Fax No. 414-277-0709

January 25, 1995

To: Mr. Clyde Lendrum
905 833 3751

Dear Clyde,

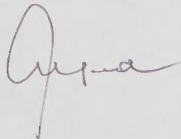

Thank you for your fax about my \$2000 gift to the Science '44 Fund.

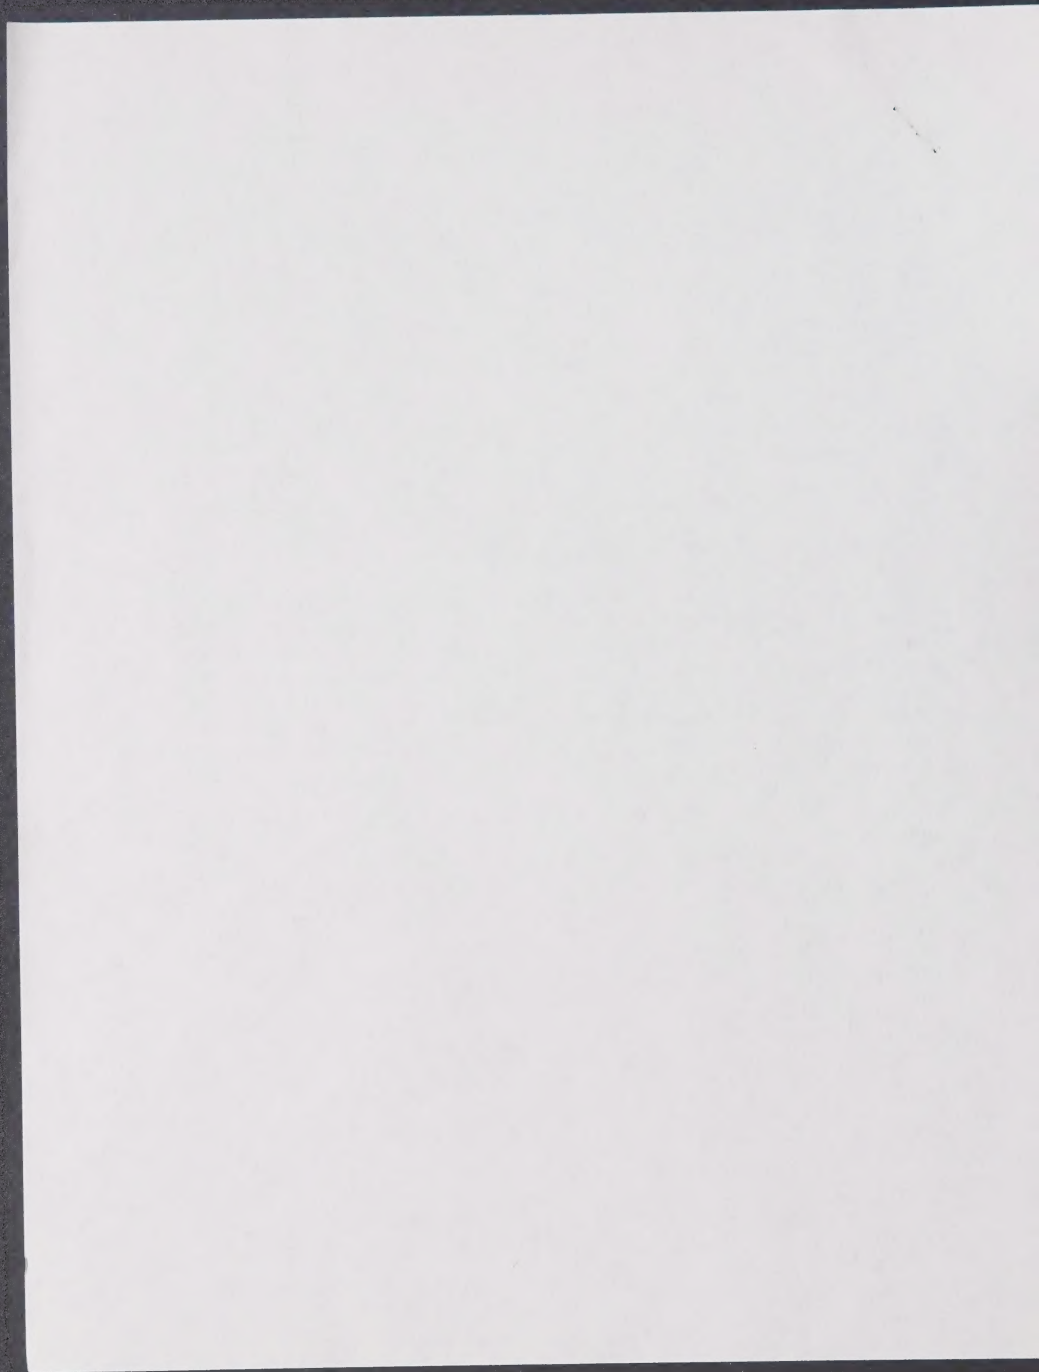

Over the years, Isabel and I have established all sorts of different funds at Queen's. For instance, one is for fellowships in art history, another for the art historical library, another for a chair in chemistry, yet another for the art centre. Another quite substantial fund is called the Bader Abeyance Fund, from which I direct gifts to other endeavors, all within Queen's. All of these funds belong to Queen's, but the understanding about the Abeyance Fund is that the money simply be there collecting interest and that during Isabel's and my lifetime we may ask Queen's to allocate funds to various other funds, all within Queen's University. This may sound complicated, but really is not.

My fax to Tom Thayer, asking for confirmation that the transfer was made, will be self-explanatory.

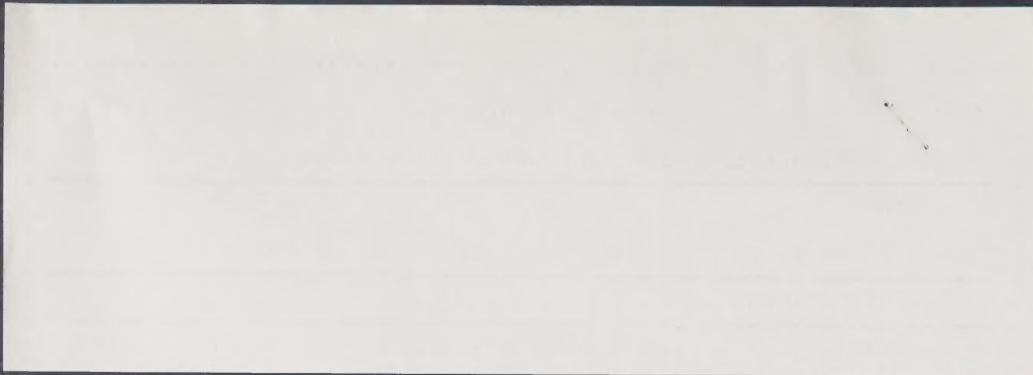

All good wishes.

Sincerely,

Dear Alfred:

Just a brief note following Marg and my trip through the Panama Canal with a Queen's Group. Actually Bill Henry, PhD., Sc'44 and his wife were on the cruise as was Muriel Rush (Ken's wife) and her sister.

In your letter of November 9, 1994 you mentioned you had sent \$2000 to the Sc'44 Fund. On my return I received the donations for November and December and there is no record of a \$2,000 donation (I never ask for names).

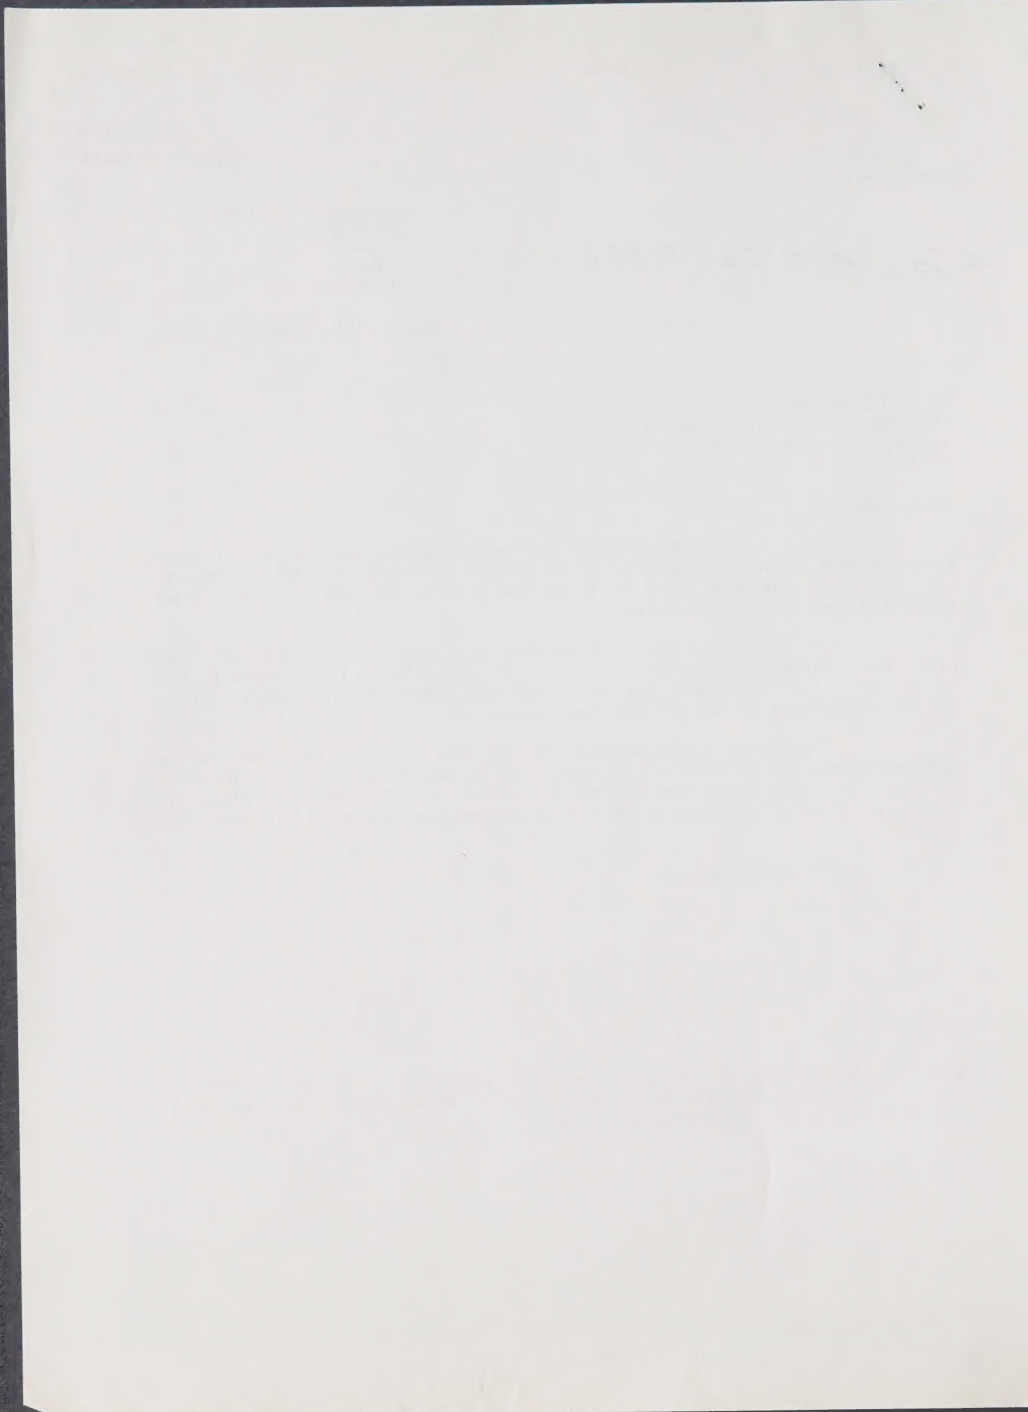

I checked with Dave Pardy of the Science Faculty and he has not seen it either which leads me to believe your cheque went astray in the mail or was misdirected at Queen's. When it arrives I will let you know but I leave for Crete February 12, 1995.

Kindest regards,

Sincerely,

ab8501

P.S.: In my letter of December 28 I gave Mr. Collins' name as Everett Alfred which is correct, then gave his initials as "A.E." instead of "E.A."

To: Mr. Thomas Thayer
Director, Financial Services
Queen's University

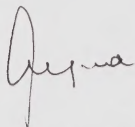

Dear Tom:

Thank you for your fax of January 24th, giving me the details about the art history fellowship fund, much appreciated.

You will recall that last November I asked you to transfer \$2000 from the abeyance fund to the Science '44 Fund. I have a special affection for Science '44, because I lived so happily in the Science '44 Coop, and that was my thank you. Could you please confirm that the transfer was made.

Many thanks for all your help, and best personal regards.

Sincerely,

Dear Alfred:

Thanks very much for your kind contribution to Science '44 Fortieth Year Fund. My latest effort re: the Fund must have crossed yours in the mail.

I was glad to hear that Queen's was interested in a Sawford Dye exhibition. Queen's has a special place in the hearts of many people from the Tri-Town.

When the Cobalt silver mines were discovered in the early 1900's it was Dr. Miller (Miller Hall) who was the leading expert in the field. He recommended many of his students to the mining companies. They in turn were prominent supporters of the Haileybury Mining School founded to train technicians for the mining industry. Queen's was the only university to accept HMS graduates for post secondary education on their marks in only maths, science and english.

Graduates of HMS/Queen's are well known in the Canadian mining industry.

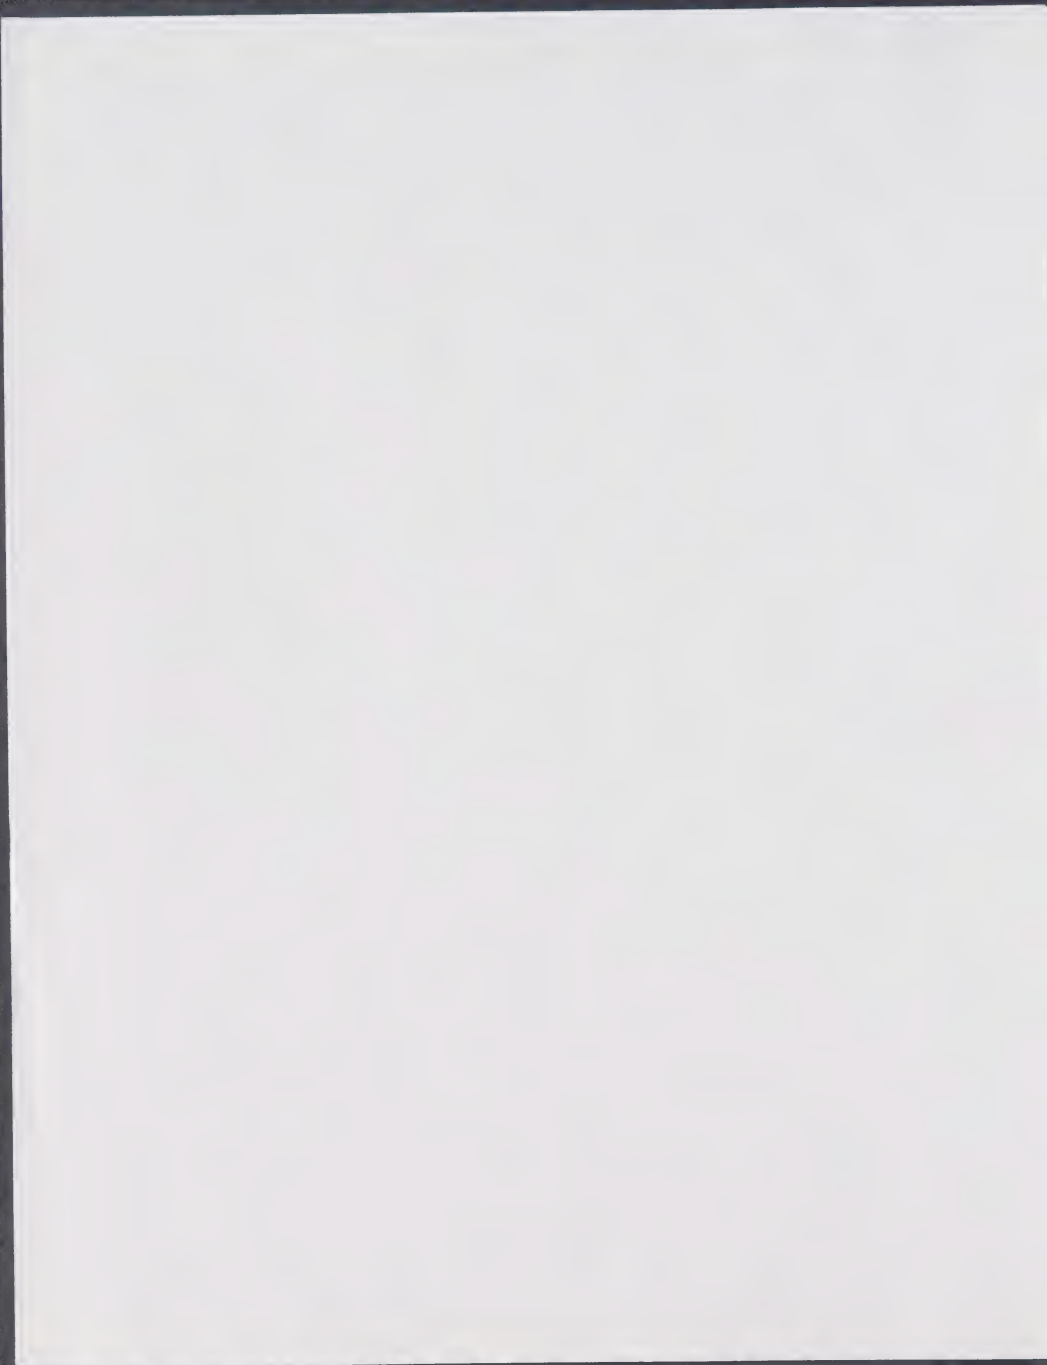

Give my best regards to Isabel.

Sincerely,

Alfred: I had a call from David and
he is well

To: Mr. Ken Cuthbertson
Editor, Queen's Alumni Review
Fax: (613) 545-6777

Dear Ken:

I am certain that hundreds of Queen's alumni were saddened by the news that Clyde Lendrum died two weeks ago.

Clyde was a most singular man. He was one of the founders of the Sc.'44 co-op. During the war, he was taken away from Queen's to work at a uranium mine, and I believe that he did not receive a B.Sc. - perhaps honoris causa - until the 1980's.

He was one of the most enthusiastic Queen's alumni I have ever met, and his great goal was to raise \$1 million for the Sc.'44 Fund.

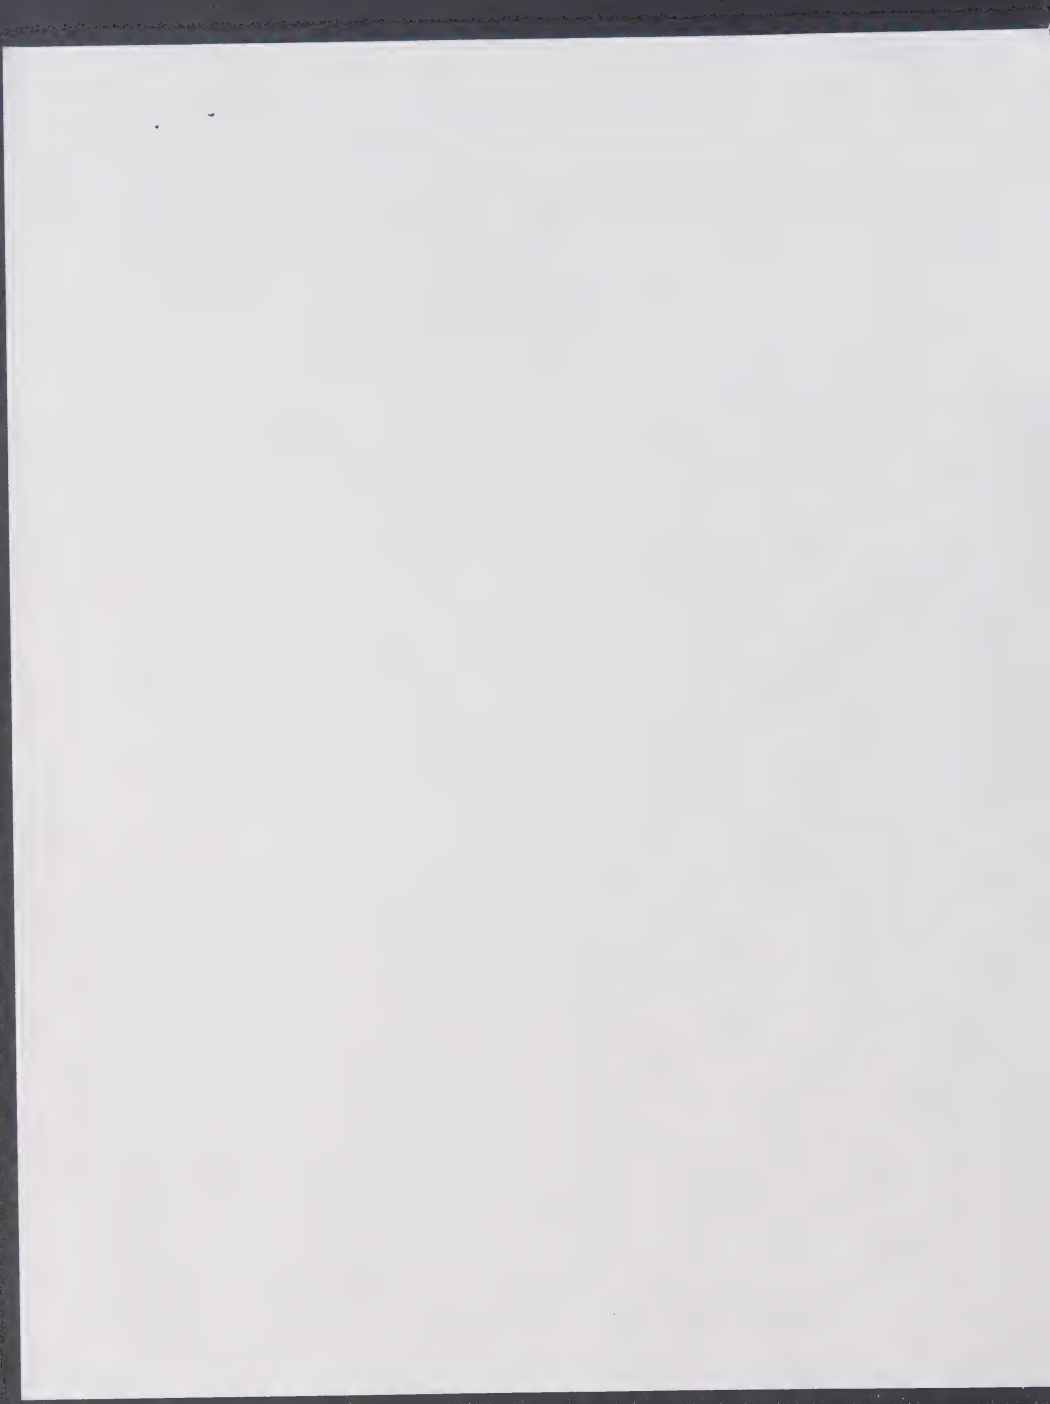

Last July, he and I spent a delightful day in Cobalt, Hailebury and New Liskeard to search for paintings by Ernest Sawford-Dye, a painter who did very fine winter landscapes, and actually boarded with Isabel's grandmother! Our hope was that the Agnes Etherington Art Centre might be interested to show his winter landscapes sometime in the future.

