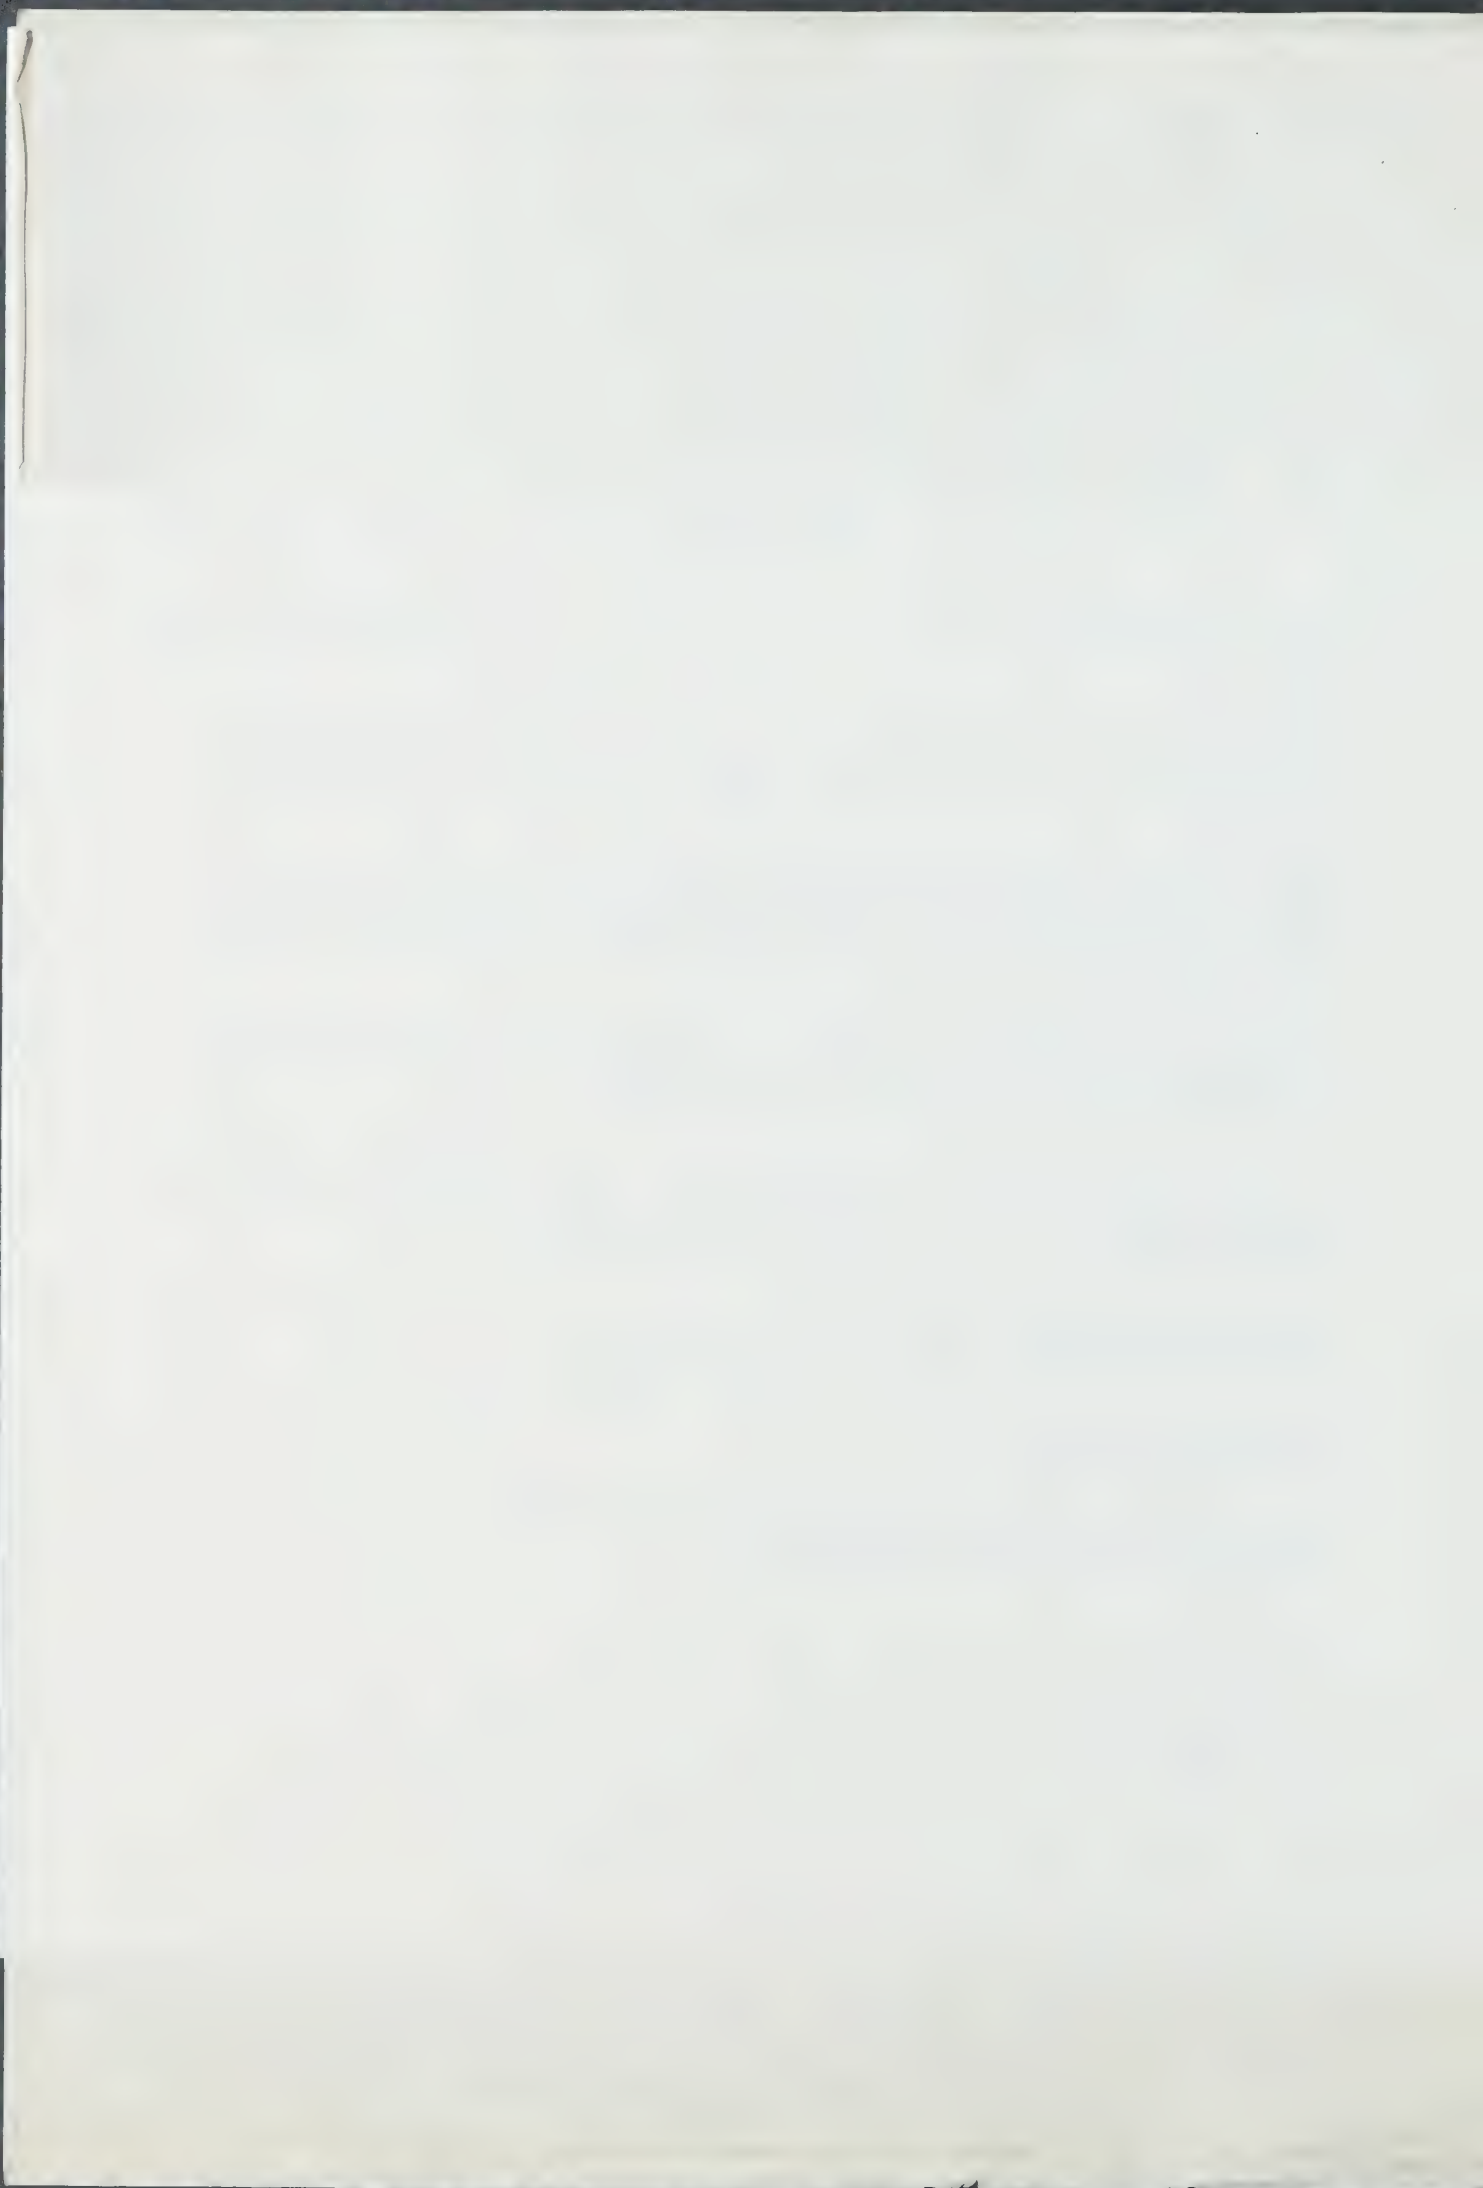

Isabel and I look forward to being in Madrid very briefly in August, and we would really enjoy chatting with you then, even if only briefly.

