A Chemist Helping Chemists

May 1, 1996

Dr. Lars Hellberg
Chemistry Department
San Diego State University
San Diego, CA 92182-1030

Dear Lars:

You must have realized how very much Isabel and I enjoyed our week in California and Mexico. This was, of course, largely because of your wonderful care.

As you know, the expense calculation is somewhat complicated. Enclosed are the two airline receipts, to which have to be added only \$40 for transportation to and from the airport, for a total of \$673.

You gave me a check for \$400 from San Diego State University and \$100 from the Lutheran church. I will be receiving checks for \$200 from the UCSD and \$150 from TSRI, making a total payment to me of \$850. However, as expenses were only \$673, I will send you my personal check for the difference of \$177 made out to the SAACS of SDSU.

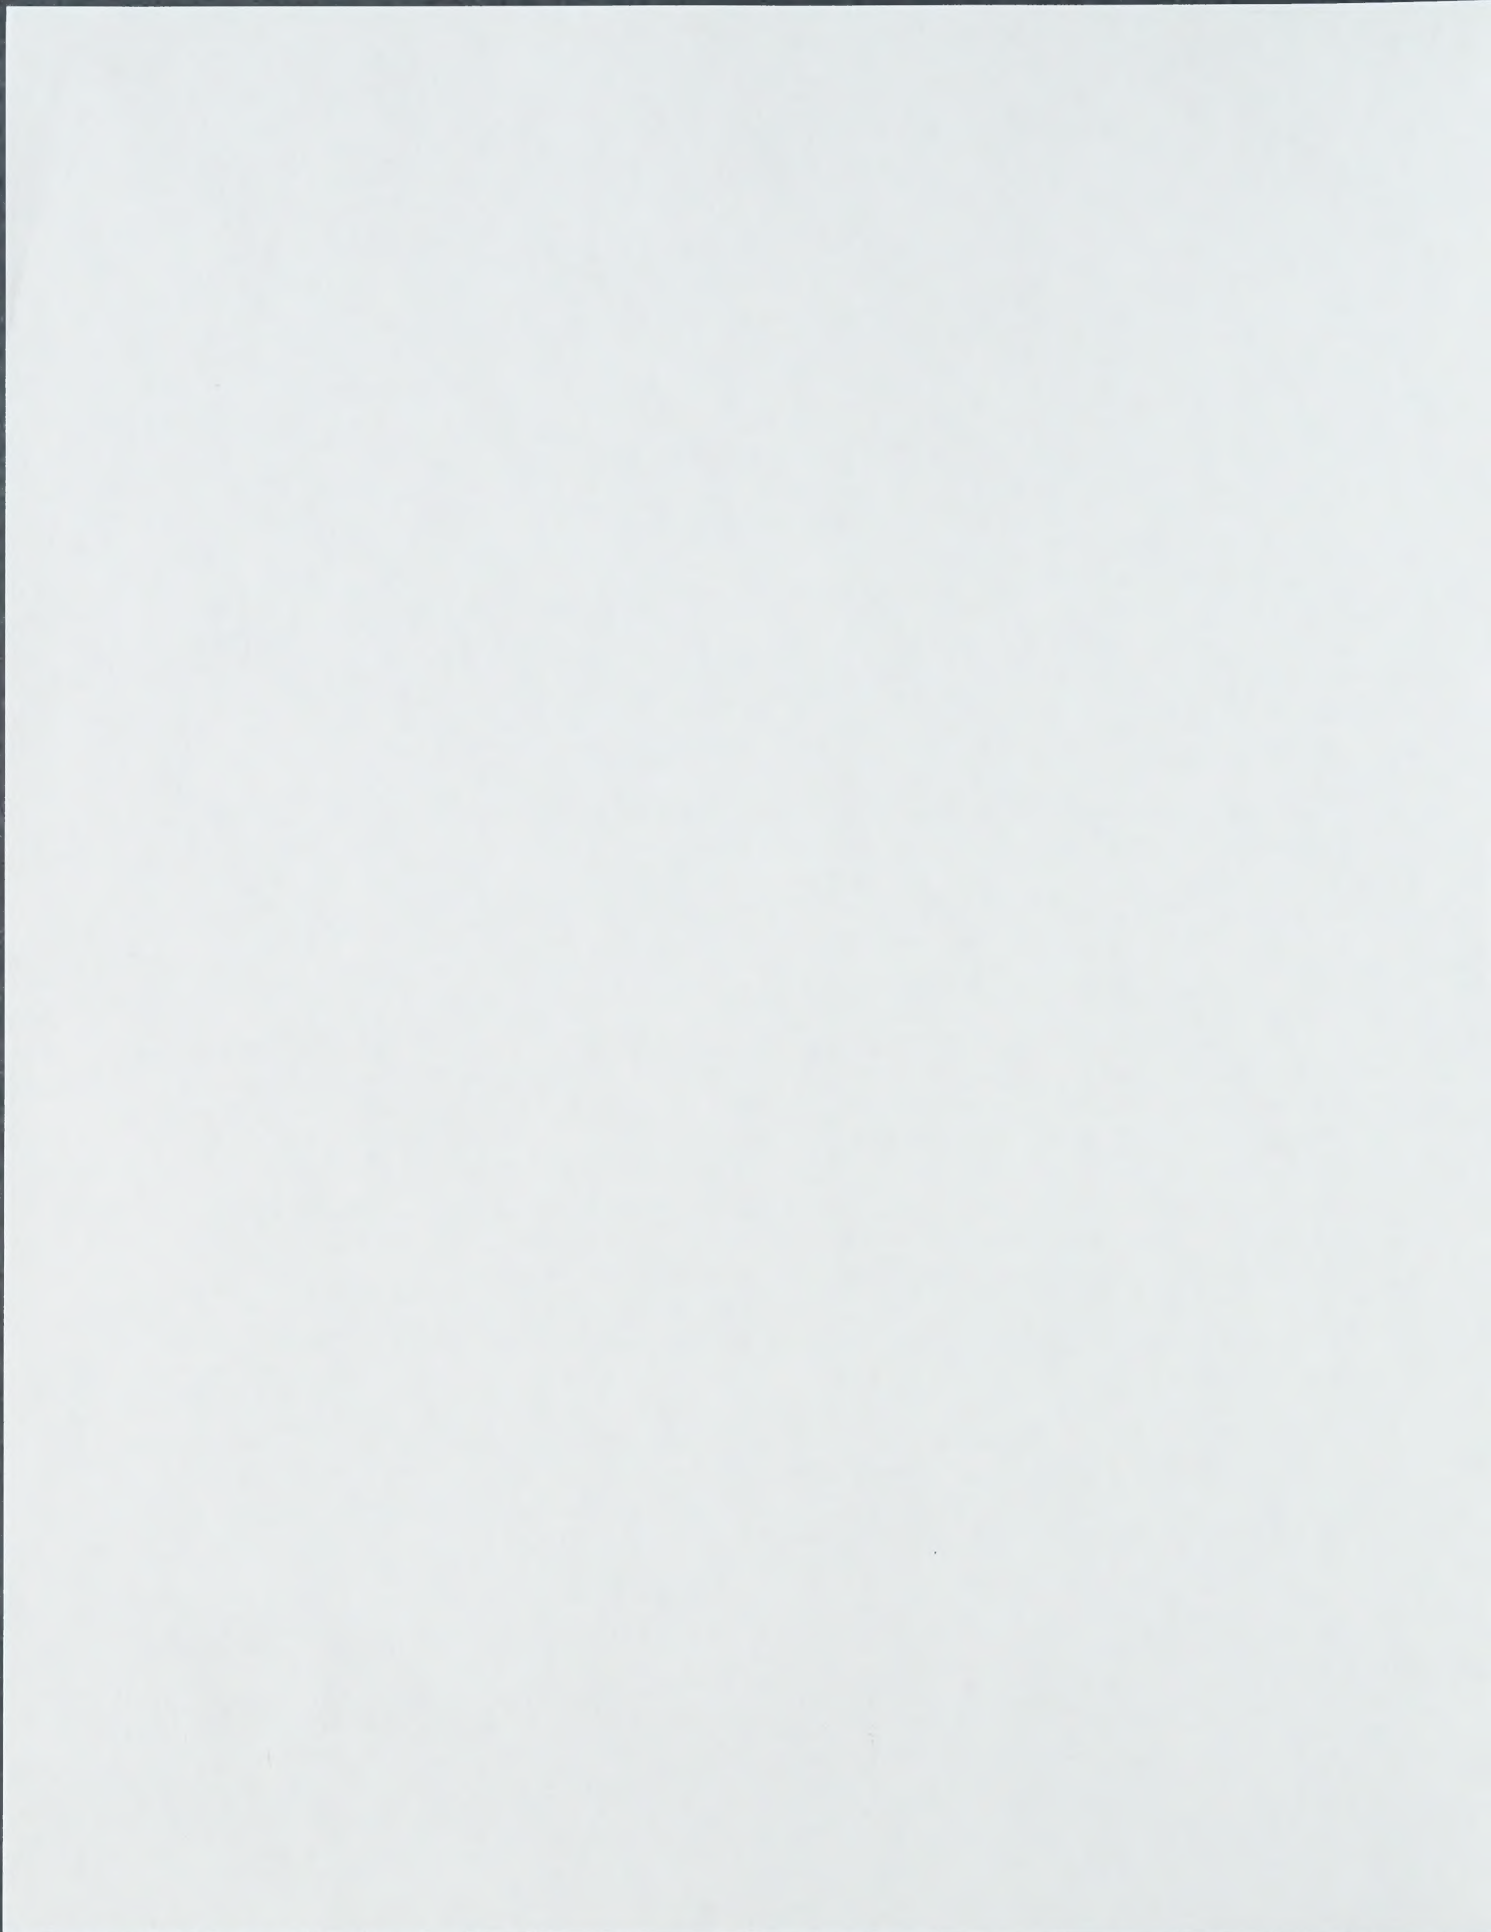

There is one minor complication: I signed several forms with my Social Security number so that the IRS may be misled into thinking that I received honoraria. I will keep a copy of this letter and pass that on to the IRS should they query me, and they may then check with you.

Enclosed as promised please find a print of *The New Baby* as well as a few others to share with your family and friends.

I talked to Bob Wandler, and he plans to come to my gallery within the next few days to pick up your most interesting samples. I will then fax you confirmation.

With best wishes from house to house, as always,

AB/cw

To: Dr. Lars Hellberg
Chemistry Department
San Diego State University
Fax: 619/594-4634

Dear Lars:

I hope that you were satisfied with Bob Wandler's offer to acquire your samples for \$500.

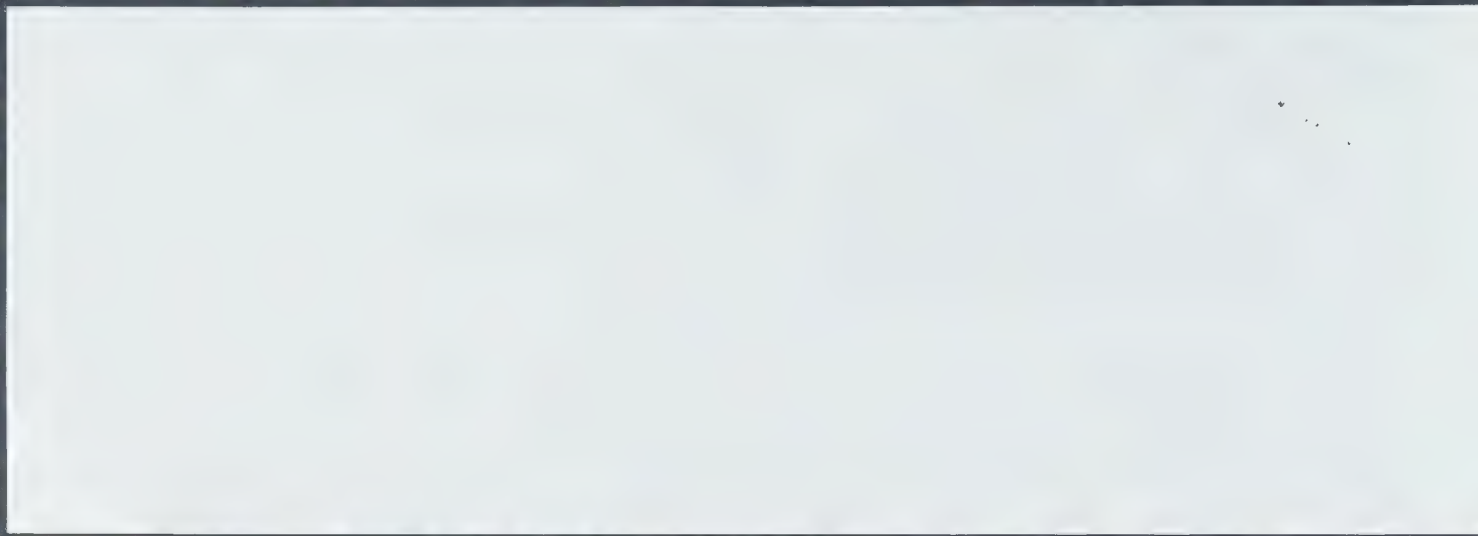

As Bob may have told you, he plans to be in San Diego later this month and hopes that he might be able to acquire some more samples from you.

After one of my talks, a young female Ph.D. student in chemistry talked to me about advice where to study the conservation of paintings. I promised to send her some information about conservation journals, but unfortunately, I have mislaid her name and address. It would be great if you could send me that information.

With all good wishes from house to house, as always,

AB/cw

Dr. Alfred Bader
Milwaukee, Wisconsin

April 26, 1996

Dear Dr. Bader:

Herewith I enclose a series of solid samples of modest amount per sample, to be examined for possible entry into the Library of Rare Chemicals at Aldrich Chemical Company. I am glad that you will be able to give them to the folks in the Library.

I have decided to leave the labels on the original containers, only adding a RED small number, if necessary, for the responsible persons to note a comment on the list provided with these samples. I may add a piece of clear 3M tape only if it appears necessary. I have prepared a list of the compounds, drawing them by hand and any additional text found on the label for each vial, then noting carefully how many small vials there are of each compound. I hope this will be useful in avoiding a mix-up of samples. I have also added the name(s) of the student(s) involved in the synthesis of the compounds. Most of these compounds are from the late 60s until mid-1970s; they were each stored in the sample container currently sent to you, behind a closed, glass sliding door in my office lab.

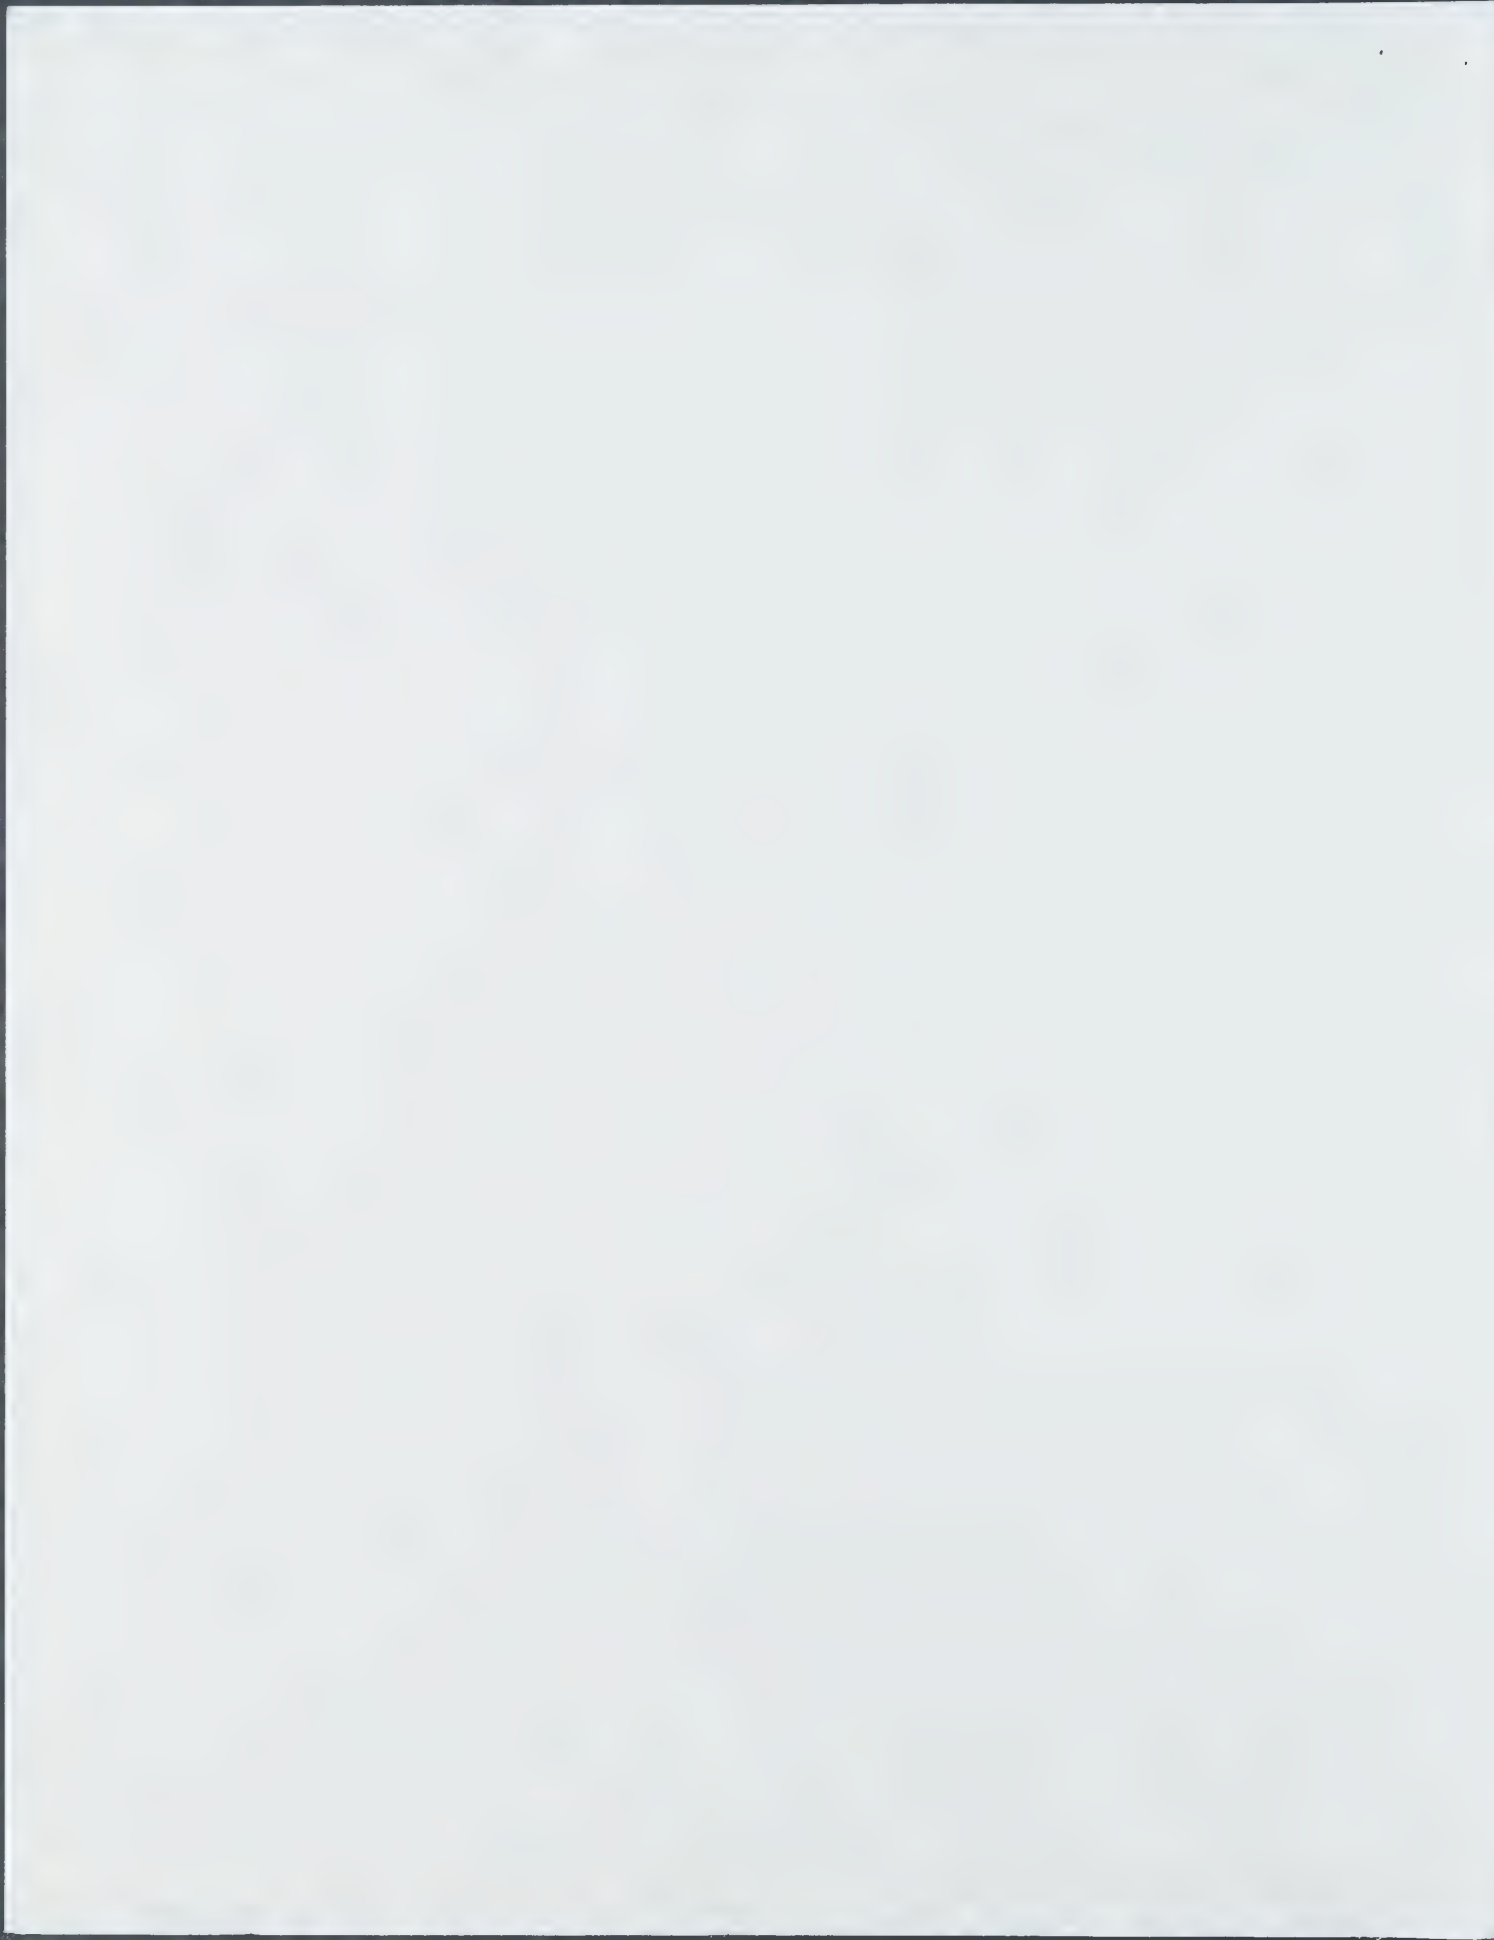

The 5-nitro-2-pyridyl compounds and the 5-nitro-2-thiazoyl compounds prepared by R. Fouts have not been published--instead, what I plan to do is to send a copy of the experimental section of the M.S. thesis completed by Mr. R. Fouts in 1974 to you, Dr. Bader, for transmittance to the Library at Aldrich. This should help to establish purity, at least at the time of preparation. Two miscellaneous ketone derivatives are also enclosed.