Ken, please don't mind my rambling, but I am so saddened by the loss.

Best wishes, as always,

AB/cw

March 27, 1995.

Dear Alfred:

When we were in New Liskeard two things came up in our discussions, why Cobalters are so proud of a worn down , unpainted town and was there a Synagogue in Cobalt? I came across the enclosed little booklet that may answer some of the questions.

Unlike the other two towns of the Tri-Town Cobalt was an overnight wonder. One of the richest silver camps in America and it was on a railway line not in some hard to reach spot. It had close association with Queen's. Willett Green Miller (Miller Hall) gave Cobalt its name and his students, Reid, Knight, Hill, Fairlie, to name a few were among the senior mining executives in town. They encouraged others such as Kostuik, Watts, etc. to attend.

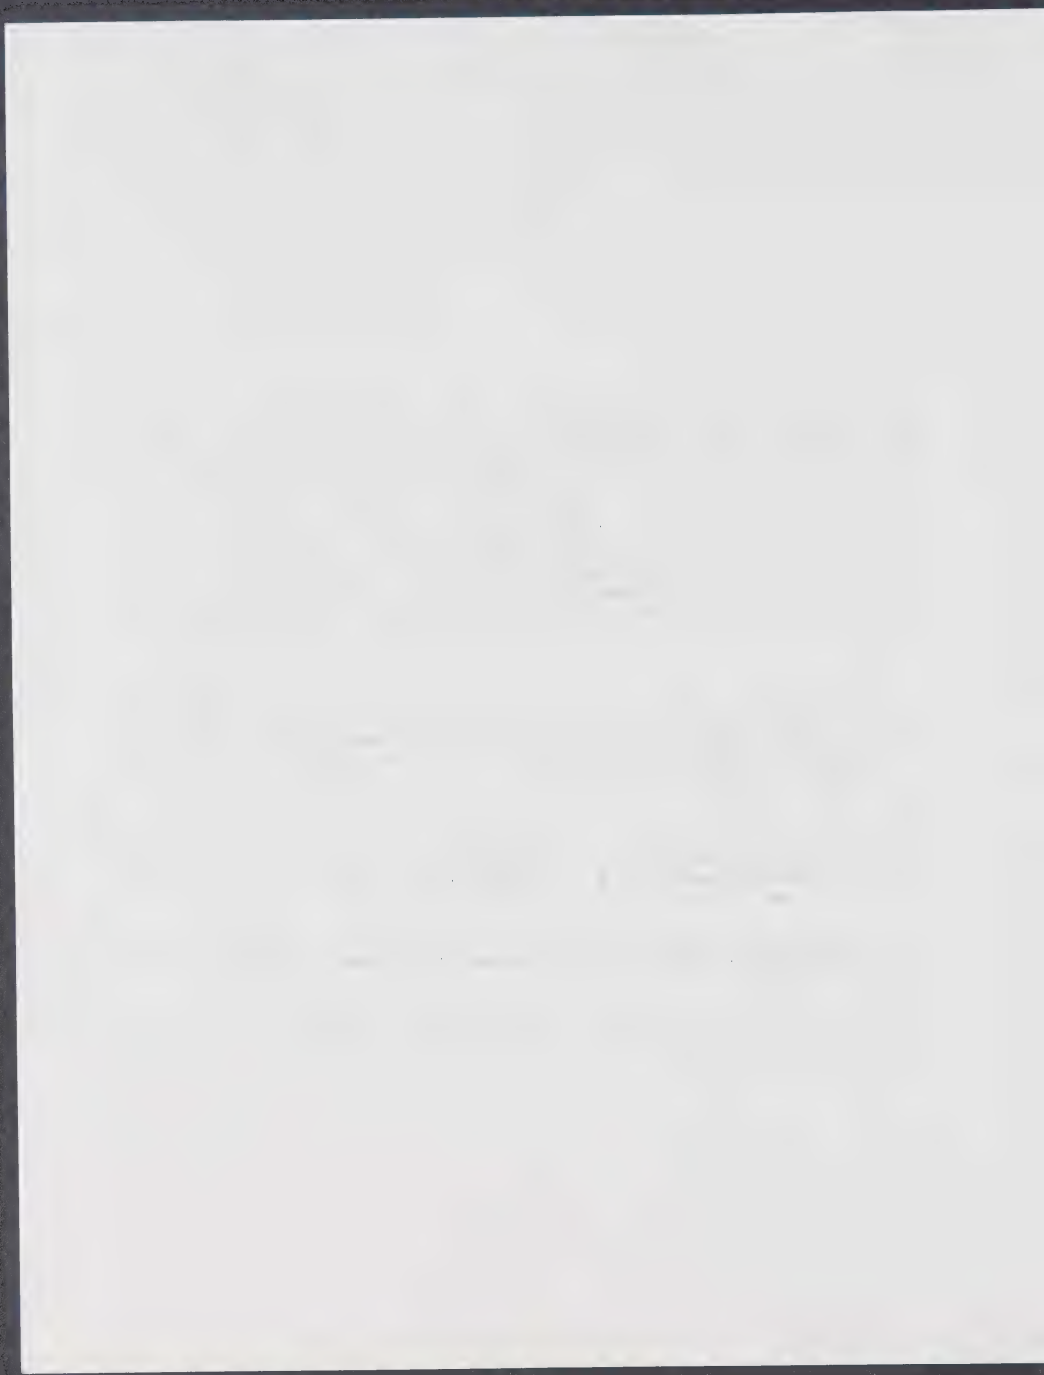

I have marked in the book some points of special interest. The Jewish Synagogue among whose congregation I had many friends. We were a racial mixture drawn to a source of employment and in many cases wealth. When the mines ran out of ore the miners moved on to Timmins, Kirkland Lake, etc.

The little booklet is not by any means complete and there are a few inaccuracies but it is an attempt to show people what the early town looked like, how it was built (of wood). the fires that decimated parts of the town only to have the rise like Phoenix from the ashes.

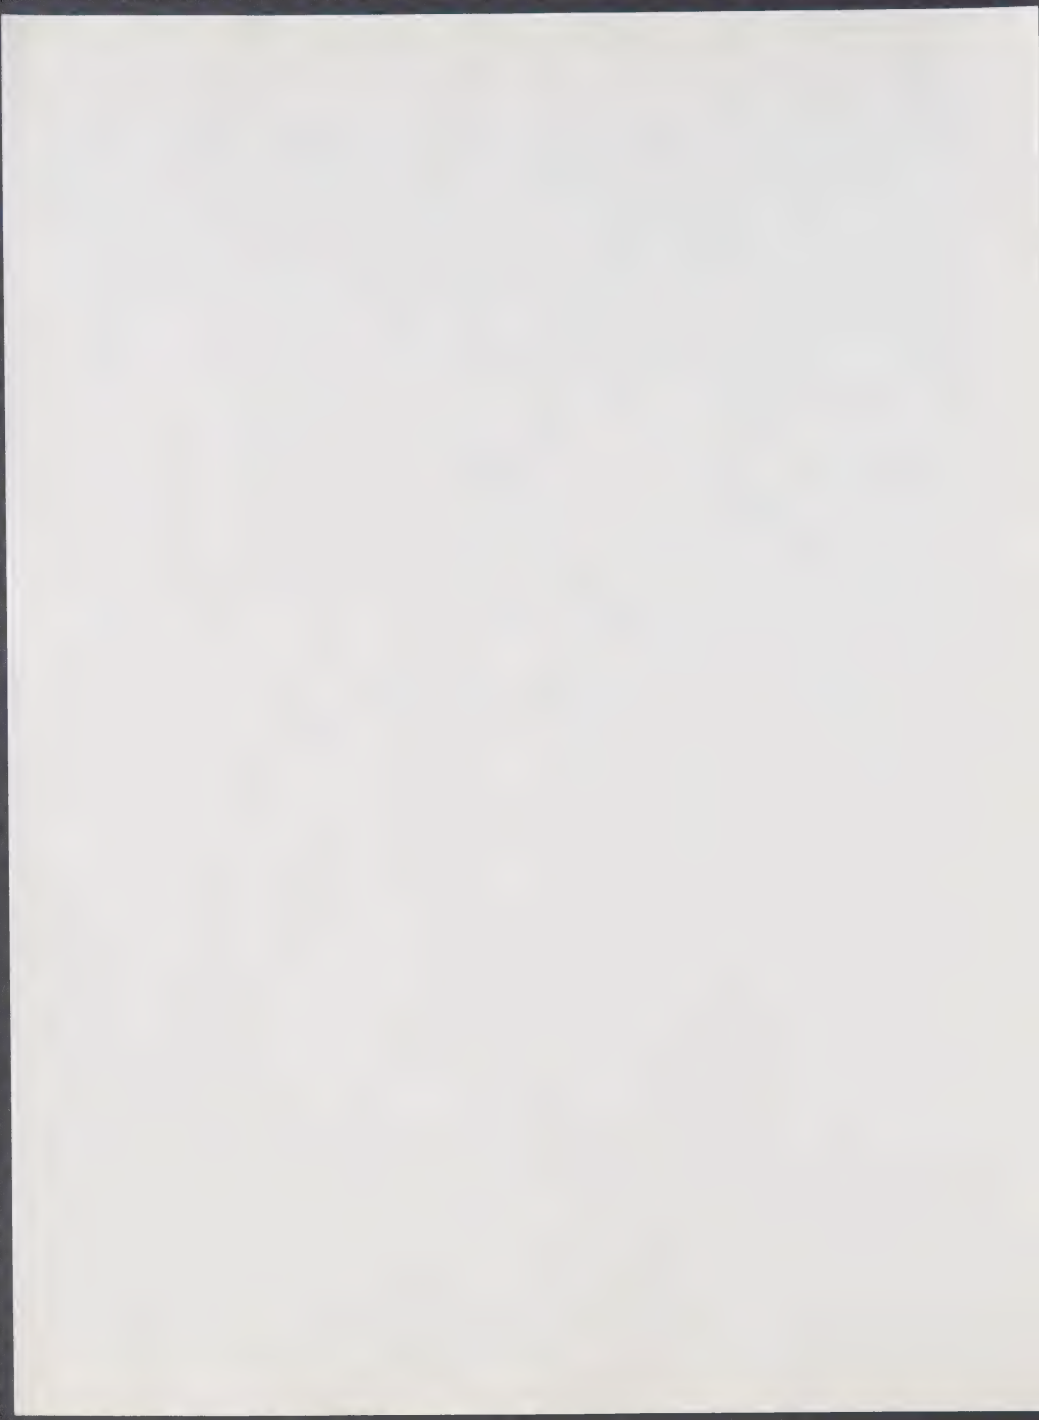

Marg and I had a great month in Crete at the Creta Maris resort. The weather was good and we thoroughly enjoyed ourselves doing mostly nothing.

I must start working on my next letter to Science '44, In the meantime all good wishes to you and Isabel and I hope we will meet again this year.

Sincerely
WKL

ESTABLISHED 1961

November 9, 1994

Mr. F. Clyde Lendrum
P.O. Box 70
King City, Ontario
Canada L0G 1K0

Dear Clyde,

Isabel and had a wonderful week at Queen's, and of course I discussed the possibility of a Sawford-Dye exhibition at the Agnes Etherington Art Centre with its director, Professor David McTavish, who is also our good friend.

I left all of the lists of owners and photographs with him. He was very interested, but has a scheduling problem because we very much hope that there will be a very substantial addition to the art centre soon. Thus, there may be quite a delay.

Of course I am writing separately to the various owners of Sawford-Dye paintings who wrote to me.

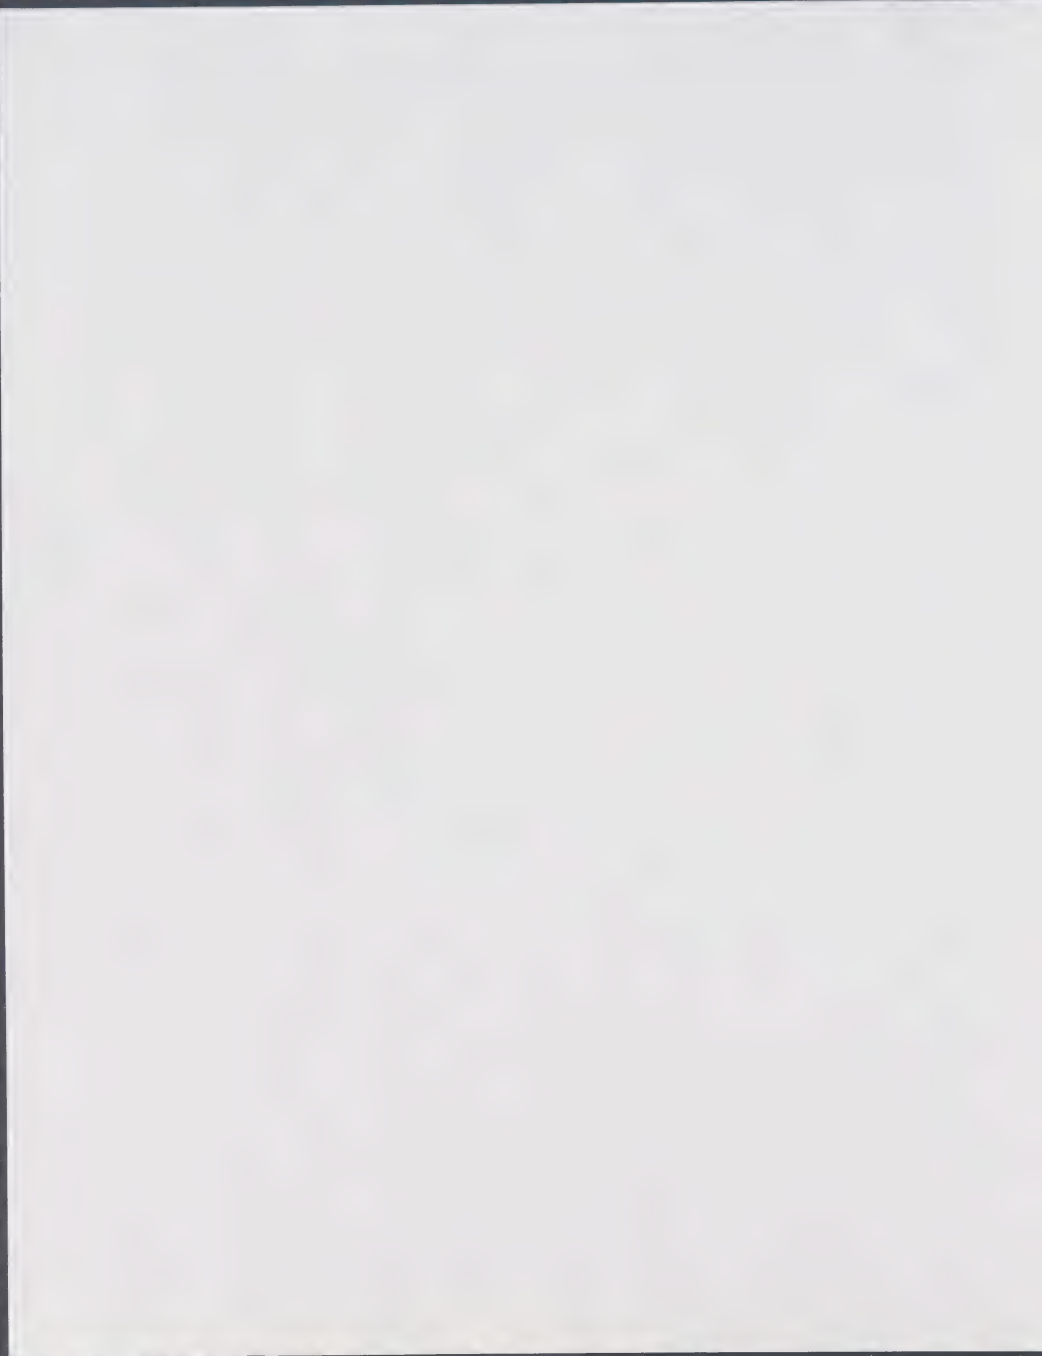

You must know that I had as many good friends in Science '44 and I did in Science '45, and I just wish that the reunions for the two years could be the same year. As a small token of my appreciation I have sent Can\$2000 to your ambitious and appropriate fund.

All good wishes.

Sincerely,

c: Prof. David McTavish

LOG 1K0

October 19, 1994.

Dear Alfred:

I was down to the Queen's Homecoming last week-end. It was my 50th reunion. Most of the remaining Co-op members were there; Wrong, Pardy, Rush, Lillie, Patzalek, Runge and myself. The only one of the originals missing was Chris Nicholl who wrote he and his wife were unable to attend. Also there was Bruce Campbell who ate at Collins house.

The weather was terrific, sunny bright and not too cool. The only disappointment was the football team lost to Bishop's.

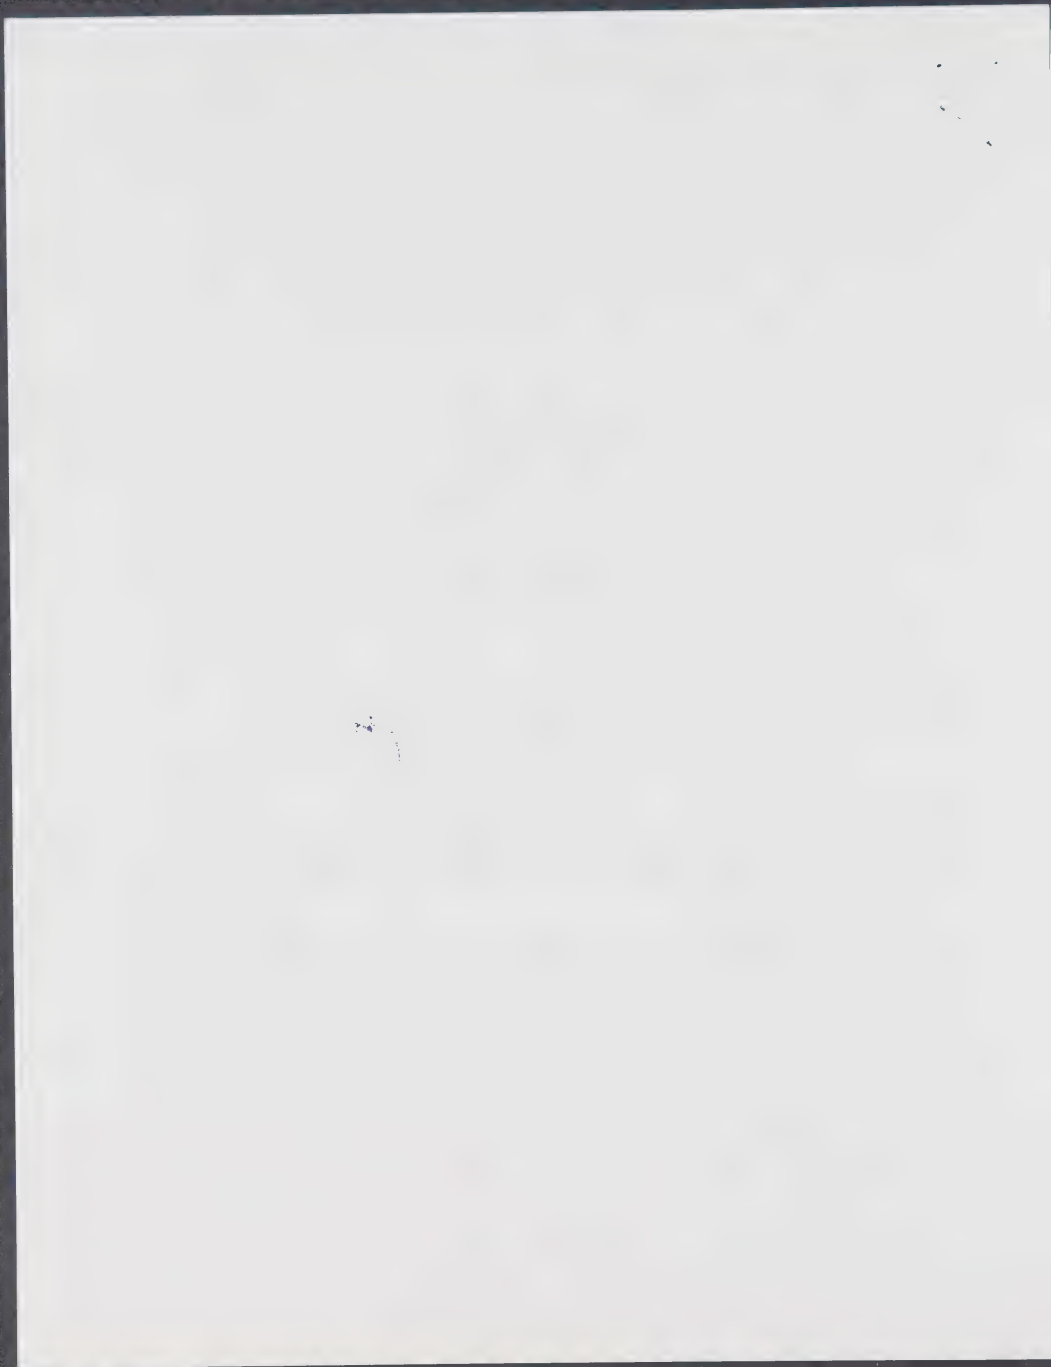

Science '44 had a dinner on Friday night and the organizers had name tags for us each with his photo (1944 edition) attached. The pictures were startling. Marg thought that she could have gone for me in 1944.

On Saturday morning we had a breakfast with the Dean at which he gave us a snapshot of the faculty as it is to-day and how it has changed from our day and then went on to tell us what he believes will be changes in the future and how the Science '44 Fortieth Year Fund will be a factor. I had agreed with our committee I would not operate a fund raising drive at Homecoming. I invited Ed Pearce in case anyone wanted advice on planned giving.

On Saturday evening we had the University's dinner for all '44 Classes and the new Principal gave a really good talk. He had apparently researched '44 and mentioned the Co-op, the "riots" of 1941 and a mention of those who left school to enter war work and the services. He brought up your castle and its importance to the international aspects of Queen's.

All in all it was a great week-end.

I talked to David Moyer this morning to tell him about Homecoming. I try to keep in touch but it is difficult.

The Sc'44 Fund is making strides and is now the largest class fund. This is mainly because "I.M. Anonymous" has bequeathed \$100,000 to give us a total of \$335,000.

There is not much more news the Stauffer Library is in operation but I did not have a chance to visit.

Marg came with me to Homecoming and we plan on taking the Trans Panama Canal cruise with the Queen's Alumni in January.