Best wishes,

Office of the
Attorney General
State of California
Sacramento, California

Dear _____:

Reference is made to _____

_____ of _____, California, and _____ of _____, California, who have applied to the State Bar of California for admission to the practice of law.

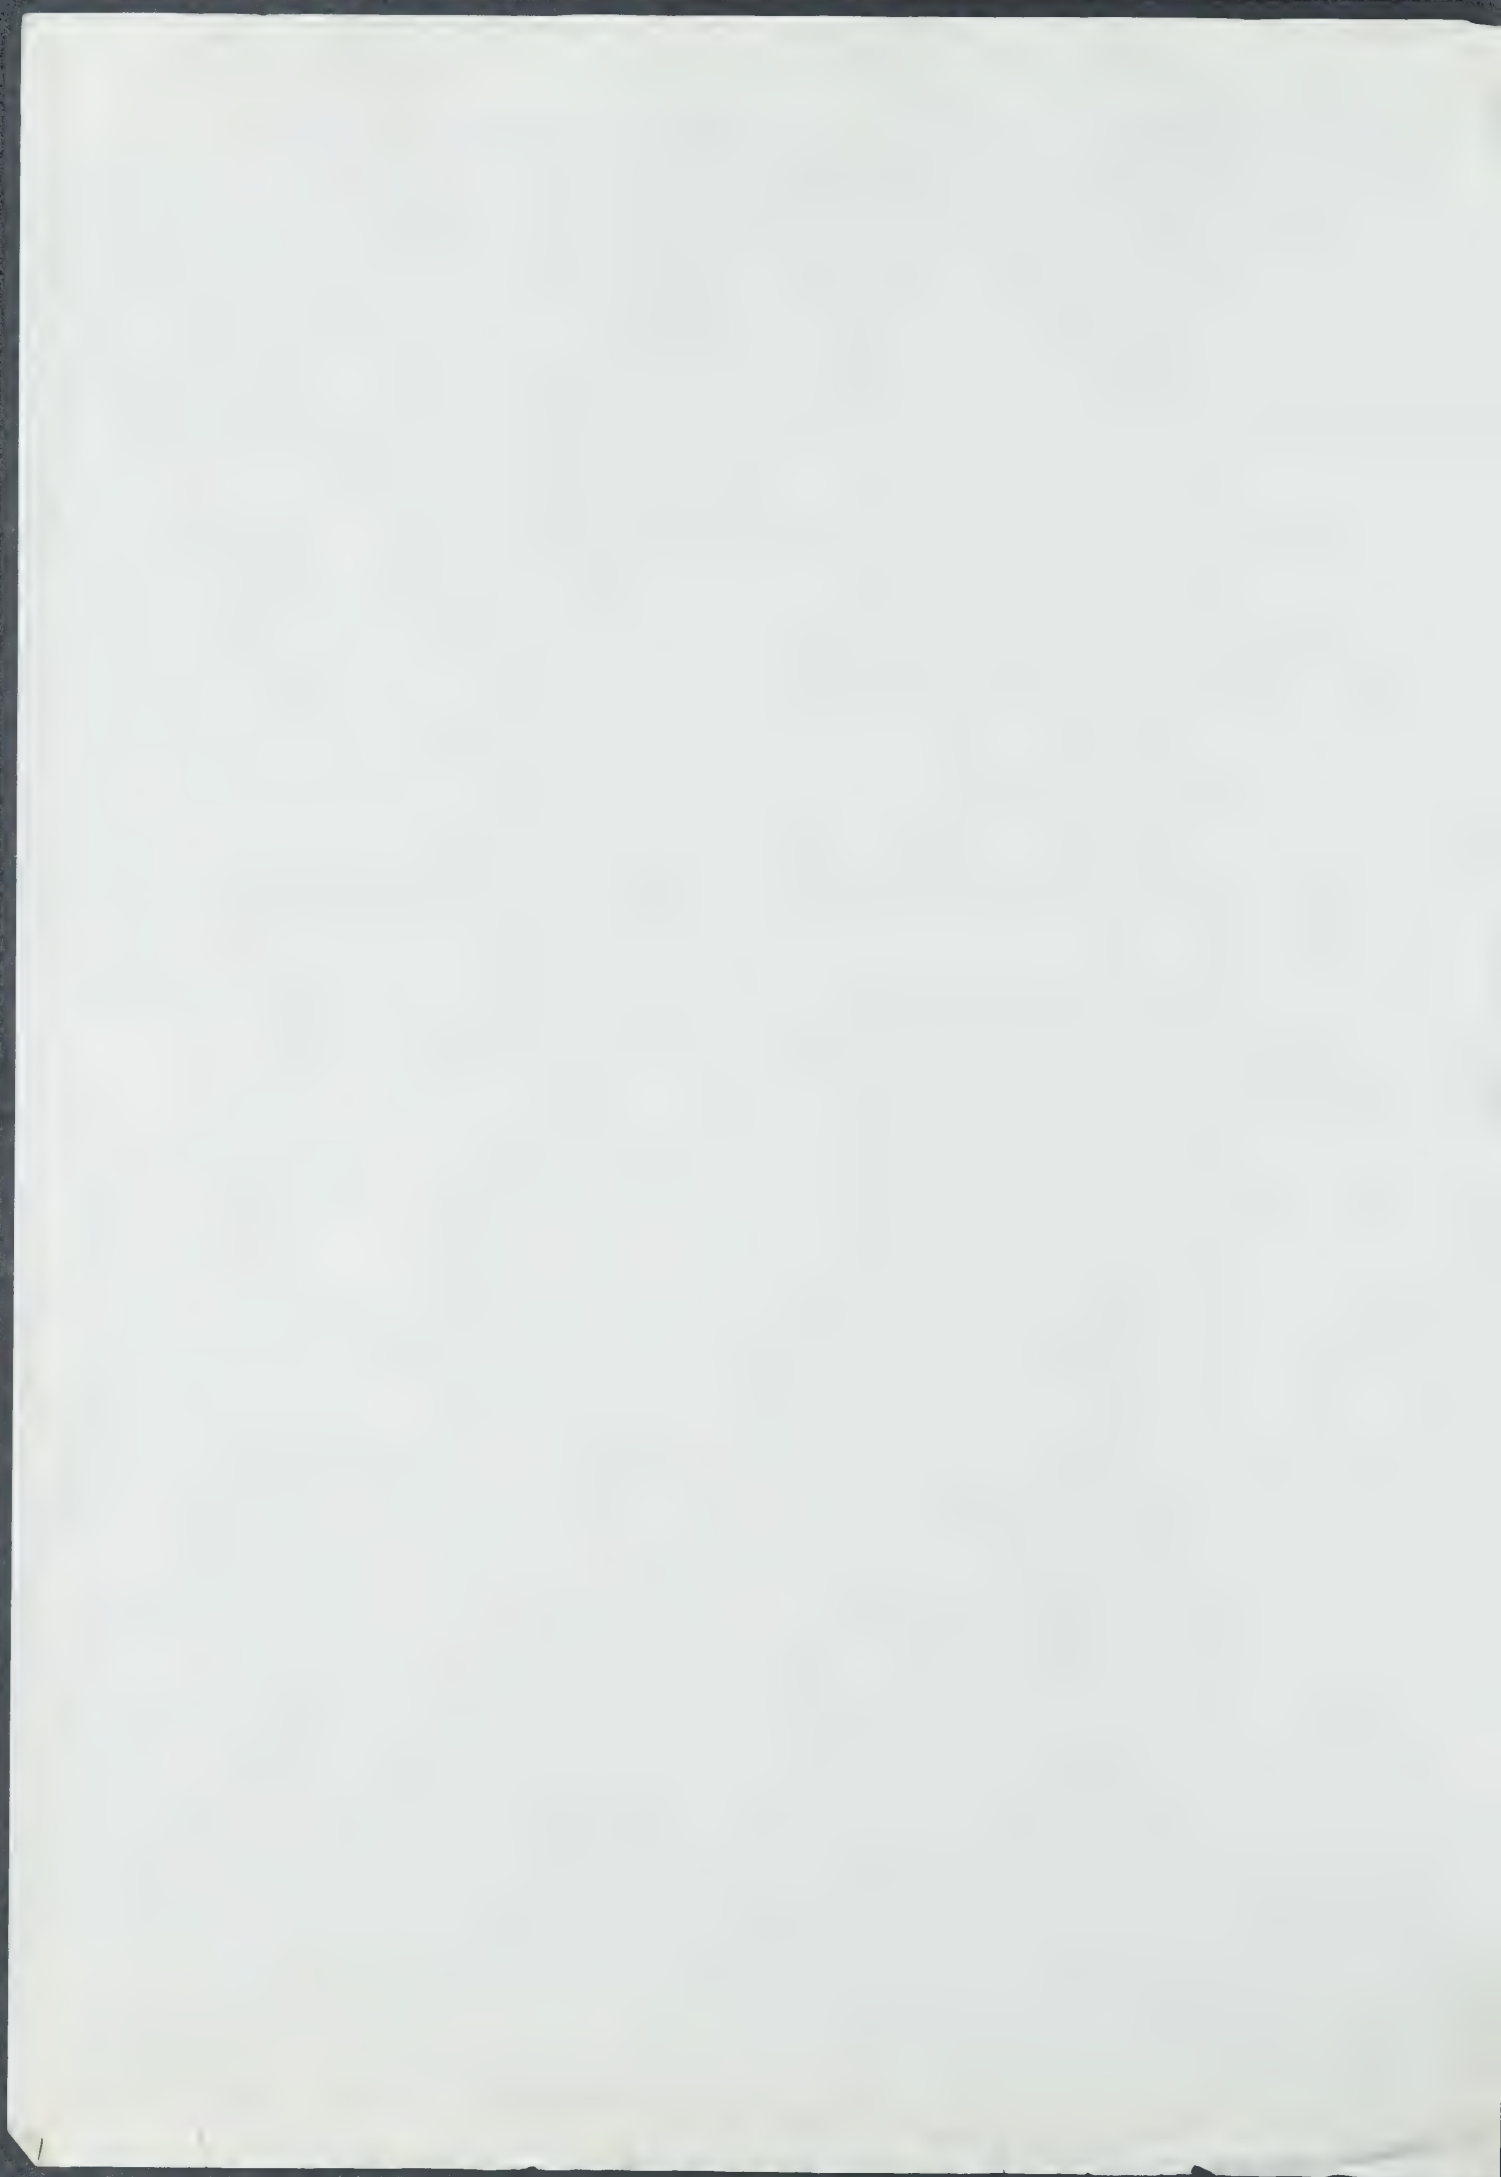

The State Bar of California has reviewed the applications and has determined that the applicants are qualified to be admitted to the practice of law.

Very truly yours,

Attorney General

FAX FROM

DR. ALFRED R. BADER
Suite 622
924 East Juneau Avenue
Milwaukee, Wisconsin 53202
Telephone 414-277-0730
Fax No. 414-277-0709

January 19, 1994

To: ~~Professor~~ Carlos Calpe

011 341 310 3733

Dear Carlos,

I am sorry that a trip to New York has delayed my responding to your fax of January 14th.

Recently, I talked at length about your dismissal with Dr. Alfred Griesinger in Steinheim and Dr. Jai Nagarkatti in Milwaukee.

Both told me essentially the same story. They were told by top management that you were dismissed because you had worked with a shipping company in which you have a personal interest, to the detriment of Sigma-Aldrich's customers and of Sigma-Aldrich. It was not clear to Dr. Griesinger and Dr. Nagarkatti whether you had a stock interest in that shipping company or whether it belongs to a relative of yours.

Clearly, if this is so then the best that can be said is that you used very poor judgment.

However, I am mindful that our top management is capable of libel. I, myself, was accused of "betting against the company," and Dr. Cori has said to many chemists who protested my dismissal that I had done something horrible but that what I did was confidential.

Hence, I am not at all convinced that the accusation against you is correct. If it is not, then you may have a valid libel case against management, and I would be glad to consider appearing as a witness on your behalf. Please do let me know exactly what happened.