The 3,5-dinitro-2-thienyl compounds were the results of work of Fred Stults (undergrad, later worker) and Milo Prodanovich (M.S., early 70s), published in Journal of Heterocyclic Chemistry, 1972. I have enclosed a copy of this paper in the box containing all the samples.

If there are any questions, please feel free to write, fax (619-594-4634) or e-mail (lhellber@sciences.sdsu.edu) me about any aspect. If these are not acceptable quality samples, please call me about how I might want them treated--some I might want to save.

Very truly yours, Lars H. Hellberg, Prof.

 San Diego CA 92182-1030

(619) 594-5595
 FAX: (619) 594-4634

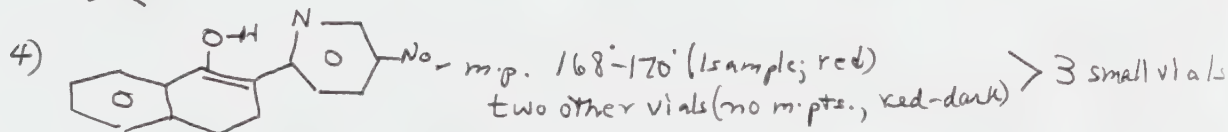

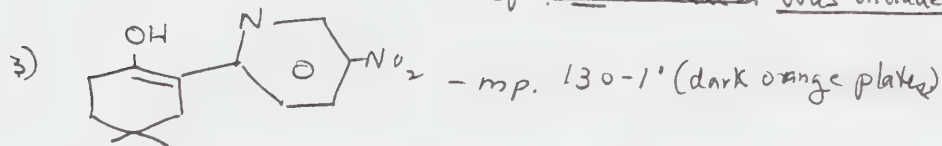

4/26/96

I enclose a published paper on this (1972) from J. Heterocyclic
 Chemistry
 Mr. Prodanovich, F. Stults, + L. H. Hellberg

At the moment, I really don't have time to take m.p.s. on
 these samples. Please feel free to return them. See more
 specific comments. Work done in 1968-1971.

- I
- 1) DNT-Gly (R=H) 1 vial, m.p. 193-205° (rude & say) milo P.
 - 2) DNT-Ala (R=CH₃) 3 vials, 1 looks good; no m.p. M.P.
 - 3) DNT-Val R=-CH(CH₃)₂ 6 vials, various shades of yellow - ~~F.S.~~ no m.p.
 - 4) DNT-leu R=(CH₃)₂CH-CH₂- 2 vials, dark; 1 has m.p. 133-137° F.S.
 - 5) DNT-Phe R=-CH₂-φ 3 vials; off yellow; 1 has F.S.
 NO EXPLANATION! m.p. 243-254°, way far from paper's m.p. 172-185°
 - 6) DNT-Asp R=-CH₂-CO₂H 2 vials, yellow-brown, with F.S.
 m.p.s. of 204°, + 211-212°. The paper reports 111-112° --- a publication error? (seems low compared to glutamic acid deriv.)
- II
- 7) DNT-Glu R=-(CH₂)₂-CO₂H 3 vials; 2 yellow with FS
 m.p. 191-2°; 1 brown, m.p. 187-191°
 - 8) DNT-Norvaline: Not in published paper; FS
 m.p. 143-147°

Dr. Alfred Bader
924 East Juncoau, Suite 622
Milwaukee, Wisconsin 53202

Dear Alfred:

Thank you for the letters and the fax of the past couple of weeks. I appreciate very much your keeping up on these matters, even though I have not responded until now--mainly because we have had final exams and, Saturday evening, graduation, and I enjoy participating in that.

First of all, I have sent you pictures of your visit here that I hope you and Isabel might enjoy--I have the negatives in case there is one or more you wish duplicates of.

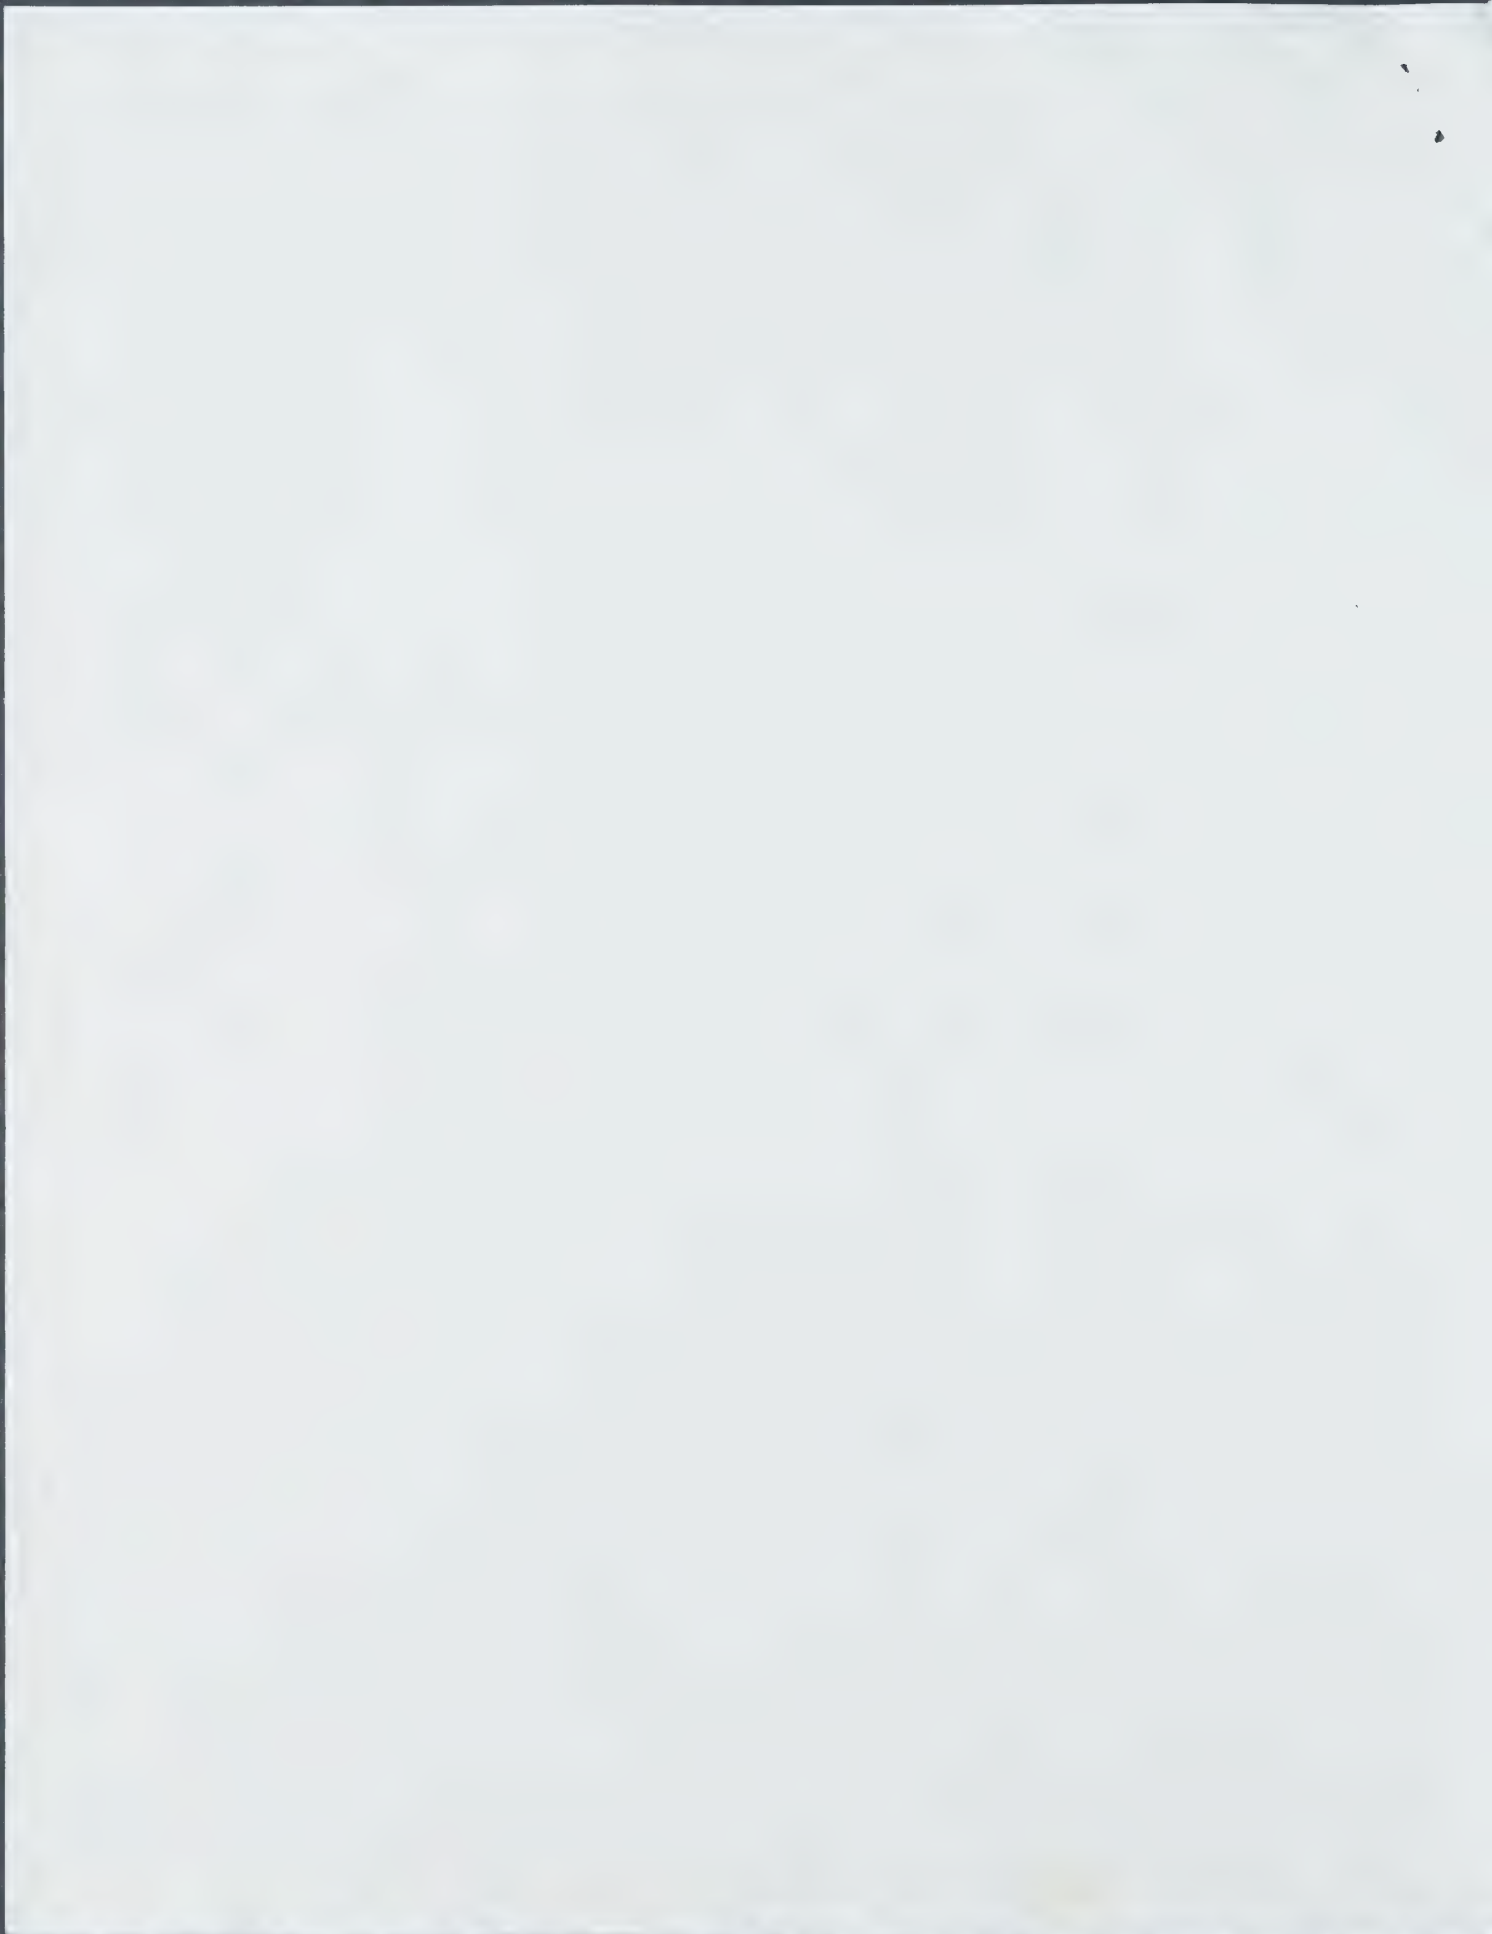

Secondly, Thank you for the check, and for catching what was an error on my part regarding who was paying for your motel accomodations in late April. The SAACS student group has now settled all financial matters regarding your trip--your check has been given to them, they have paid Lois and me a check for the VISA bill for your five days at Comfort Inn. Thank you.

I am sorry I didn't respond to your mentioning Bob Wandler a couple of times--I was very pleased to hear by telephone from him about the proposed \$500.00 for the chemicals you carried to him. And, just today, the check came! Thank you very much for making these arrangements. I have found a few more solid chemicals to give to Bob when he comes to San Diego late next week (June 6-7) for a show here--he and I will have lunch on the 7th of June. It will be fun to talk to him about the Library as well as Combinatorial Synthesis. I have also mentioned the Library to a couple of other synthetic chemists in the department.

I wondered a week or so ago how you and Isabel fared in the high winds and rain that "hit" SE Wisconsin last week. I assume you are still paddling along there in Milwaukee.

I am going to the Twin Cities tomorrow to visit several elderly cousins and friends who are going downhill from various causes. And I heard today of a cousin in Sweden passing away--one's mortality comes to the fore at such times.

My Best Wishes to You and Isabel. Sincerely, *Lars* Lars

PROGRAM OF EVENTS

- 5:30-6:30** SOCIAL HOUR/HOR D'OEUVRES
- 6:30-7:30** BUFFET DINNER
- 7:30-8:00** AWARDS AND PRESENTATIONS

INTRODUCTION: **Glen Knott**, SAACS President

ACS ANNOUNCEMENTS: **Steve White**, ACS Chair, and **Tammy Dwyer**, ACS Education Committee Chair, San Diego Section