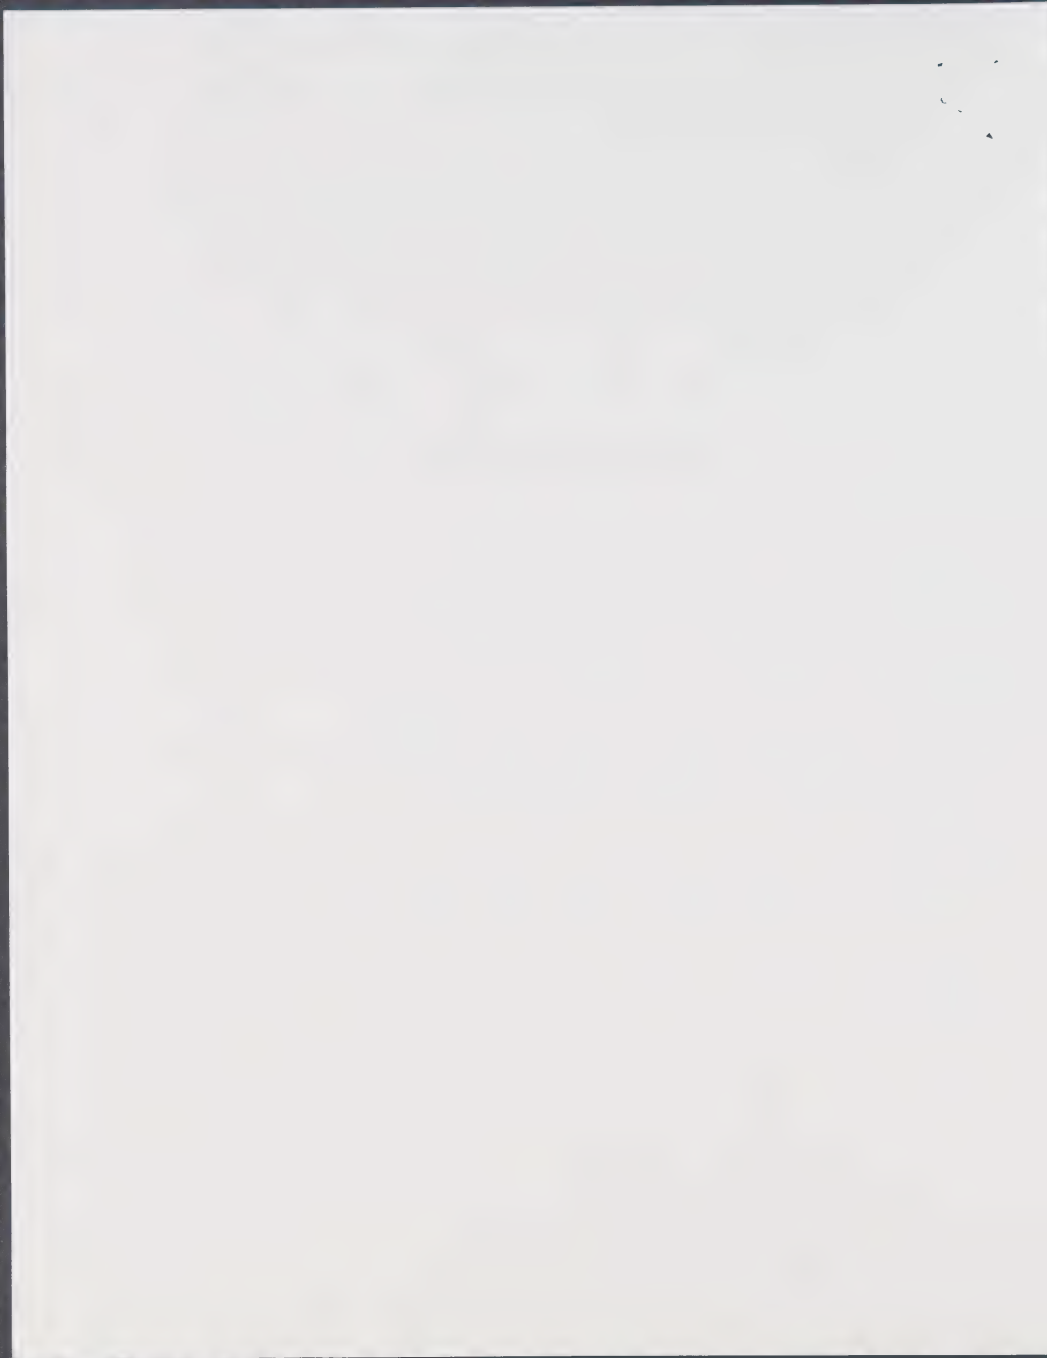

My health has improved quite a bit and hopefully will continue to let me get around.

My Fine Arts Grad is touring Europe and hopes to get down to see the Castle. I had a letter from her and she got to England a found a job which will "help fill the well" for a little while.

All the best to you and Isabel. Drop a line when you have time. Everybody is hoping you will be able to set up an exhibition of Sawford-Dye's work.

Sincerely,

ALFRED BADER FINE ARTS

Dear Clyde,

Thank you so much for your thoughtful letter of August 3rd.

You mentioned that you have highlighted a couple of places in your wonderful history of the Science '44 Co-op, but I saw nothing highlighted. This doesn't matter, because all is so interesting that I read it carefully twice.

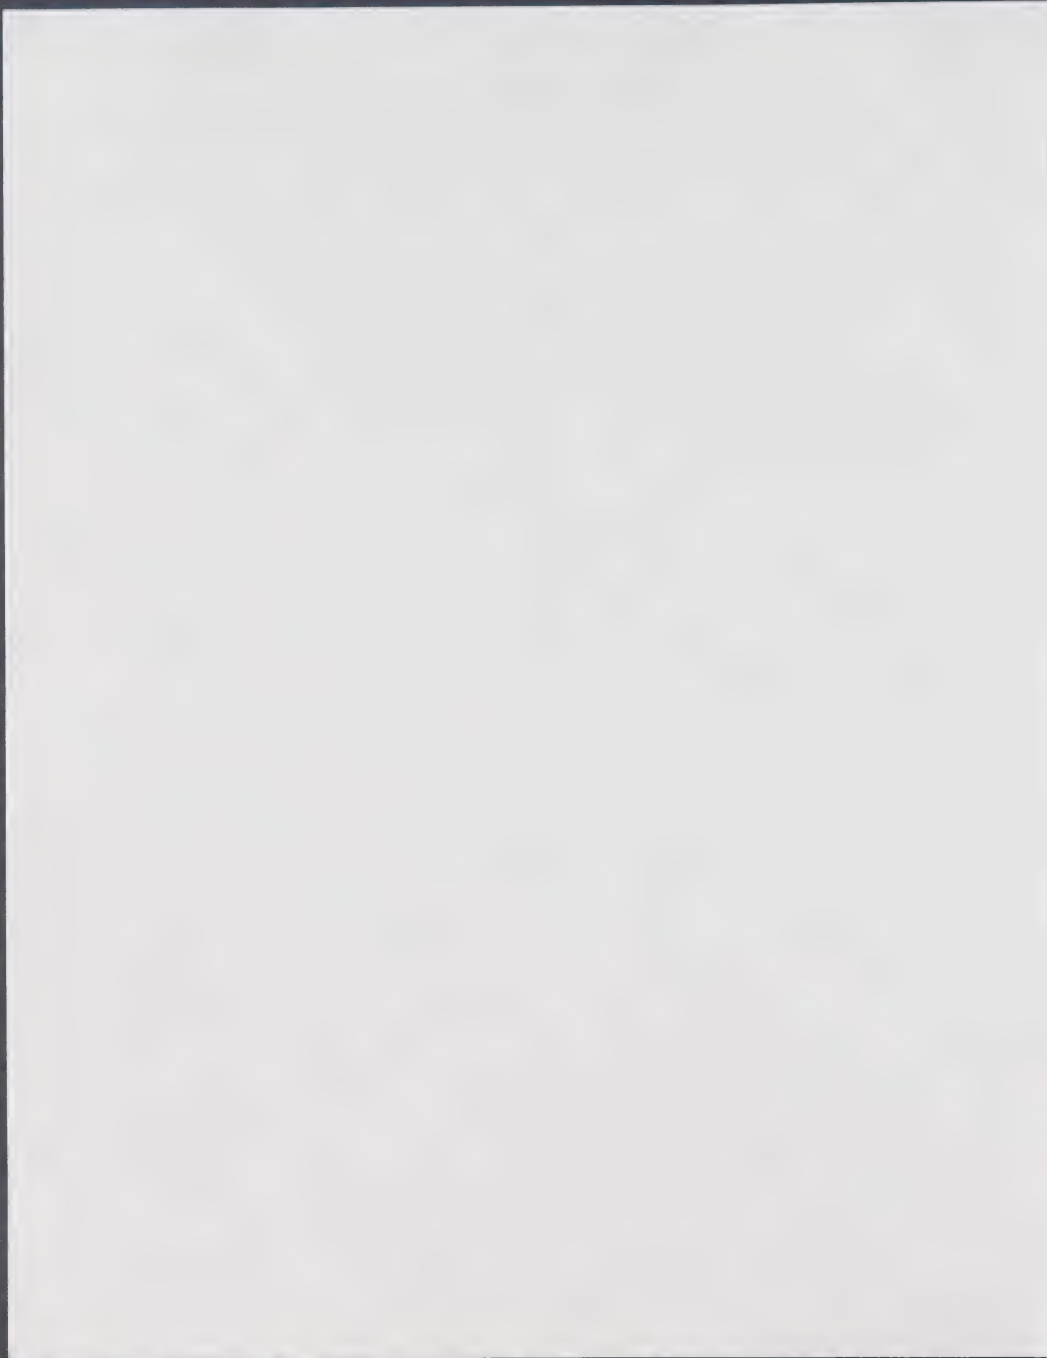

We are just leaving for England and Spain and will not return until September.

Early in November I will spend an hour or two with Professor David McTavish, Director of the Queen's art centre, to share the many photographs and information on Sawford-Dye. I will then report to you what he says.

Best wishes.

Dear Alfred:

I promised I would send you a copy of the anecdotal history of Science '44 Co-Op I wrote following Science '44 Fortieth reunion in 1984. The original, plus other documents are in Queen's Archives.

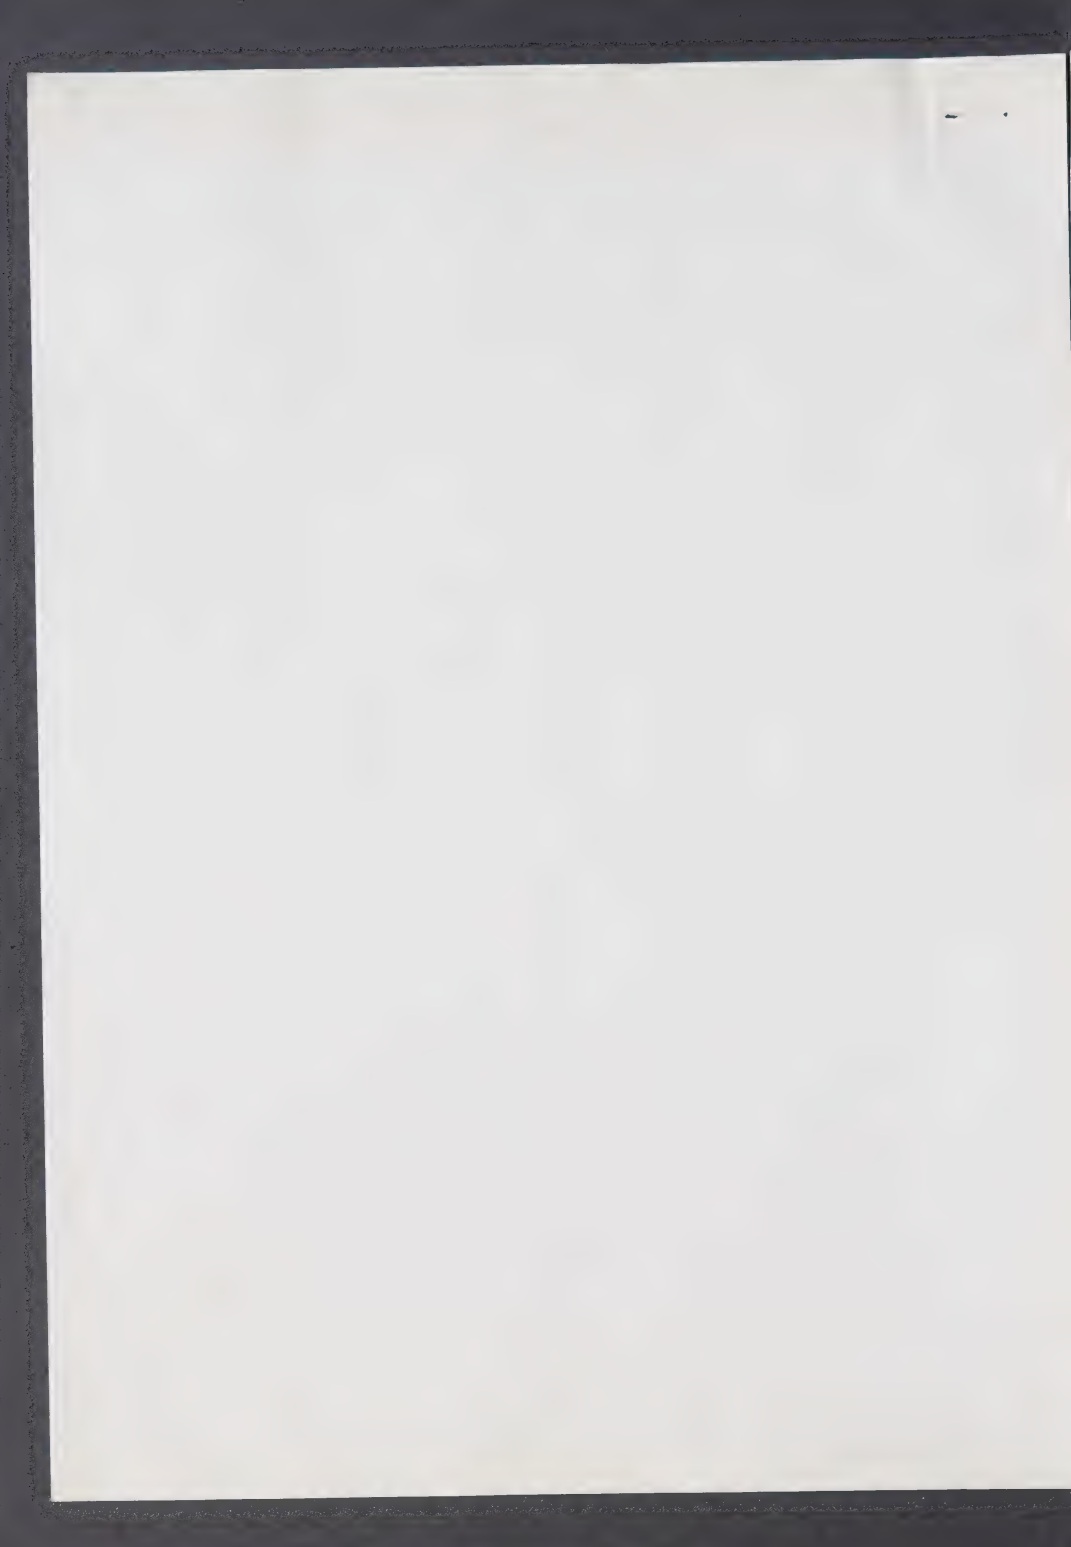

I have highlighted a couple of places in which you will be interested.

I have not been able to secure the book on Allan Sapp, P.C.A., a native Indian painter from Prince Albert, Saskatchewan. Sapp painted scenes of the Indian Reservation, many of them snow scenes. I have enjoyed Sapp's work and own one of the portraits he painted, Mary Mosquito, his Grandmother.

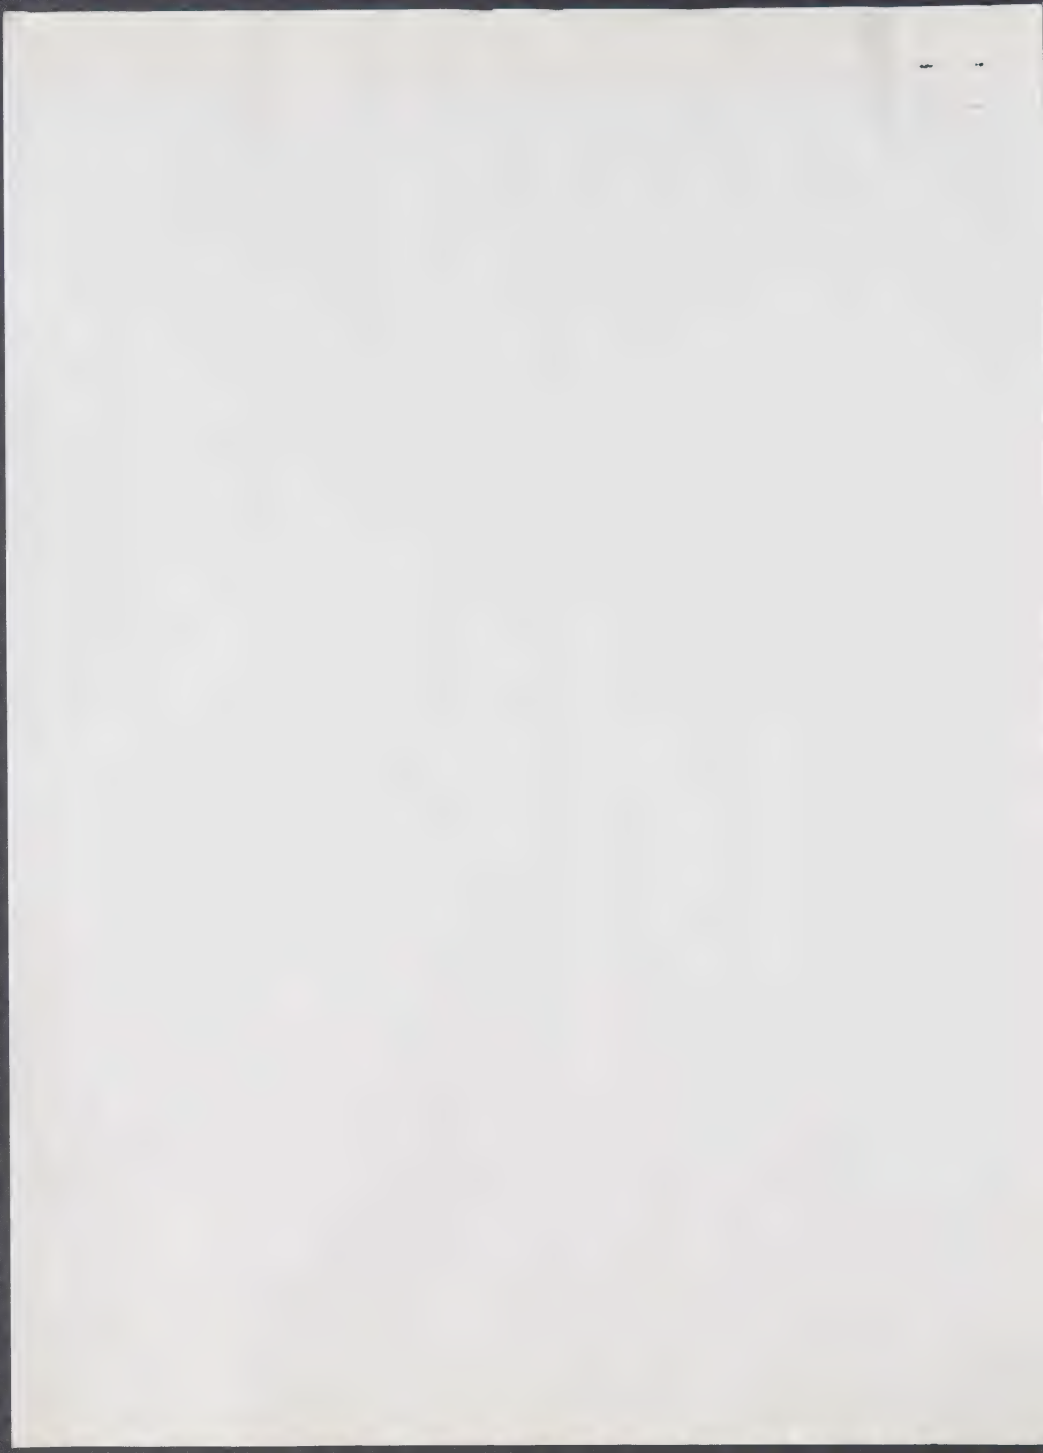

Sincerely,

H. C. C.

July 1994

These letters have this information that I just read it along.
Ed
Dear Classmate:

I had not intended to write another letter before "Homecoming" but a couple of events have developed that could aid our Fund and I want to bring them to your attention.

The Fund now stands at \$120,471.00 including 1993 interest of \$6,712.00. The current market value is \$127,804.00. The Fund was also increased by an insurance policy of \$10,000.00. Ed Pearce tells me there are others considering Charitable Annuities which are paying 8% plus tax benefits.

WHO ELSE WANTS TO BE INCLUDED IN THE BEQUESTS???

In my last letter I discussed a mechanism for leaving a bequest in our wills to Queen's. Since then I have learned that the Ontario Government has allowed the universities to set up a new legal identity called a "Crown Foundation" which will allow a person to give a large gift and its assessed value will be deductible up to a 100% of their taxable income. Any excess can be carried forward for two years.

Science '44 Fortieth Year Fund can benefit under the program by bequeathing a gift to "Crown Foundation Queen's University at Kingston - Science '44 Fortieth Year Fund".

Michael Davies spoke to this at the Grant Hall Society dinner and I enclose a copy of his notes for your information.

Further detailed information can be obtained from:

Dr. Edward H. Pearce,
Bequest and Planned Giving Officer,
Department of Development,
Queen's University,
Kingston, Ontario. K7L 3N6

Telephone: 1-800-267-7837

- 2 -

You will have received Chuck Campling's letter re "Homecoming" and I hope he can arrange a breakfast meeting with Dean Hammacher who is anxious to tell us what our Fund means to the Faculty. I urge all who are interested to help Chuck organize the breakfast.

Sincerely,

A handwritten signature in black ink, appearing to read "F. C. Lendrum", with a long horizontal stroke extending to the right.

F. C. Lendrum, P.Eng.

sc449411

GRANT HALL SOCIETY DINNER
SATURDAY, 14 MAY 1994
Address by Michael Davies

As members of the Grant Hall Society, you represent the top level of private support for Queen's University.

You have shown your support in a tangible way, with your personal contribution, and thereby demonstrated that you believe in the goals of Queen's.

As Chairman of the Grant Hall Society, and on behalf of the University, I wish to thank you one and all for your understanding and personal generosity.

Two years ago, I gave you a brief outline for a new Financial Instrument known as a Charitable Annuity. To refresh your memory, it's a method of "keeping your cake and eating it too!" - or, "how to benefit from your own benevolence

If you are 75 or over, and you decide to make a capital gift to Queen's, then for the rest of your life, Queen's will pay you interest at a very competitive rate. Because the Income Tax Act regards this interest payment as a return of capital, there is no tax payable on this interest income, no matter how long you live. Currently, Queen's has received \$2.5 million under this program, \$965,000 in the last 12 months.

(If you are planning a bequest, why not give it now and benefit from your own benevolence.)

This year the Ontario Government, under pressure from the Universities, has allowed Universities to set up a new legal entity called a Crown Foundation. Prior to now, an individual could only claim up to 20% of his yearly taxable income for charitable donations.

Now, by donating to the Queen's Crown Foundation, a person may gift a large item, for example a piece of property, or a work of art, that, when duly appraised, is deductible against 100% of their taxable income, and it can even be carried forward for up to five years.

For example, if a person had a taxable income of \$100,000, and this person made a gift of a painting appraised at \$300,000, to the Agnes Etherington Gallery, the person would pay NO income tax for three years!

If you believe either of these programs is applicable to your future plans for Queen's, please contact the Department of Development. --And remember, you may have a friend or relative who would be interested in these new methods of support.

YOU DESERVE A TAX BREAK!