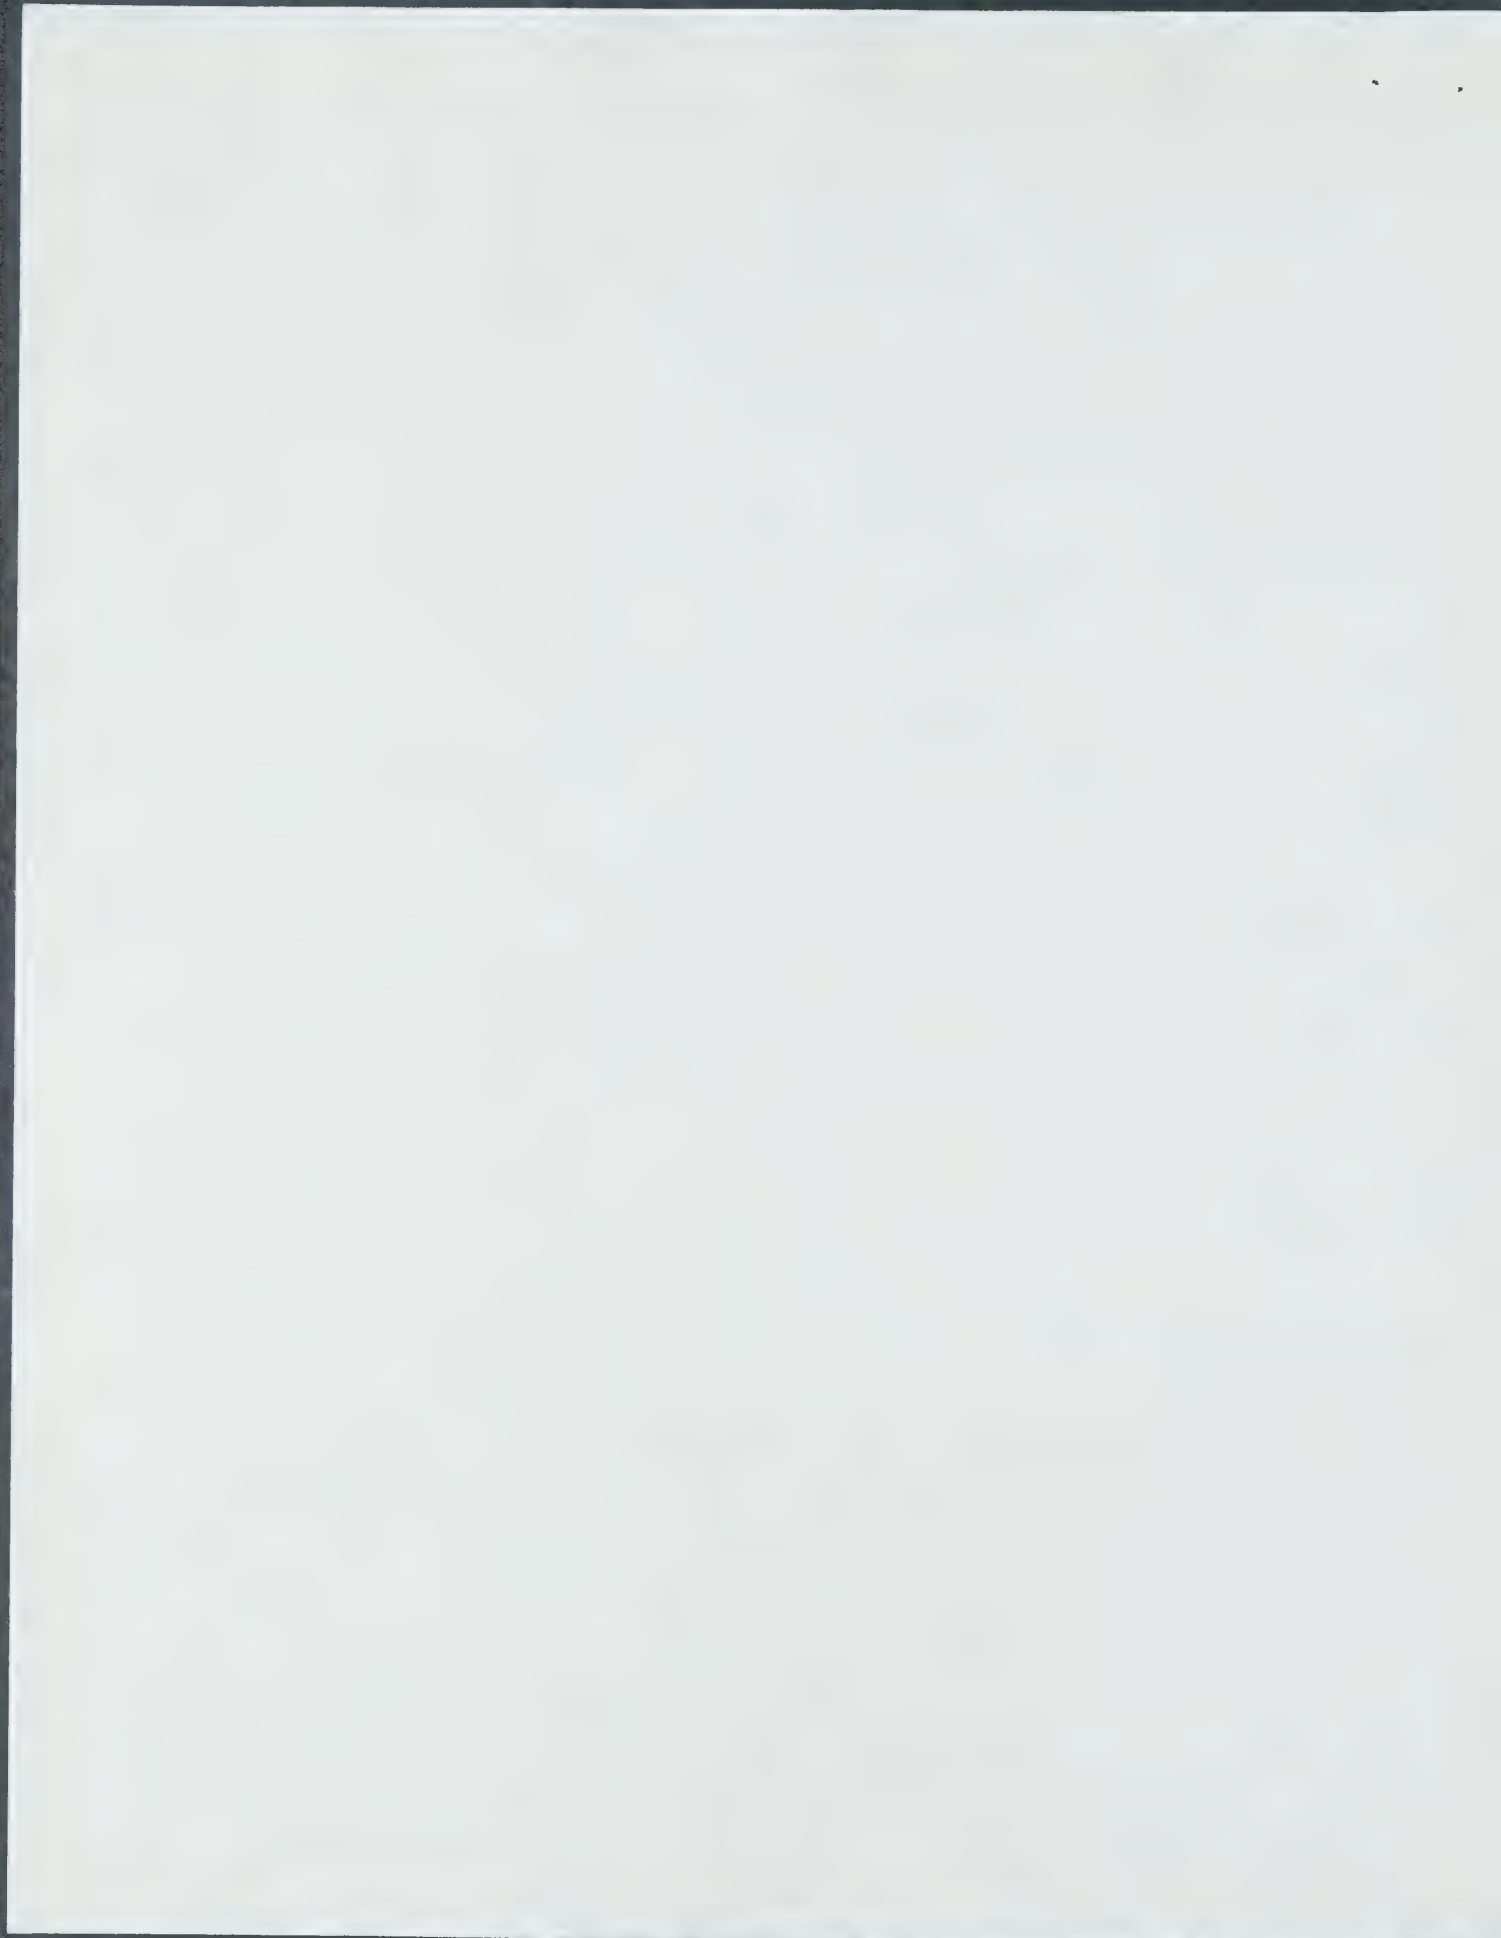

Fisher Scientific has now agreed to buy Janssen Chimica for what I consider a very full price, over \$30 million. They have also purchased the fine chemical business of Eastman Kodak, for very much less. The key to their succeeding will be getting really good people around the world to pull this conglomerate together.

