A Chemist Helping Chemists

August 6, 1997

Page 1 of 1

To: Miss Toshi Saito
ICN Japan
Fax: 813-3275-4055

Dear Toshi:

It is so good to know that you will be visiting us the weekend of August 23rd.

An old friend, the President of Isabel's *alma mater* Victoria University in Toronto, Dr. Roseanne Runte is visiting us that weekend and you will really enjoy meeting her.

I have been trying to search my memory about Aldrich No. 21 299-7, 2-phenyl-3-butyn-2-ol of which you need 500kg. I believe to remember that this was not a good seller and that Aldrich had Aldrich Chemie in Germany purchase this for Aldrich at a pretty low price, somewhere around \$50/kg. You will note that it is still priced relatively inexpensively in the Aldrich catalogue and I do not think that Aldrich purchased this from Farchan.

If you have a good rapport with my old friend Dr. Alfred Griesinger, you could ask him as I am confident he would know the German source.

Best wishes, as always,

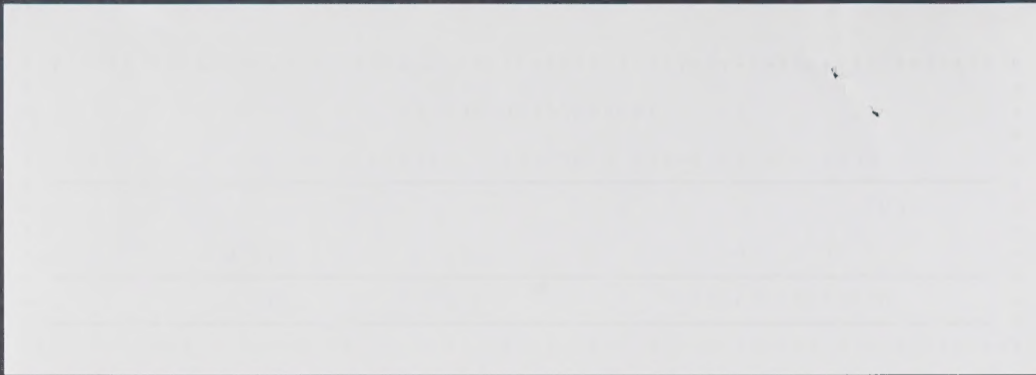

AB/nik

Dear Toshi:

You must have realized how very much we enjoyed your visit, even though it was so very short.

Please do plan to visit us on every trip to the United States and we very much hope that on one of these trips he will not be alone nor on any trips that will then follow.

Enclosed please find the invoice for the two paintings which you took along. I very much hope that the string lasted until San Francisco and that you could then strengthen it.