Dear Clyde,

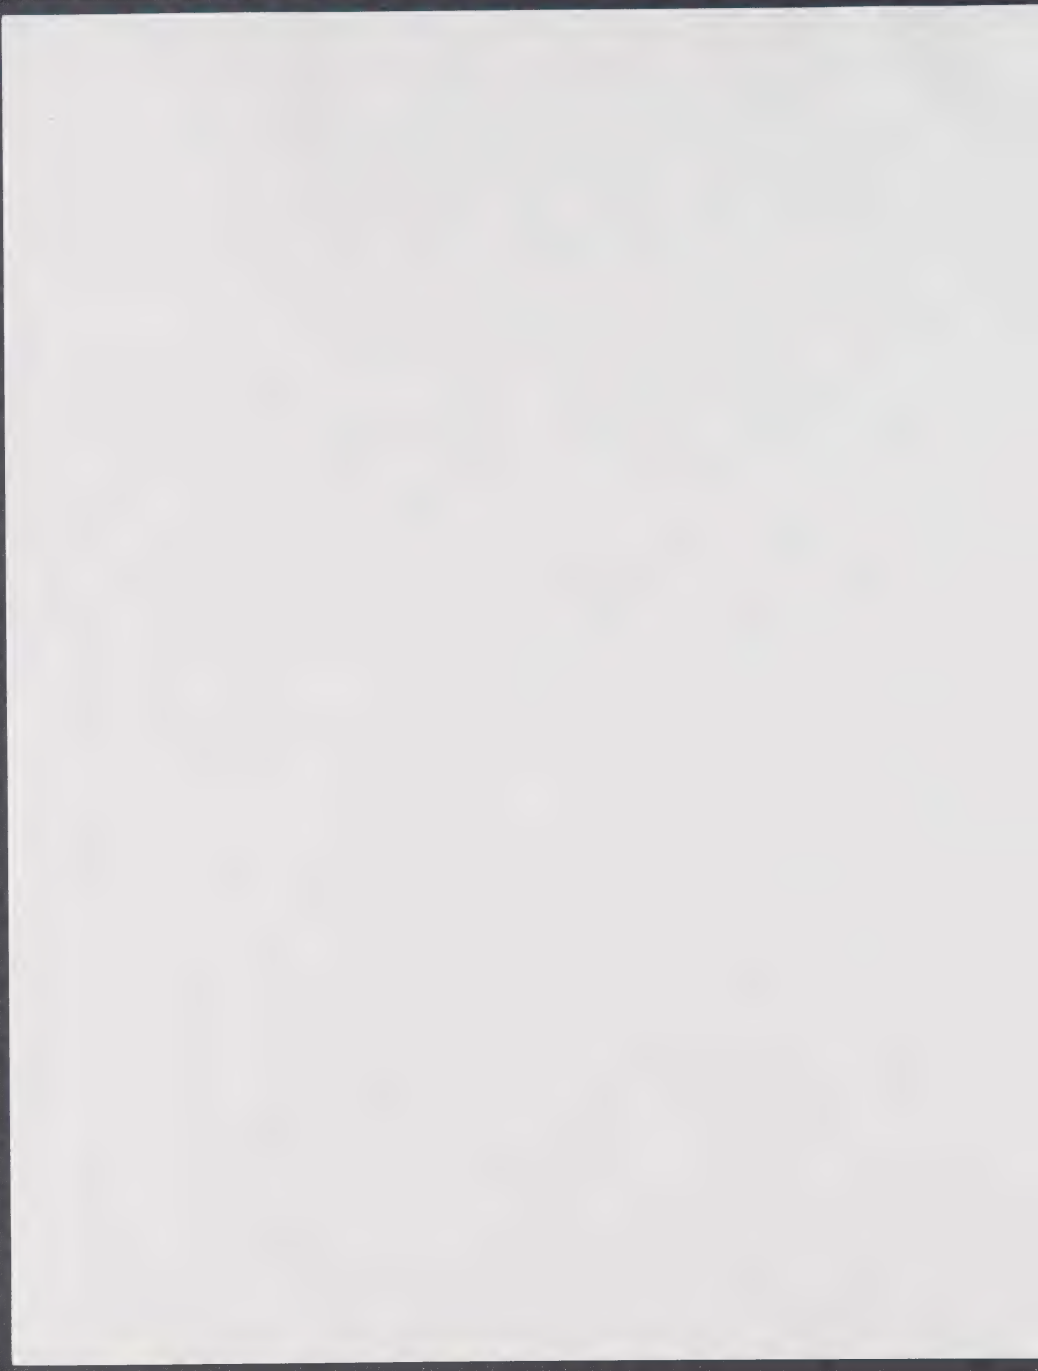

Isabel and I look forward to being in Toronto from the evening of Wednesday, June 1st, until Sunday, June 5th. I will be giving a lecture at York University, Chemistry, on Thursday afternoon, June 2nd, and Isabel will be attending the festivities of her 45th reunion.

Then, from about the 18th to the 22nd of July, we plan to drive to Kirkland Lake for that city's 75th anniversary. Might you like to come with us to look for paintings by Ernest Sawford-Dye. That would make the search so much easier and so much more fun.

Have you seen David Moyer recently?

Fond regards.

April 1994.

Dear Classmate:

*hope to see you
in July
keeping you
updated
on my hobby horse*

Fifty years ago now the Class was in its last term before the finals and looking forward to graduation in the spring. Not all of us were there, some had joined the armed services and gone to war, others had been seconded for war work hoping to graduate later. To-day we are all looking forward to our Fiftieth Anniversary and Homecoming in the fall.

Last October I gave you an up-date on our **FUND** and relayed a letter from the Dean telling us what our type of endowment fund has meant to the Faculty, in the new world of government restraint and university financing. The result was that in December, I had the pleasure of informing the Dean that our **FUND** had reached its first plateau of \$100,000. in cash donations plus returned interest and that he may, should he wish make the first withdrawal. It is the Dean's continued wish to allow the **FUND** to grow, because our fund has allowed the faculty to "think big".

As of March 31, 1994, the **FUND** had \$112,750 in cash and a market value of \$130,784. With capital gains and annuities purchased, etc. the **Science '44 Fortieth Year Fund** is well in excess of \$200,000. and growing.

My previous letters have stressed the Charitable Annuity as a way of benefiting both the university and ourselves. These annuities are still available and the rate of return is still 8% plus the income tax benefits you may derive. You can get the latest information from Dr. Ed. Pearce, Director of Planned Giving (Telephone: 800-267-7837).

I would like to now suggest that we all give some serious thought to leaving a bequest to the university, in our wills through the **Science '44 Fortieth Year Fund**. There are some eighty of us still here, if each of us bequeathed \$10,000. in our will we would put our Fund well over the million dollar mark. Other years are suggesting this approach and Ed. Pearce has developed a codicil which is the simplest way of adding the bequest to your will. I have enclosed a copy of this codicil and recommend that you discuss it with your own lawyer and/or financial counsel.

Chuck Campling our Vice President and the Kingston contingent of Bill Pardy, Ken Rush and Bill Stinson are organizing our 50th Homecoming and have plans well underway. Chuck will be in touch with all of us.

During Homecoming Dean Hamacher has expressed a wish to meet with those who believe in the **Science '44 Fortieth Year Fund** and tell us what our Fund means to the faculty. He has suggested we meet for breakfast on the Saturday morning. Chuck is hoping to arrange this at the Donald Gordon Centre.

Mel Griffin has proposed a "draw", in support of the Fund to be held at Homecoming. The prize will be the cost of the winner's hotel room for two nights and the winner must be present at Homecoming. Tickets for the draw will be given for cash contributions to Science '44 Fortieth Year Fund prior to August 1, 1994. The first \$100. contribution earns you one ticket and every additional contribution of \$50. gets you another ticket. Mel has offered to underwrite the hotel room so there will be no cost to the Fund.

Enclosed is a graph showing the progress of the fund to date.

I may get another up-date to you this summer but if not I look forward to seeing you all at Homecoming.

BE SURE TO MAKE ALL CHEQUES PAYABLE TO:

QUEENS'S UNIVERSITY - SCIENCE '44 FORTIETH YEAR FUND.

QUEEN'S UNIVERSITY SCIENCE '44 FORTIETH YEAR FUND

ALFRED BADER FINE ARTS

DR. ALFRED BADER

ESTABLISHED 1961

January 7, 1994

Mr. F. Clyde Lendrum
Consulting Limited
P.O. Box 70
King City, Ontario
Canada L0G 1K0

Dear Clyde:

I am sorry that a two-month trip to England has delayed my thanking you for your most helpful letter of November 6th.

The title in Herstonceux Castle is now finally with Queen's University, and in December I was also able to negotiate the purchase of a further 250 acres of land next to the castle. The first students are to arrive in July, and everything should be in full swing by September.

You wouldn't believe how many offers and requests I have had for all sorts of things, ranging from upgrading Kingston's inner city to purchasing Thousand Island estates. There is only so much I can do.

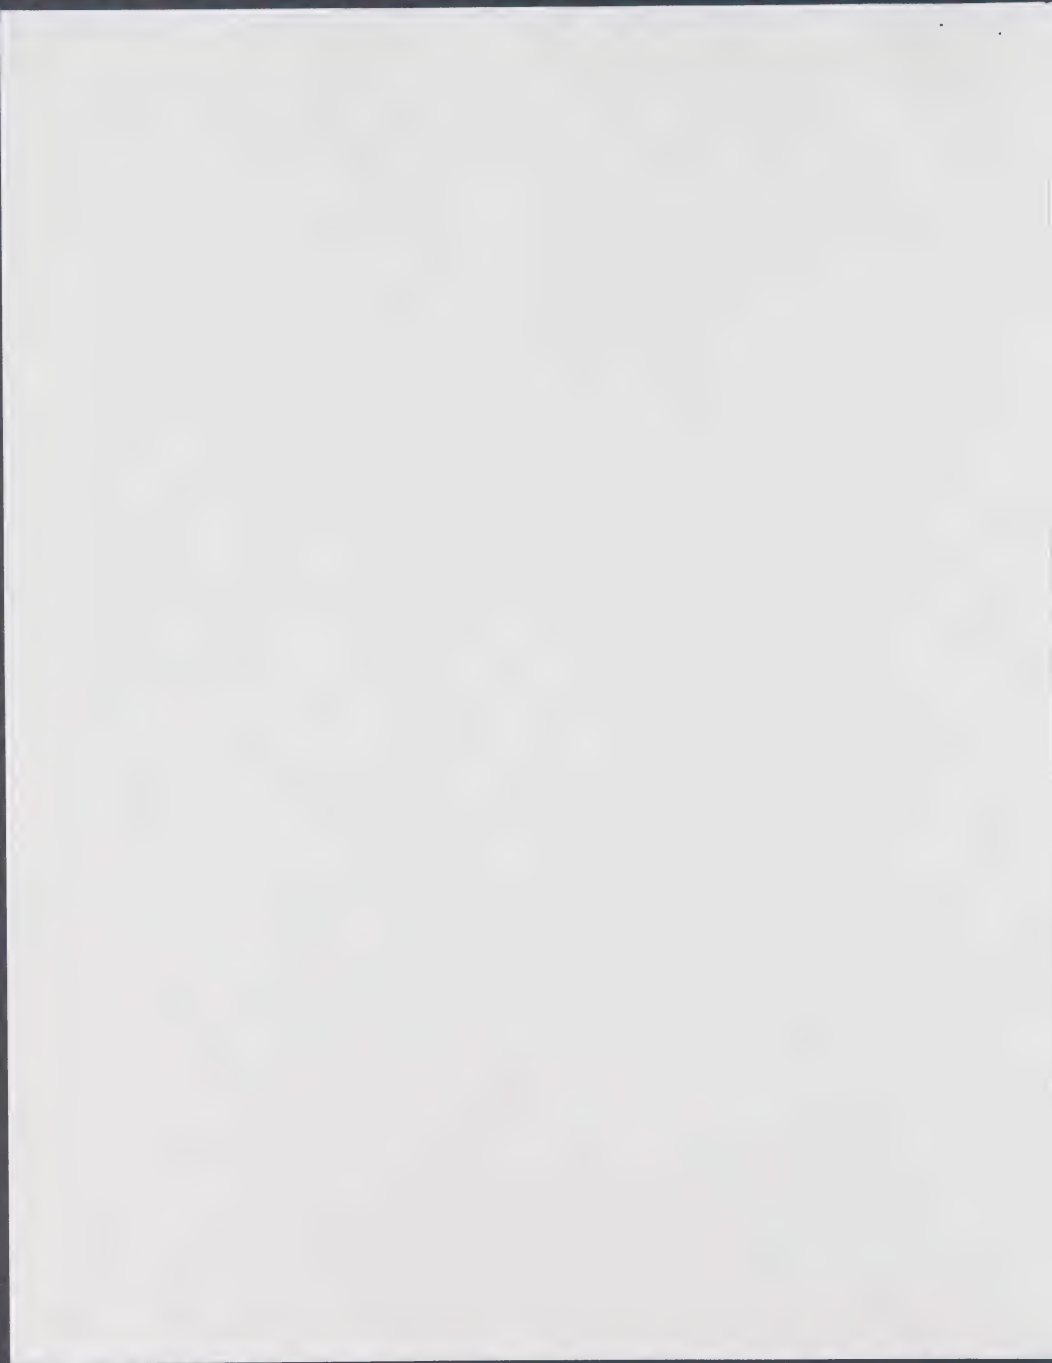

Isabel and I much look forward to going up to Kirkland Lake the week of July 18th for the 75th anniversary of the founding of the city. Then, of course, we will also be looking for snow scenes by Sawford Dye, not just in Kirkland Lake but also in New Liskeard and Cobolt.

I have had some very moving letters from David Moyer. He is really an able writer, and it is such a pity that nobody encouraged him when he was young. He has a terrible self-image, and he just doesn't realize how good he is. We all need encouragement, but David more than most.

It is such a pity that the 1944 and 1945 science reunions don't fall into the same year. Living at the science '44 co-op made me know engineers in science '44 as well as my classmates in science '45. I think--but please don't quote me to members of science '45--that science '44 was a much more cohesive year, and you must be tremendously proud of the good work you are doing for Queens'.

Sincerely,

By Appointment Only

FAXED

Dr. Alfred Bader,
Milwaukee, FAX 1 414 962 8322.

Dear Alfred:

It was a pleasure to have coffee with you and David. Let's agree that next time it is my treat.

The folio of pictures of the Castle is beautiful. I hope if I get back to England I will have a chance to visit Sussex.

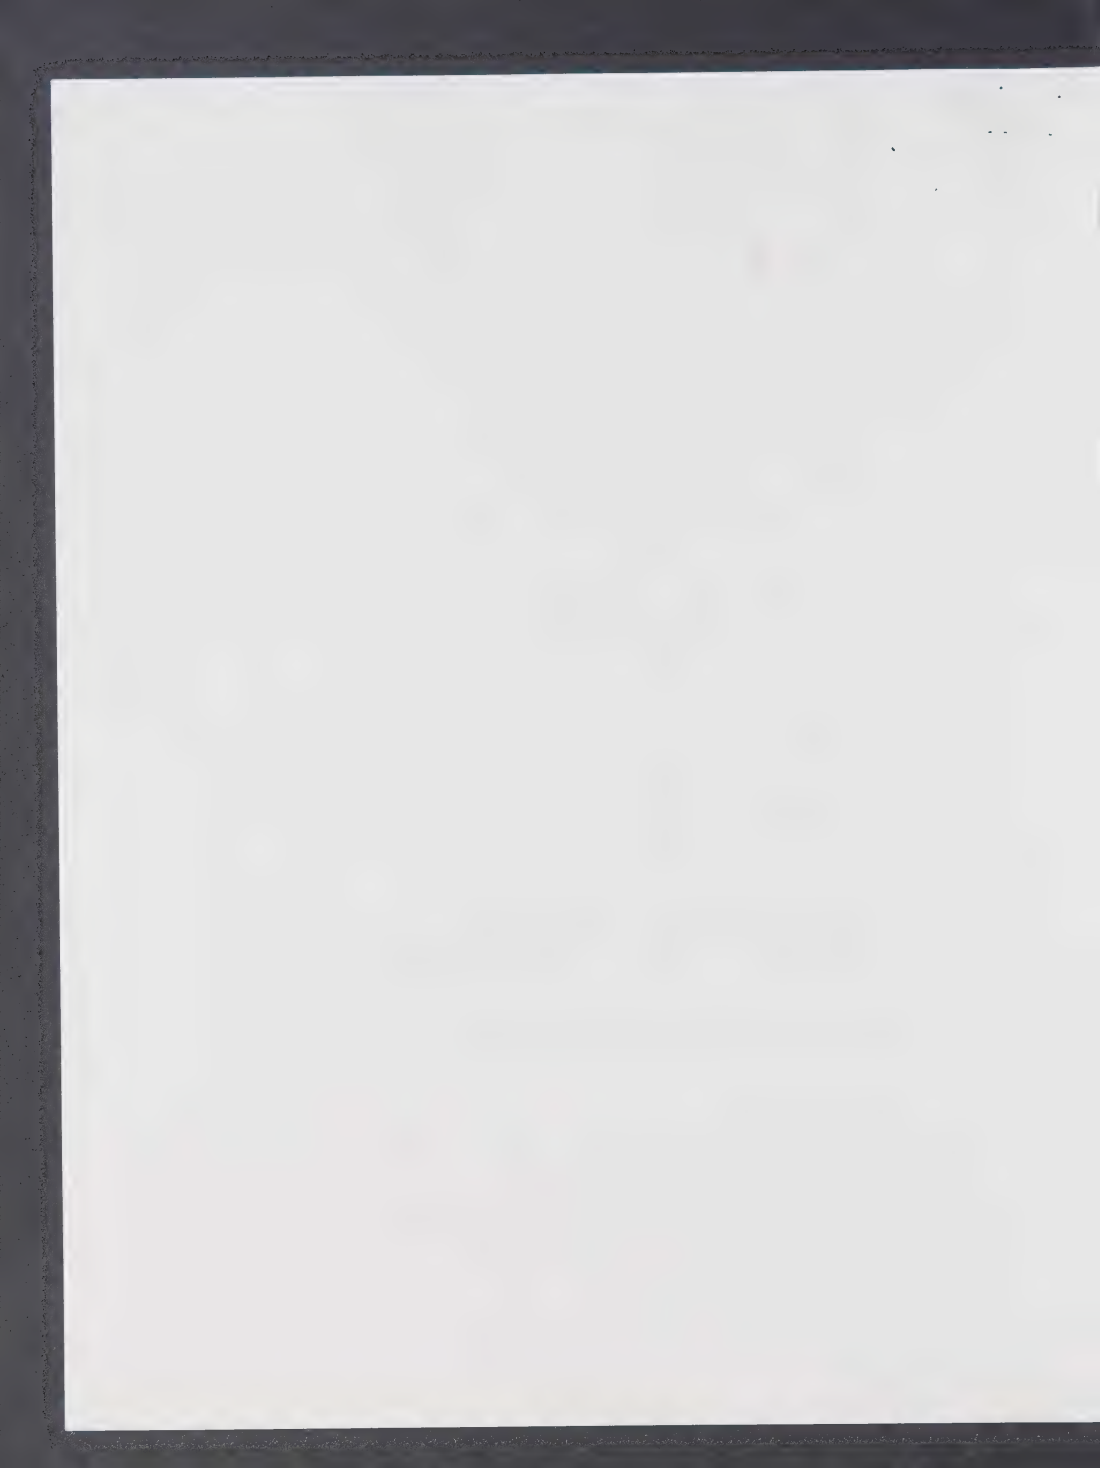

If you still require information on Mount Assinaboine (The Matterhorn of the Canadian Rockies) it is 35 Km. south of Banff, Alberta and it is the highest peak between the Trans-Canada Highway and the U.S. Border. Elevation 3618 m.

Regarding houses in the "Ghetto" around Queen's:

1. In the 1940's the "Ghetto" was an area bounded by the University on the south and Johnson or Brock Street on the north. It stretched westward from Barrie (Court House) to probably Collingwood Street on the west. Collins House was a better than average constructed and maintained house in this area which will give you an appreciation of the state of the houses, in the "Ghetto" fifty years ago and they have not improved.

2. If buying house is to house students on a basis similar to the Co-Op my approach would be with great caution. Sc '44 Co-Op grew from within. The members organized on the Rochdale Principles which while being socialistic in nature i.e one member-one vote are hard headed when it comes to business practice. The Co-Op members approached E.A.Collins to buy the house as an investment and rent it to the Co-Op at a rental that would cover maintenance and a "fair rate of return" on capital. Mr. Collins chose instead to give the house to Queen's and let Queen's have the investment income. Nobody ever gave the Co-Op a gift.

3. I suspect that modernization of these old houses would be exorbitant because of a combination of up-grading to present day standards and the fact many of these 100 year old houses were not that well built. My approach would be to make inquiries from knowledgeable people like David Bacon or the executives and managers of the Co-Op who have renovated a number of houses. If renovated to their original appearance one does not have much unless one landscapes the street as well.

4. If the purpose is to give Queen's more acreage through removal or demolition of the houses my suggestion would be to leave this to the AMS and the university itself. They have on-going plans. My support would be on a site specific basis.