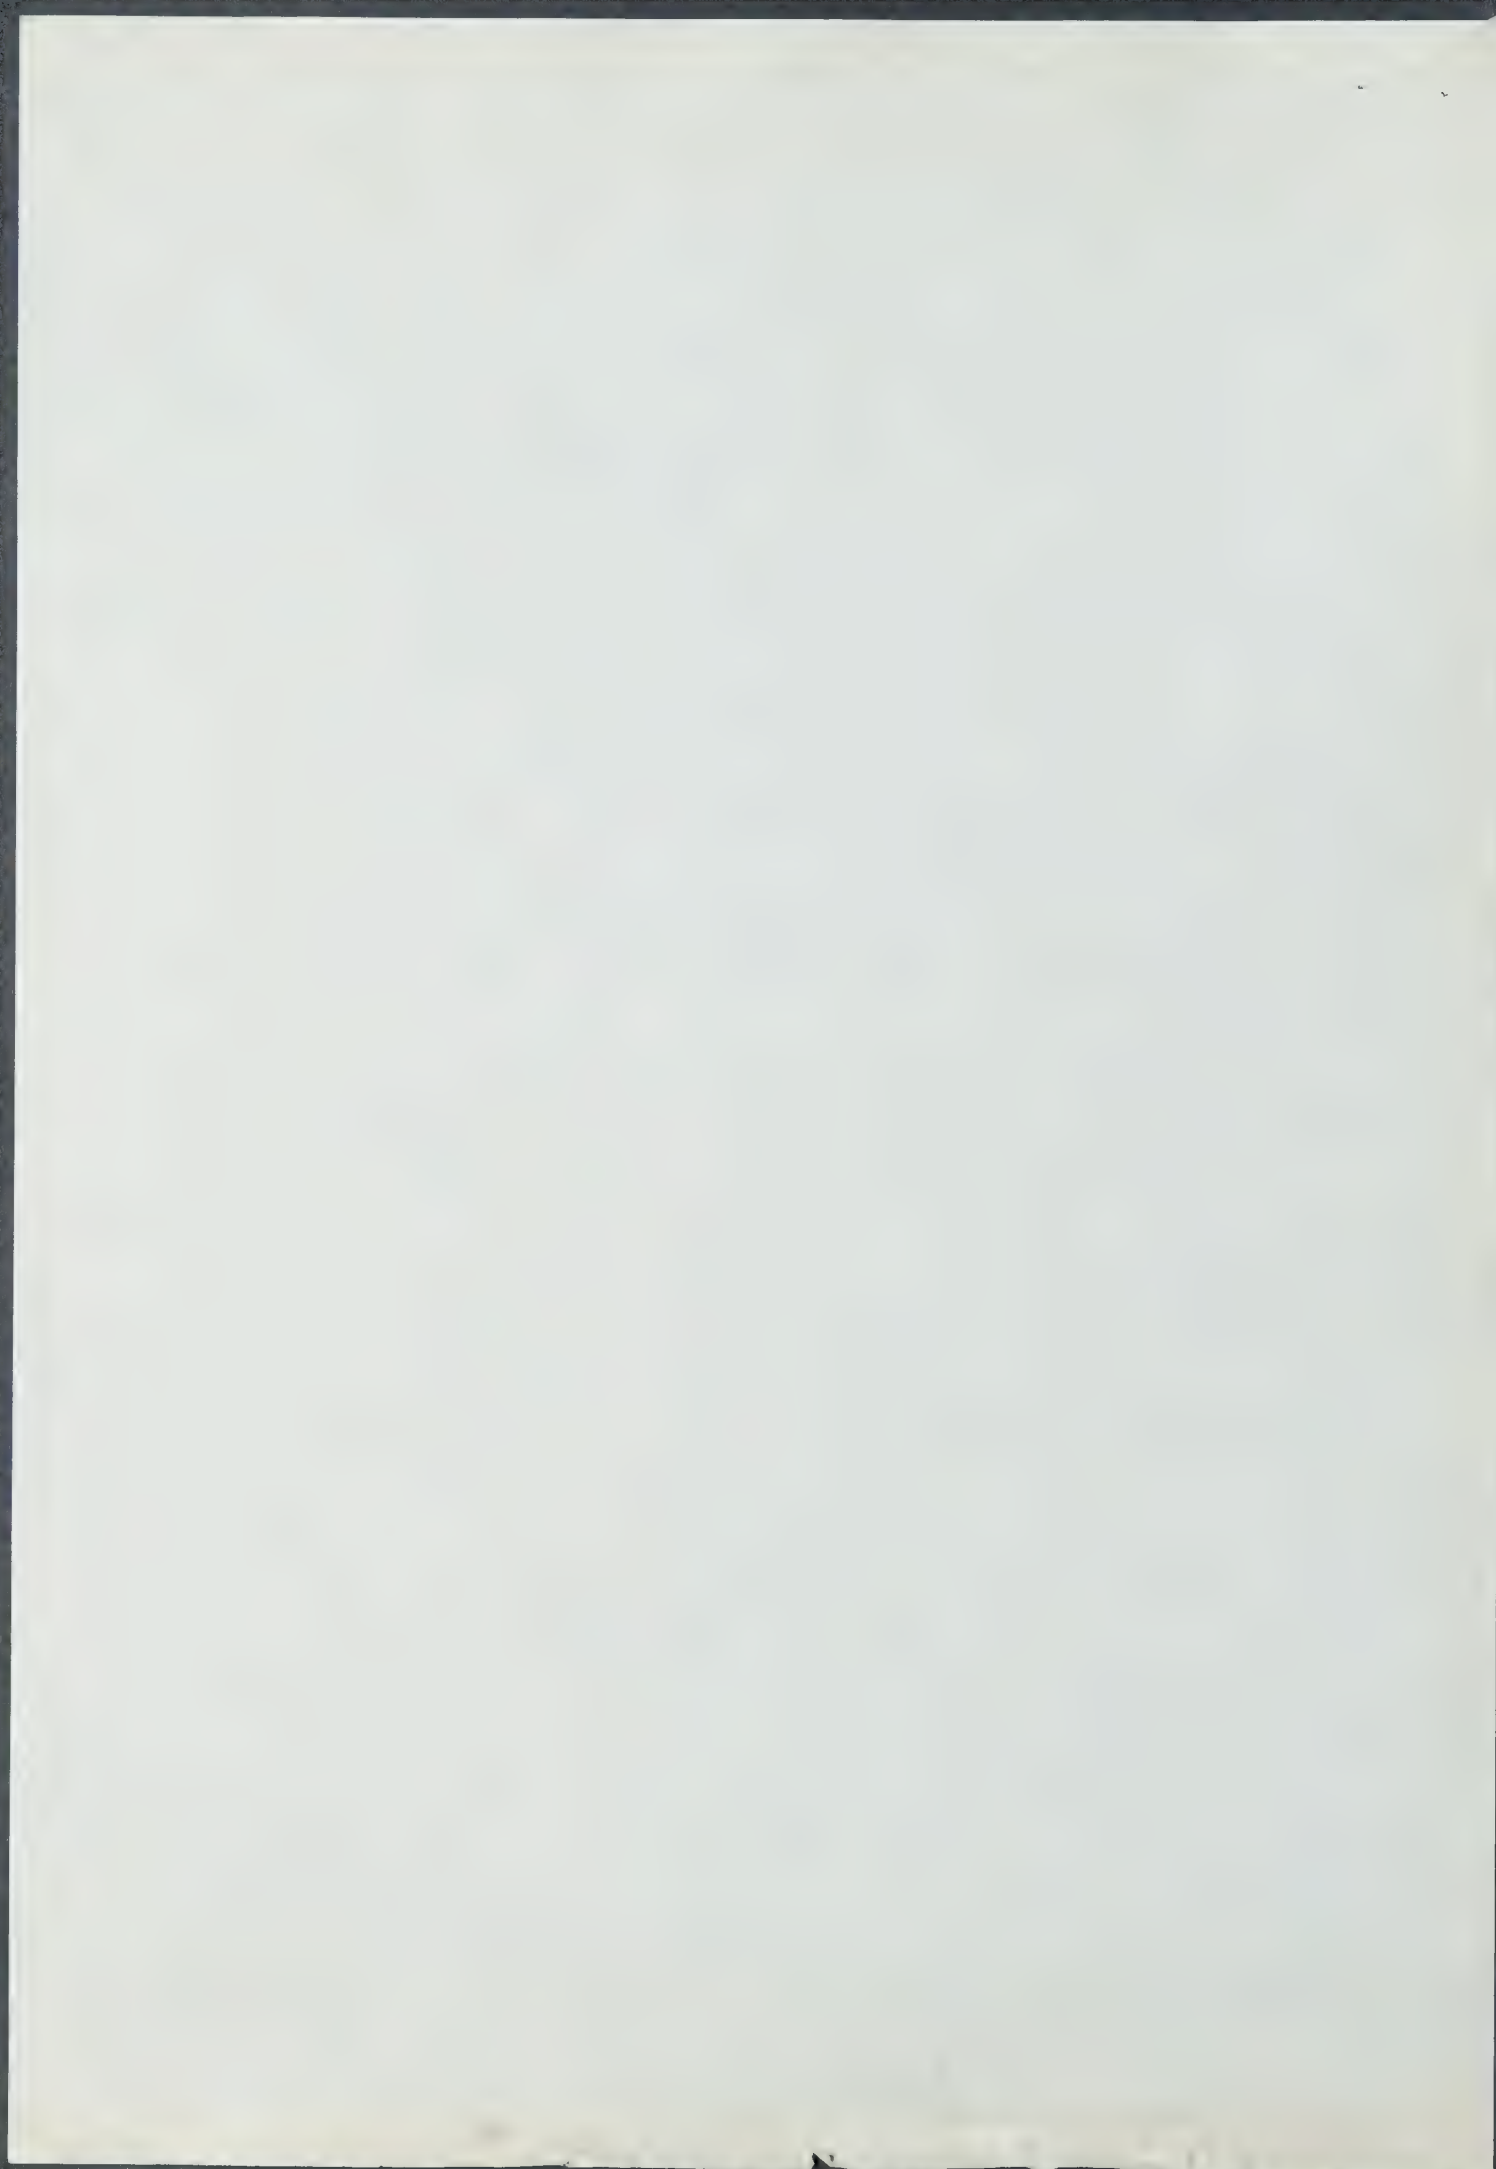

I much look forward to hearing from you.