RECOGNITION OF OUTSTANDING HIGH

SCHOOL SCIENCE STUDENTS: **Dan DeBry**, SAACS representative

SDSU AWARDS: **Dr. Stephen Roeder**, Chemistry Department Chair

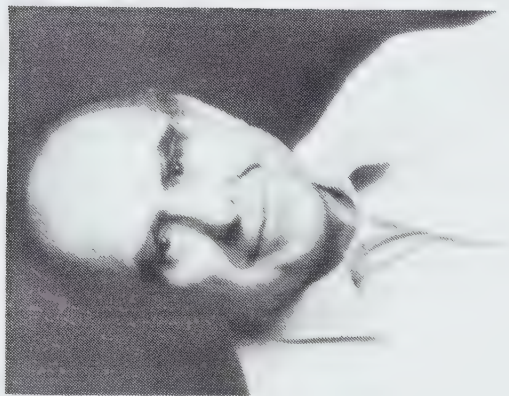

SDSU CHEMISTRY PROFESSOR OF THE

YEAR: **Glen Knott**, SAACS President

SAACS ANNOUNCEMENTS: **Kate Burmeister**, SAACS Vice-President

8:00 - 9:00 "HISTORY OF THE ALDRICH CHEMICAL CO." **Dr. Alfred R. Bader**

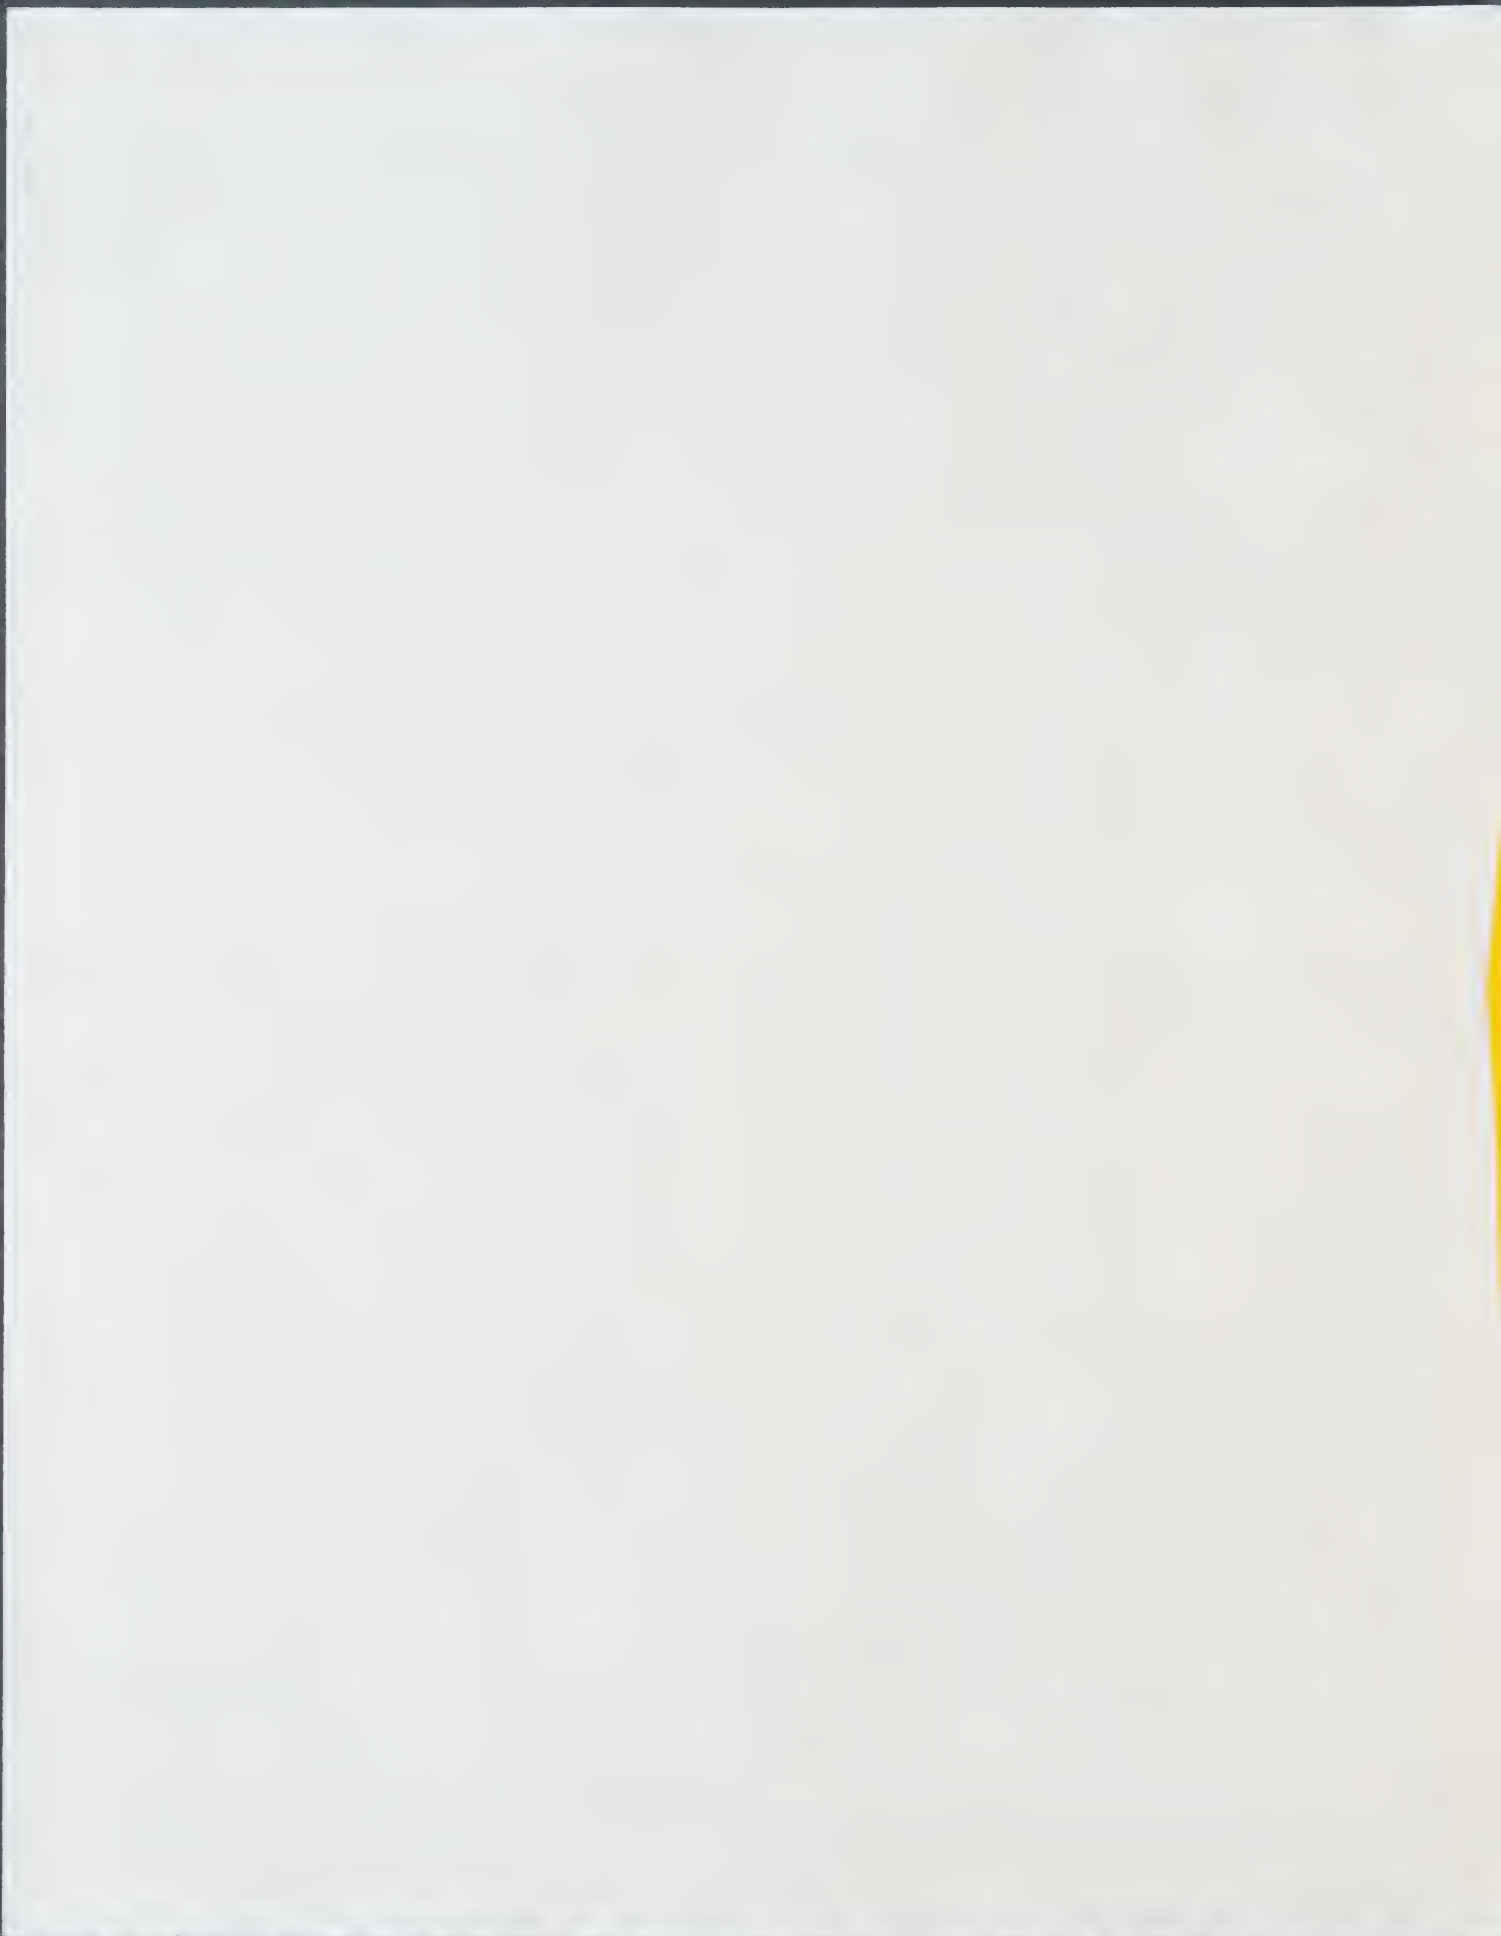

Special thanks to Suzanne Blackburn, ACS Councilor; Dr. Lars Hellberg, SAACS Faculty Advisor; Glen Knott, SAACS President; Kate Burmeister, SAACS Vice-President; Lisa Hinchman, SAACS Secretary; Annalisa Co, SAACS Treasurer; Dan DeBry, SAACS Representative; and Chris Hans and Mark Liersch, SAACS members.

DR. ALFRED R. BADER

Dr. Bader was born in 1924 in Vienna. Growing up he faced many difficult times with the rise of Nazism. As a consequence of this, he was forced to move to Canada at the age of 16. Fortunately, this turned out to be an invaluable experience for him, as he was adopted by a family in Montreal a year and a half later. He then had the opportunity to attend Queen's University in Kingston, Ontario. Here he received a Bachelor of Science degree in Engineering Chemistry, Bachelor of Arts degree in History, and a Masters of Science degree in Organic Chemistry. Later he went on to Harvard University where he received his PhD.

Presently, Alfred Bader lives his life according to what he calls his "ABC's": art, the Bible, and chemistry. Most people know Alfred Bader as the founder of Aldrich Chemical Company, but he is also an avid art collector whose collection has included works by famous artists such as Rembrandt and Rubens. Dr. Bader has also written an autobiography, and tonight you will have the opportunity to purchase an autographed copy of this book, "Alfred Bader: Adventures of a Chemist Collector". In addition, you will hear the intriguing tale of the history of Aldrich Chemical Company.

1996 SPRING BANQUET

HOSTED BY THE STUDENT AFFILIATES OF

May 8, 1996

To: Dr. Lars Hellberg
Department of Chemistry
San Diego State University
Fax: 619/594-4634

Dear Lars:

I am sorry that a trip to New York has delayed my responding to your fax of May 10th. Why the formality of addressing me as 'Dr. Bader'?

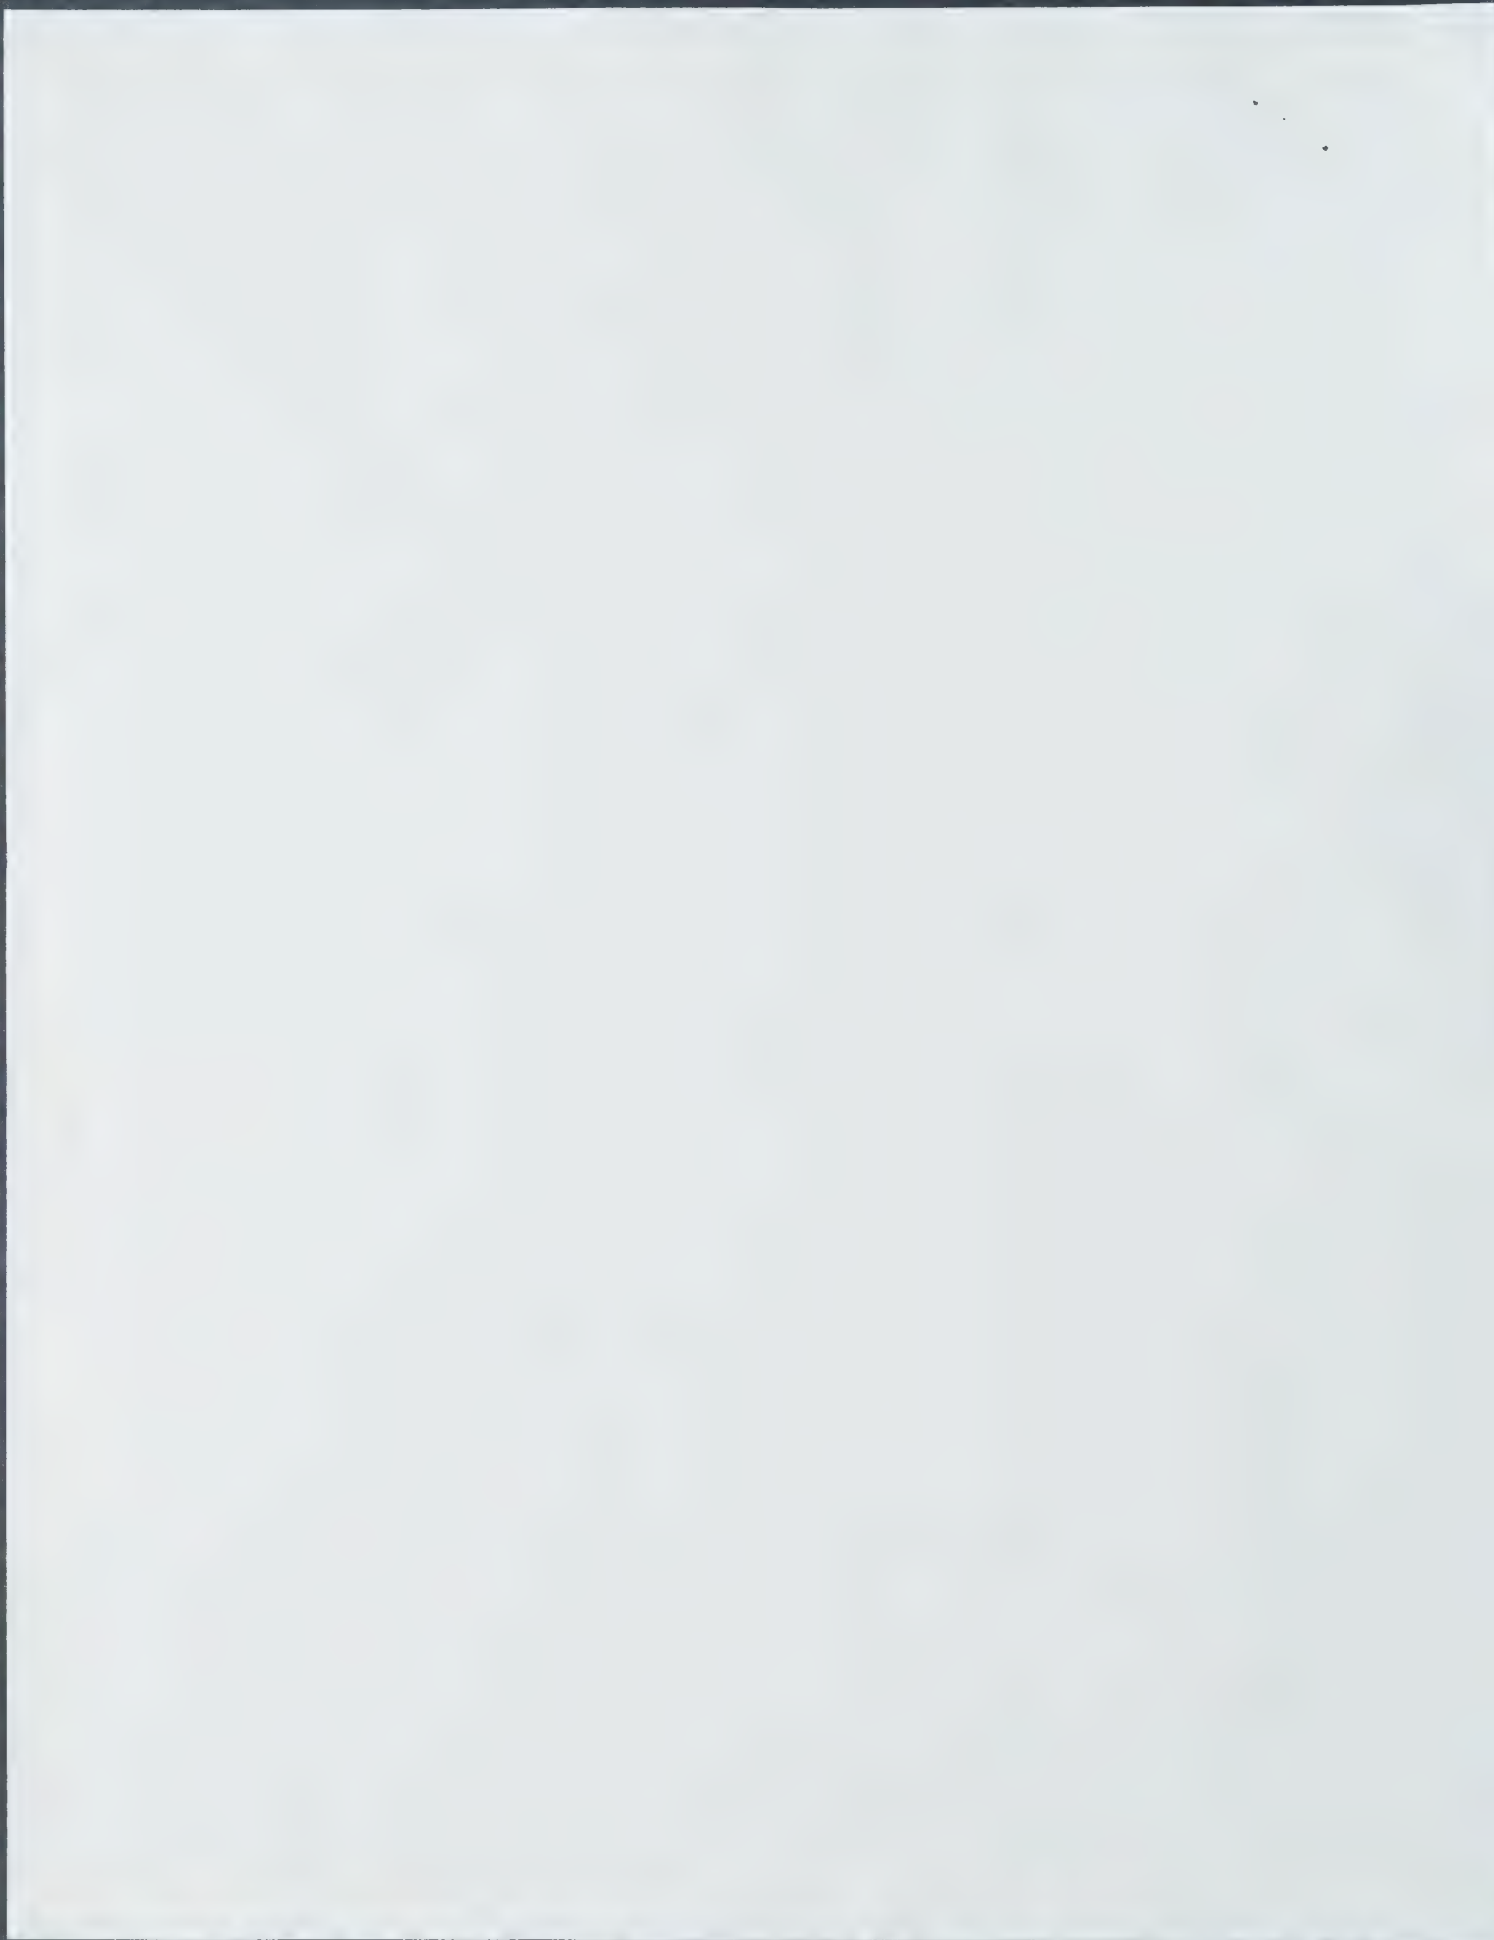

I did receive the check from the Scripps Clinic, but not from UCSD.

However, I do owe you money because it was you and not I who paid for the Comfort Inn.

Best wishes, as always,

A handwritten signature in cursive script, appearing to read 'Alfred Bader'.

Dr. H. Ballew

1024 East Green
Malibu, CA

Dear Dr. Ballew

Today I just received your letter of May 1, with the
checks -- your accompanying letter about a few
your other letters, one written May 3 -- had arrived
at least a days ago. The US Mail had the same
would -- larger envelope sizes.

PLEASE do not send a check! Ito & Kyrone is
you forgot to include the cost of 5' water in the
Comfort Inn --- \$359. That would make your
expenses a total of \$1,032.00.

Please let me know when the other 2 checks from
UCSD and Scripps arrive --- if they haven't arrived
very soon, I will make some phone calls. They will
be even slower than SDSU --- not a good recommendation.
The SAC's here under your name!

THE CALIFORNIA STATE UNIVERSITY

Will be in touch on this! Sincerely, Lane Hellberg

Dr. Lars Hellberg
Chemistry Department
San Diego State University
San Diego, CA 92182-1030

Dear Lars:

Just a note to tell you that Bob Wandler looked at your interesting samples, liked them a lot, and suggested \$500. He already left a message for you with your secretary and hopes you will find this satisfactory.

He plans to be in San Diego later this month and would, of course, be delighted if you could find some more samples for the Library.