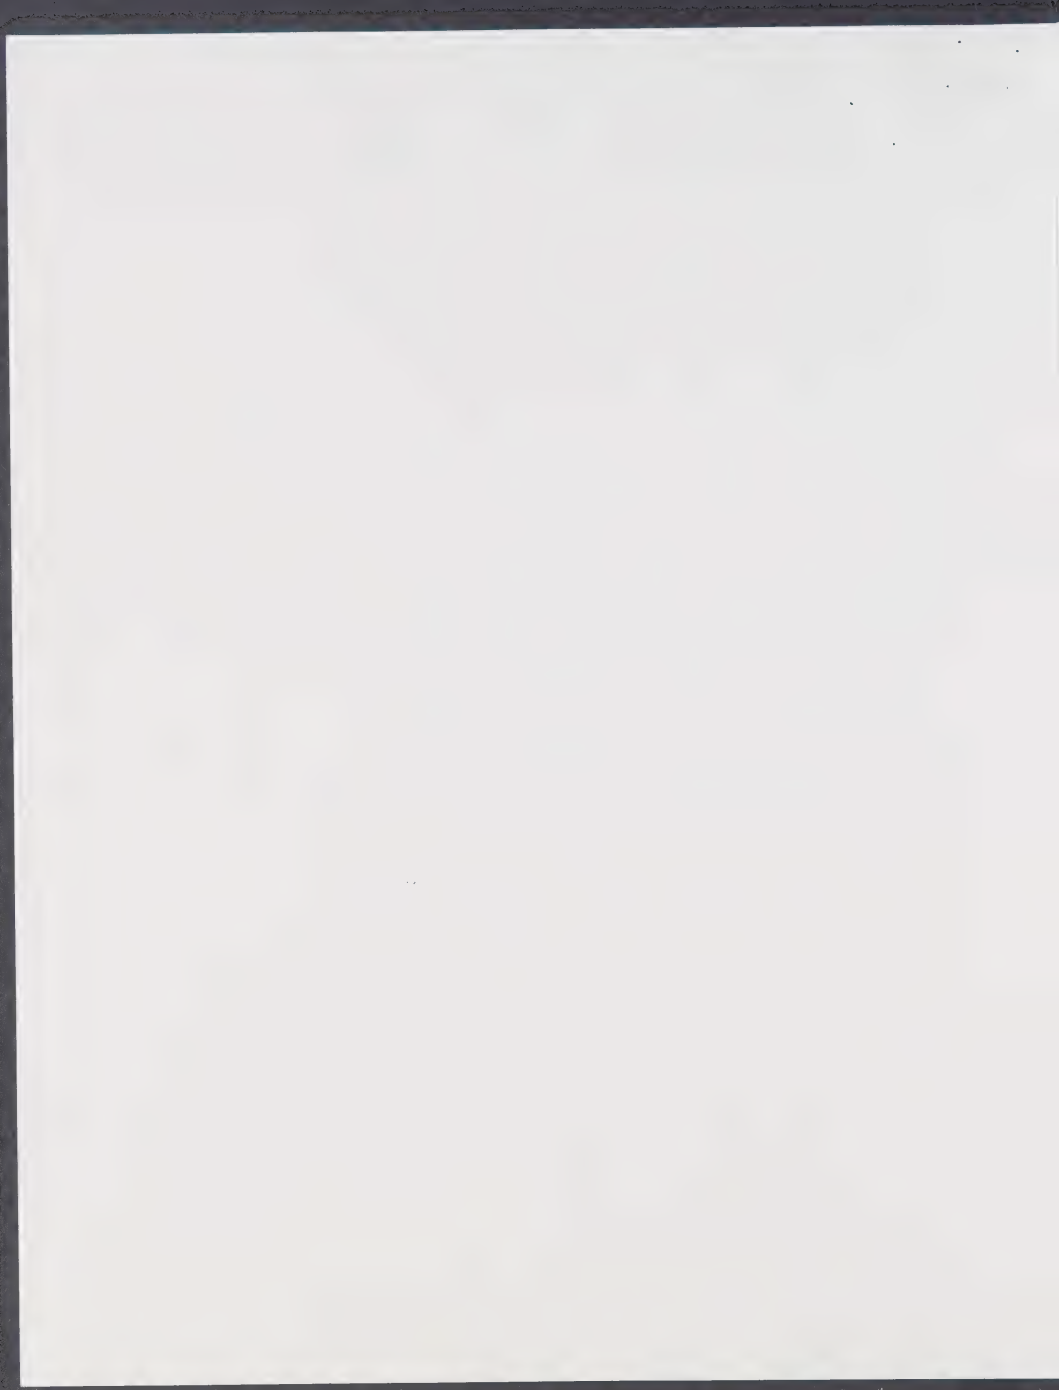

Any suggestions about the Court House would hinge on what use Queen's might have for this fine old building. Renovation would be costly if major changes are required. The Provincial Government has a Heritage Program in place but I have never had reason to investigate it. This program deals with preserving old historical buildings and the Court House should fit their criteria.

I will send you by post some information on the Science '44 Fortieth Year Fund which, I think embodies a lot of my personal thinking on giving to the university. Initially our fund was a Class Fund, these funds because of economic conditions were, at the discretion of the faculty used to replace laboratory ware, etc. They were not self sustaining so that once used they were gone leaving only a plaque acknowledging a gift.

At the time I took over guidance of the fund there was a movement afoot by some of the university hierarchy that because the Science alumni so strongly supported their faculty they did not "require" as much from the shrinking university funds for their operating needs.

Following many discussions with Dean Bacon we decided that the Science '44 Fortieth Year Fund should be self sustaining could only be used for special projects that enhanced the faculty's ability to provide world class engineering education. It could not be used to reduce the operating budget of the Faculty.

We set the target at One Million Dollars knowing full well that the sum could never be met by annual donations from the class members. There are about eighty-five of us left. We therefore have been advocating that we and our friends leave something to the faculty in our wills and for those who want to leave something but are concerned about having enough left to see them through this life, they consider the Charitable Annuity. These annuities become very attractive when one becomes older because the income from the annuity can be free of income taxes. To date we have sold some \$60,000. and I am hoping this will increase because the class is approaching the witching age when the tax provisions become 100%.

- 3 -

Dean Hammacher says our fund has now allowed the faculty to "think big" and plan ahead knowing that any project undertaken using the Fund can be successfully financed on an on-going basis. He has decided he will not use the fund until it becomes significantly larger so that larger sized projects may be considered.

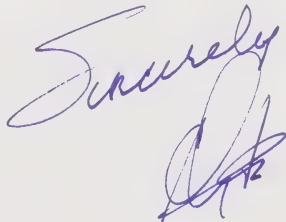

Next year (1994) is our fiftieth reunion and I hope we will be able to have or predict we are half way there.

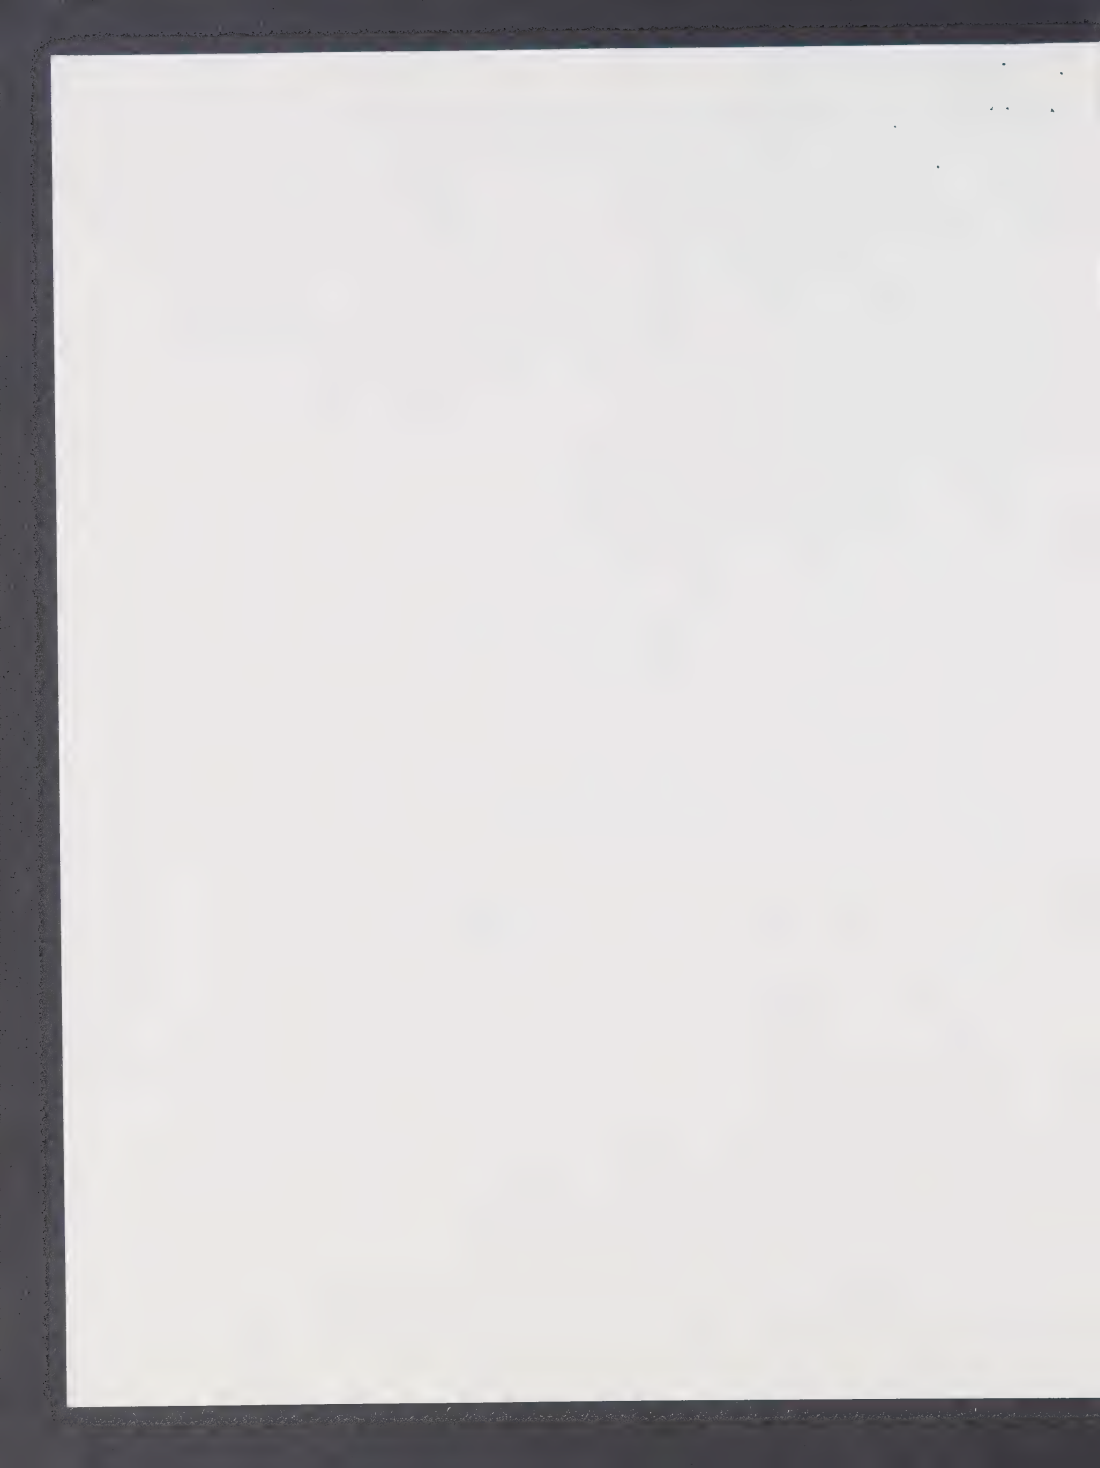

The fund has become my "hobby horse". The Co-Op still operates as a self supporting rooming and boarding facility for students and I am hoping the Fund will be a self supporting Foundation to allow Queen's to maintain a leading edge in engineering education.

I look forward to the possibility we may be able to spend a few of days together in the Tri-Town area next summer.

Kindest regards to you and Isabel.

ab1193

QUEEN'S UNIVERSITY
SCIENCE '44 FORTIETH YEAR FUND

1) Objective

The Science '44 Fortieth Year Fund is established by the graduates and friends of the class of Science '44 of Queen's University as a discretionary fund for the use of the Faculty of Applied Science. The purpose of the Fund is to supplement the operating budget normally available by the University to the Faculty of Applied Science and it is not intended nor is it desired that this Fund or the income it generates, will have the effect of reducing the operating budget of the Faculty.

2) The Fund

The Science '44 Fortieth Year Fund is an endowment to be administered in perpetuity by Queen's University for the sole good of the Faculty of Applied Science and in accordance with the requirements as set forth in this document.

3) Source of Moneys for the Fund

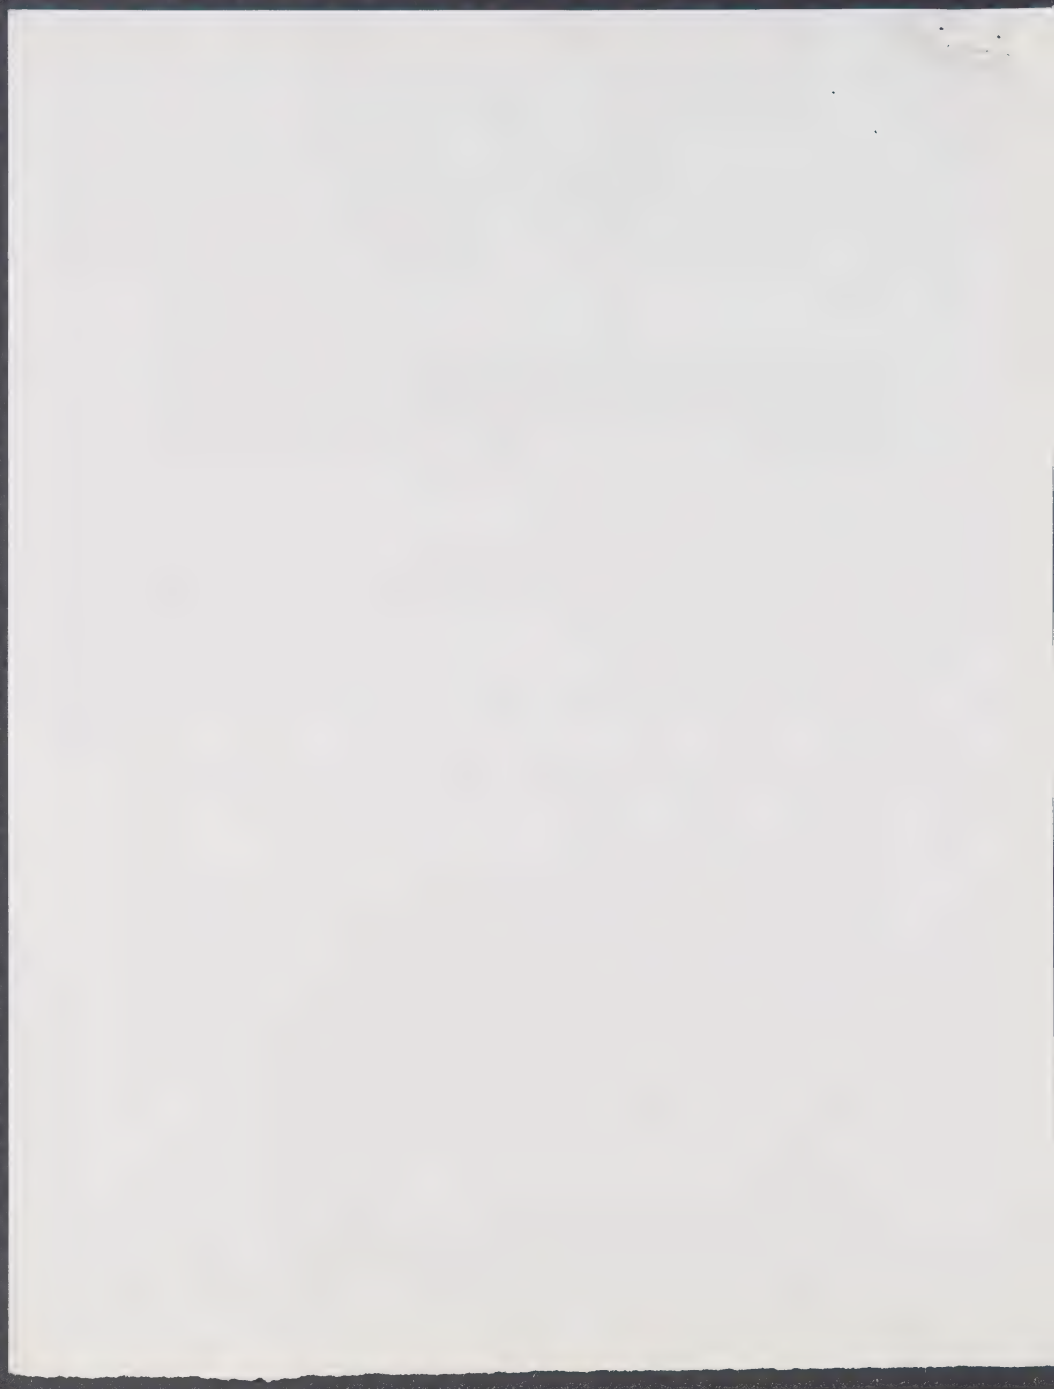

- i) Gifts, bequests, annuities and other contributions to Queen's University specifically to the Science '44 Fortieth Year Fund.
- ii) Interest, capital gains and other investment income which is applied to the Fund as a result of the investment experience of the Fund as managed by the University.

4) Financial Management of the Endowment

The Financial management of the Fund shall be governed by the policies of the University as approved by the Board of Trustees. It is the intention of the class that the purchasing power of the endowment be protected from inflation by returning a portion of the earned income each year for investment in the endowment fund. The remainder of the earned income as determined by the Board, shall be made available to the Dean of the Faculty of Applied Science for expenditure at his discretion. It is the wish of the class that all earned income be returned to the endowment and each time the amount of the endowment reaches a value of \$100,000 at which time expenditures may be made from the Fund as set forth below. If in the judgment of the Dean it should become necessary to retain the remainder of the earned income in any given year to an endowment to increase the value of the Fund, the Dean is empowered to take such action.

5) Uses of the Fund

The expenditure of moneys from the Fund will be controlled by the Dean of the Faculty of Applied Science, within those general policies which have been established by the University and in accordance with the wishes of the Class of Science '44. These wishes have been set out in the terms and conditions attached to the creation of the Fund and

on the advice of the Associate Deans and Heads of Department offering Engineering programs who are expected to provide the Dean with a priority assessment of the needs of the Faculty. Moneys from the Fund are to be considered discretionary in that they can be allocated by the Dean without reservation with due consideration to provision for advice as noted above and upon consultation, as noted below.

6) **Reporting**

The Dean shall provide a report annually to the members of the class of Science '44, as long as there are surviving members and to the Heads of Departments offering engineering programs on the expenditures from the Fund.

7) **Amendment of Terms**

It is recognized that with the passage of time changing conditions may render it difficult or impossible for the Science '44 Endowment Fund to be used strictly in accordance with the wishes of the Class of '44 (as those wishes have been set out in the terms and conditions attached to the creation of the fund). In any case where it appears that funds from the Science '44 Endowment Fund cannot be used strictly in accordance with the original wishes of the Class of '44, the Board of Trustees of the University shall, in consultation with the Dean and representatives of the Class of '44, have the authority to use resources from the endowment fund for purposes which they consider, acting reasonable and in good faith, to be consistent with the wishes of the Class of '44.

**SCIENCE '44 FORTIETH YEAR FUND
A MILLION DOLLAR GOAL**

Dear *Alfred:*

This letter was sent to Sc '45 members of the C-57 as well as Seive.

As we approach our 50th anniversary year I have had correspondence with Dean Hammacher and others about the Sc '44 Fortieth Year Fund. In a letter just received from the Dean, which I would like to share with you he again expresses his admiration and support for the type of endowment that Science '44 has pioneered. Some four or five other years have based their negotiated agreements with the university on our text.

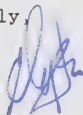

Our fund now has an estimated market value of over \$180,000. of which \$60,000. is in Charitable Annuities. These annuities are still available and pay you 8% per annum. Your income from the annuity, depending on age can be tax free and you may also be eligible for a tax credit. You can get the latest details on annuities and bequests from Dr. Ed. Pearce by phoning Ed. at 1-800-267-7837, the Queen's University Department of Development.

We have averaged about twenty-five contributors each year plus one or two corporate supporters. Those of us who have chosen to support other funds or have not participated in our endowment but would like to support it in our Fiftieth Year still have time to make a contribution in the 1993 taxation year. The purchase of a Charitable Annuity also gives you an income for life. Early in a 1994 I hope to mail our regular letter bringing you the up to date information before our Fiftieth Reunion in October 1994.

We are survivors (see over) and a reason we have survived and prospered is the the sound education we received as engineers at Queen's. Let's celebrate by returning something to the Faculty that started us on our way. A Charitable Annuity allows you, or your spouse a source of tax free income for life.

See you all in 1994,

Sincerely,

BE SURE TO MAKE ALL CHEQUES PAYABLE TO:

QUEEN'S UNIVERSITY - SCIENCE '44 FORTIETH YEAR FUND

THE CLASS OF SCIENCE '44

WE ARE SURVIVORS!

We were before television, penicillin, polio shots, frozen foods Xerox, contact lenses, frisbees and the PILL.

We were before radar, credit cards, split atoms, laser beams and ball-point pens; before pantyhose, dishwashers, clothes dryers, electric blankets, air conditioners, drip dry clothing - AND before man walked on the moon!

We got married first and THEN lived together. How quaint can you be? In our times, closets were for clothes, not for "coming out of." Bunnies were small rabbits - and rabbits were not Volkswagons. Designer Jeans were scheming girls, and having a meaningful relationship meant getting along well with our cousins. We thought fast food was what you ate during Lent, and outer Space was the back of the local theater.

We were before house-husbands, gay rights, computer dating, dual careers and commuter marriages. We were before day care centers, group therapy and nursing homes. We never heard of FM radio, tape decks, electric typewriters, artificial hearts, word processors, yogurt, and guys wearing earrings. For us,, time sharing meant togetherness, a "chip" meant a piece of wood, hardware meant hardware, and software wasn't even a word!

In 1940 "Made in Japan" meant Junk and the term "making out" referred to how you did on an exam. Pizzas, "McDonalds" and instant coffee were unheard of.

We hit the scene when there were 5 and 10 cent stores where you bought things that were five and ten cents. The corner drug store sold ice cream cones for a nickel or a dime. For one nickel you would ride a street car - make a phone call - buy a pepsi - or enough stamps to mail one letter and two postcards! You could buy a new Chevy coupe for \$800.00, but who could afford one? A pity too, because gas was only 11 cents a gallon!

In our day, cigarette smoking was fashionable, GRASS was mowed, COKE was a cold drink, and POT was something you cooked in, ROCK MUSIC was Grandma's lullaby and AIDS were helpers.

We were certainly not before the difference between the sexes was discovered, but we were surely before the SEX CHANGE, we made do with what we had. And we were the last generation that was so dumb as to think you needed a husband to have a baby!

ANON

**BUT WE SURVIVED!!
WHAT BETTER REASON TO CELEBRATE!!!**

FAX (613) 545-6500

October, 1993

Mr. Clyde Lendrum
P.O. Box 70
King City, Ontario
L0G 1K0

Dear Clyde:

I am writing to express, once again, my personal appreciation for your tireless efforts, and the generosity of the class of Science '44 in raising the level of the Science '44 Fund to new heights.

When the class fund was established none of us could have predicted the extent of support from class members that would follow. In those early days, few donations were targeted to class funds. With the exception of scholarship and award funds, most donations were deposited to a discretionary fund under the Dean's control. The practice of the Faculty at the time was to spend donations from engineering alumni to meet the immediate and critical needs of the Faculty, such as equipment for the undergraduate laboratories.