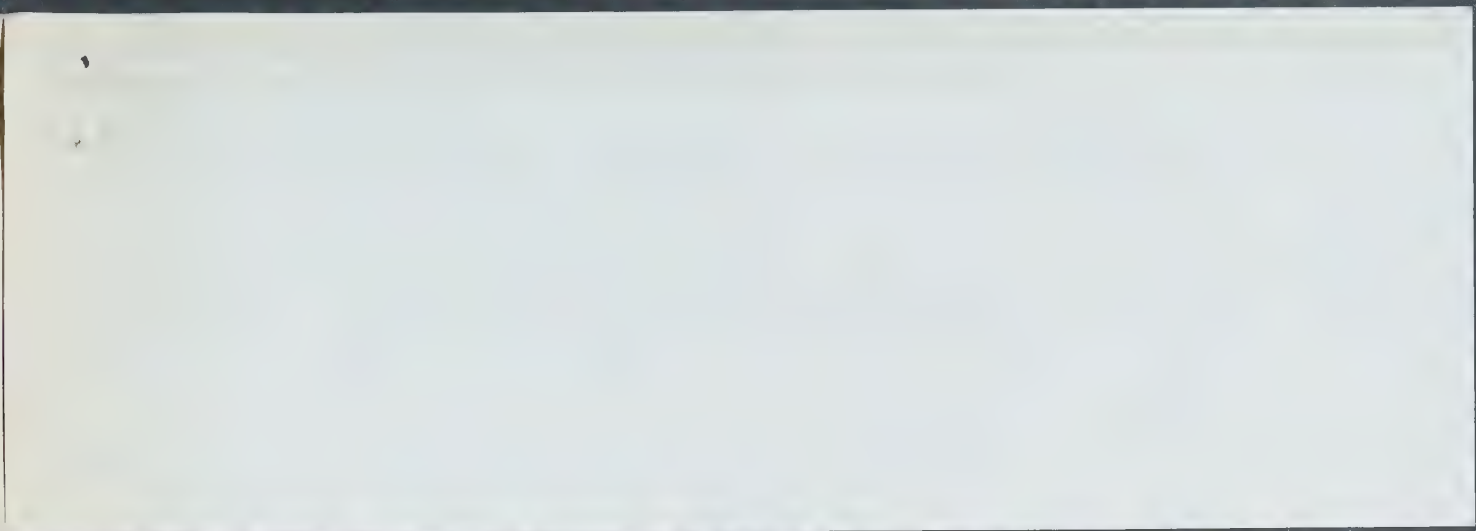

Best personal regards, *also from Isabel*

Dear Dr. Bartroli:

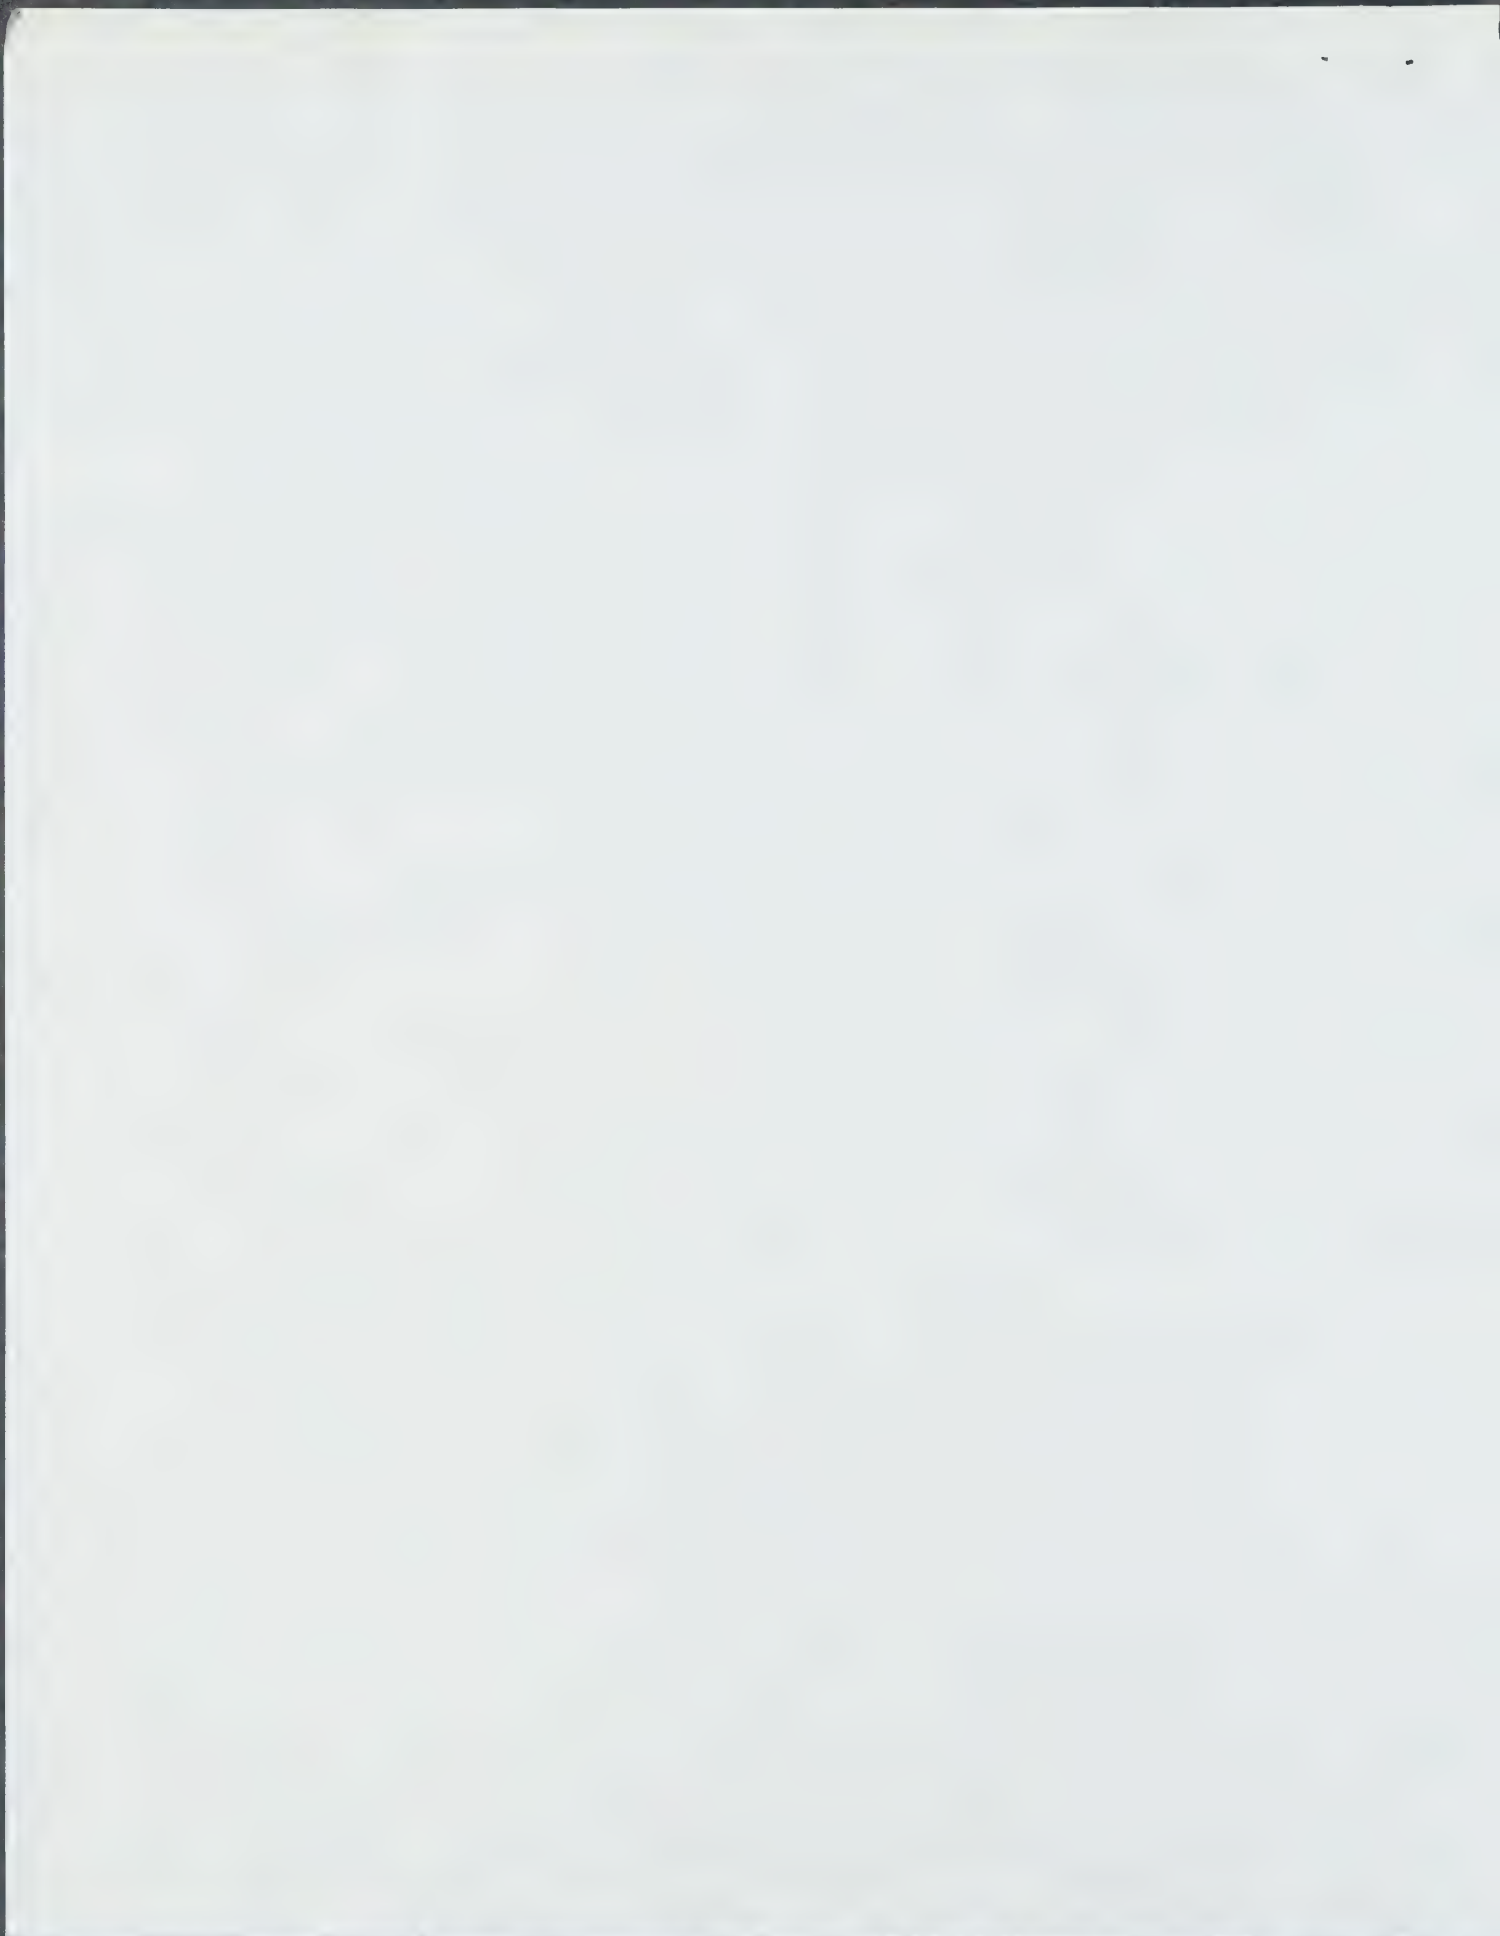

Of course I remember you from our previous meetings, and I want to thank you most sincerely for your letter of February 5th.

I am immediately bringing the availability of your two important chiral reagents to the attention of Dr. A. W. Runquist, Manager of Purchasing, and to Dr. Stephen Branca, Director of New Products, at Aldrich.

All good wishes.

Sincerely,

c: Dr. Stephen Branca

Dear Dr. Bader:

My name is Xavi Bartrolí, a former Dave Evans PhD student. Some years ago we met at Aussois and then at my parents house, in Barcelona, looking to some old paintings.

I am writing this letter to communicate you that Urquima, i.e. Uriach's fine chemical division, is now marketing (R) and (S)-4-benzyl-2-oxazolidinone, the latest generation of the Evans chiral auxiliaries, at very convenient prices. As this is one of you catalog products and as these auxiliaries are becoming very popular among chemists, we thought you would be interested in knowing our offer. I enclose a copy of Dave Evans letter sent to the users of these products for your interest.

For further information please contact:

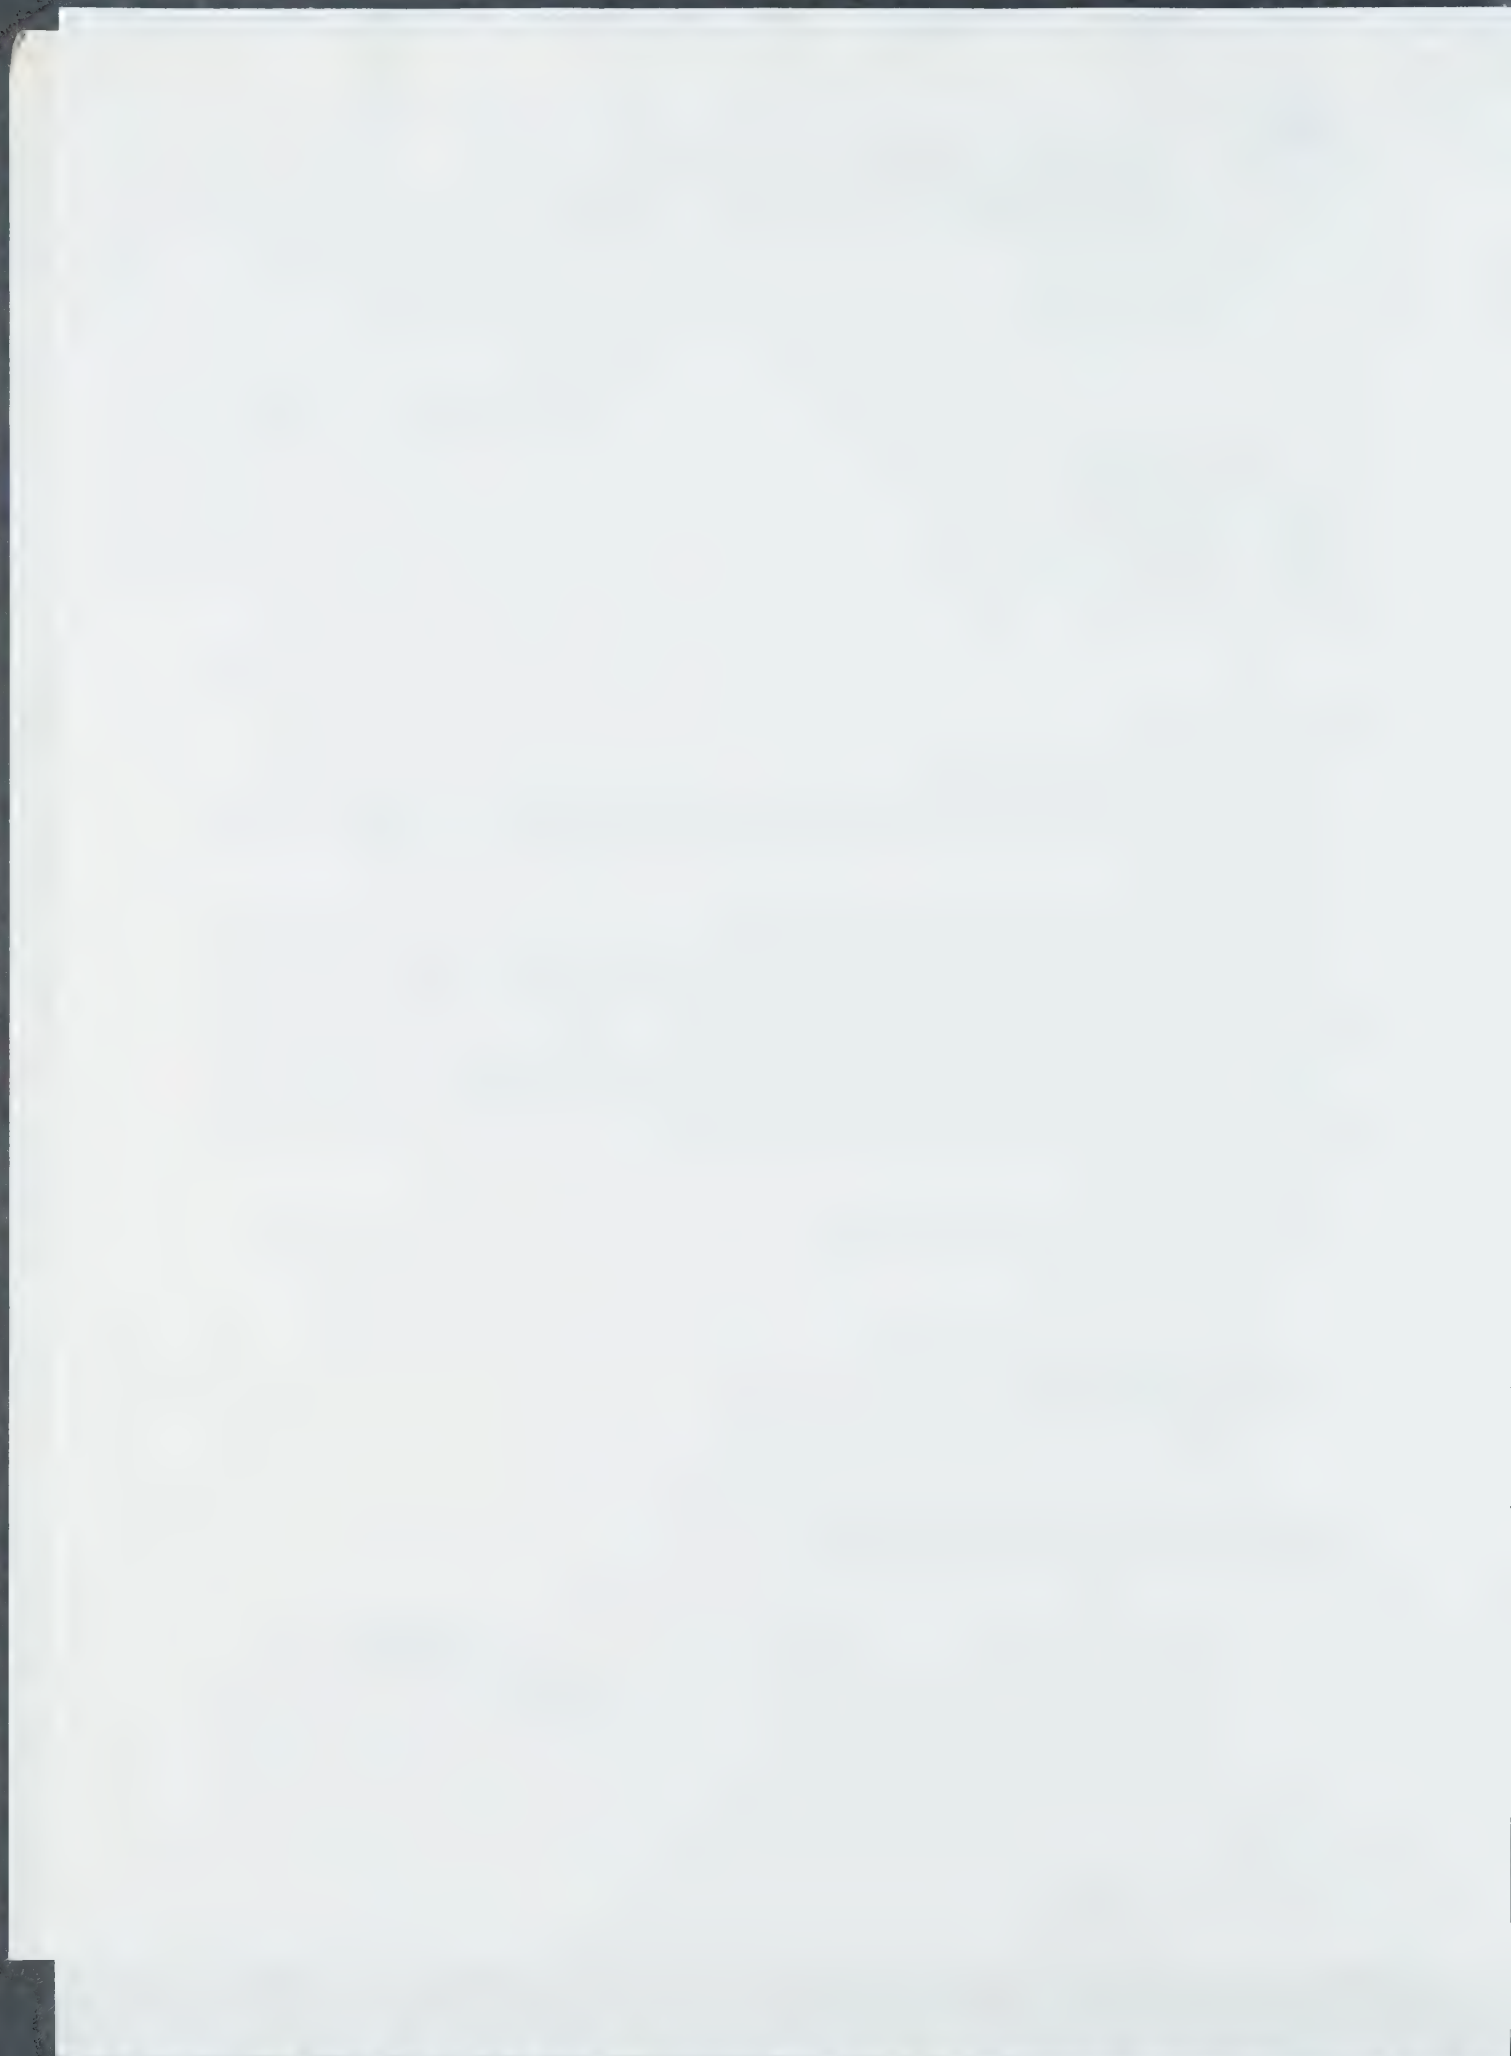

Sr. A. Alís
J. Uriach & Cía. S.A.
Degà Bahí 59-67
08026 Barcelona

DAVID A. EVANS

ABBOTT AND JAMES LAWRENCE PROFESSOR OF CHEMISTRY

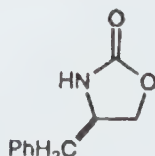

November 17, 1992

Gentlemen:

One of my former co-workers, Xavier Bartroli, is associated with the pharmaceutical company J. Uriach & Cia, which is located in Barcelona. This company, through the name Urquima S. A., is now starting to market (S) and (R) chiral oxazolidinones at the reasonable price of \$1100 per kilo.