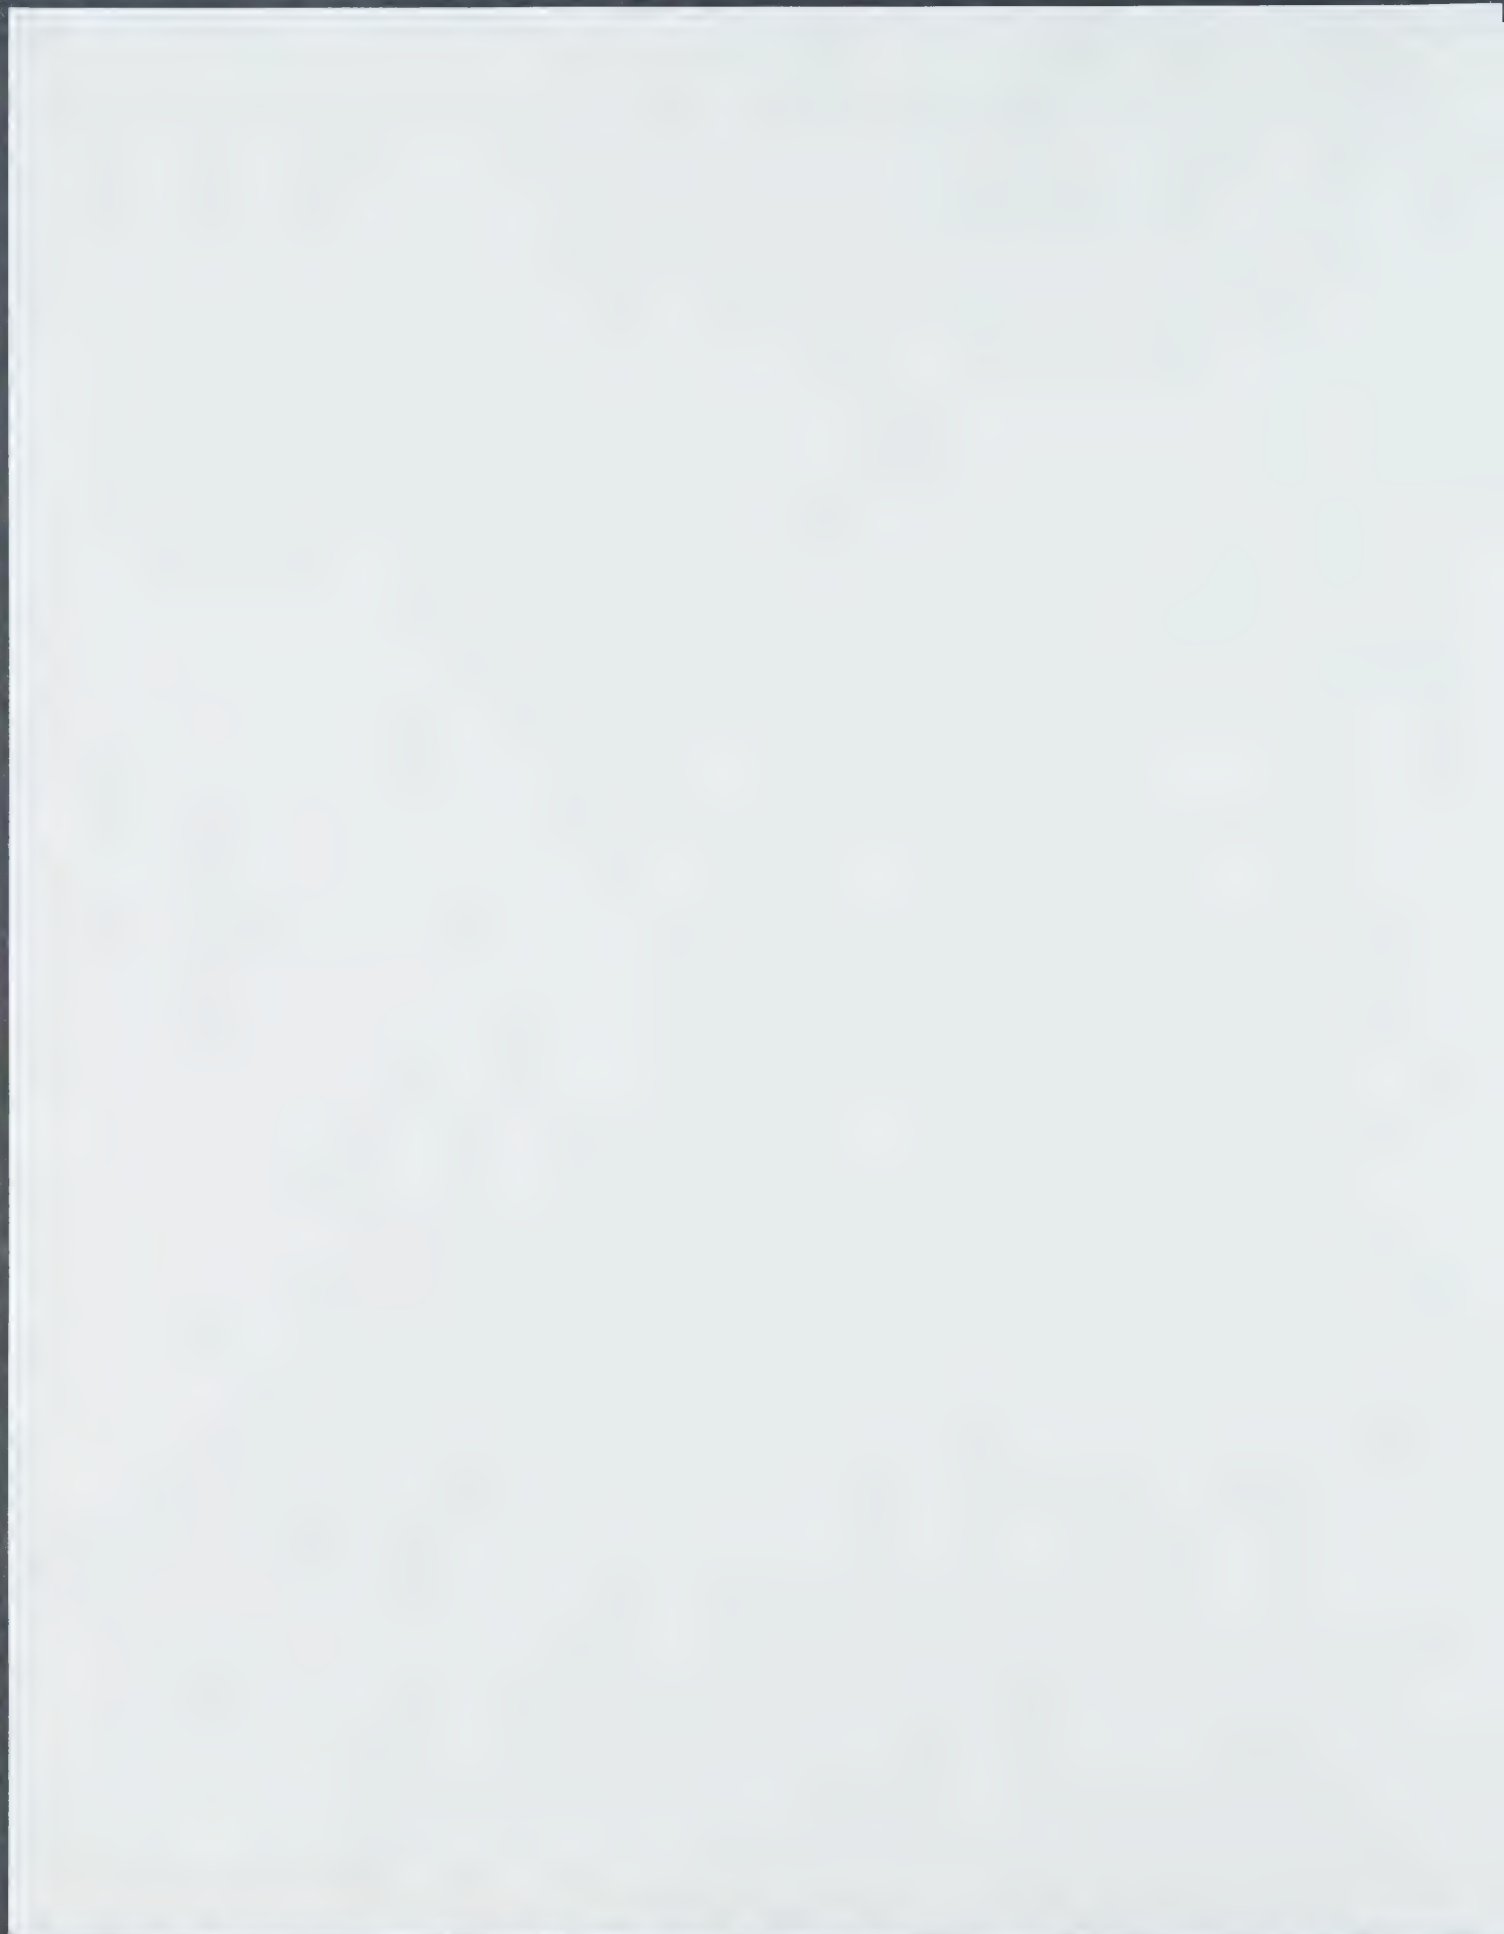

There is no question in my mind that our Library has helped thousands of research chemists around the world.

With all good wishes, I remain,

Yours sincerely,

AB/cw

A Chemist Helping Chemists
February 28, 1996

Seth L. Harrison, M.D.
Managing Director
Hambro BioBank
650 Madison Avenue, 21st Floor
New York, NY 10022

Dear Seth:

You must know what pleasure your visit gave me, and now I also want to thank you for your detailed letter of February 22nd.

Except for Aldrich's involvement with tacrine, described on page 122 of my autobiography, and through the Helen Bader Foundation's involvement, I know very little about the treatment of Alzheimer's disease.

I would most like to become involved with companies where I can give some chemical help, and hence, I am looking forward to learning more about the two companies with which the three of you will be involved chemically, namely the building block business and the catalyst business.

As you know, Isabel and I will be in San Diego from Monday noon, April 22nd until Saturday, April 27th and hope then to have a chance to talk some more with Barry. he is one of the most brilliant chemists I know, and such fun to be with.

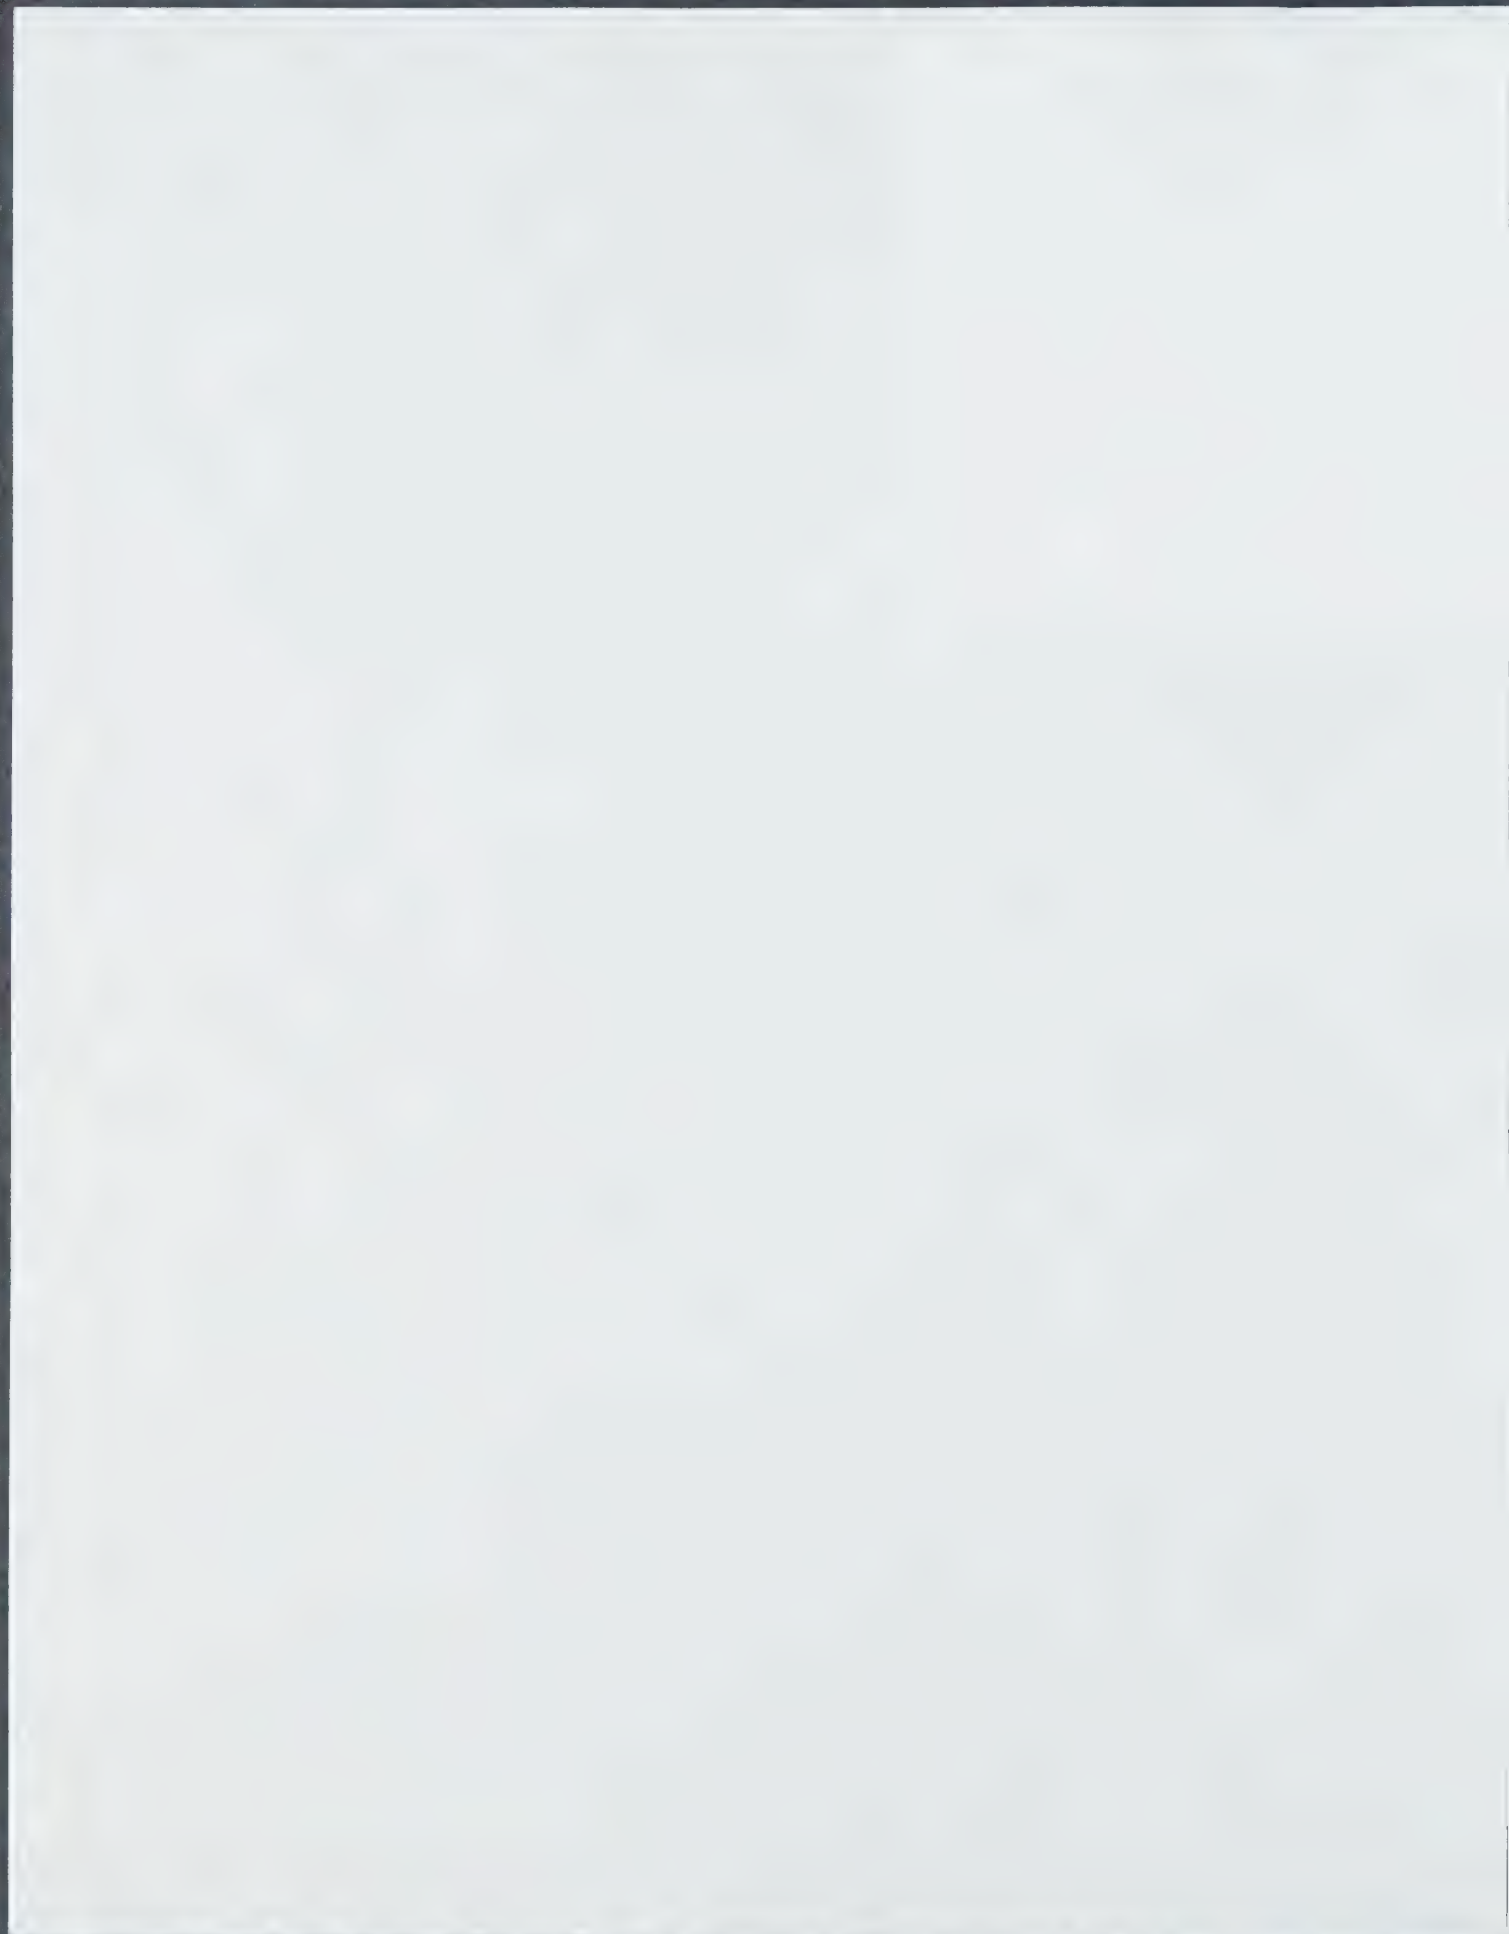

You are one of the very few people I know who obviously loves art, is an accomplished entrepreneur and a fine scientist. I already look forward to your next visit.

With all good wishes, I remain,

Yours sincerely,

AB/cw

February 22, 1996

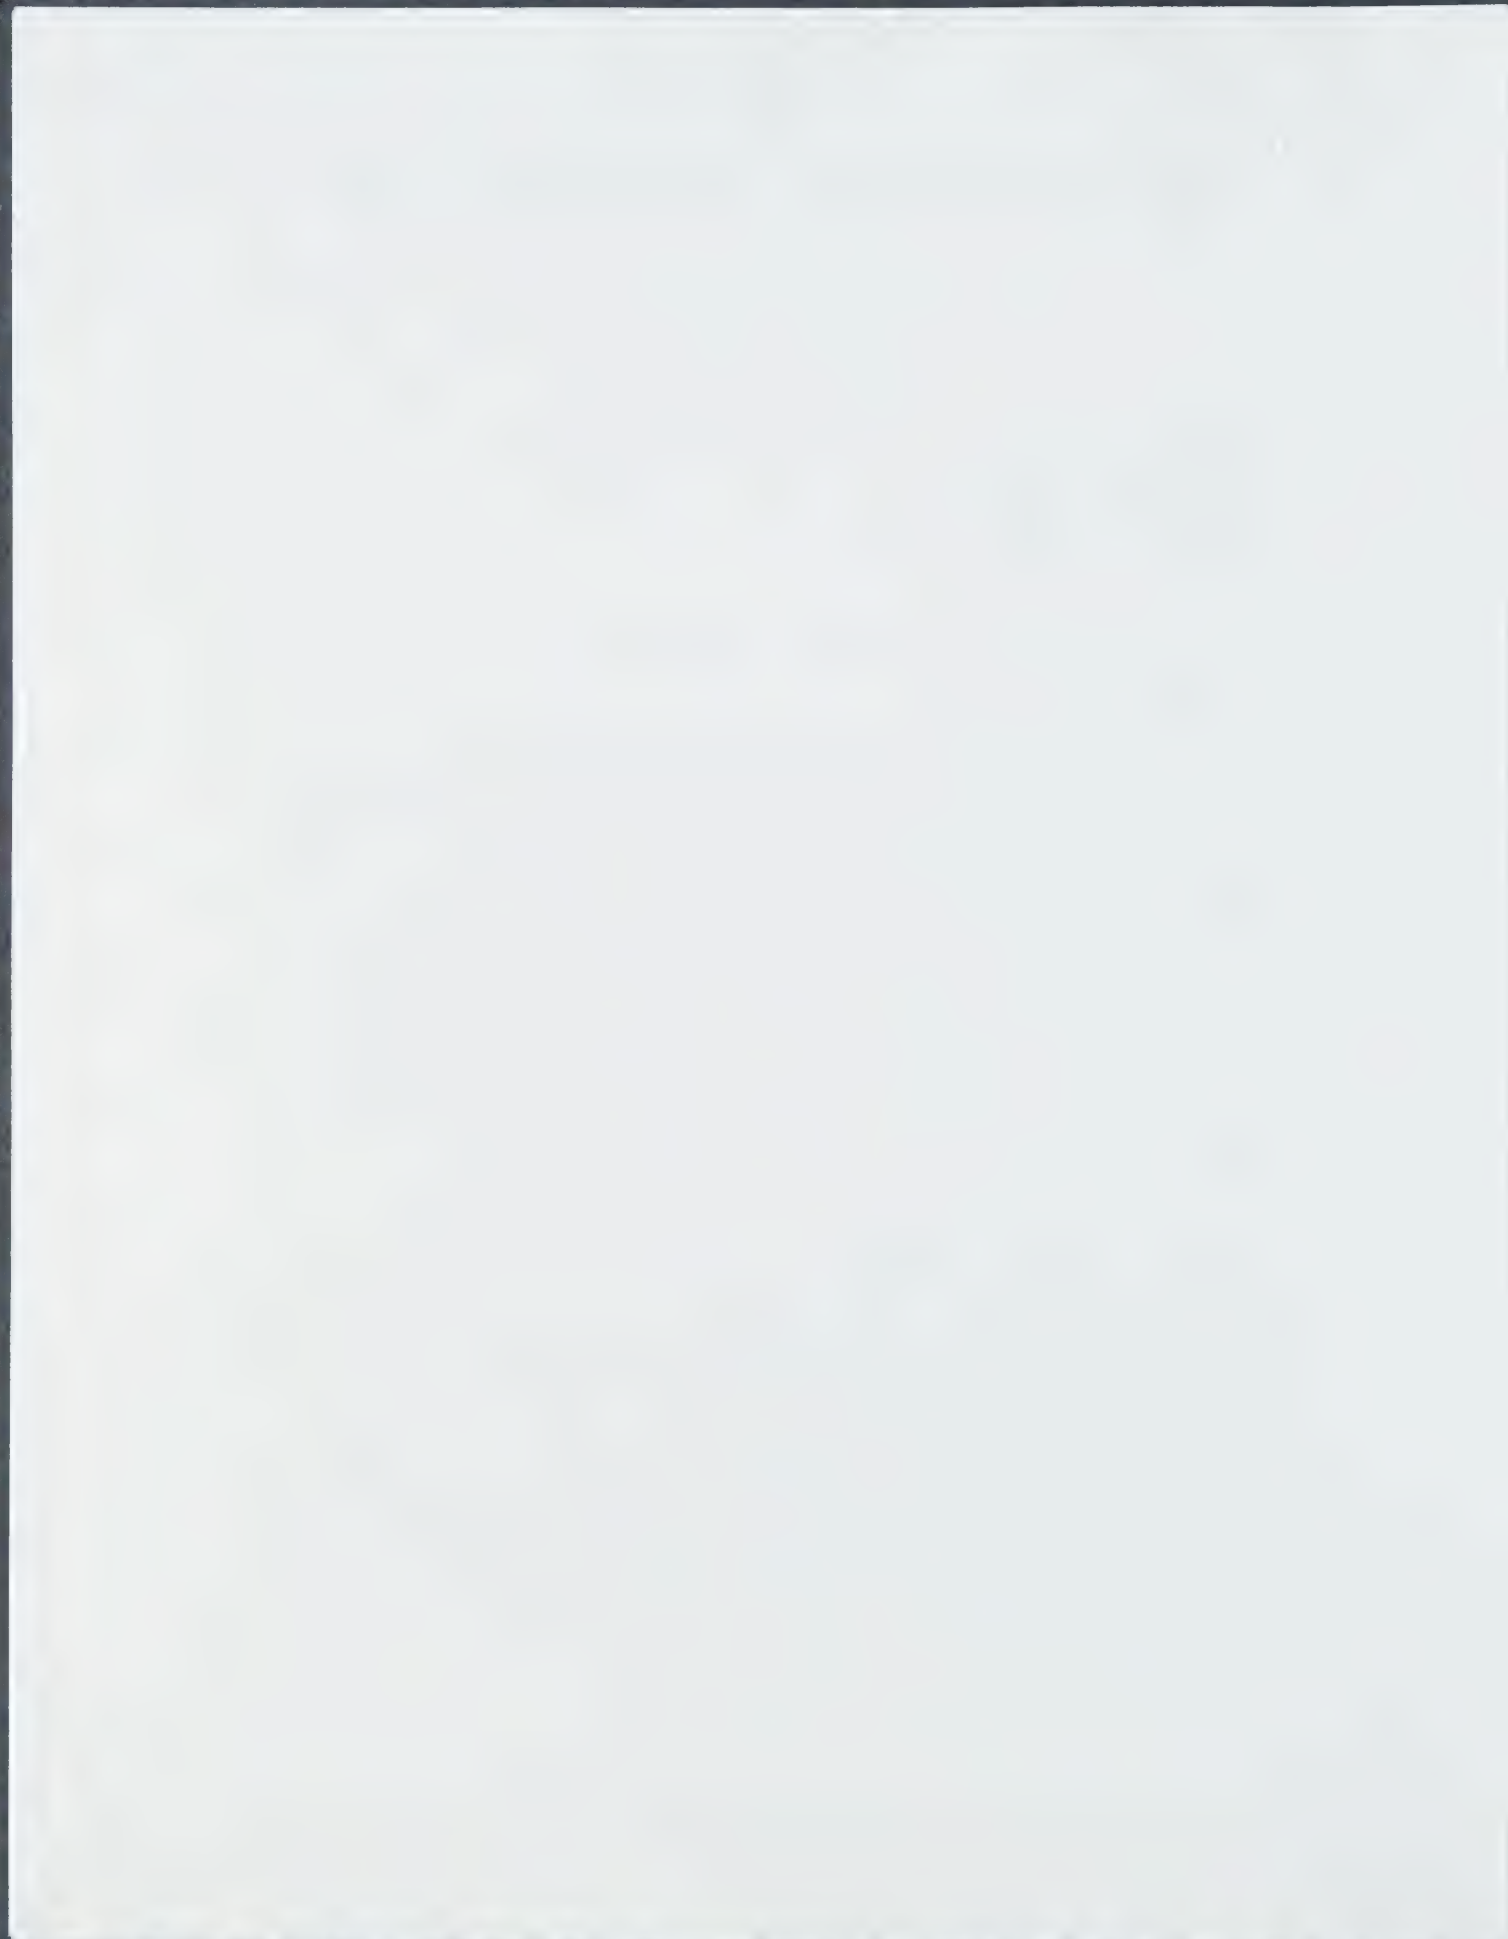

Dr. Alfred Bader
Alfred Bader Fine Arts
Astor Hotel, Suite 622
924 East Juneau Avenue
Milwaukee, WI 53202

Dear Alfred:

Barry Sharpless, Dave Boulton and I still glow from our visit last Saturday with you in Milwaukee.