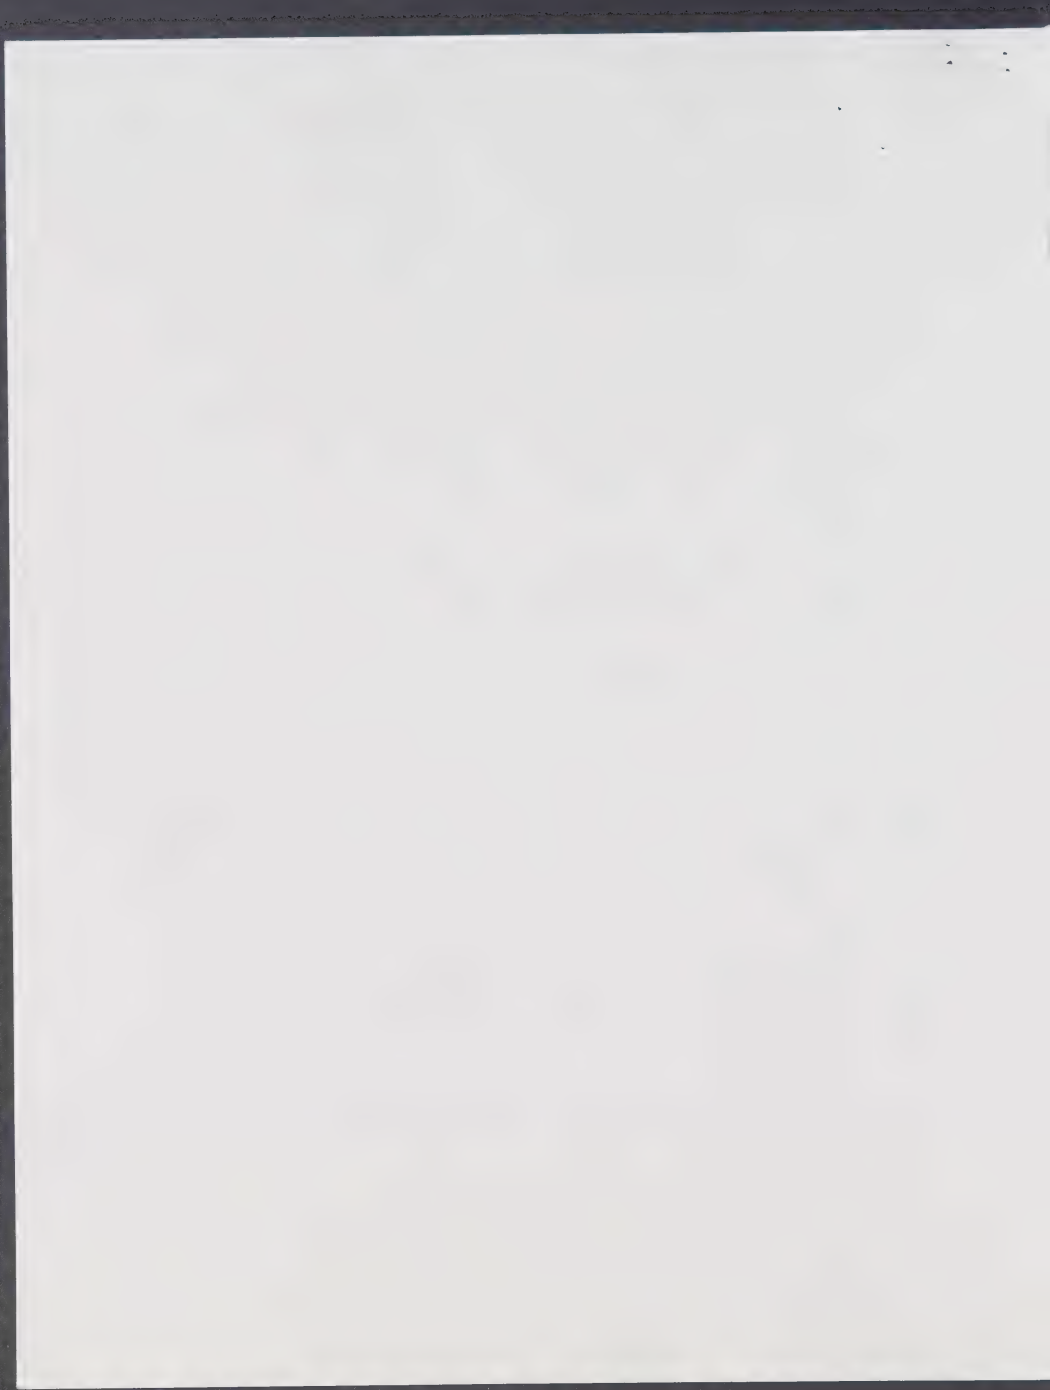

It was the far reaching vision of the class of Science '44 which required that donations be allowed to grow in an endowment to a level where the Faculty could begin to make long term plans for its future by calling upon the income from the fund. Put another way we were able to "think big". It seems to be in the tradition of class members to lay the foundation for endeavours, such as the Science '44 Cooperative, which stand the test of time by continuing to grow and flourish.

Today, on the strength and promise of the Science '44 Fund, we are able to contemplate initiatives, such as planned laboratory and curriculum renewal, which just ten years ago would have been beyond our means. As the class of Science '44 approaches its 50th anniversary it can look with justifiable pride to the enviable record of support it has generated through the Science '44 Fund. It has amply demonstrated how much can be accomplished in such short time through the commitment of its members.

On the occasion of your next letter to the class, I hope you will convey my kindest regards and deep appreciation for the support of those who contributed to the Fund.

Yours sincerely,

V. Carl Hamacher, P.Eng.
Dean
Faculty of Applied Science

July 1993

Dear Classmate:

Just a brief up-date on the progress of our Science '44 Fortieth Year Fund. In my last letter I asked "who would make it \$200,000". We are coming close. In April 1992 our fund had a Current Market Value of \$83,606 plus \$35,000 in Annuities and Bequests for a total of \$118,606. **On April 30, 1993 the current market value was \$104,675 and annuities of \$60,000 for a total of \$164,675 an increase of \$46,069. As of June 30 the book value is in excess of \$96,373, and the estimated market value of the fund in excess of \$170,000.** There have been no disbursements.

The recent province of Ontario austerity budget and the "Social Contract" legislation have once again squeezed Ontario universities. The need for the Science '44 Fortieth Year Fund is more critical than ever. Although the fund cannot be used to supplement the operating budget of the Faculty (93% of which is salaries), it can be used in a variety of ways, e.g. the purchase of laboratory equipment, to enrich the learning environment for Queen's engineering students.

For those of us who wish to return something to our university and faculty we should consider the tax advantage one gets from taking out a Charitable Annuity. The rate of return is still 8% and for most of us it will be a tax free income, plus a possible tax credit. You can call Ed Pearce toll free at 1-800-~~361-5764~~ **267-7837** for the latest rates and information.

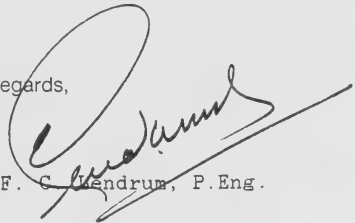

In conversation with Ed he reports that there is increased interest in annuities and also in estate planning because there are some who prefer to leave a bequest in their will. I do not have information regarding bequests. Any of us considering a bequest may call Ed for advice. **Just be sure the bequest is dedicated to Queen's University Science '44 Fortieth Year Fund.**

..12.

This year is the 100th anniversary of the Science Faculty. At the Grant Hall dinner Professor Richardson reviewed the accomplishments of Queen's Science Faculty's first 100 years. He mentioned that the start of men's student housing was the Science '44 Co-op. All those wishing more information on events celebrating the 100 years of the Science Faculty may call Chuck Campling at (613) 353-6728 until August 31. After that date Chuck will be at (613) 544-1951.

Have a good summer and we may see some of you at homecoming in the fall.

Regards,

F. C. Lendrum, P. Eng.

August 1992.

To all Science '44 Classmates:

The fund continues to grow, as of April 30, the fund stood at \$83,602. plus the annuities which remain at \$35,000. For your information I include the Faculty's Statement of Account.

There is still a lot of talk about our fund, its million dollar objective and the fact its purpose is to enhance the Faculty and cannot be used for ordinary operating expenses. There is no doubt that the Fund will get to the million dollars the way it is structured, the question is when? Last year we had two employers double donations. There may well be other bequests, etc. about which we have not heard. Any and all suggestions for bringing the date, we make the million forward will be appreciated.

At the Grant Hall Society dinner Michael Davies, President of the GHS spoke on annuities and I would like to quote a some excerpts from a brief he has written:

"The charitable annuity is a relatively new charitable financial instrument which provides a tax incentive. It is an ideal vehicle for anyone who has considered or even committed to a bequest by moving a bequest commitment ahead through the purchase of a charitable annuity, significant tax benefits are possible depending on the age of the contributor.

"The concept of the charitable annuity is to preserve the capital for use of the beneficiary at some time in the future, while the annuitant receives a measure of tax free income, which can be as high as 100% during his or her lifetime.

"...If we use the annuity rate of 8.5% and apply it it to a younger male purchaser, we find that at age 74, the immediate tax receipt disappears but the annual income continues to be tax free. At age 70 our friend would have no immediate tax receipt, and although he would be taxable on about 20% of his annuity, the tax free portion would save him "x dollars for the rest of his life."

Ed. Pearce designed a simplified set of instructions and an application form for a Charitable Annuity. I have reproduced Ed's work and attached it to our news letter update for your convenience. Just be sure to make out all cheques to:

GIFT ANNUITY PLAN

- THE PROCESS -

1. Kindly fill out the Annuity Application.
2. Attach a cheque post-dated to the 1st day of the month that the annuity is to begin. Make cheque payable to:
QUEEN'S UNIVERSITY - SCIENCE '44 FORTIETH YEAR FUND
3. Attach a cheque marked VOID on the account into which monthly annuity payments are to be made.
4. Attach photocopy of birth certificate(s).
5. Upon receipt of the above material, an annuity contract will be mailed in duplicate for signature.
6. Return both copies to the Development Office to be signed by the University.
7. One endorsed copy of the contract will be returned to the annuitant(s) for filing.
8. Monthly payments will be placed in the annuitant(s) bank account on the last working day of each month.
9. Forward all documents to:

TO: Mr. Clyde Lendrum
FAX 905 833 3751

Dear Clyde,

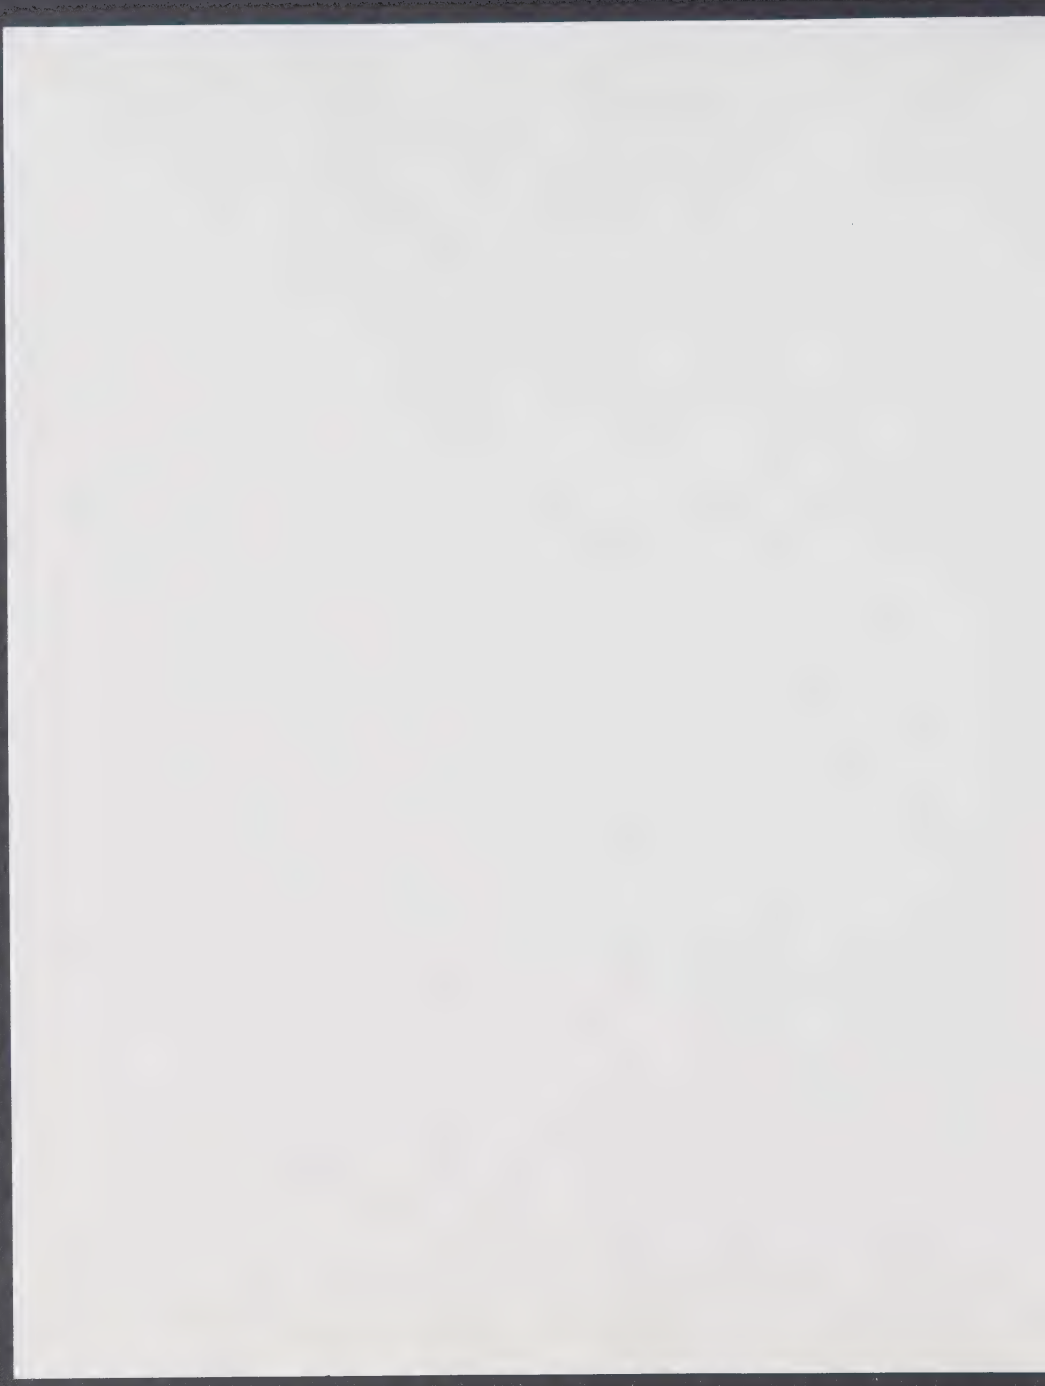

It is so good to have your fax of October 14th on my return from the east. The schedule of my Thursday afternoon at the Chemistry Department is attached; after that, there is a reception of Queen's graduates as described on the other enclosure.

Could you and David Moyer meet us perhaps on Thursday morning or on Friday morning, for coffee?

We are planning to stay with Mrs. Eva Kushner, the President of Victoria College (Isabel's alma mater). We plan to arrive there from Queen's later on Wednesday afternoon, and here address is 63 Albany Avenue, telephone 416 538 0173.

Best wishes,

Our always welcome letter arrived this morning. It is not here to
be said you I had lunch with David Hays and he seems to be
getting over well. We also visited his wife's office, through we
were at the office with her husband and David and David's wife
too. The house is full of excitement his wife.

I had not heard from his wife, though I had called a number of
times. On arrival of your letter I called again and this time he
was home. I told him of your impending visit. He is going to get
in touch.

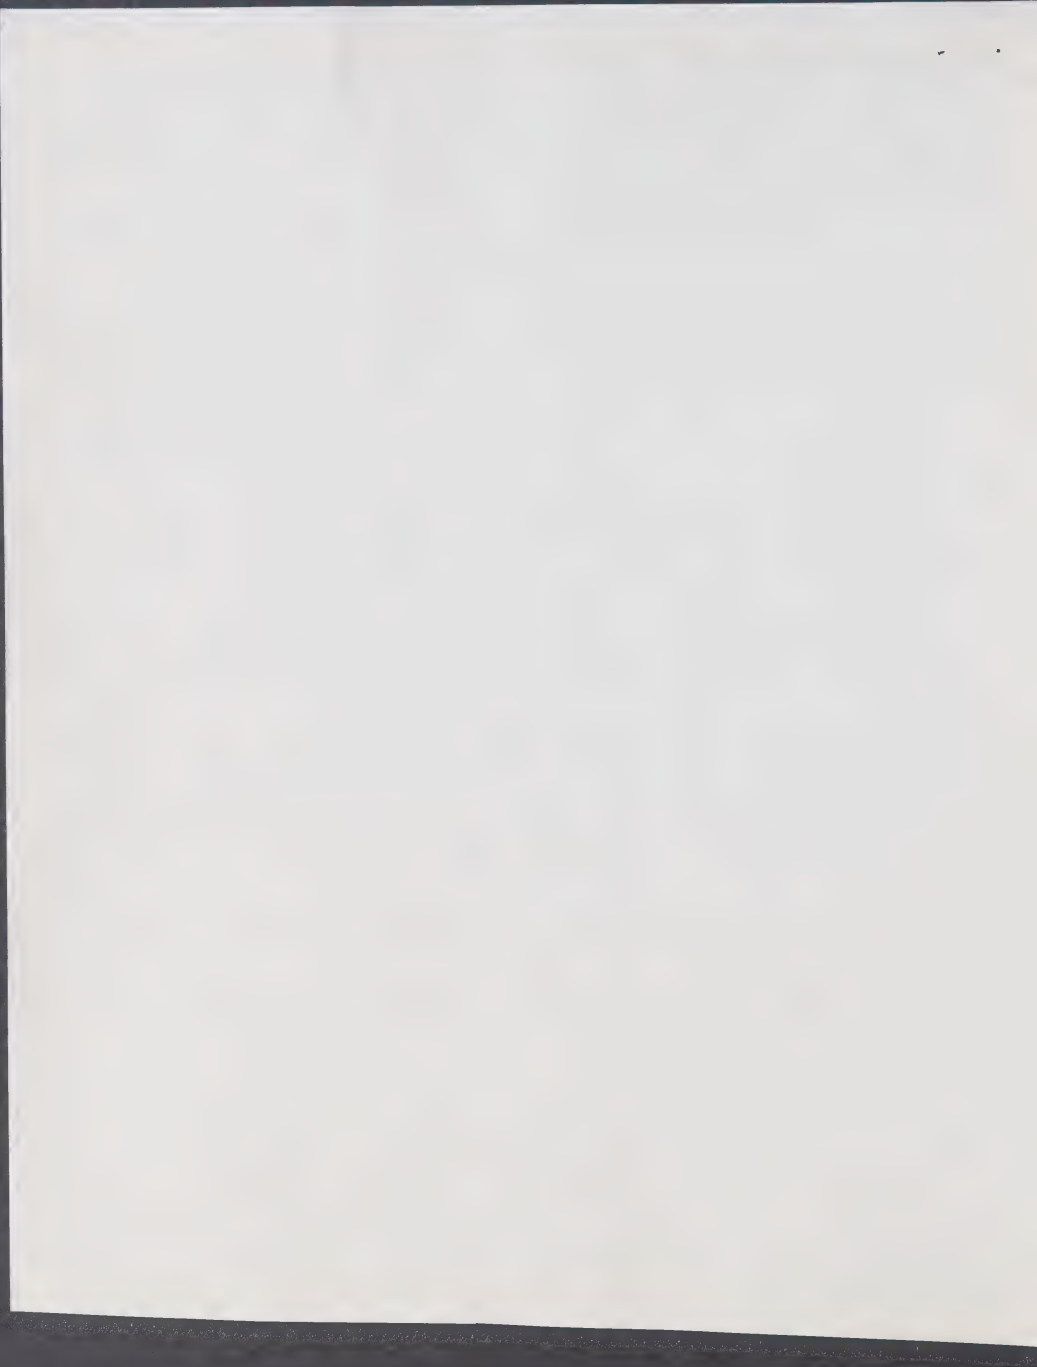

I probably will not be able to attend your lecture, though I
enjoyed the lecture you had. Possibly you will have to
meet for dinner after your lecture on November 4th. If so, I
suggest the Hotel York Hotel as a suitable place. Both David and I
can get there by subway and you will not be far from the
R. T. We will see a time after you arrive but please have
telephone number for a new area code 914. If in the evening I do
not have I would be at 914 712 1991.

I am up to New York on the Independence Weekend. We
will be in the city on the Independence of 1776. If
you are in the city on the Independence of 1776.

In an attempt to reach some time I will be in the city
and will be in the city and will be in the city.

Yours sincerely,

October 14, 1993.

Dear Alfred:

Your always welcome letter arrive this morning. I am not sure if I told you I had lunch with David Moyer and he seems to be settling down well. We then visited his home and he showed me some of his writing which he hoped to get typed and send you a copy. The house is full of memories of his wife.

I had not heard from him since, though I had called a number of times. On arrival of your letter I called again and this time he was home. I told him of your impending visit. He is going to get in touch.

I probably will not be able to attend your lecture, though I enjoyed the outline you sent. Possibly you, David and I could meet for dinner after your lecture on November 4th. If so I suggest the Royal York Hotel as a central place. Both David and I can get there by subway and you will not be too far away at the U of T. We can set a time after you arrive but please note my telephone number has a new area code **905**. If in the evening I am not home I usually am at (905) 773 5994.

I was up in New Liskeard over the Thanksgiving week-end. My brother and I went back to the Haileybury School of Mines from where we both graduated many years ago.

In an attempt to save some time I will FAX this to the number on your letter head and mail a hard copy to your home address.

Kindest regards,

F. Clyde Lendrum

Dear Clyde:

I am writing to express, once again, my personal appreciation for your tireless efforts, and the generosity of the class of Science '44 in raising the level of the Science '44 Fund to new heights.

When the class fund was established none of us could have predicted the extent of support from class members that would follow. In those early days, few donations were targeted to class funds. With the exception of scholarship and award funds, most donations were deposited to a discretionary fund under the Dean's control. The practice of the Faculty at the time was to spend donations from engineering alumni to meet the immediate and critical needs of the Faculty, such as equipment for the undergraduate laboratories.

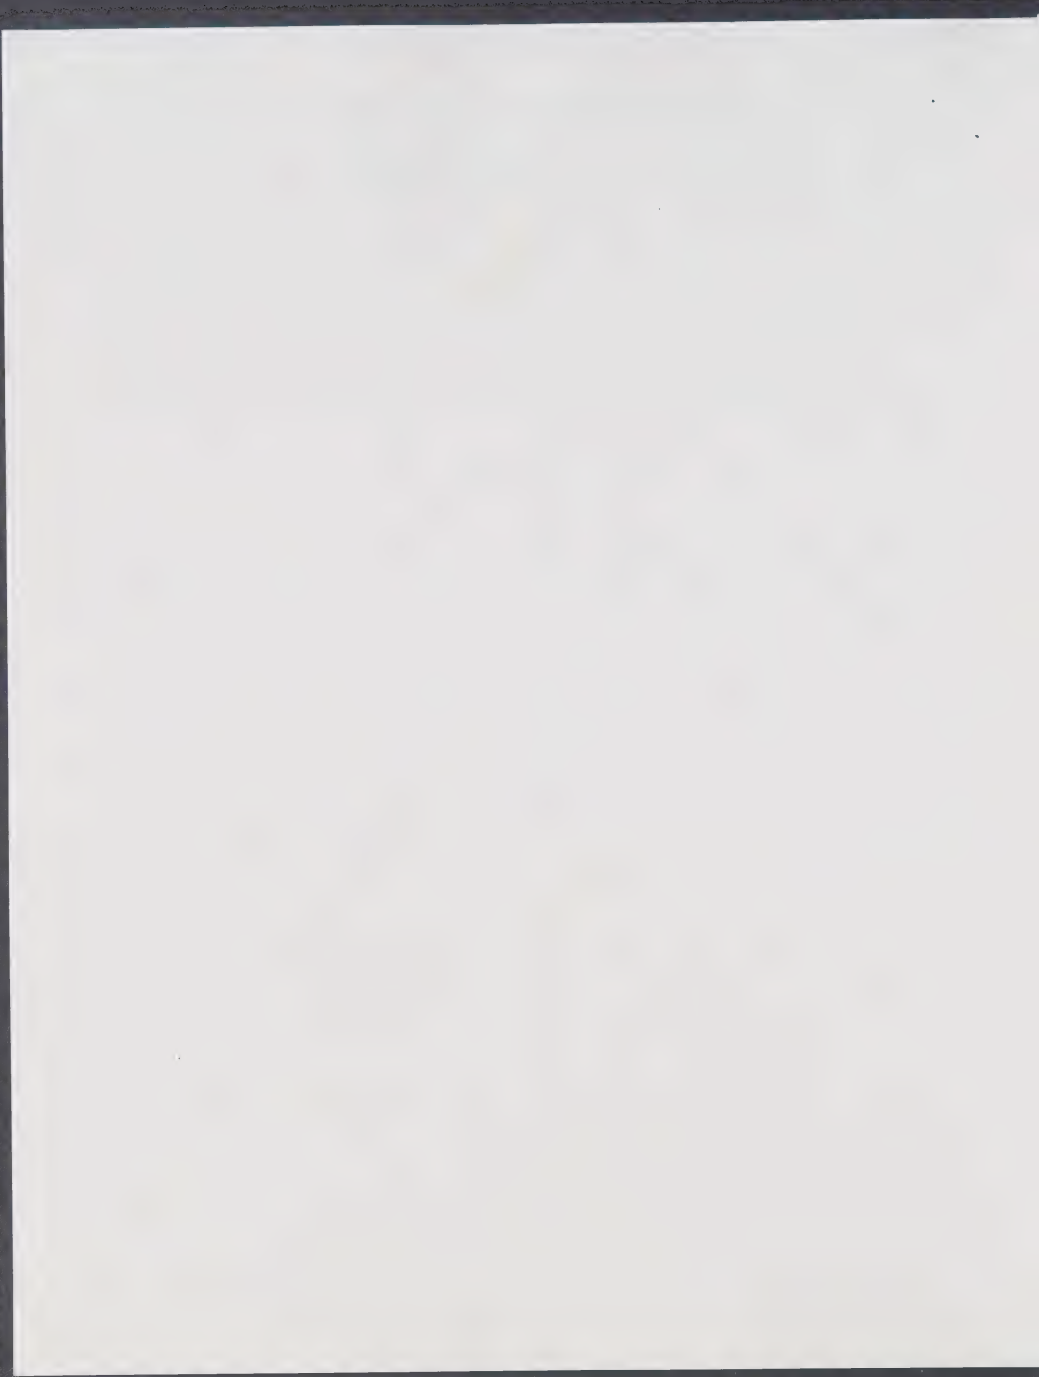

It was the far reaching vision of the class of Science '44 which required that donations be allowed to grow in an endowment to a level where the Faculty could begin to make long term plans for its future by calling upon the income from the fund. Put another way we were able to "think big". It seems to be in the tradition of class members to lay the foundation for endeavours, such as the Science '44 Cooperative, which stand the test of time by continuing to grow and flourish.