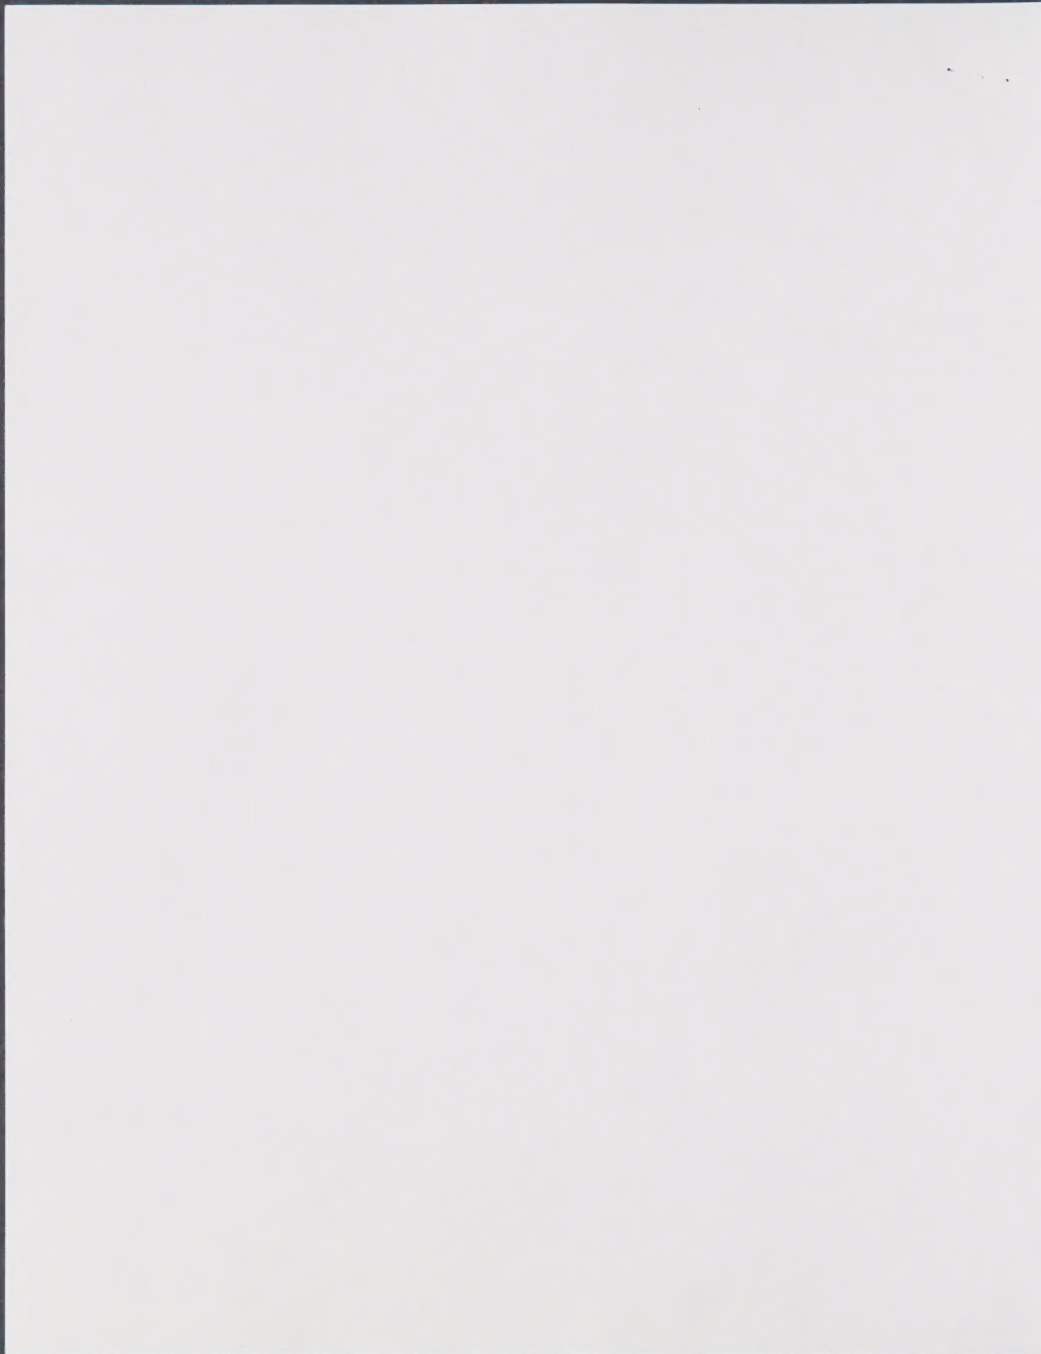

I will send you photographs of the Kosar's shortly. These are just being matted and you can then take your pick.

Fond regards, as always,

AB/nik

Dear Toshi,

I hope that most Japanese are like you and so it would be a good thing for Japanese to take over the American chemical industry. That this is happening you can see from this fine advertisement.