I especially wanted to thank you for the opportunity to tour your gallery and your house and to view with you the wonderful masterpieces in your collection. I have unwrapped the Epstein "boat picture" and have already noticed details in the painting that make me love it even more: in the ship's hull there are many complicated layerings and swirls, algal greens, mud browns and mustard yellows, etc., etc. I have never thought of myself as an "...art-lover", but I actually think this is what I am. In September, I was invited by Hambros Bank in London to come over and make a presentation on the U.S. biotechnology markets. This was to an audience of completely non-technical investors, so as a heuristic device I interspersed slides of famous paintings with the main slides from my talk. I began with Pollock and ended with Breughel (to give you a sense of the fun I had in putting it together and the eclecticism of the scope.) So, independent of any business project, I hope that we can stay in touch on this level; and the next time I see you, I would be happy to bring the biotechnology/art talk along, which you may get quite a kick out of.

As far as the business opportunities go that we discussed: I believe that they are robust and timely. The accelerated discovery through combinatorial automated methods of new industrial catalysts is an exciting concept especially with the team assembled. Apparatus from the combinatorial chemistry and high-throughput screening world of drug discovery when transposed onto the discovery of new industrial catalysts should enable intuitions such as Barry's to make great leaps consistently. Barry believes he would be able to cut down the seven-year discovery time, which is the time that elapsed between the publication of each of his major reactions, to one year. We need to displace but a single energy- and cost-intensive chemical transformation with a well-catalyzed version to create enormous value. In addition, if we could generate financial leverage and assure a supply of interesting chemical building blocks through the creation of a building-block business on the side, then so much the better-- provided that we do not distract ourselves from the main effort.

We are now in the process of writing a short, to-the-point business plan outlining what we believe will be the most economically efficient way to finance and operate over the first twelve to twenty-four months. I expect to have this to you within thirty days.

Separate and apart from the catalyst plan, and based upon your stated interest in Alzheimer's disease, I enclose a summary of a business that I have been developing in a novel area of Alzheimer drug discovery. KBS is on the Scientific Advisory Board and we are having a great time trying to finance Acumen utilizing corporate partnerships only. You may or may not have an interest in this, but I thought it would be food for thought as to how to proceed in Alzheimer's disease at least at the Helen Bader Foundation level. Any member of the Acumen team would be more than happy to sit down with you and others to outline how we view various areas of Alzheimer's research and where we see the greatest needs and the greatest progress likely to be made.

I truly enjoyed meeting you and Isabel and look forward to our future interactions.

Warmest regards,

A handwritten signature in black ink, appearing to read 'Seth L. Harrison', with a horizontal line extending to the right.

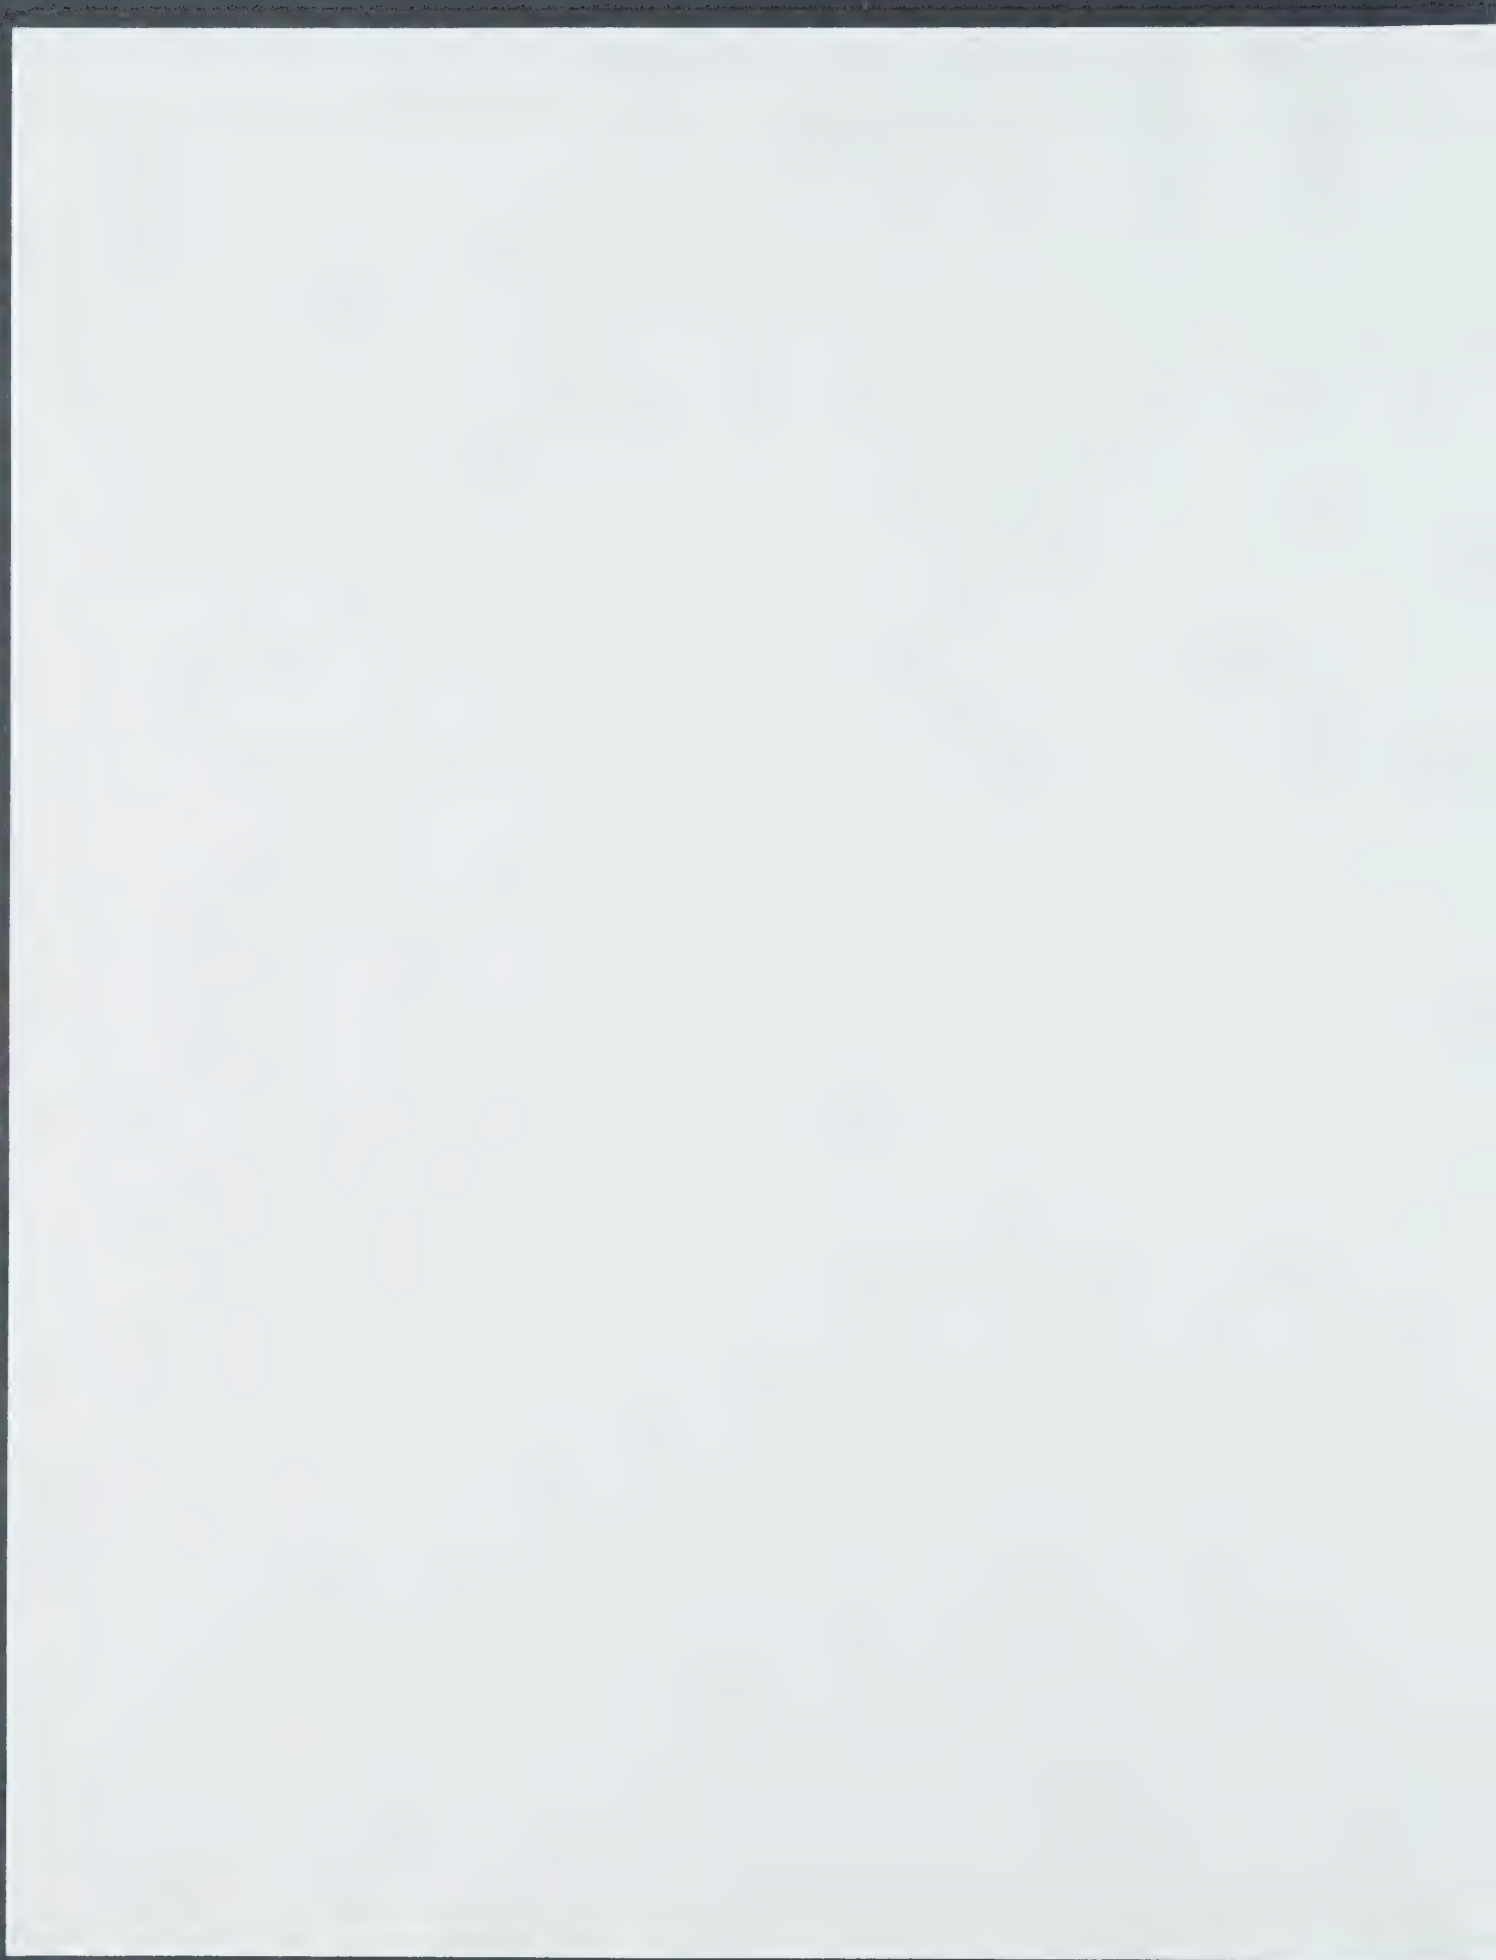

Seth L. Harrison, M.D.
Managing Director
Hambro BioBank

Enclosure (1)

Schedule of Dr. and Mrs. Alfred Bader in San Diego

Date: February 21, 1996

<u>Date</u>	<u>Time</u>	<u>Place</u>	<u>Event; Related Matters</u>
4/22	12:15 PM	Airport	Arrival via Midwest Express
4/22	4 PM	UCSD	Organic Seminar, UCSD Title: "Josef Loschmidt, The Father of Molecular Modeling" (JLFMM)
4/22	Evening	La Jolla	Dinner with Faculty, UCSD
4/23	10:45 AM	San Diego Museum of Art (SDMA)	"The Rembrandt Research Project and the Collector" (In SDMA conference room- undetermined crowd size)
4/23	3:30 PM	SDSU	Department Seminar, SDSU Title: "JLFMM"
4/23	6 PM-Drinks 7 PM-Dinner 8 PM-Lecture	SDMA	"The Adventures of a Chemist/ Collector" (ACC); to the "Ex- plorers Club" of San Diego (approx. 100 people)
4/24	9 AM	SD Luth Minsters (Tierrasanta Lutheran Ch)	"The Bible thru Dutch Eyes: Rembrandt and the Jews"
4/24	12-1 PM (bit more casual!)	Centro de Graduados, Instituto Tecnologico, Tj	Seminar: "ACC" (To Lunch afterwards, at a nice place in Tijuana)
4/24	Evening	Dinner	L. Hellberg
4/25	5:30 PM	High School Nite-ACS Mt	Talk: "The History of the Aldrich Chemical Company" (about 300 pers., at Al Bahr Temple; buffet dinner
4/26			
4/27	1:00 PM	Departure for Milwaukee

Dear Professor Theodorakis:

In response to your letter of February 22nd, I look forward to being with you on the afternoon of April 22nd.

The title of my talk will be "*Josef Loschmidt, the Father of Molecular Modelling*".

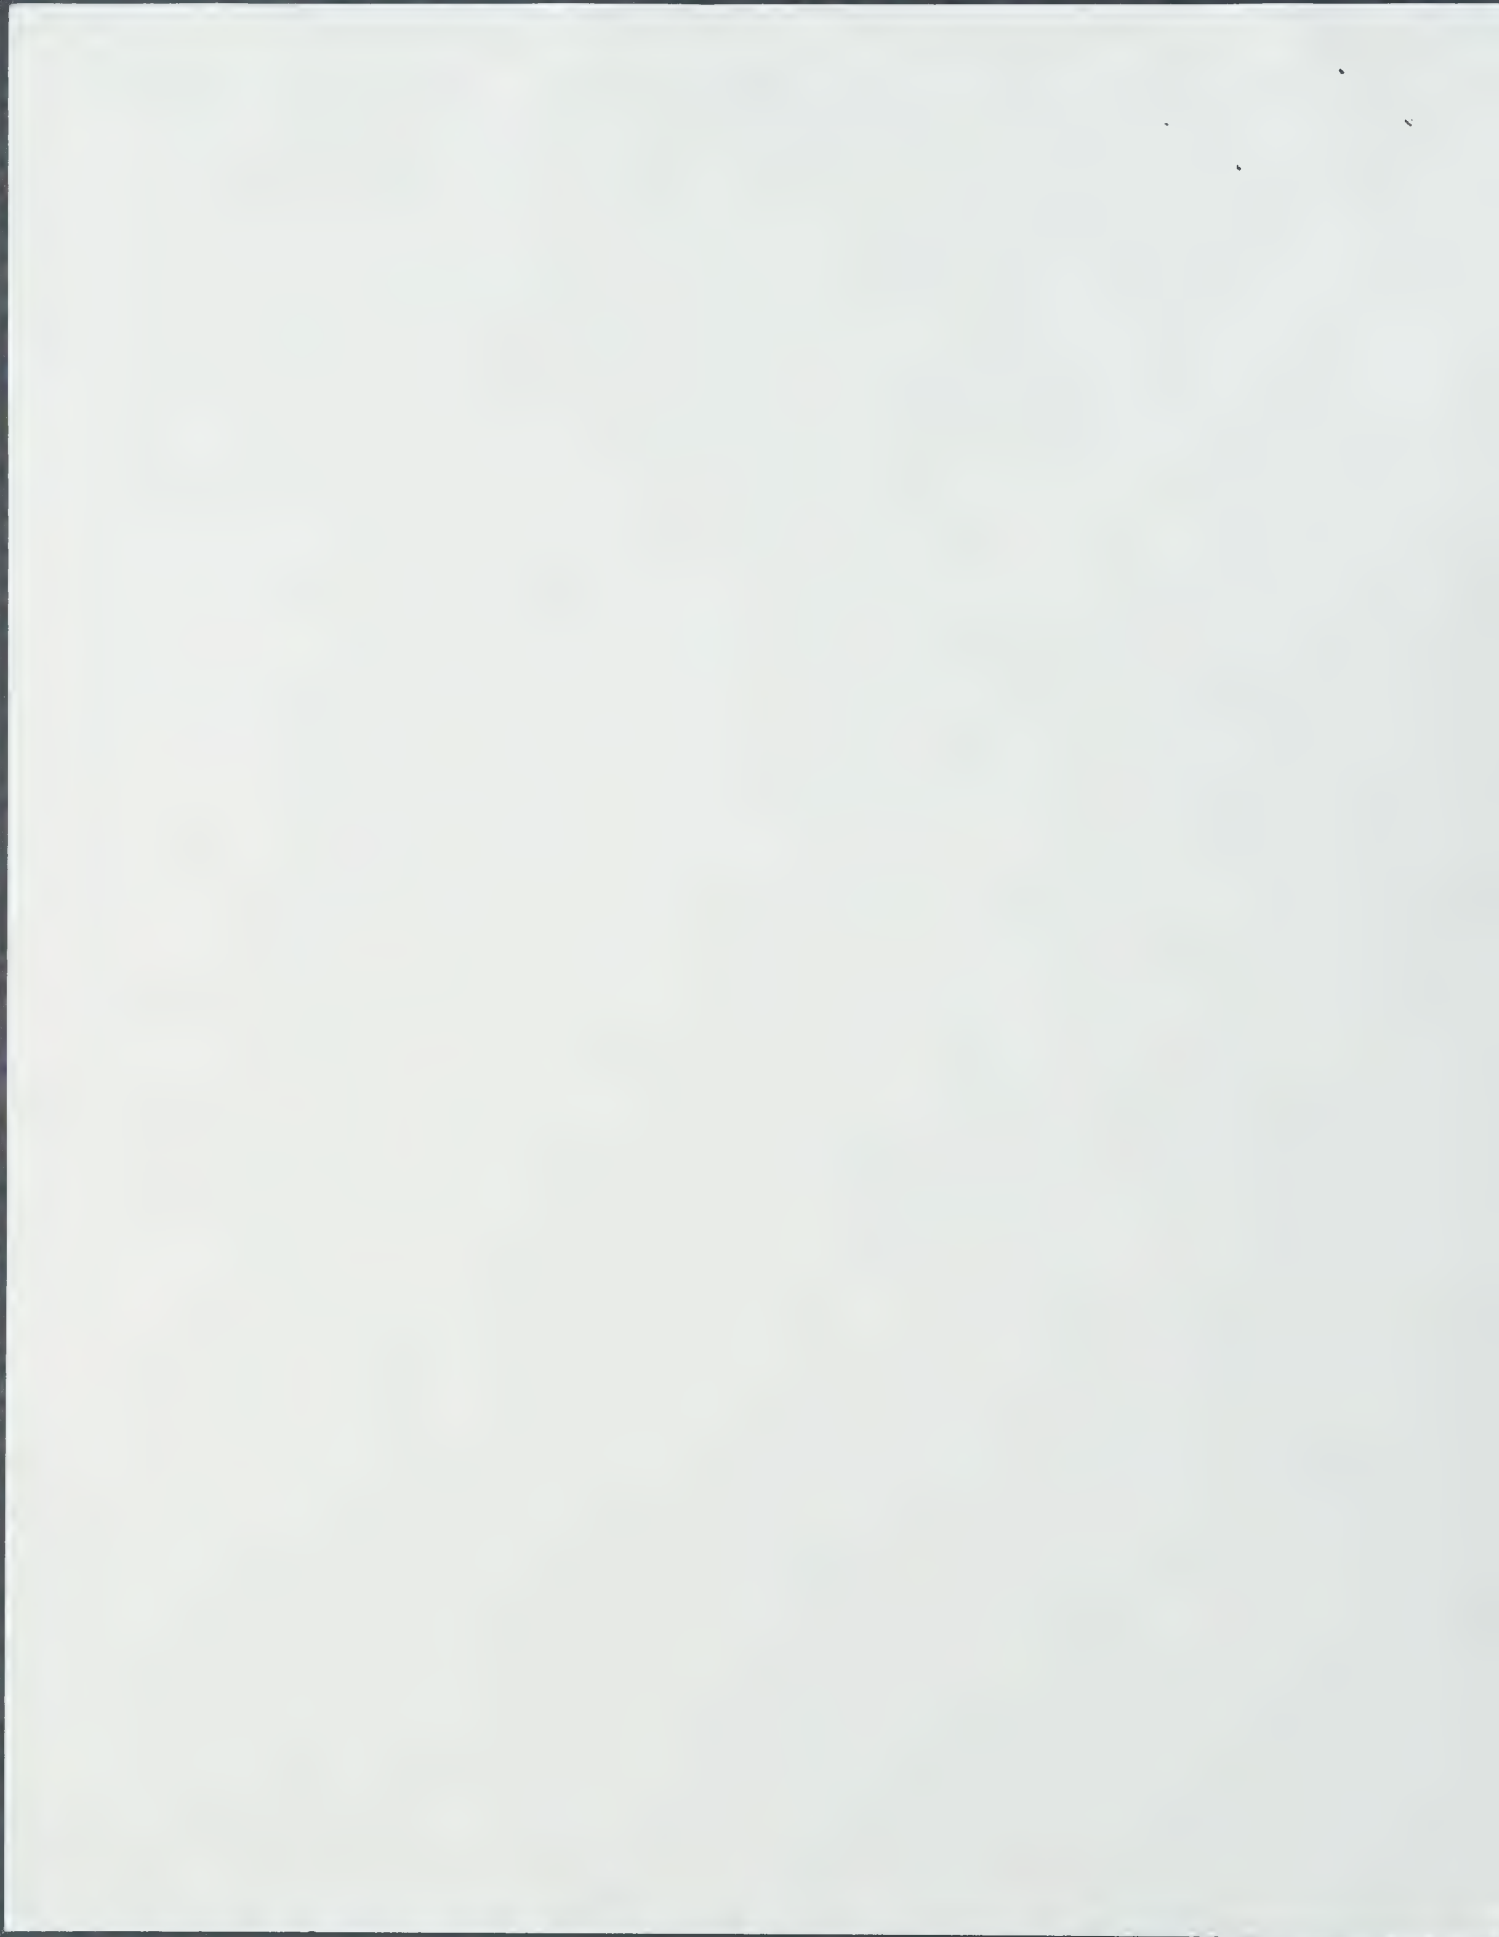

Professor Lars Hellberg at the Department of Chemistry at San Diego State University has been making all the arrangements for our stay in San Diego, and he will be able to tell you where we will be staying. We will not have a car and hope that you can arrange for transportation.