Today, on the strength and promise of the Science '44 Fund, we are able to contemplate initiatives, such as planned laboratory and curriculum renewal, which just ten years ago would have been beyond our means. As the class of Science '44 approaches its 50th anniversary it can look with justifiable pride to the enviable record of support it has generated through the Science '44 Fund. It has amply demonstrated how much can be accomplished in such short time through the commitment of its members.

On the occasion of your next letter to the class, I hope you will convey my kindest regards and deep appreciation for the support of those who contributed to the Fund.

Yours sincerely,

V. Carl Hamacher, P.Eng.
Dean
Faculty of Applied Science

Dear Clyde:

Isabel and I look forward to being in Toronto from Wednesday afternoon, November 3rd, until Friday afternoon, November 5th, when we return to Milwaukee on Northwest Flight 1197 departing at 7:35 p.m.

I have been invited to give a lecture in the Chemistry Department of the University of Toronto at 3:00 p.m. on Thursday the 4th. Might you be able to attend? Actually, it is not a talk about complicated chemistry, but very much a detective story about Josef Loschmidt and Kekulé. The enclosed paper is an outline.

I haven't heard a word from David Moyer. Have you? Is there any way that all of us could get together in November?

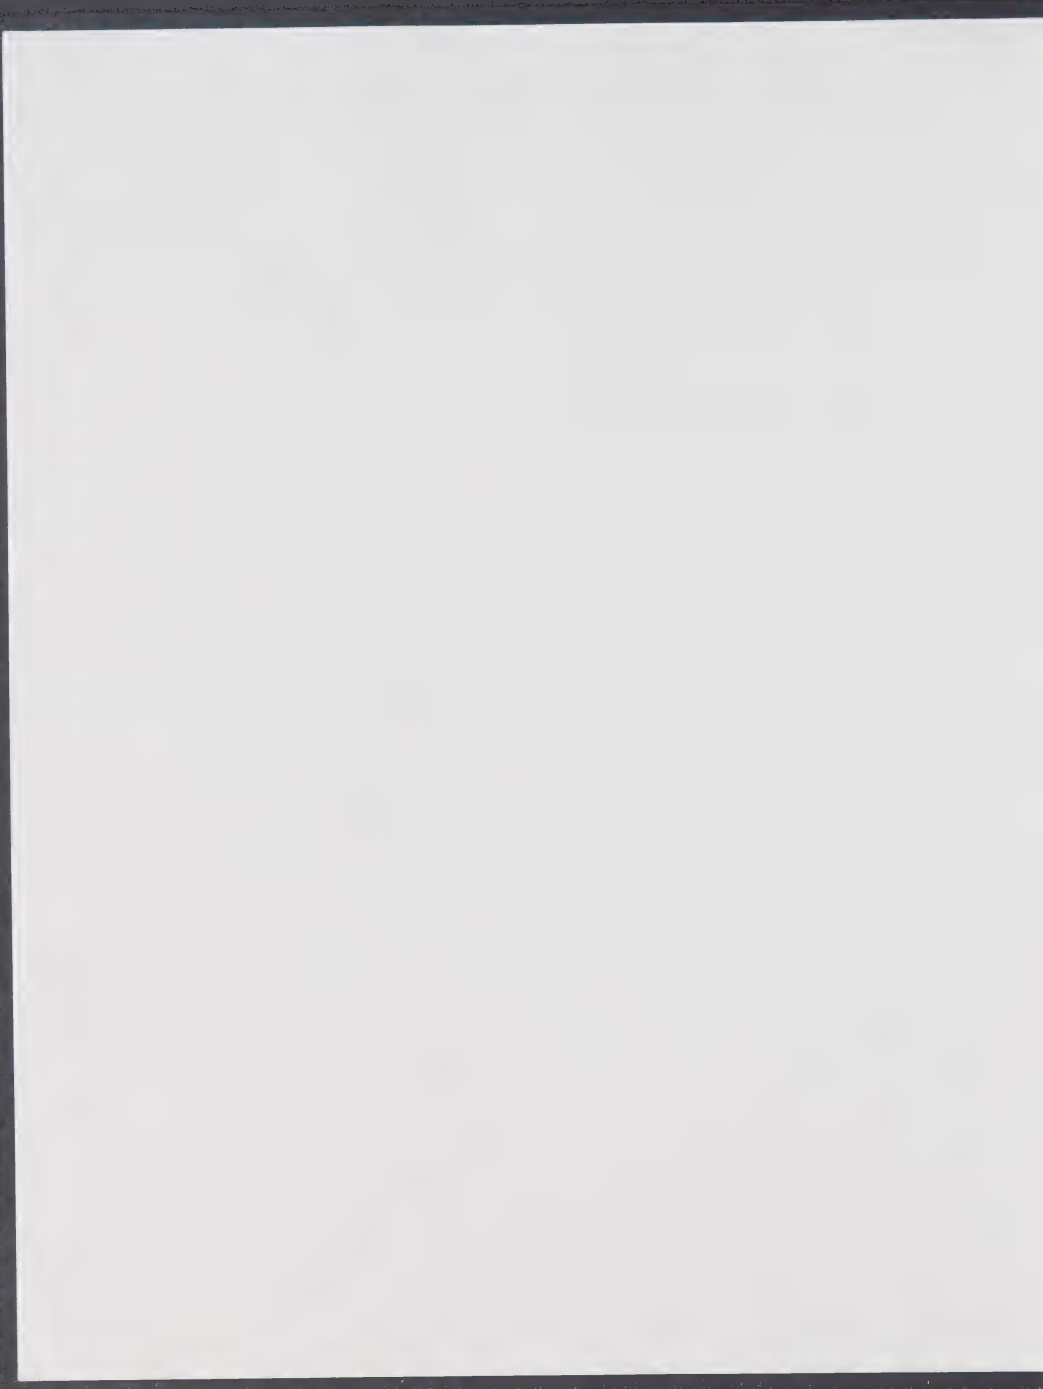

We have now made plans to be in Kirkland Lake the week of July 1, 1994, and will be looking for paintings by Ernest Sawford-Dye at that time.

Best regards.

As always,

Enclosure

Dear Clyde:

Thank you so much for your kind letter of August 26th, which came here miraculously quickly. Usually mail from Canada takes one to two weeks.

Please don't think for a moment that Isabel and I have forgotten about Sawford-Dye, but New Liskeard and Kirkland Lake are pretty far away, and we don't get there easily. There will be a reunion next summer, and we plan to attend.

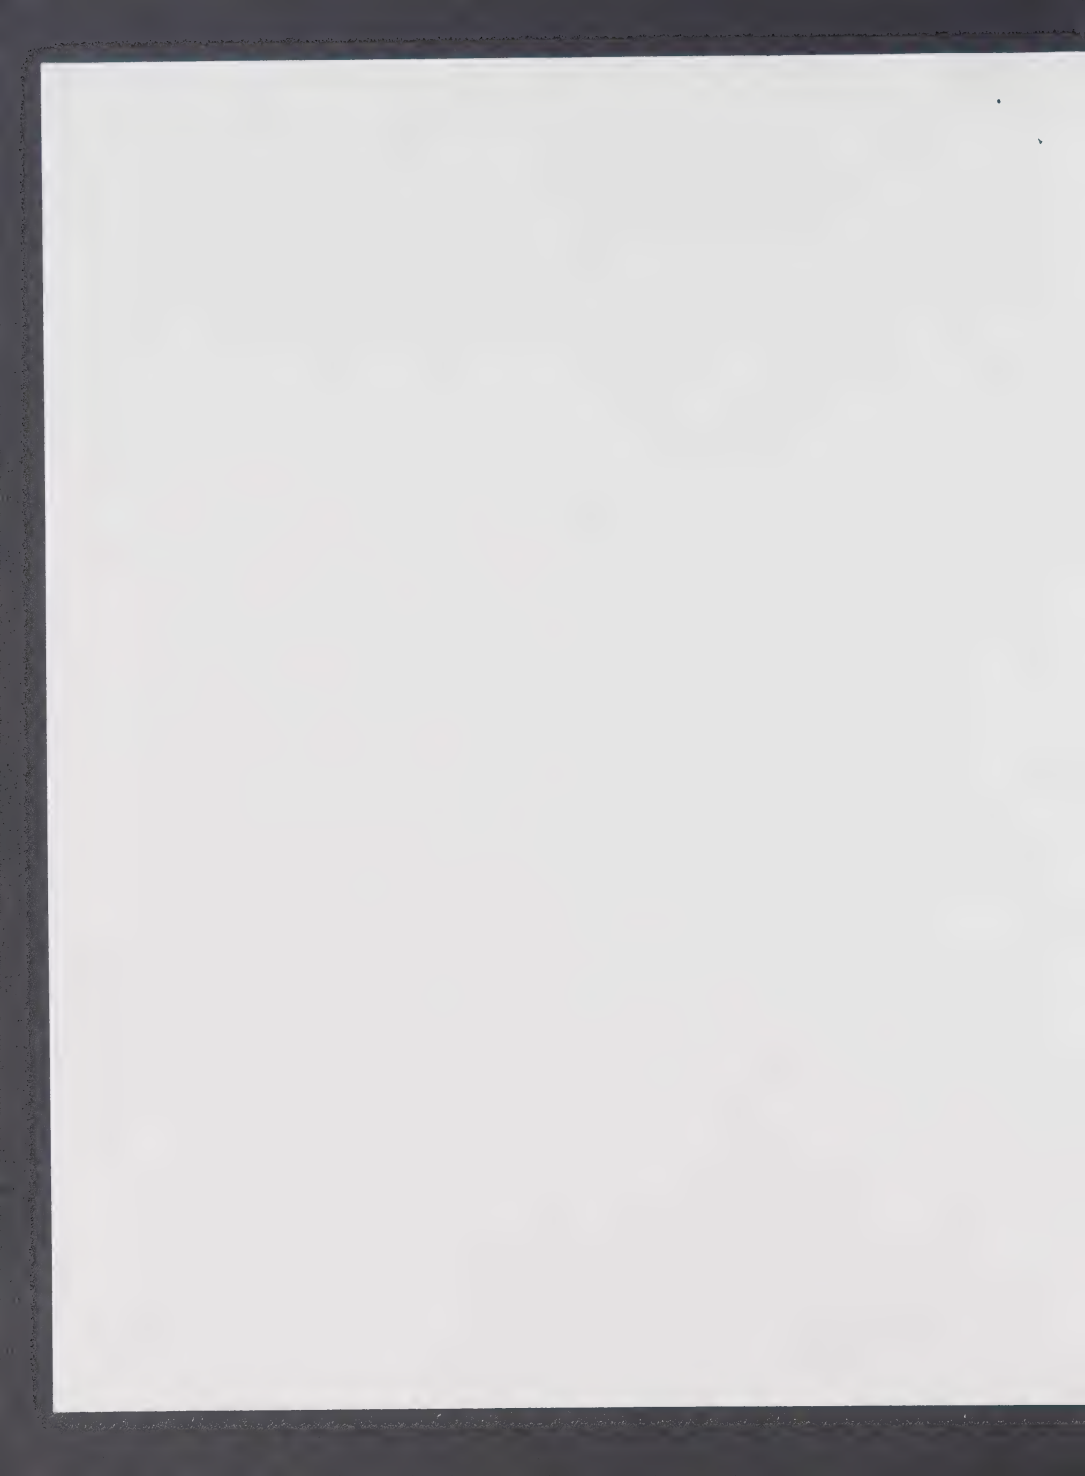

McGill and Concordia Universities have asked me to lecture in Montreal on October 25th and 26th, and we then plan to spend three days in Ottawa, three days in Kingston, and visit Toronto November 3rd and 4th. From there we will then fly to England.

It would give us great pleasure if we could get together with you, and also with David Moyer.

All good wishes.

Sincerely,

By Appointment Only

August 26, 1993.

Dear Alfred:

What a coincidence! Nancy and Ron Hollsworth of New Liskeard were in town over the week-end and were asking if I had heard from you lately. Nancy is Marg Kemp's sister who helped us assemble the information on Sawford-Dye. Then on Monday I received your letter.

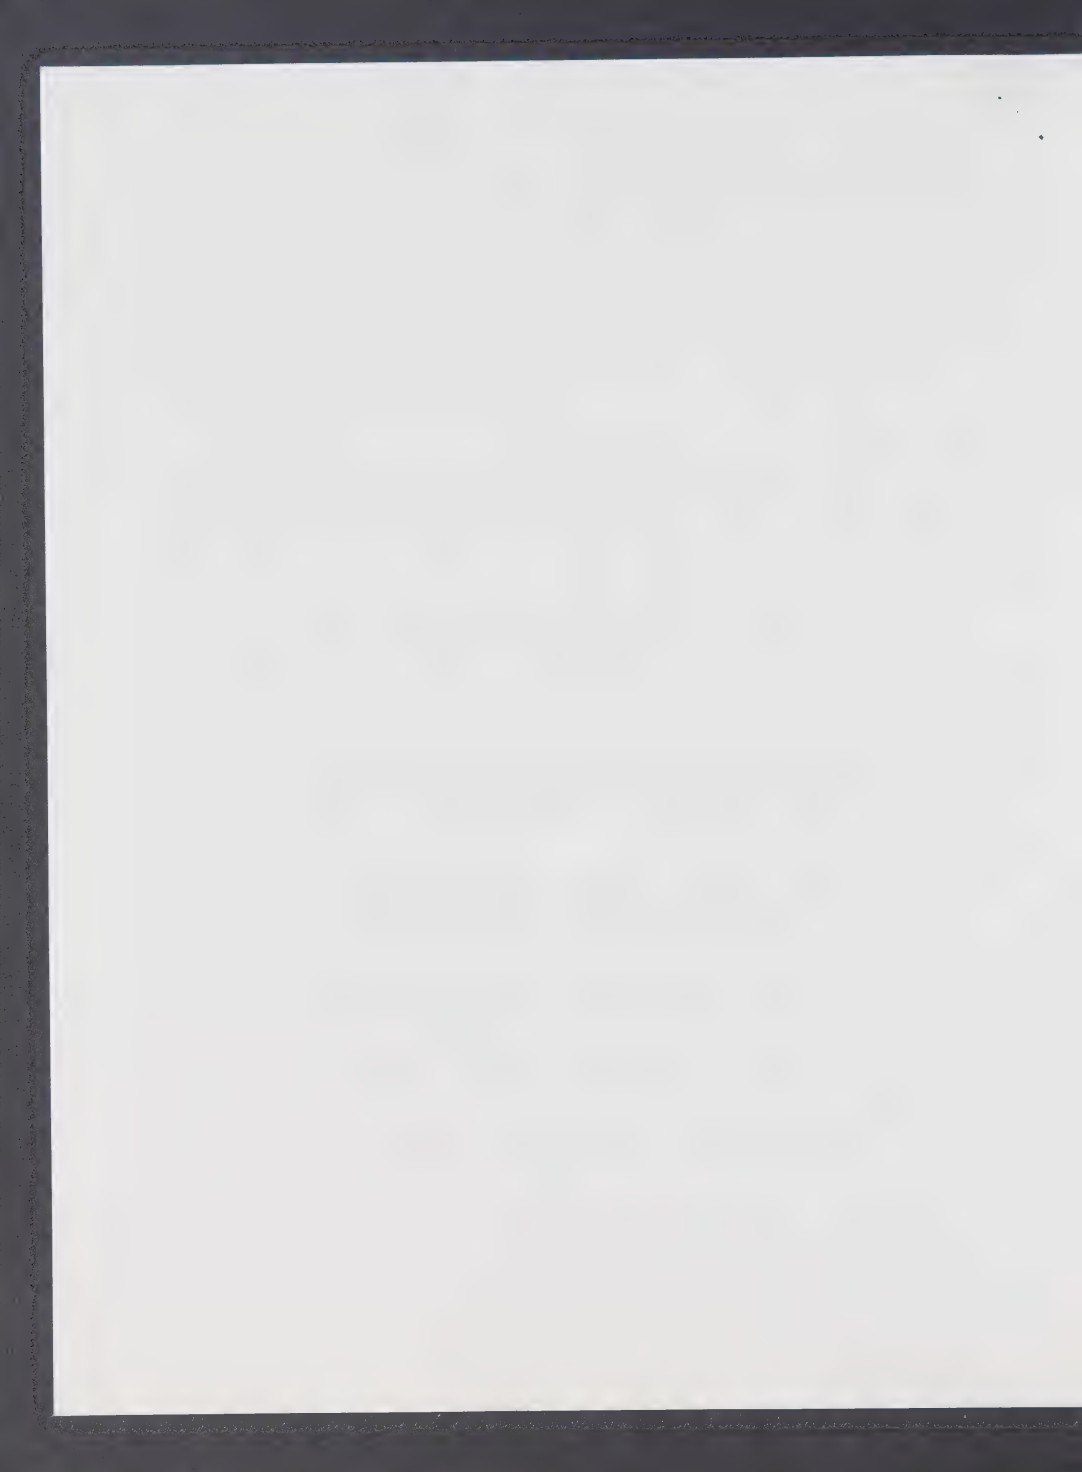

I was sorry to hear of David Moyer's loss. Unless one has gone through the experience it is impossible to understand the deep sense of loneliness that envelopes one. I talked to David for an hour that evening and he seems to have come to terms with the situation and I have promised to go to lunch with him early in September. I will keep in touch.

I had not heard from David for quite some time. We were in constant communication a couple of years ago when Bill Sweet (my old Co-op roomie) died and David who lived near Sweet and kept in close touch. David is a great conversationalist on the telephone. He would do a fine essay on "Jeanie" Royce.

In a time when men were supposed to have dominated the scene Jean Royce was the exception. Dr. McNeil once said that he expected when he got to the pearly gates and met St. Peter, Jean Royce would be standing beside him telling St. Peter who should or should not be allowed into Heaven.

There is not a great deal of news. We are having a great summer weatherwise. I am becoming more retired and at my family's suggestion have started an autobiography of the nearly sixty years I have spent in the mining industry. This plus some work with the Sc '44 Fortieth Year Fund keeps me occupied.

Last spring Marg and I were in Portugal and who did I meet on a Lisbon Street but Doug Lillie. Like us he was on a tour.

- 2 -

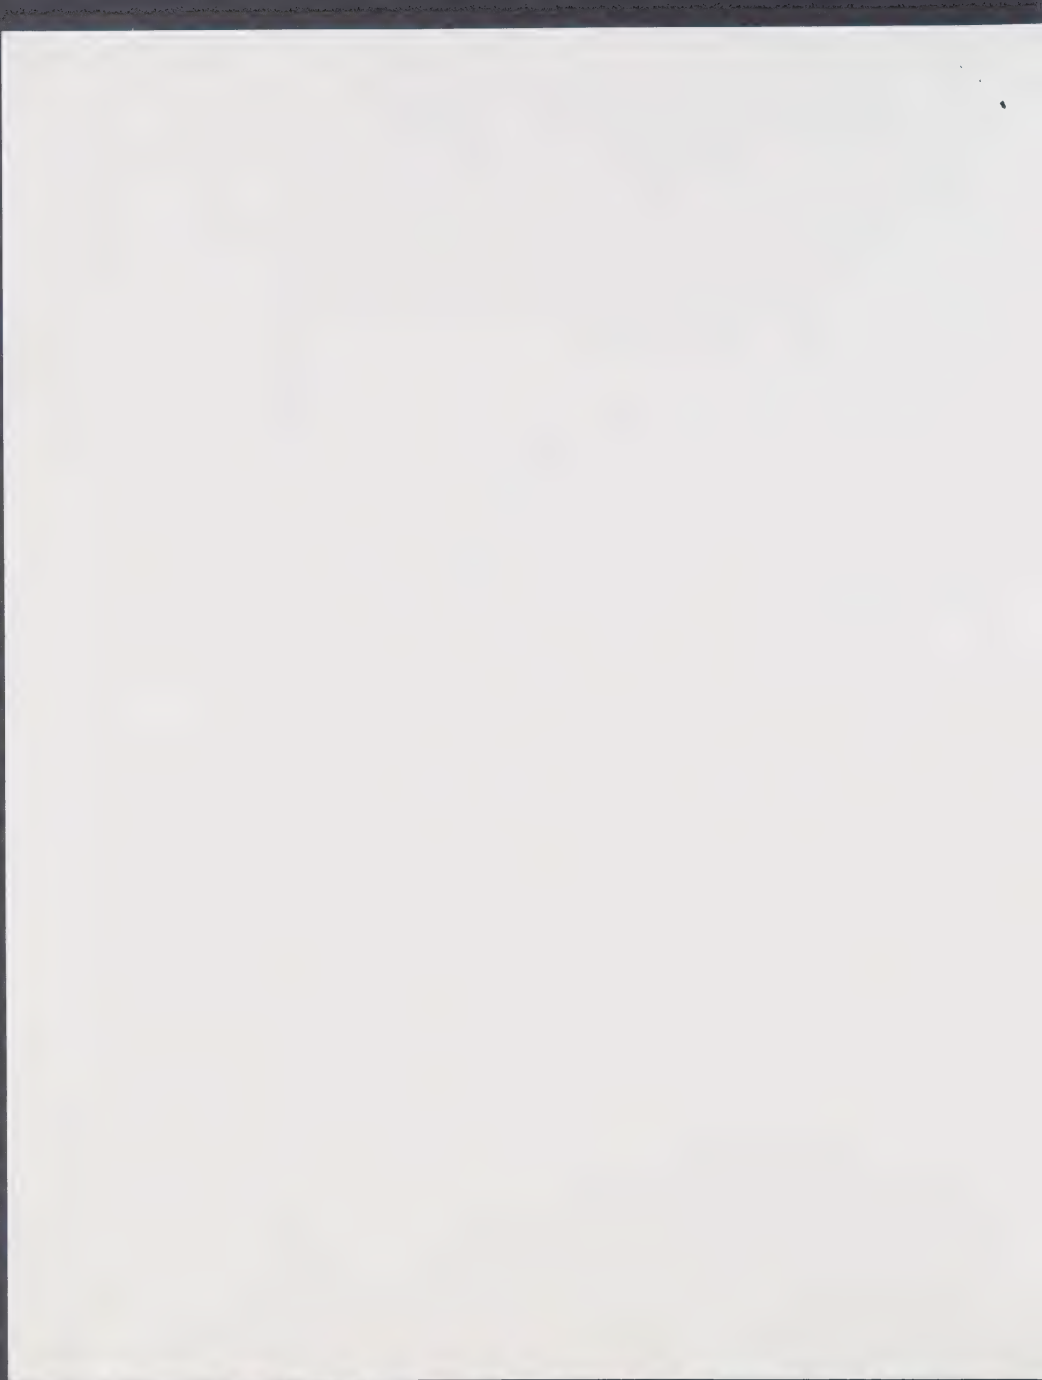

Give my best wishes to Isobel and tell her my brother is coming east in October (colour season) and we just may go back to the Tri-Town for a couple of days.