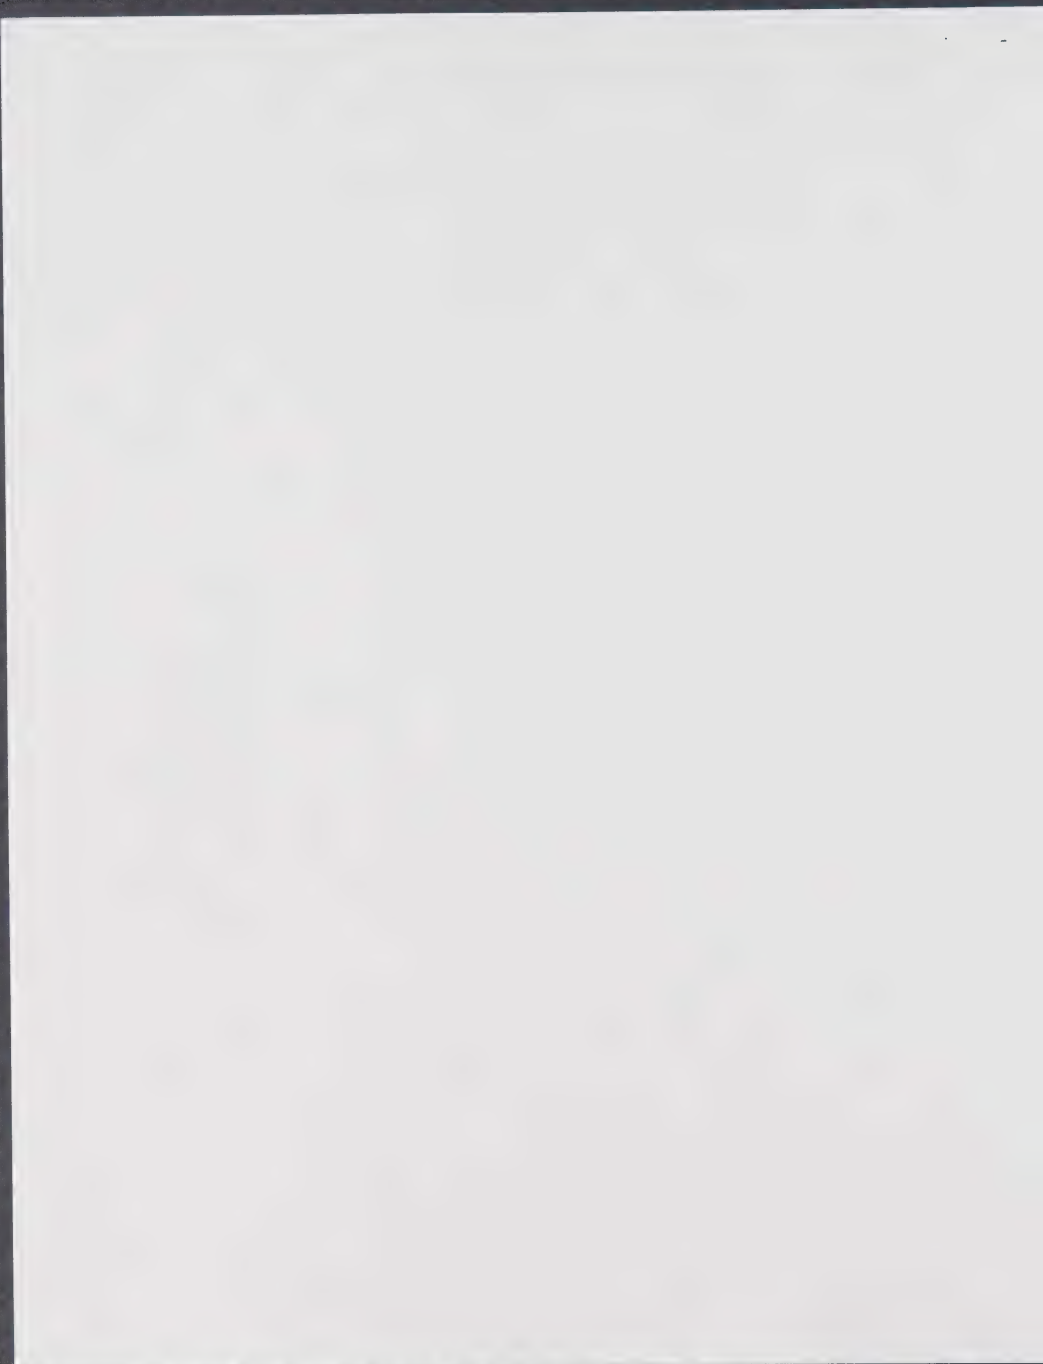

What does it say?