I look forward to being with you and remain,

Sincerely yours,

Please thank Lindsey Fawcett
for her fax of 10-day.

Dear Dr. Bader

I had contacted you about a week ago regarding your seminar at University of California, San Diego and followed up with a letter to you from Emmanuel Theodorakis sent the same day. I hope you will have received the letter. At this time I need to get some information from you so that we can proceed with the preparations of your visit. I need the following information from you

- 1) The title of your seminar by March 7.
- 2) Your arrival/departure times. Will you be needing a hotel, parking permit for on campus, maps, etc.

If you have any questions, please do not hesitate to contact me.

Sincerely

Linley Paddock
Administrative Assistant to Professor Emmanuel Theodorakis

Dear Dr. Bader,

It is my great pleasure to invite you to present a seminar to the Division of Organic Chemistry group at University of California, San Diego. We look forward to your lecture which has been scheduled for April 22, 1996 at 4:00pm in Room 3500 of Pacific Hall. Please let us know your travel arrangements and the title of your lecture so we can proceed with hotel reservations and the preparation of your visit.

My assistant, Linley Paddock, can be contacted for further information at (619)822-0387 or E-mail her at lpaddock@ucsd.edu. She will be sending you more information shortly.

The faculty and I are looking forward to meeting you.

Sincerely,

Emmanuel A. Theodorakis
Assistant Professor of Chemistry

To: Dr. Lars Hellberg
Chemistry Department
San Diego State University
Fax: 619/594-4634

Dear Dr. Hellberg:

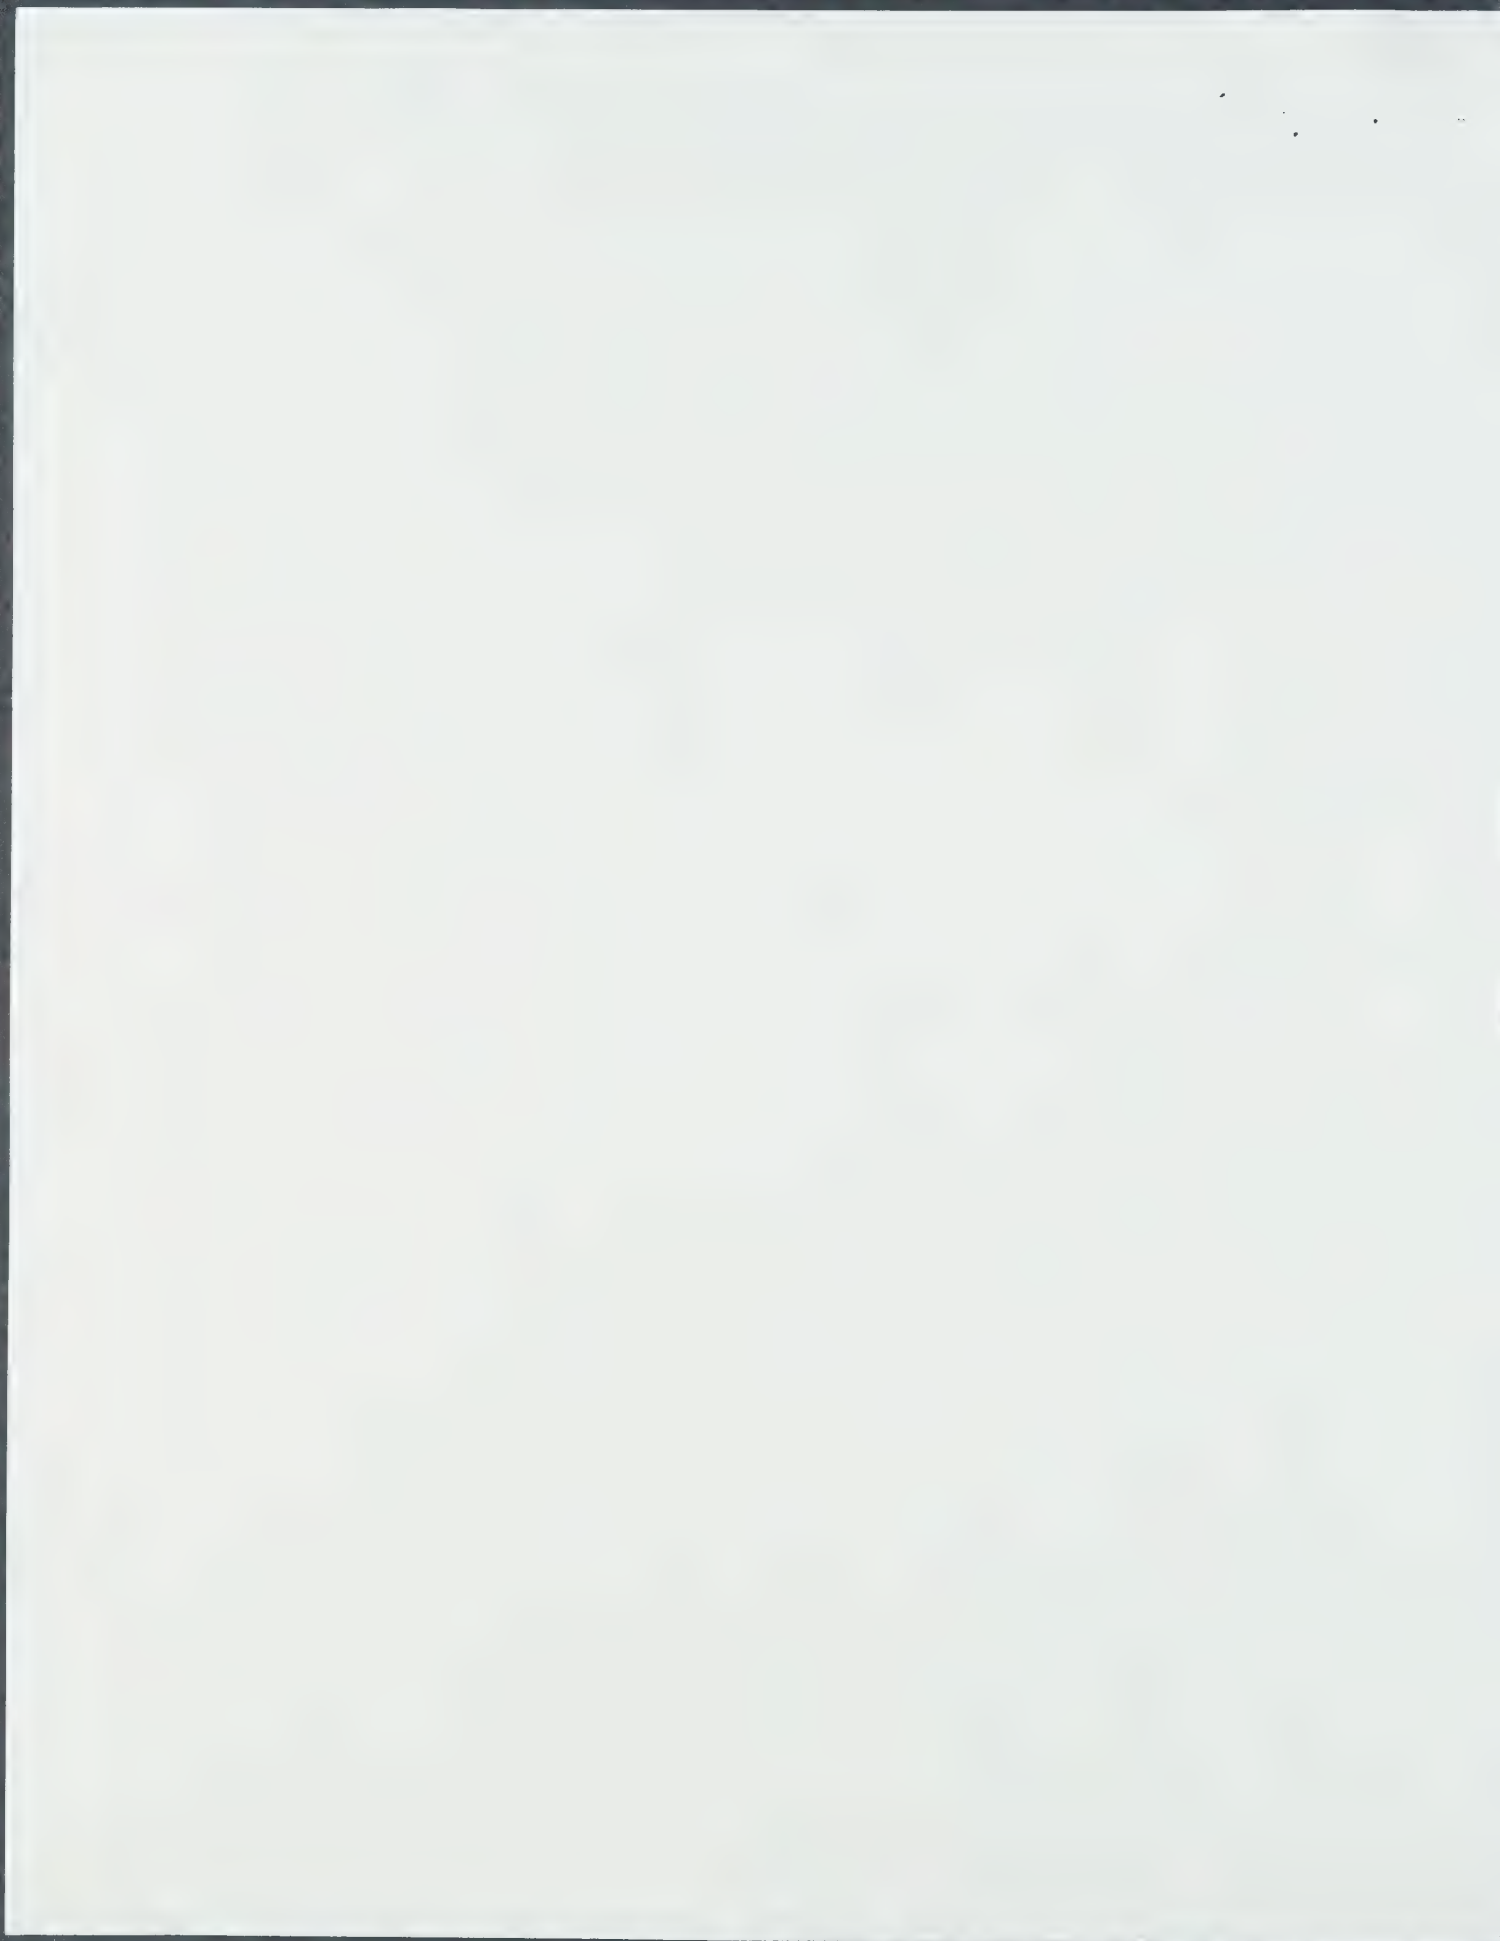

Thank you so much for your fax of yesterday. Just to refresh your memory, I enclose the updated menu of my talks.

The talk on Monday will be Talk #2, *Josef Loschmidt, The Father of Molecular Modelling*.

The talk on Tuesday morning at the art museum will be Talk #7, *The Rembrandt Research Project and the Collector*; in the afternoon, Talk #1, *The History of the Aldrich Chemical Company*; and in the evening, Talk #5, *The Adventures of a Chemist Collector*.

The talk on Wednesday morning at the Lutheran Church will be Talk #4, *The Bible through Dutch Eyes (Rembrandt and the Jews)*. I presume that talk in Tijuana on Wednesday noon will again be Talk #5, *The Adventures of a Chemist Collector*. I have talked to Isabel, and she will be happy to make comments and answer questions in Spanish, but she would prefer me to give the talk in English. Keep in mind that we will require two slide projectors to be able to show two slides at the same time. The talk to the local ACS on Thursday evening should really not be Talk #5, *The Adventures of a Chemist Collector* yet again, because to give three identical talks might put me to sleep! May I suggest that for the ACS, Talk #3, *Richard Anschütz, Archibald Scott Couper and Josef Loschmidt: A Great Detective at Work* would be best? (The original title, *Anschütz, Couper and Loschmidt*, is a bit bland, and so I would suggest that we sub-title it *A Great Detective at Work*.)

Later this week, I will know what it costs to fly by Midwest Express leaving here on Monday morning and returning on Friday morning, as well as what it would cost to leave on Monday morning and return on Saturday, to take advantage of the lower fares.

Dr. Lars Hellberg
February 13, 1996
Page 2

Shades of the past: I would be delighted to look at our correspondence from 1968.

I hope that you will be able to arrange for book-signings, and whoever takes care of that can keep 50% of the retail sales prices of \$25. Please do let me know how many books you think will be required.

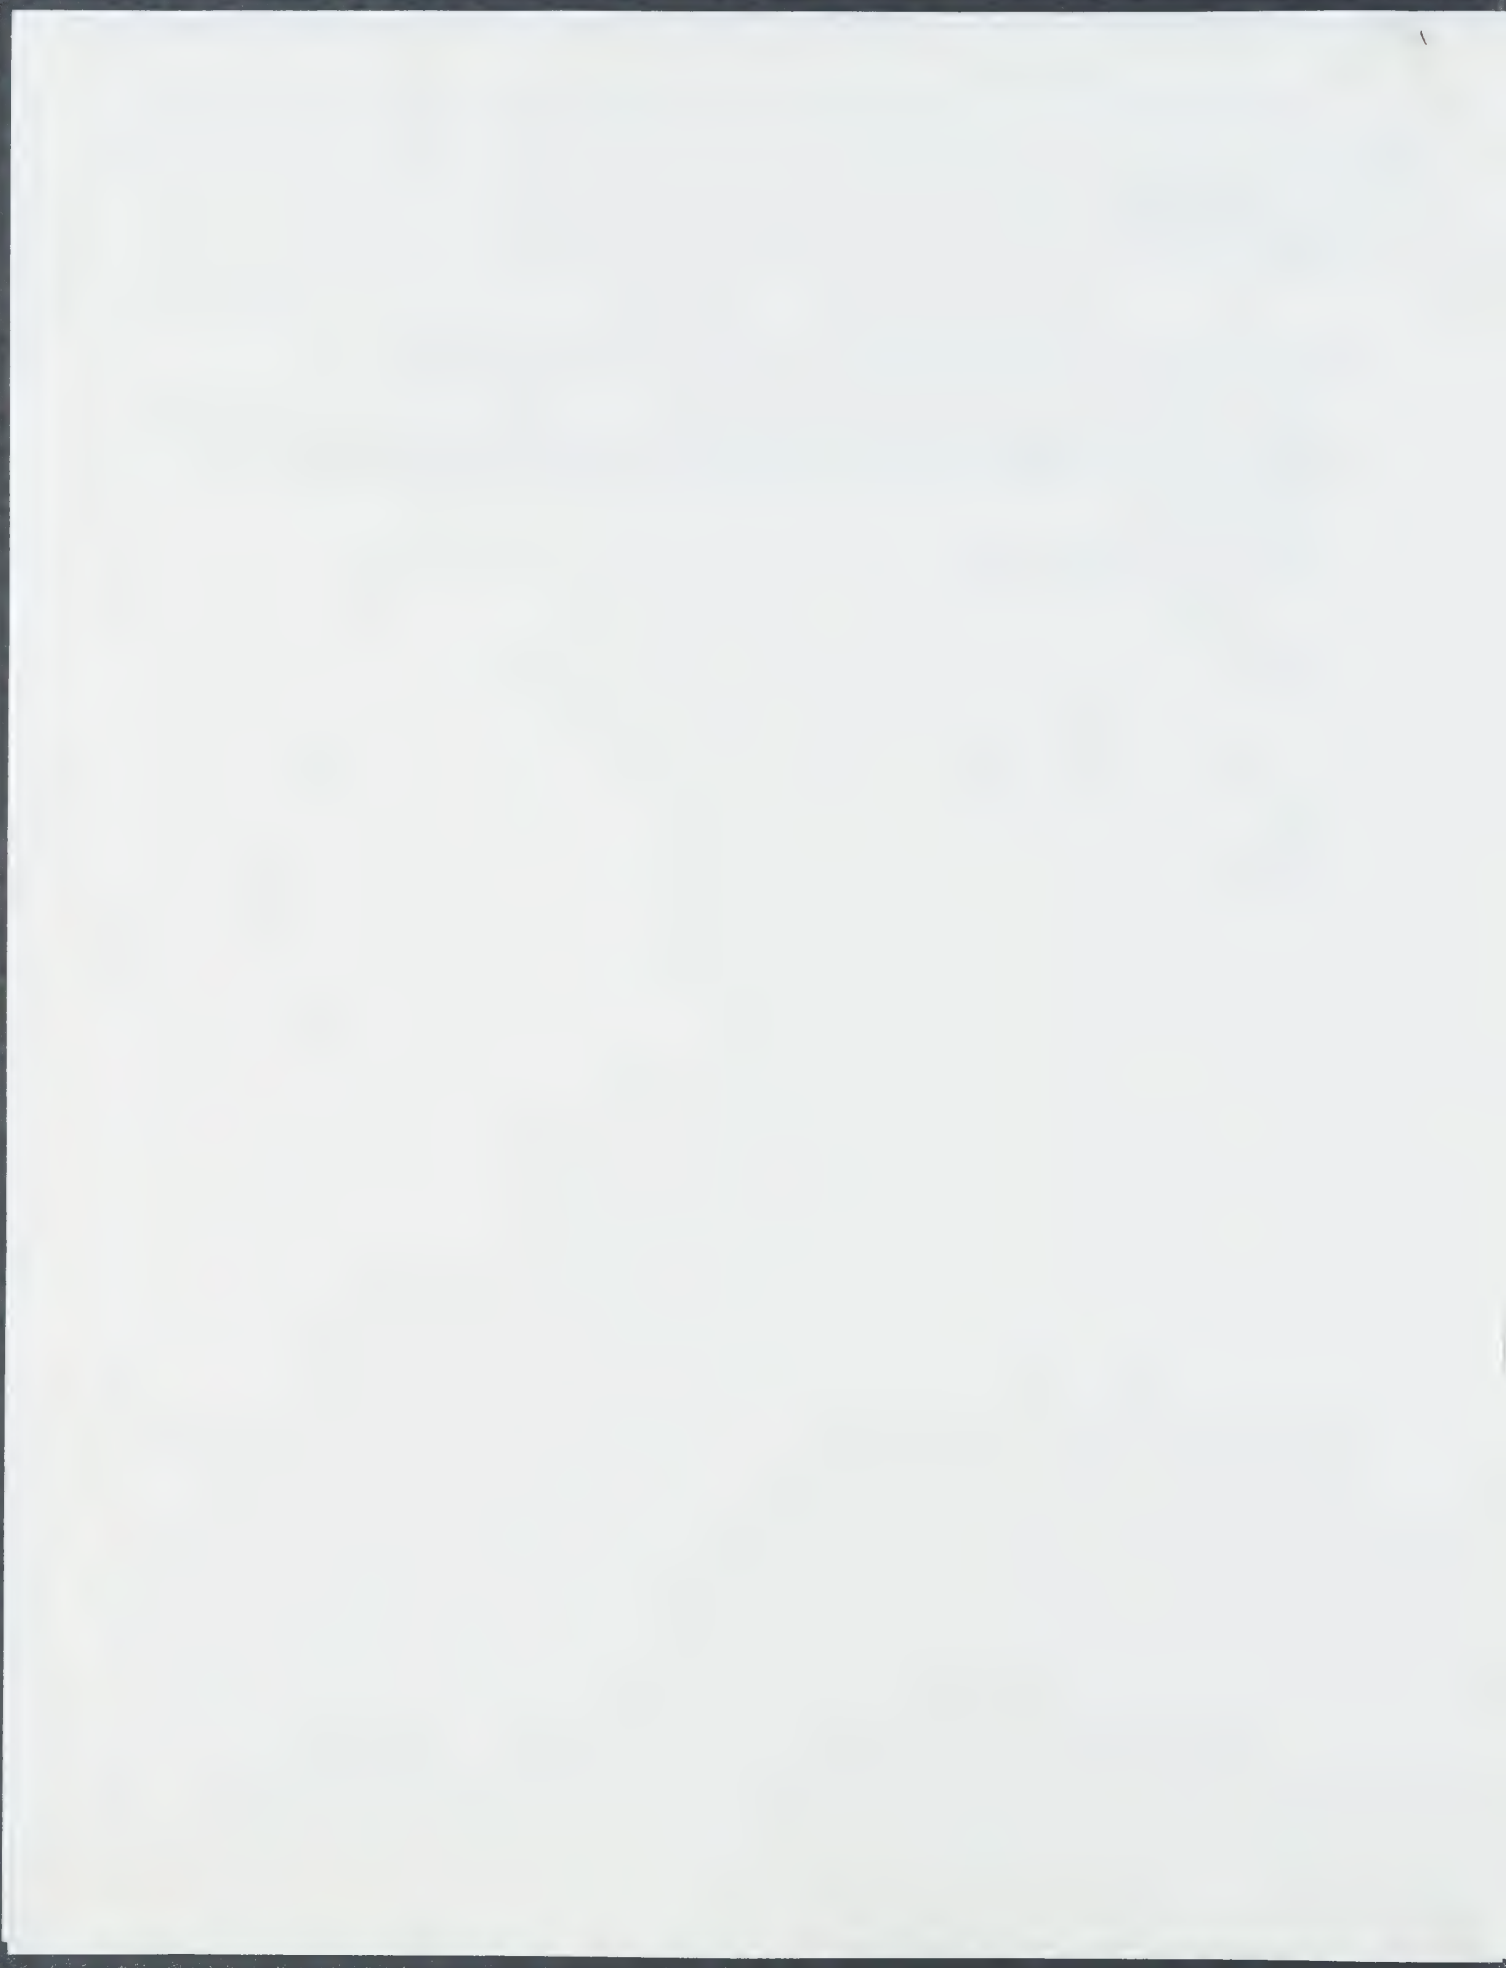

With all good wishes, I remain,

Yours sincerely,

A handwritten signature in cursive script, appearing to read "Anna Day".