(S) & (R)-4-benzyl-2-oxazolidinones

ca \$1100 per Kg

ca \$1100 per Kg

J. URIACH & C^{IA} S.A.

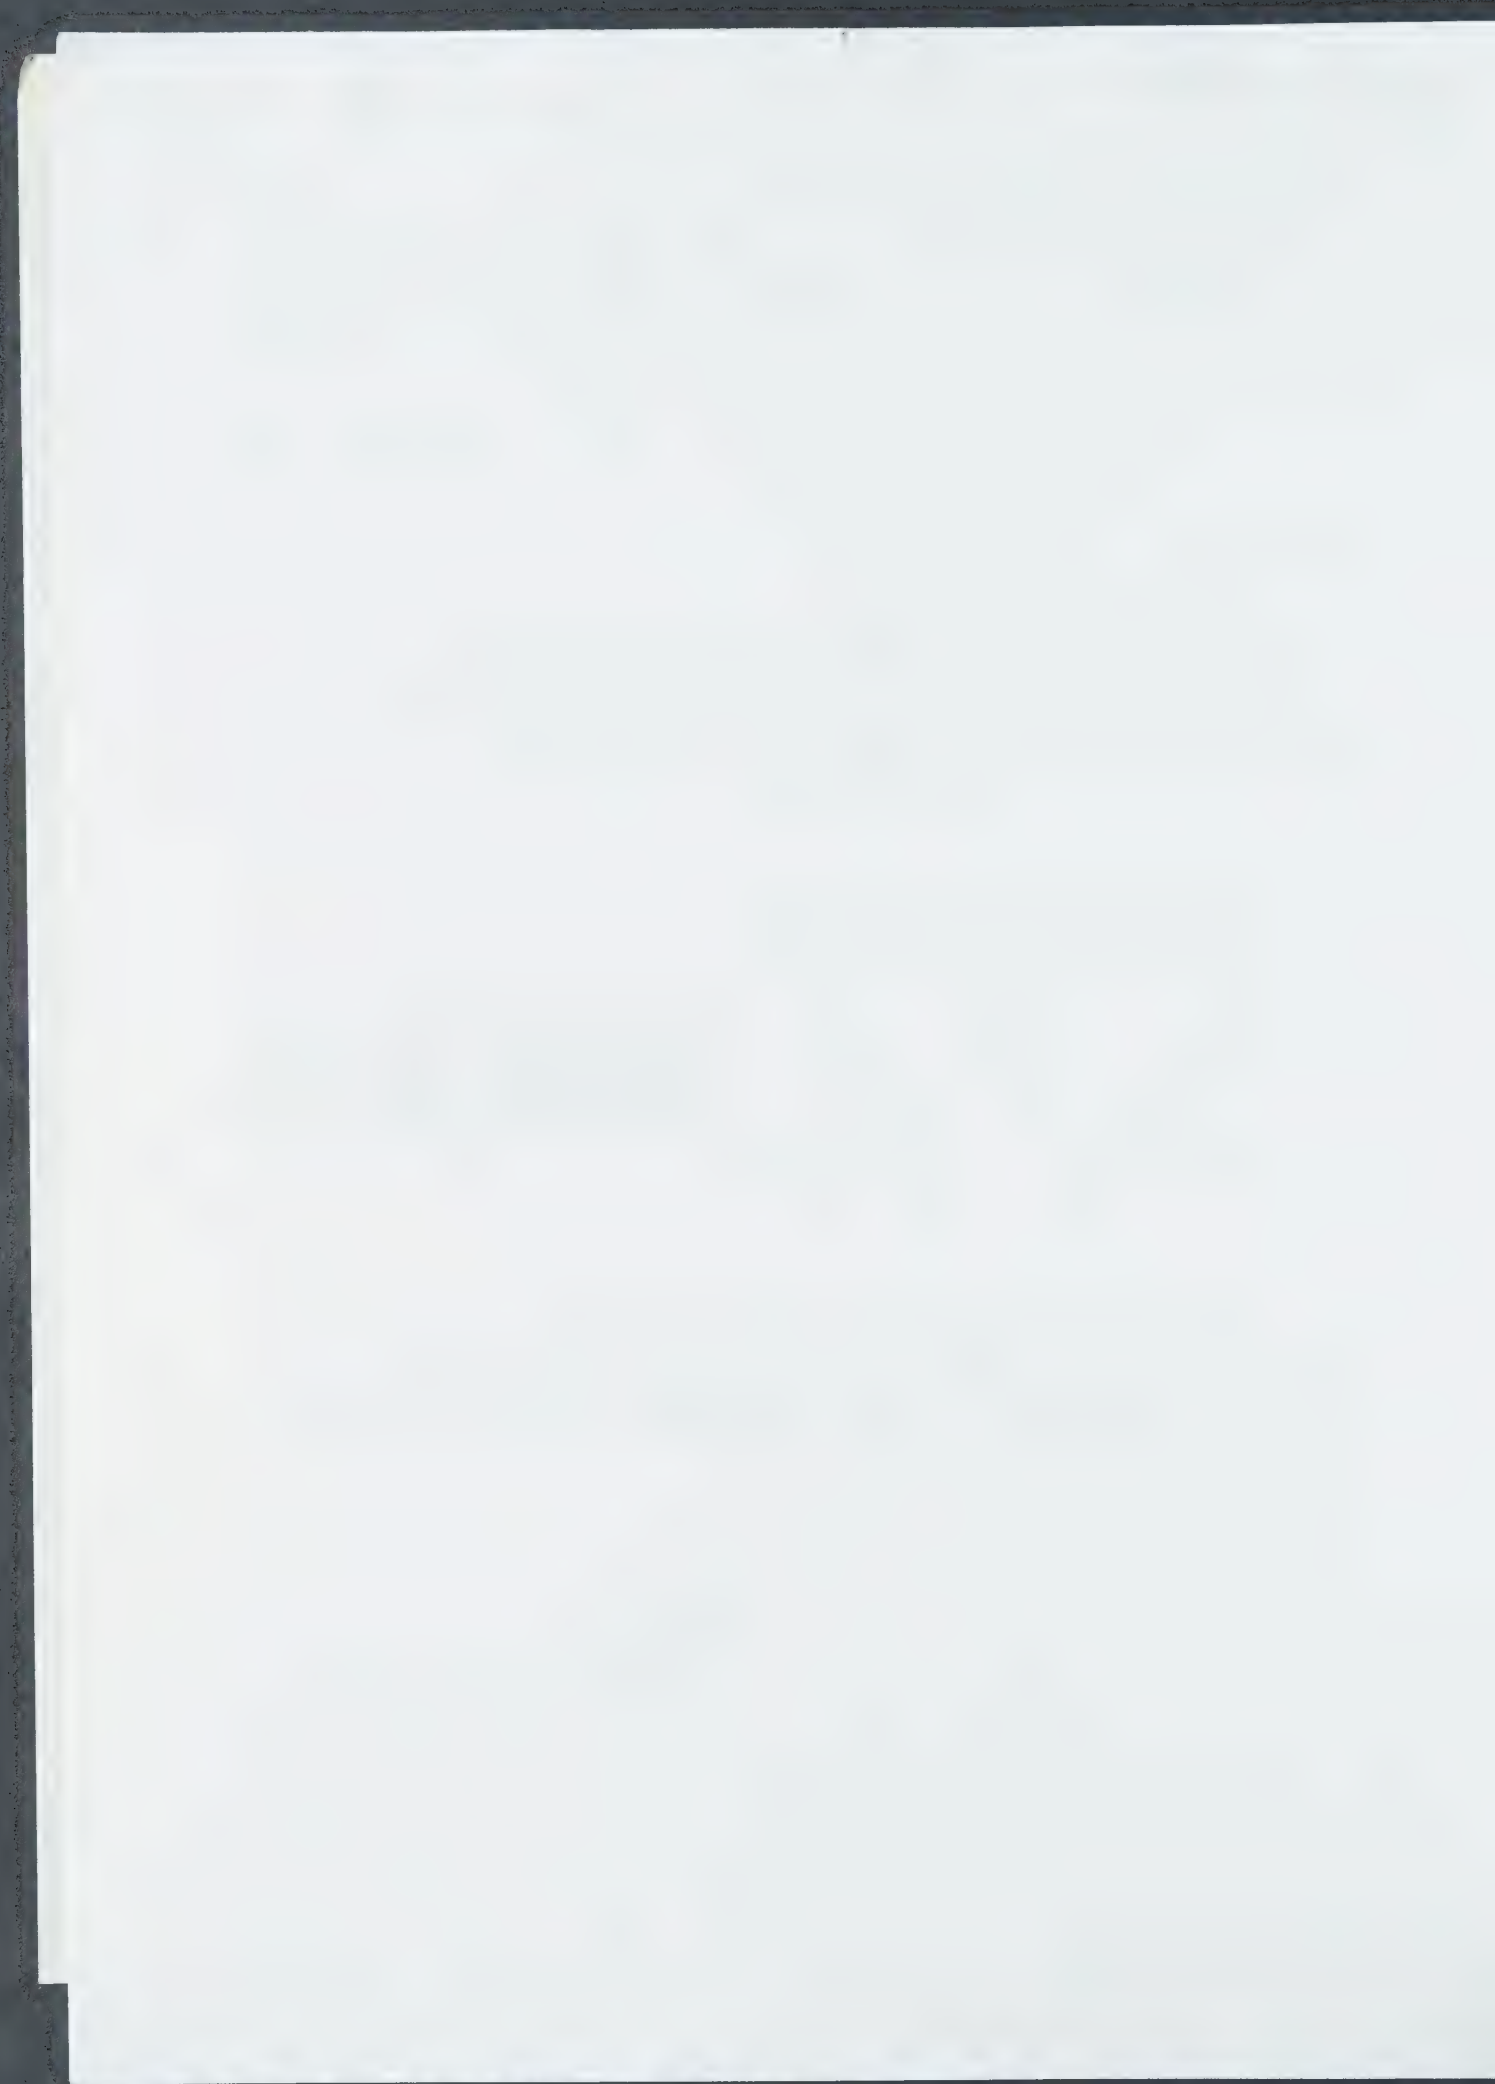

Apar. 74.295 - Dicario Bati 59-67 - 08026 Barcelona

FAX: 456 06 39

As a person who might have the occasion to use these auxiliaries, I would like to alert you to this company and these products. This price is by far the best which I have seen quoted. I was also informed that the company will provide better pricing for multi-kilo orders.

Sincerely yours,

David A. Evans

Universidad de Barcelona, El Tossal, Tarragona.

MEMO

To Pat Battig - Sigma
From M. Hassmann - Aldrich
Date November 20, 1986
Subject Acta Mailing List

Please add the following to the ACTA mailing list (all are in Spain):

Dr. Miguel A. Yus
Departamento de Quimica Organica
Facultad de Quimica

Prof. Jose Barluenga
Departamento de Quimica Organica
Facultad de Quimica

Prof. Vicente Gotor
Departamento de Quimica Organica
Facultad de Quimica

Dr. Ricardo Obeso
Departamento de Quimica Inorganica
Facultad de Quimica

Universidad de Oviedo
Oviedo, Spain

Dr. Gabino Carriedo
Departamento de Quimica Inorganica
Facultad de Quimica

Prof. Victor Riera
Departamento Quimica Inorganica
Facultad de Quimica

Prof. Jose Gimeno
Departamento Quimica Inorganica
Facultad de Quimica

Prof. Juan Fornies
Departamento Quimica Inorganica
Facultad de Ciencias
Universidad de Zaragoza
Zaragoza, Spain

Prof. Pascual Royo
Departamento Quimica Inorganica
Facultad de Ciencias
Universidad Alcala de Henares
Alcala de Henares (Madrid), Spain