Fond regards.

As always,

平成6年度 基礎科学特別研究員 の公募について

科学技術庁と理化学研究所とは、連年し我が国の基礎研究を強力に推進するため、平成6年度の基礎科学特別研究員を募集します。斬新な研究課題を自主的に遂行できる若い我が国の在外研究者の応募を期待します。

1. 採用予定人員：/年定員10名
2. 学問分野：理化学研究所
3. 募集対象：物理化学、化学、生化学、工学の各分野
4. 募集時期：理化学研究所で実施可能な研究
5. 募集資格：原則として平成6年4月現在25歳未満の優秀な若者で、博士号取得者又はこれに同等の研究能力を有すると認められる者

5. 待遇等/
 - ①謝金/月額85千円程度(社会保険料、税金)
 - ②補助費/実費(上原出千円/月)
 - ③住宅費/実費(300千円/年)程度
6. 実施期間：原則として平成6年5月1日現在2年以内
7. 応募資格：博士号取得者又はこれに同等の研究能力を有すると認められる者

CIRCLE 1 ON READER SERVICE CARD

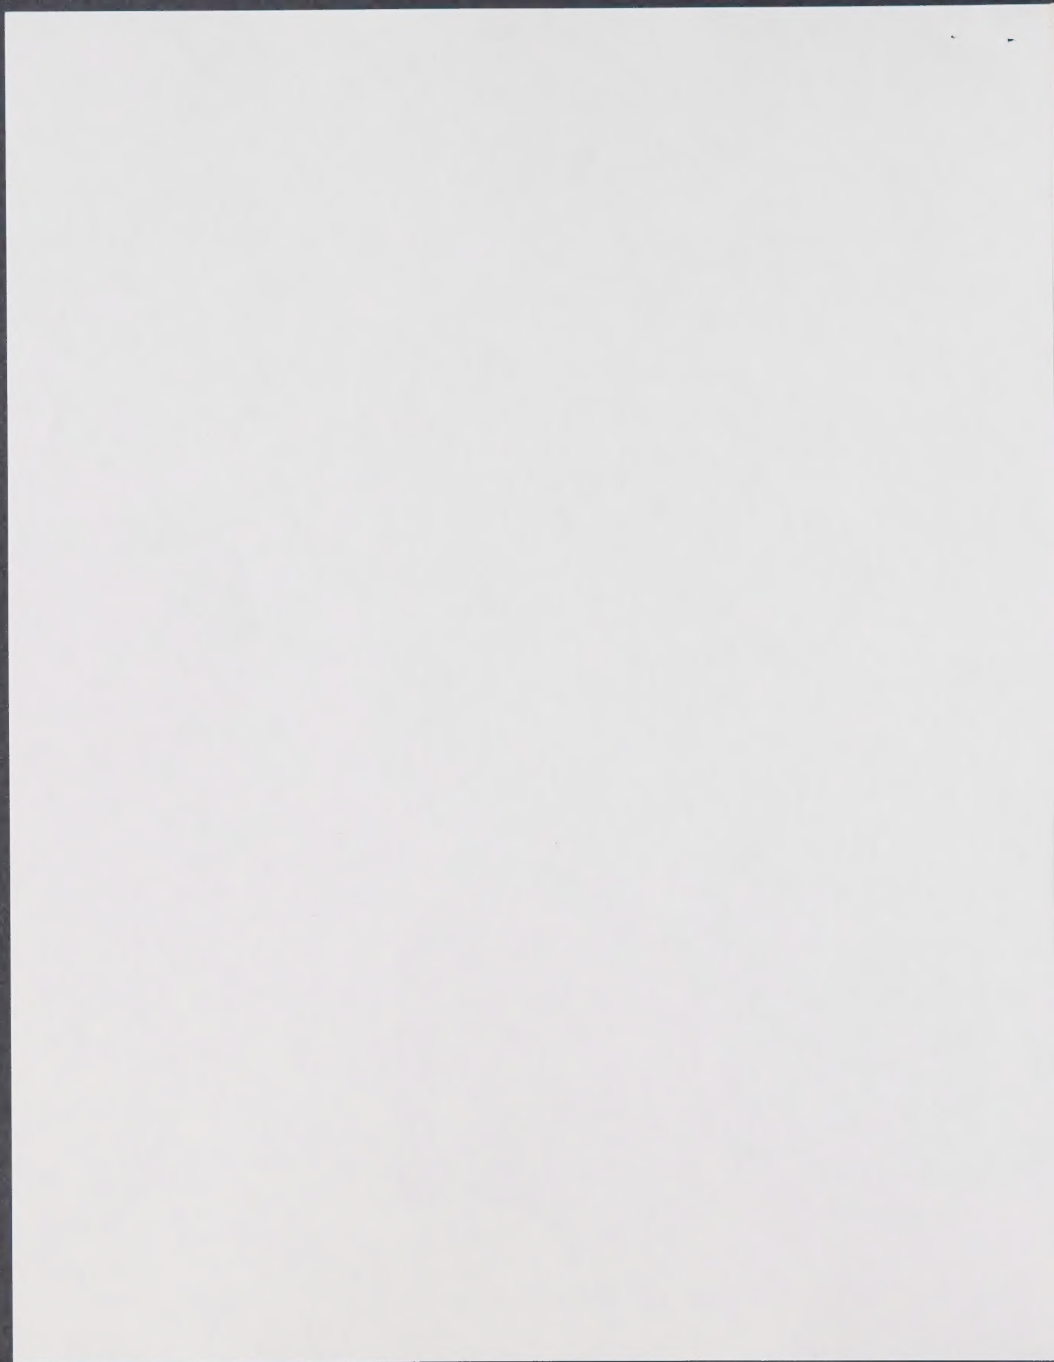

not aware of examples where scientists engaged in novel, groundbreaking science have been prosecuted for so doing," write Drummond Rennie and Kristina Gonsalus in a recent editorial in the *Journal of the American Medical Association* [269, 915 (1993)]. "We are therefore highly skeptical of the reality of this threat, which we regard as a boogyman used to mobilize scientists in opposition to any regulation." Rennie is deputy editor of *JAMA* and Gonsalus is associate vice chancellor for research at the University of Illinois, Urbana-Champaign.

"Any limited definition will cause trouble," Buzzelli said during a discussion at a forum on ethics held by Sigma Xi in February (C&EN, March 15, page 7). "You're going to either have to call things [fabrication, falsification, or plagiarism] when they are not, to make them fit under a narrow definition, or you'll have to let some cases pass by."

Indeed, ORI's Bivens admitted at the same session that a recent misconduct case at Michigan State University, East Lansing, would not have fit under the revised definition his office is planning to propose. In that instance a graduate student from accepted practices deviation from accepted practices when she would not allow her former research supervisor access to primary research data and materials.