A Chemist Helping Chemists

January 4, 1996

Dr. Lars Hellberg
Chemistry Department
San Diego State University
San Diego, CA 92182-1030

Dear Dr. Hellberg:

I enjoyed chatting with you and have penciled in April 23rd to 26th for possible talks in San Diego. Actually, you would find that flights are very much less expensive if we stay over a Saturday and perhaps you could arrange for a talk on Saturday evening, April 27th, and our then returning on April 28th.

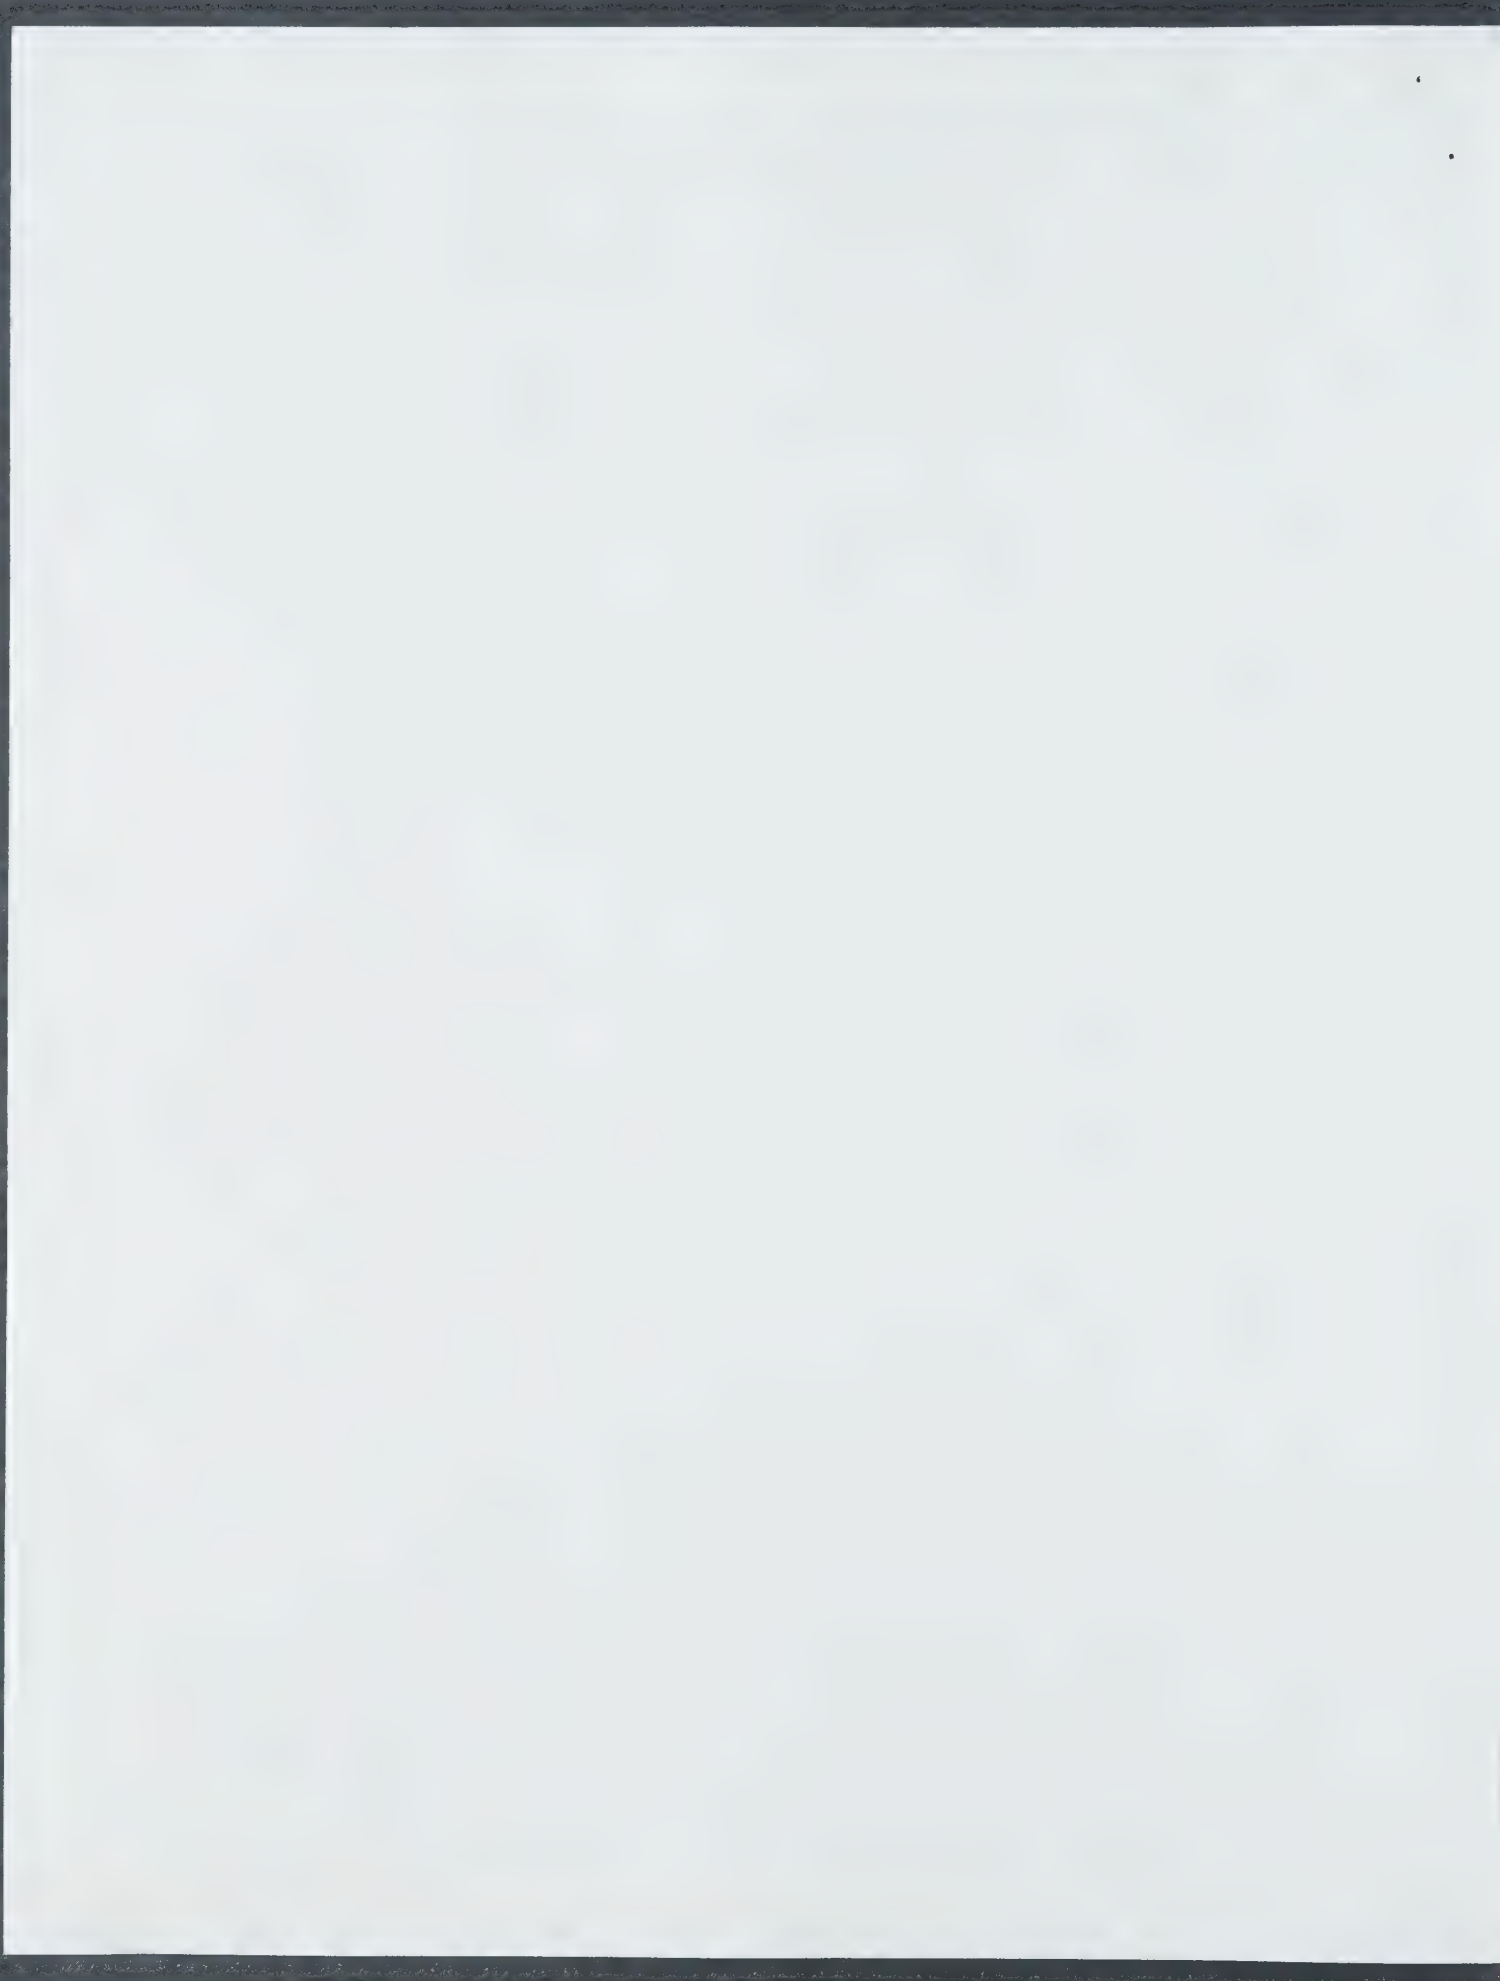

My oldest friends in the San Diego area are Professor Ernie Wenkert at the University of California-San Diego and Professor Barry Sharpless at the Scripps Clinic. Either or both might enjoy a talk at their institution.

I have just received some reviews of five talks I gave at University of Alberta last April, and these might interest you.

With all good wishes for 1996, I remain,

Yours sincerely,

AB/cw

Aide Memoire

Cheryl Weiss
December 21, 1995

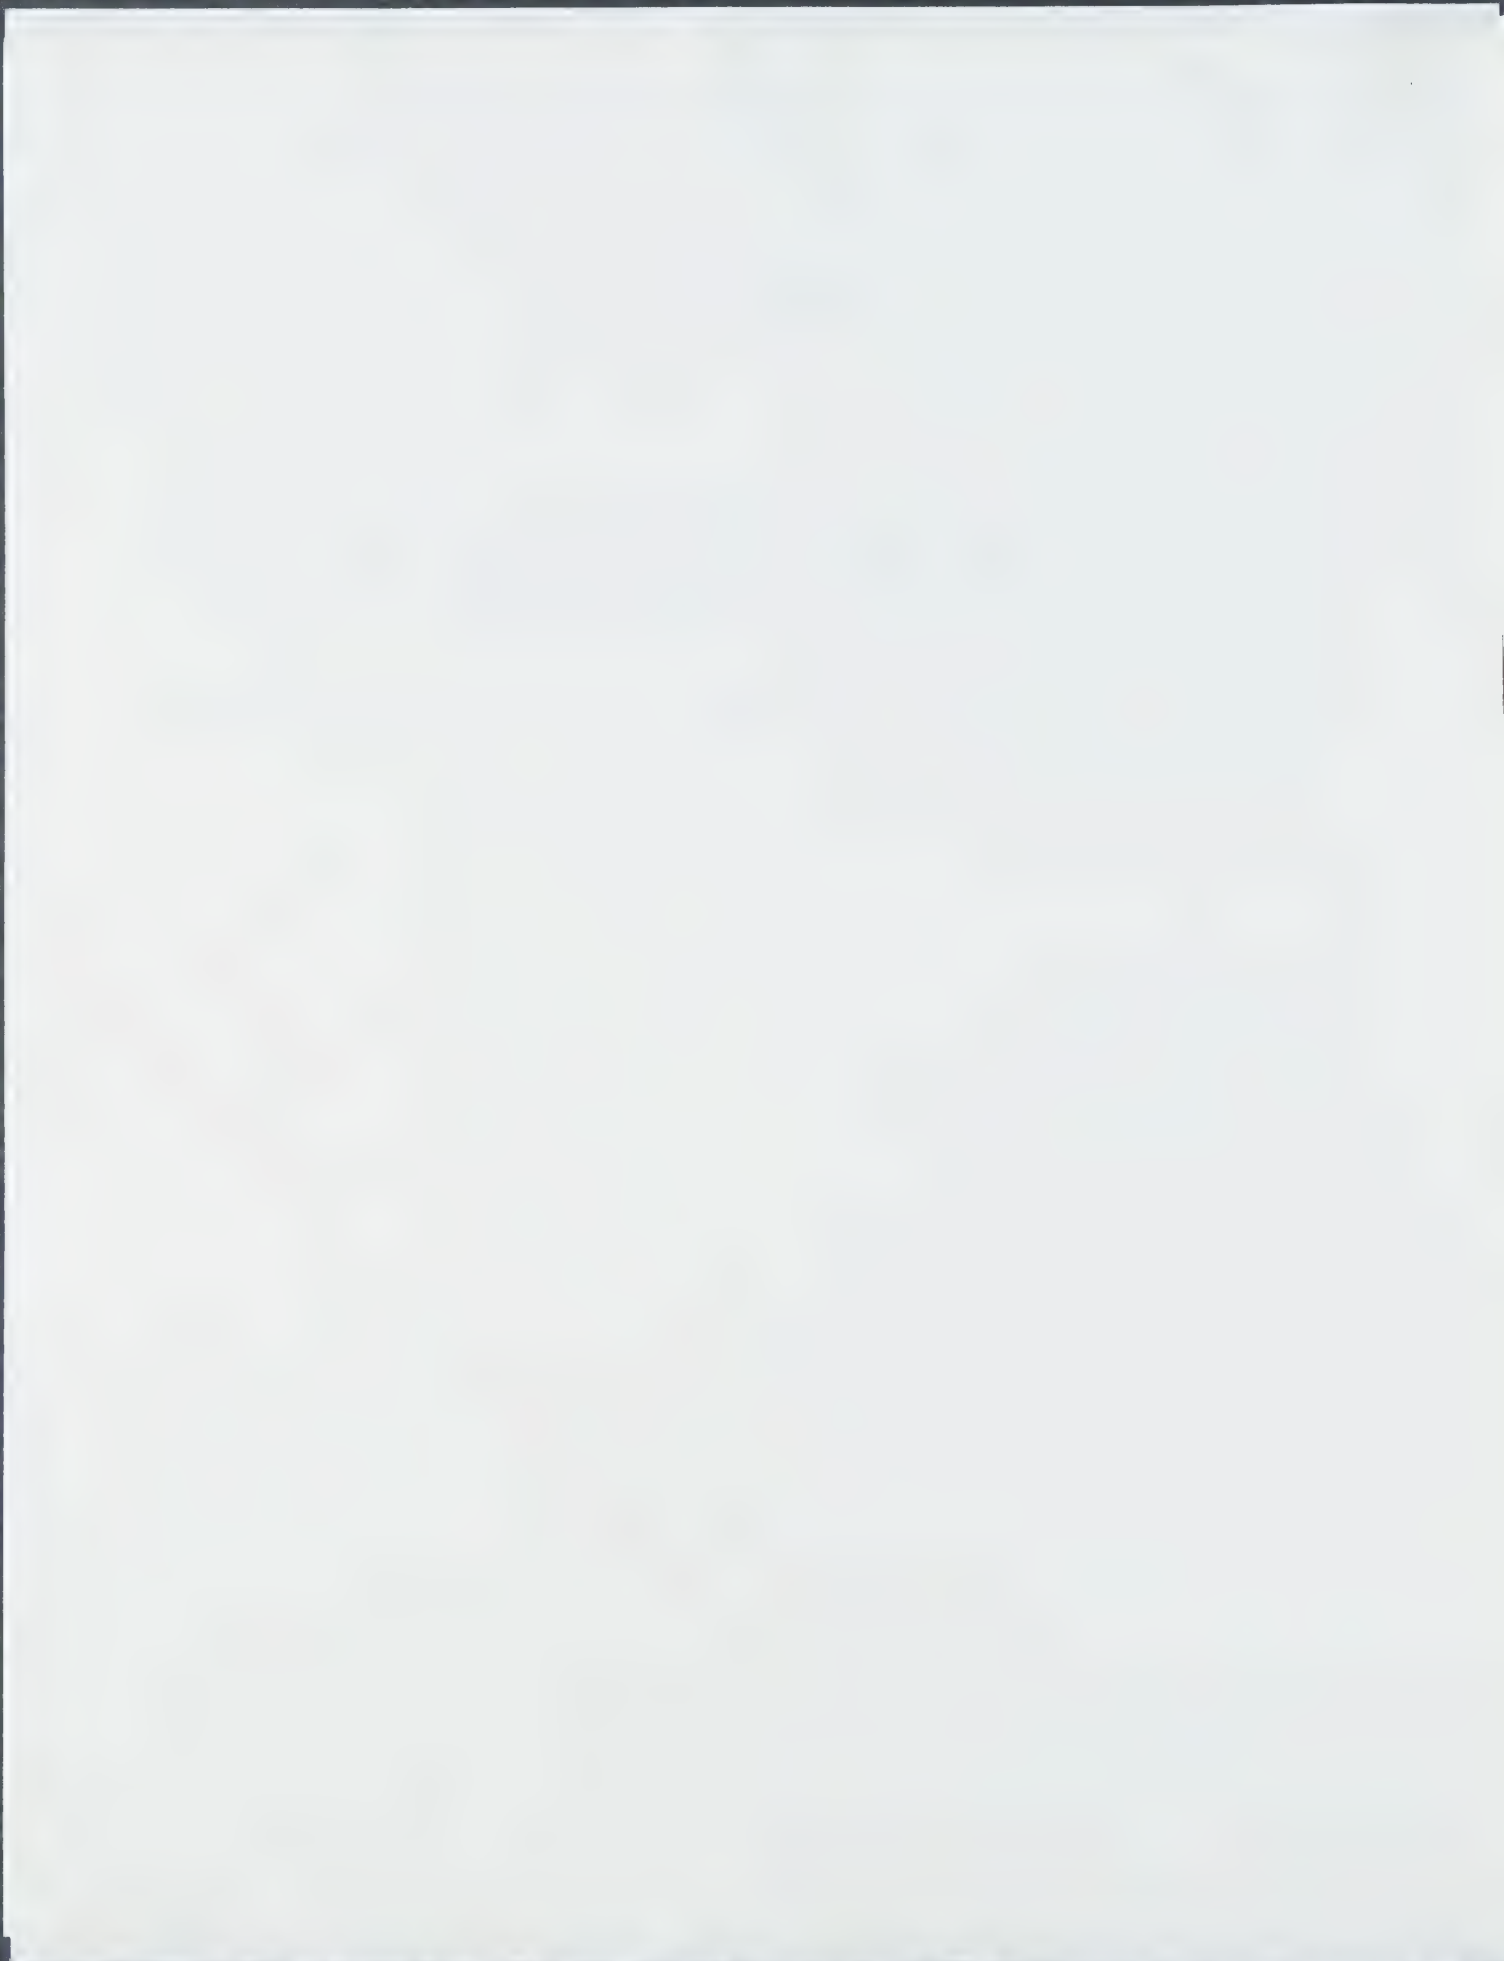

Received a call from Lars Hellberg in the Chemistry Dept. at San Diego State University - He had heard that you will speak to groups, and he is the faculty advisor to a student group at SDSU. They are having their high school night in April (He suggested either the 18th or 25th; you are at SIU the week of the 18th, but the 25th looks like it is clear on your calendar) in conjunction with the local ACS chapter.

I faxed him the menu and suggested that he might want to talk to the Art Dept. and/or the local Jewish community and have several talks.

He will call the first week in January to discuss expenses, honorarium, etc.

Dr. Lars Hellberg
Chemistry Department
San Diego State University
San Diego, CA 92182-1030
Ph: 619/594-5570 (his direct line)
619/594-5595 (Chem. Dept. ofc.)
Fax: 619/594-4634

He also mentioned that he had read your book & suggested a book signing

Milwaukee, Wisconsin 53202
Telephone: 414/277-0730
Fax: 414/277-0709

January 18, 1996

To: Barney Malesky
Curator, San Diego Museum
Fax: 619/232-9367

Dear Mr. Malesky:

I enjoyed chatting with you today and hope that you will have a chance to look at my autobiography, which is offered by Trafalgar Square in North Pomfret, Vermont. Any bookseller will be able to obtain the book; its ISBN number is 0-297-83461-4.