ORI's Bivens said his office had also discussed whether it should respond to Buzzelli's article, but had decided it didn't want to air interagency disputes in public. "I think NSF's definition is going to fall of its own weight," he said. In his article, Buzzelli cites examples of NSF cases that the agency could not have addressed without the "other serious deviation" clause in its definition. The PHS advisory committee members found one to be most objectionable: An NSF-funded researcher was accused of coercing sex from young female participants in a field study project. NSF found him guilty of scientific misconduct. The researcher agreed to a five-year debarment from receiving any federal grants. That case was also criticized in the NAS report. Sexual misconduct should not be considered scientific misconduct just because it occurs in a research environment, the panel said.

Buzzelli argues that NSF's interest in the case went beyond sexual harassment. "The government could not continue to be in the position of providing funds and the opportunity for these activities," he writes in *Science*. "Even if the case had gone to court, NSF could not expect the courts or anyone else to protect the integrity of federal research funds. NSF had to do this itself, and only the misconduct regulation makes debarment possible in a case like this."

Shinagawa-ku
Tokyo 141, Japan

Dear Mr. Morton:

It was such a pleasure to meet you in New Brunswick, and Isabel and I very much hope that you will have a chance to visit us and look at many paintings here in Milwaukee.

Best regards.

Sincerely,