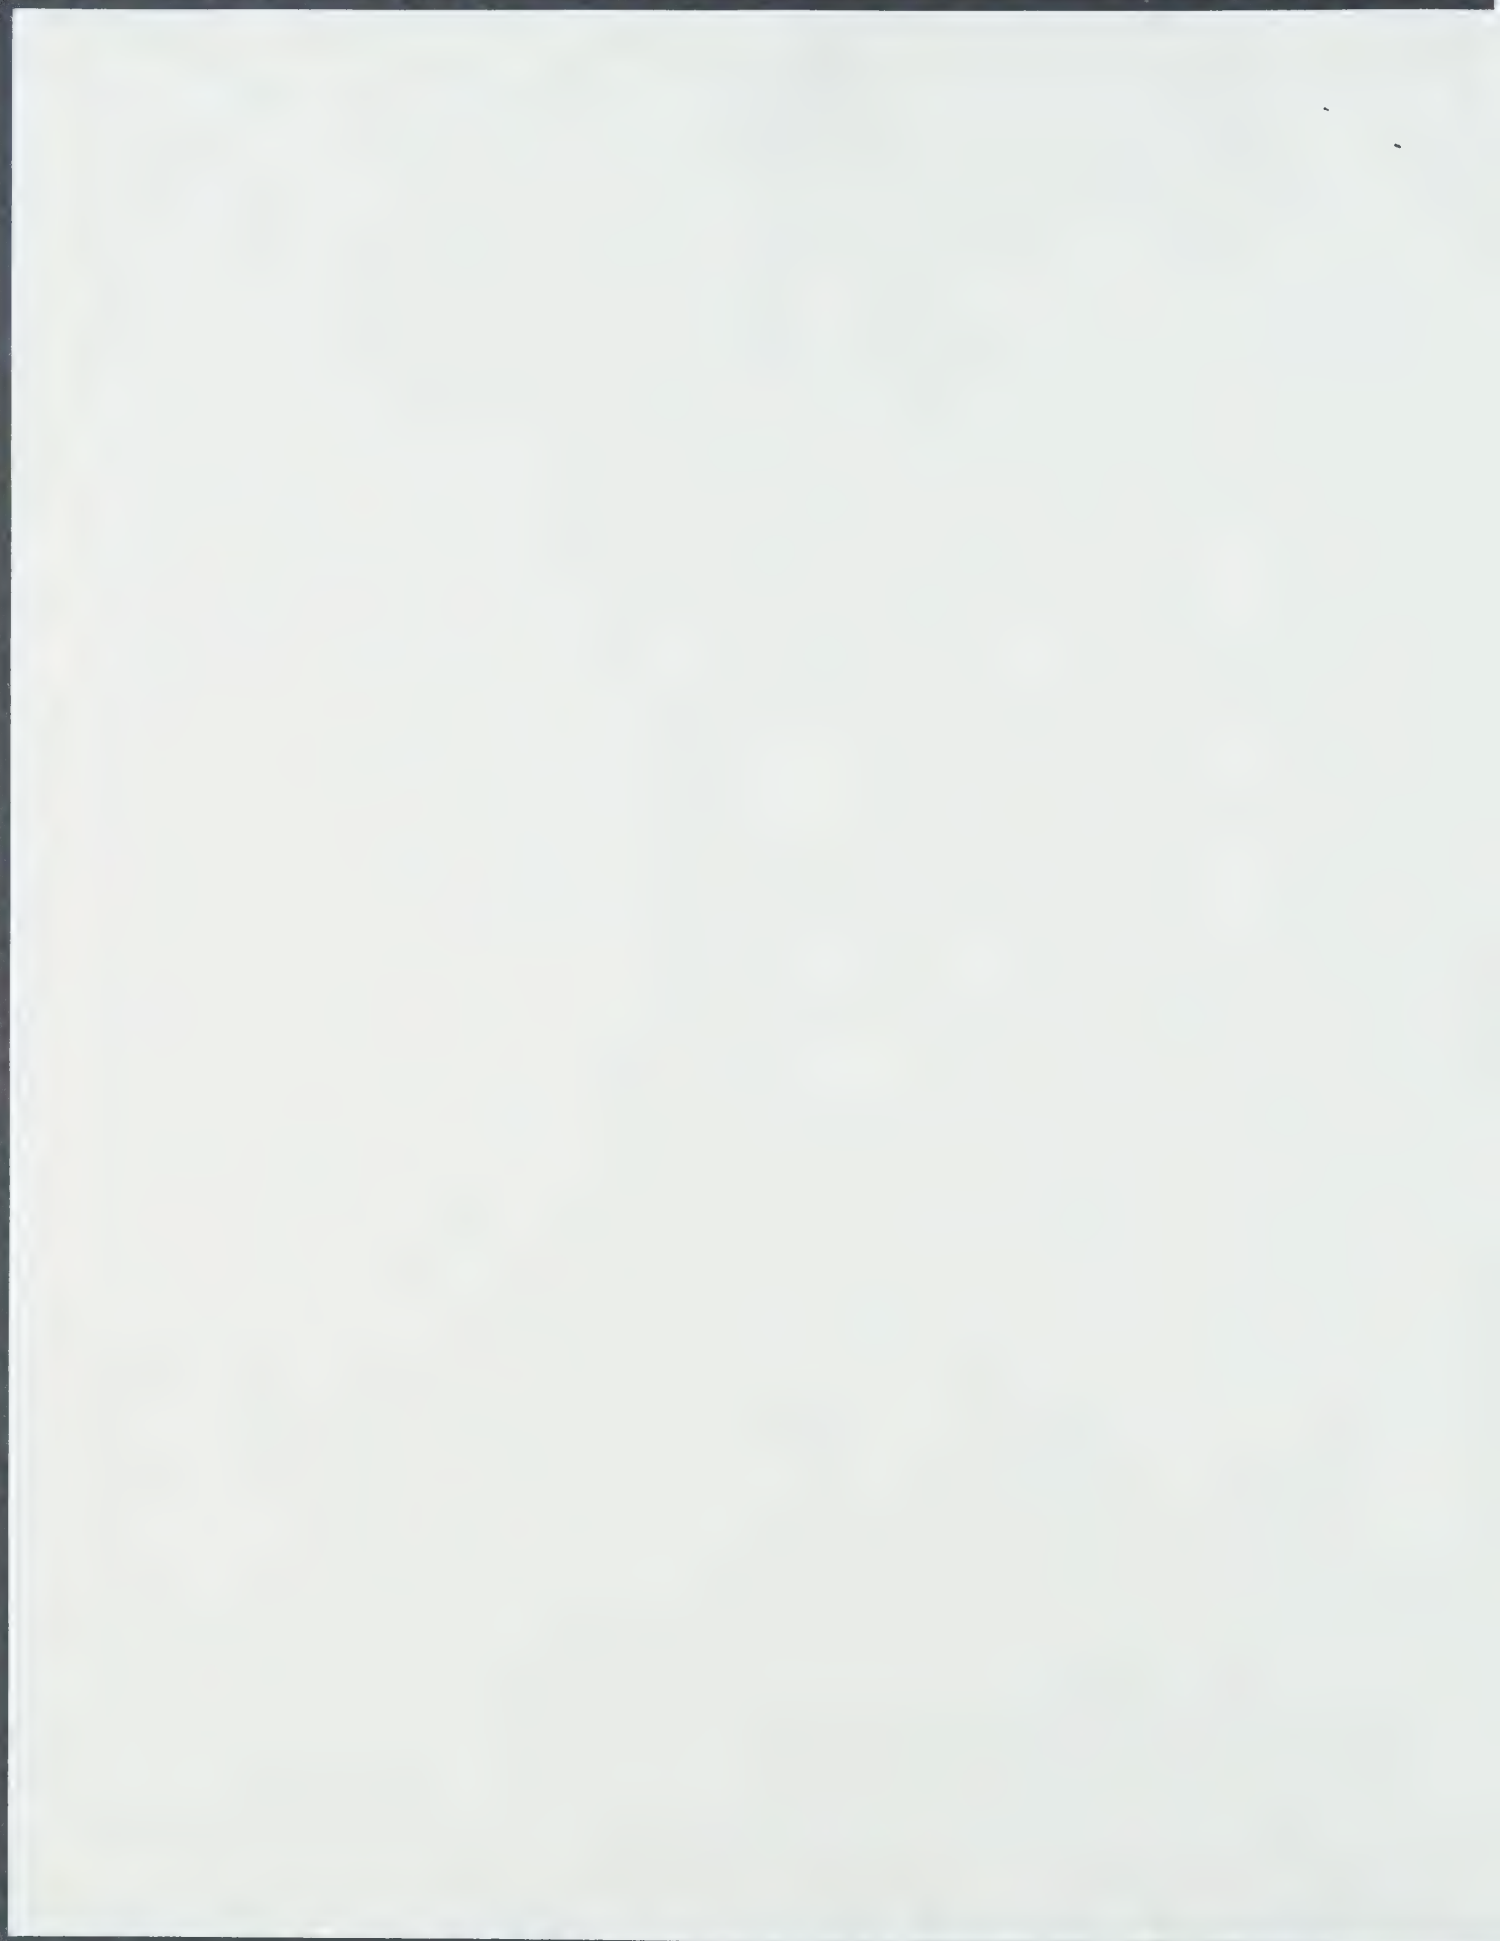

For your art museum, four talks would be suitable:

- (1) **The Rembrandt Research Project and the Collector.** This deals with the tremendous opportunities which the recent Rembrandt research is providing to collectors.
- (2) **Jan Lievens: Out of the Shadow.** Jan Lievens was a very great artist, and some of his works have been mistaken for Rembrandts. He worked in Leiden, London, Antwerp and Amsterdam and was both friend and contemporary of Rembrandt.
- (3) **The Adventures of a Chemist Collector.** This describes the restoration of a good many Old Master paintings.
- (4) **The Bible Through Dutch Eyes,** sub-titled Rembrandt and the Jews. This discusses how Dutch artists looked at the Bible and why their works are so different from those of other artists.

With best personal regards, I remain,

Yours sincerely,

AB/cw

FAX FROM

DR. ALFRED BADER'S OFFICE

Suite 622

Milwaukee, Wisconsin 53202
Telephone: 414/277-0730
Fax: 414/277-0709

February 16, 1996

To: Dr. Lars Hellberg
Chemistry Department
San Diego State University
Fax: 619/594-4634

Dear Dr. Hellberg:

The flight schedules and prices make the decision very easy.

We can fly to San Diego on a non-stop Midwest Express flight which arrives in San Diego at 12:25 pm and return on Saturday on a non-stop flight departing San Diego at 1:00 pm for a round-trip fare of \$316.50 each (including our senior discounts).

Using the same Monday flight and a Friday return would entail a stop in Los Angeles and increase the fare to \$489.30 each. The difference of over \$300.00 is surely a great deal more than the cost of one additional night in the hotel.

Hence, as we discussed, I have booked the Monday and Saturday flights for us. I will send you copies of the invoices when I receive them.

Isabel and I much look forward to our visit to San Diego State University.

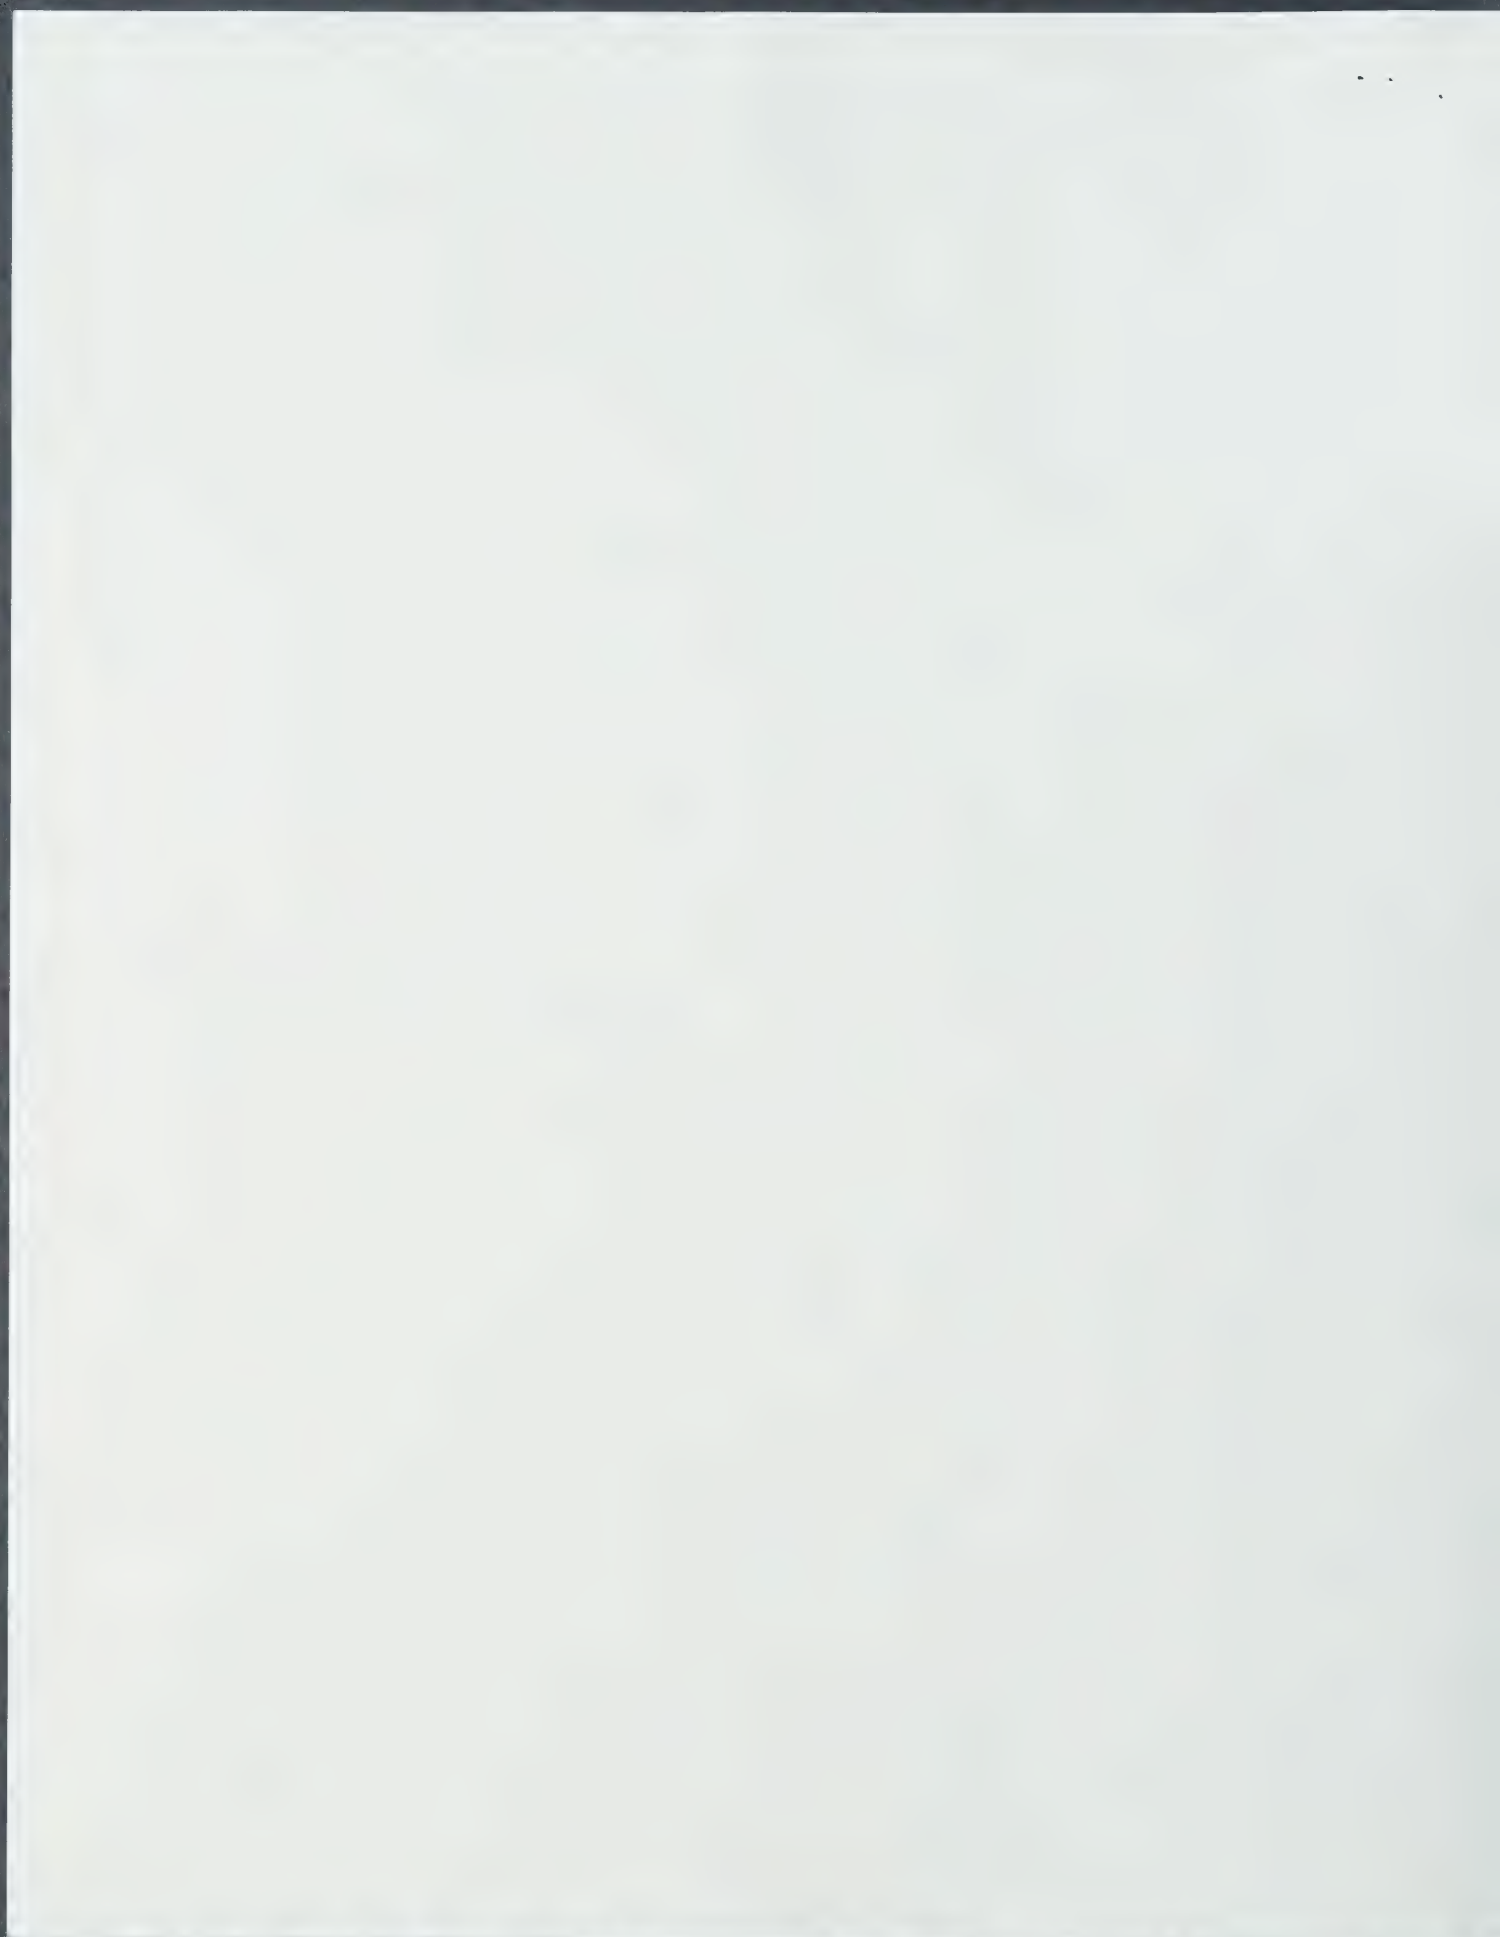

With all good wishes, I remain,

Yours sincerely,

Alfred Bader
aw

AB/cw

P.S. As we now have Friday free, would you like to add an additional talk on Friday? Please do let me know.

CW Would it be
ever cheaper if we
returned on Sunday?

Loaves
already
booked
on
Sun
New
would
work

I received your fax late Friday afternoon. If I understand correctly that you are booking flights for Monday, 4/22, and Saturday, April 27, I don't see how this schedule leads to a Saturday night stayover discount, at least as I understand what I have read and used when I fly United Airlines. Perhaps Midwest Express has a different policy regarding weekend usage at their airline. I hope you are enlightened re. reassurance about this matter.

As for another seminar on Friday, or even early Thursday (nothing but the banquet is scheduled that day), I will await your response to the above. If there appears to be time for you to "seminar" again, I will call Barry Sharpless as the next person on my list. I hope his visit this weekend went well.

Please give my regards to your wife, Isabel. My wife, Lois, just returned from the Far East. Our younger son, Daniel, lives and works in Taipei for Wardsco (S&W), and so she works with there for five days she speaks Chinese very fluently--she learned a month here say he speaks without any accent. When last time they went to celebrate Chinese New Year, and during the celebration later Daniel for a week--my wife had a terrible time getting a visa. Dan had no problem. When they got on their different planes an hour apart, Dan was denied the flight. Apparently, his visa had already expired (he just trusted that it covered this time--no readable dates on the visa). So, Lois ended up in Taipei alone, and Dan had to scramble in Taipei to get her out the next day--she did not want to travel alone. Since there was no other place to visit in the region, and since plane tickets booked early for the New Year--she decided to fly back on Saturday. There was no way that Dan could get another visa on the spot. But like all Mothers, she enjoyed seeing where he worked and saw several things on Taiwan.

With kind regards

Very truly yours: *Lara H. Hillman*

P.S. Barry Shargless will
check about giving a talk on
Friday.

FAX FROM

DR. ALFRED BADER'S OFFICE

Suite 622
924 East Juneau Avenue
Milwaukee, Wisconsin 53202
Telephone: 414/277-0730
Fax: 414/277-0709

February 20, 1996

To: Dr. Lars Hellberg
Chemistry Department
San Diego State University
Fax: 619/594-4634

Dear Dr. Hellberg:

Midwest Express is a much different airline from United and the rest. They consider business travel to be Monday through Friday, and so discount the weekend fares. Hence, the fares would be no cheaper for a Sunday return.

While we have booked the flights, we have not ticketed yet, and fares can always change until the trip is ticketed. Hence, we would like to have the flights ticketed as soon as possible. Shall I finalize the trip and have it ticketed?

Once we have the schedule finalized, we can then turn our attention to the lectures and seminars.

With many thanks for your help and best regards, I remain,

Yours sincerely,

AB/cw