Let us try and plan a little better so we may have dinner together when you are in Toronto in late October. As one gets older the wisdom of Omar Khayyam becomes more relevant

With kindest regards,

A handwritten signature in blue ink, appearing to read "F. Clyde Lendrum". The signature is stylized and cursive.

Dear Clyde:

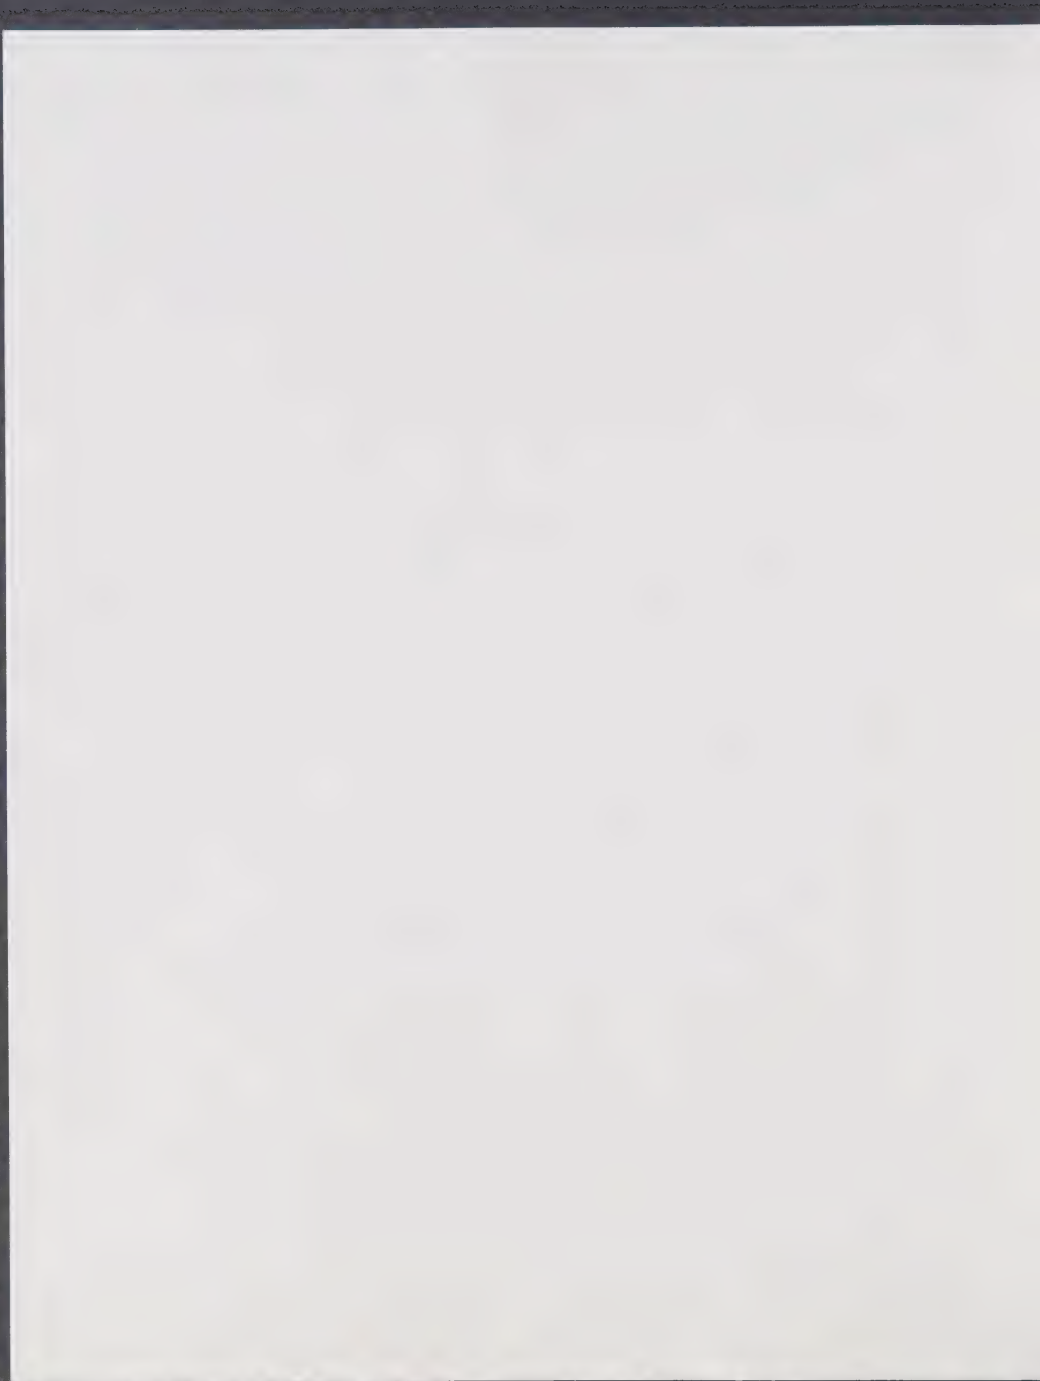

The enclosed correspondence with David Moyer will be self-explanatory.

I find it truly moving that he writes exceedingly well and should really be encouraged to write.

I hope that you don't live too far from David and that you might have a chance to visit with him.

Best wishes,

Enclosure

January 11, 1993.

Dear Alfred and Isabel:

Congratulations on your successful acquisition of the Herstmonceux Estate for Queen's. When we met for coffee last fall you were working on the project. It is fitting that the estate that housed the Royal Greenwich Observatory should come to Queen's whose Faculty of Applied Science was fathered by Sandford Fleming, the originator of Standard Time.

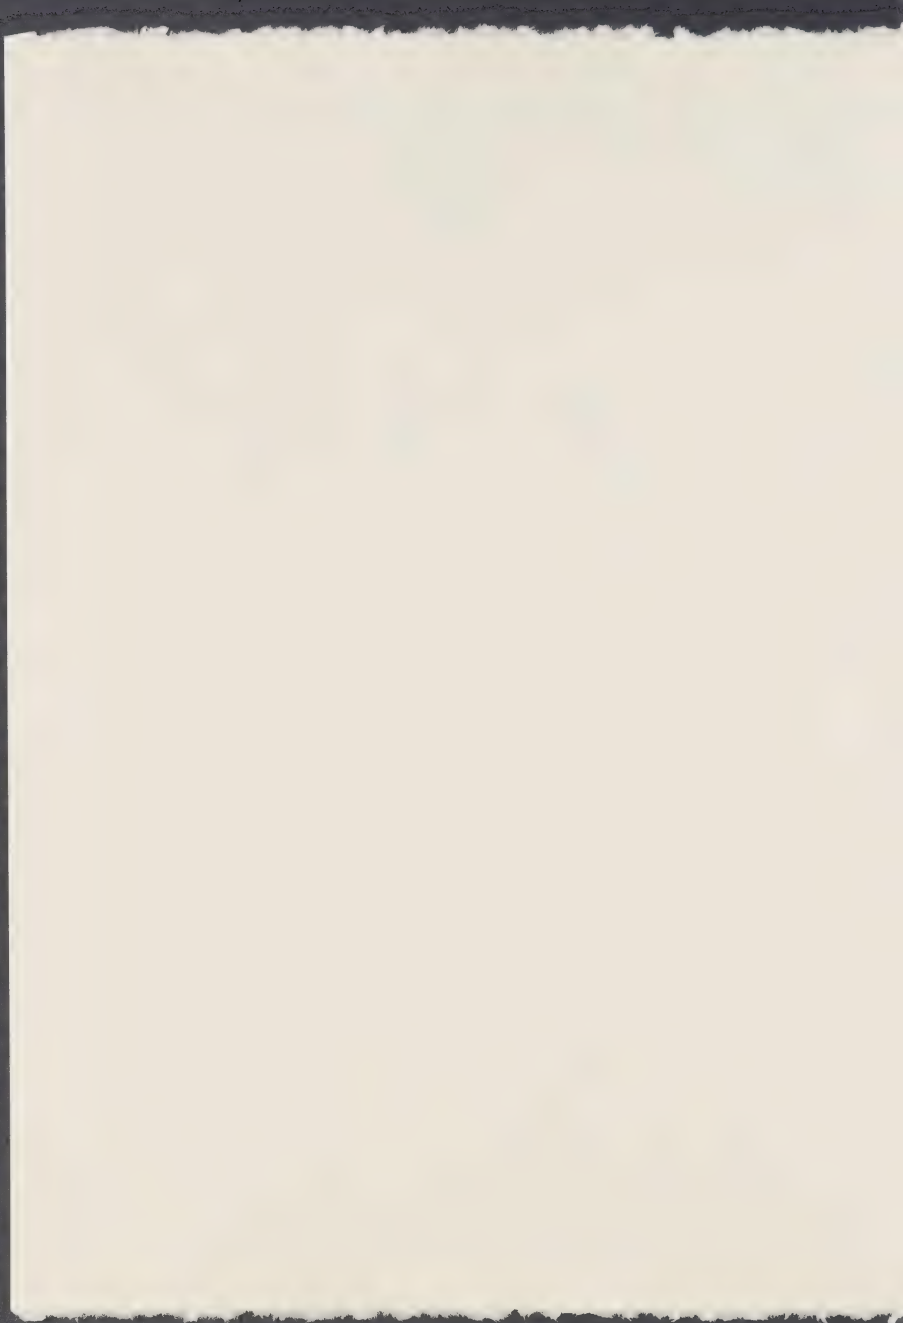

I saw Marg's sister and brother-in-law Ron and Nancy Holdsworth of New Liskeard and they have located a number of Sawford-Dye's paintings. I believe they have been in touch with you about the people who are interested in helping with an exhibition. They are anxious to help.

Have you seen the book just published entitled "Queen's Engineers"? It is a history of the first hundred years of the Faculty of Applied Science which will be celebrated this year, 1993. The Co-Op received a strong mention along with a number of '44 and '45 members who returned to teach. It is an interesting book. The Faculty has sure changed, for the better I believe since our days.

Things are much the same here I still get a fair bit of work and that keeps me somewhat current. There is also the "Science '44 Fortieth Year Fund" which grows and which the Dean believes will be a help in the future allowing the Faculty to do things knowing that the endowment will have continuing money for their upkeep.

Again congratulations and next time you are up in Toronto let us try and have dinner together. All the best in '93.

Sincerely,
F. C. Lendrum

Dear Clyde:

Isabel and I plan to arrive in Toronto Sunday noon, November 8th, and will then probably leave for Queen's in the late afternoon of Monday the 9th. We will be staying with Isabel's neice who lives in Toronto. Could we meet in Toronto, perhaps on Monday morning.

Best regards,

Dr. Alfred R. Bader,
2961 North Shepard Avenue,
Milwaukee, Wisconsin
53211

Dear Alfred:

Thanks for yours of June 29. Your gift to Queen's will be gratefully received. The old school and faculty need all the help they can get. Science '44 has converted their year fund into the "Science '44 Fortieth Year Fund", an endowment. Our target is a million dollars, the income from which can only be used by the Faculty of Applied Science for those badly needed extras that cannot be included in normal operating budgets. I took over the organization of the fund shortly after my wife died in 1990.

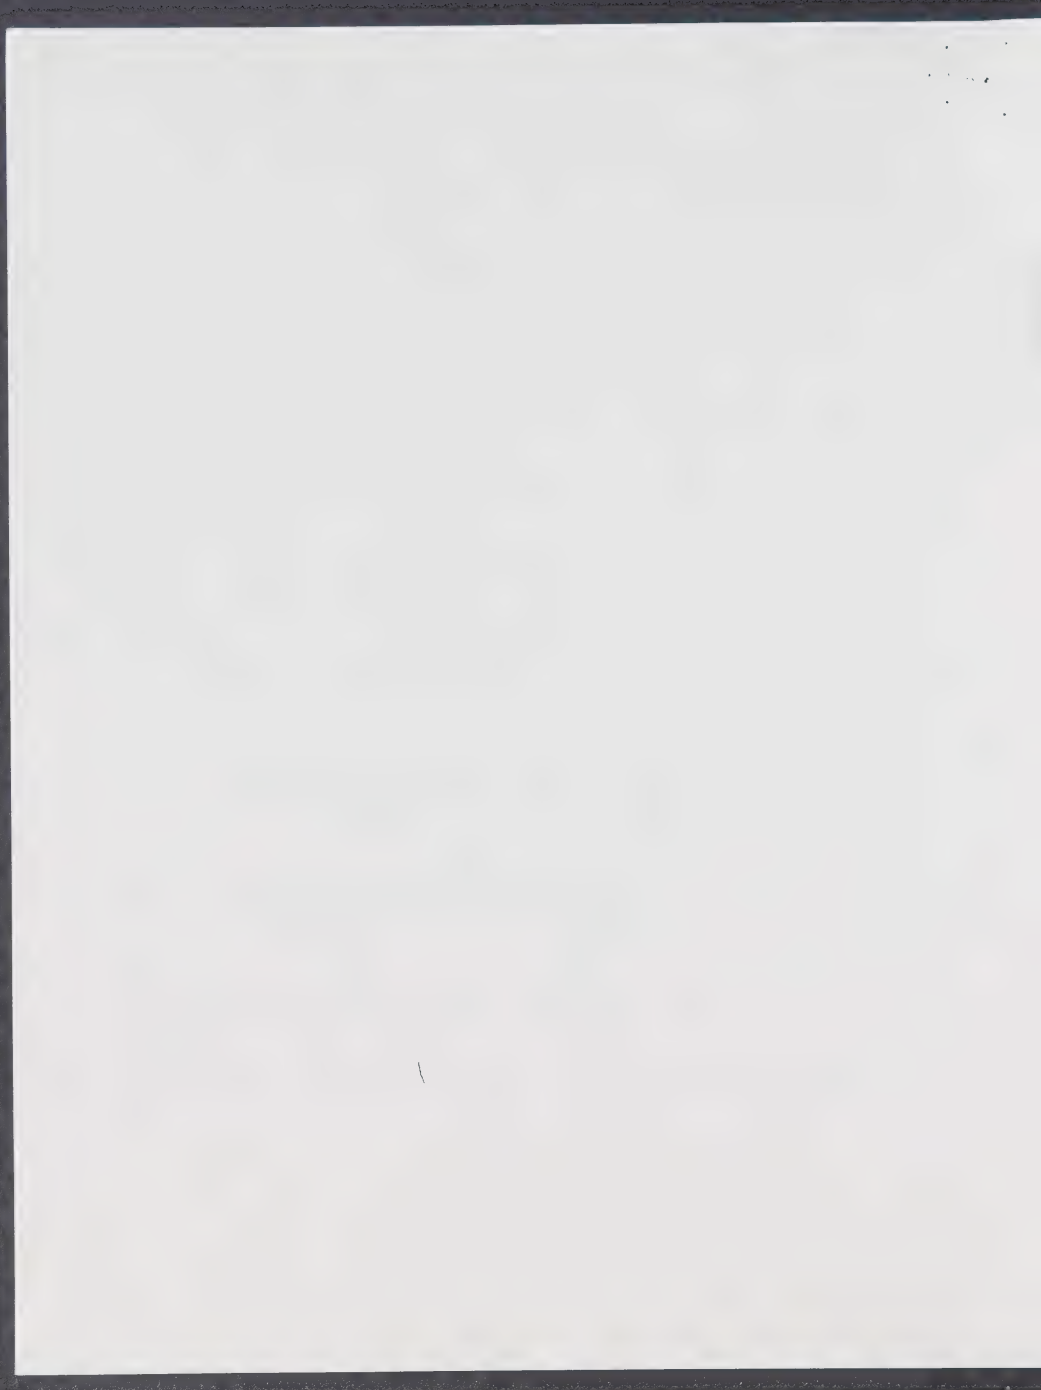

We will not make our million from annual donations but we have a good chance by selling charitable annuities, bequests and other gifts. We are the first year to make our foundation a legal document and apparently are now a role model for others.

Science '44 gave Queen's Co-Operative Housing. Now we hope to give the Faculty a foundation of its own. The idea was Dean Bacon's and has been strongly supported by Dean Hamacher. I try to reach the class three times a year. Enclosed is my last effort.

Following your telephone call from England, I telephoned Mrs. Karen Davidson, Curator of the Temiskaming Art Gallery in Haileybury, Ontario to tell her of your desire to organize an exhibition of Sawford-Dye winter scenes at Queen's University in Kingston, Ontario. She tells me that the Gallery is also planning an exhibition of Sawford-Dye winter scenes for the end of 1993 or early 1994.

Nancy + Ron Aldsworth
25 Pine St. W.
Box 144 New Liskeard P.O. 1P0

705-647-7457

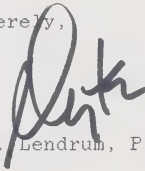

They will then organize a task force to view each of the offered paintings, get the history of the painting and a photograph. They would then make their selection. She would be most happy to talk to you with the hope you could work together on such a venture. She suggests that on a Saturday morning, you she and the Chairperson of the Gallery Committee arrange a telephone call and hopes that you may be able to work together on such a project.

I told her you could also be interested in purchasing outright some winter scenes for Queen's University.

I still plan to go to New Liskeard this summer. If I can be of help, let me know.

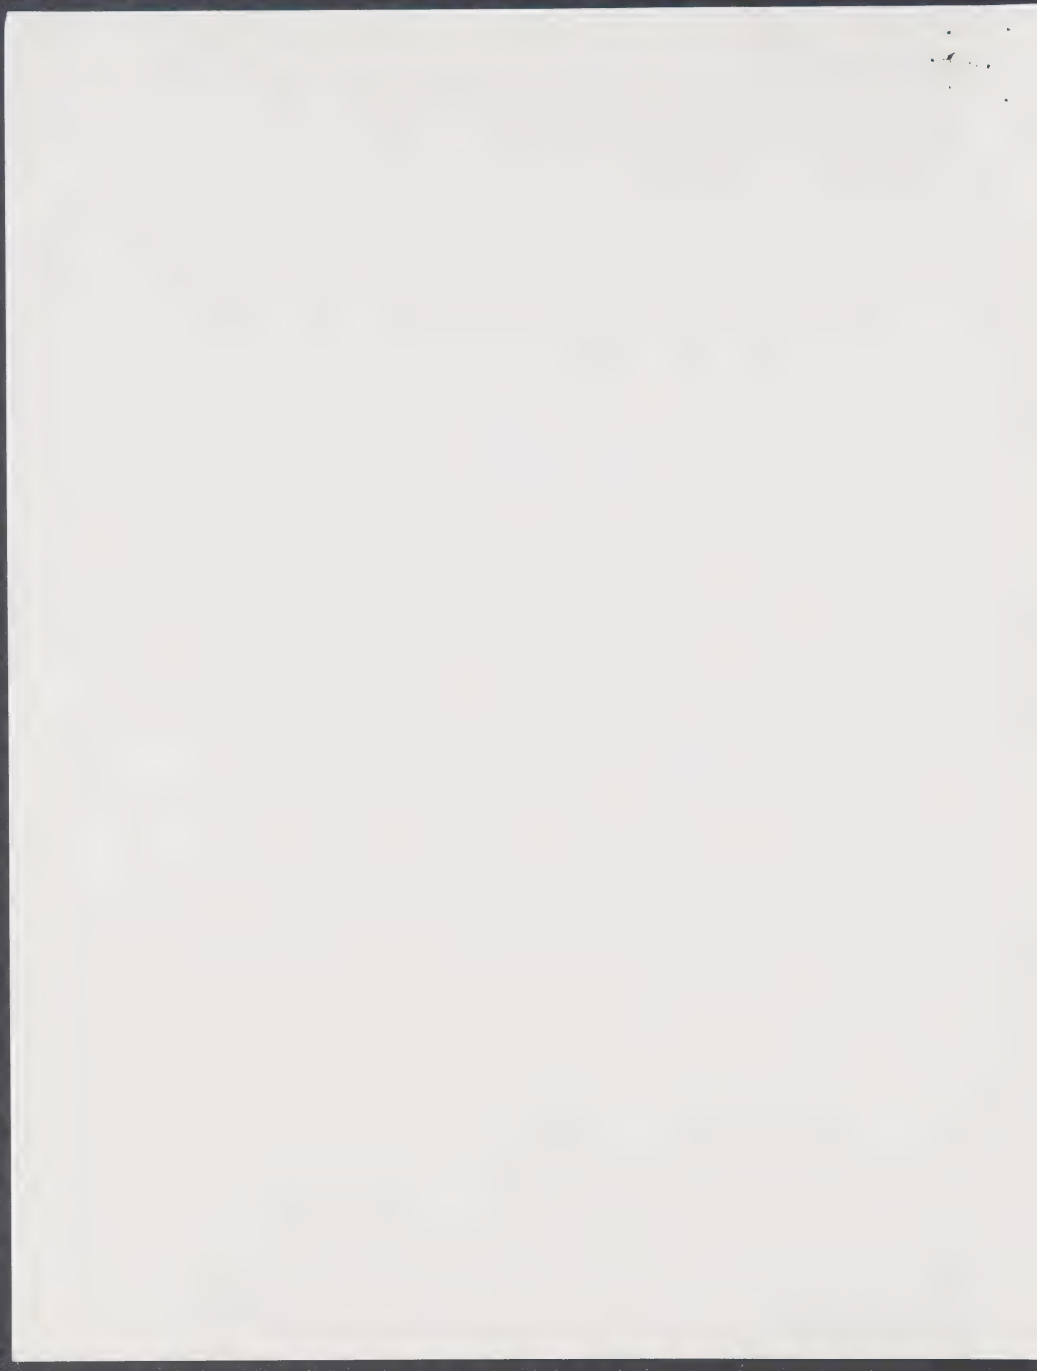

Sincerely,

F. C. Lendrum, P.Eng.

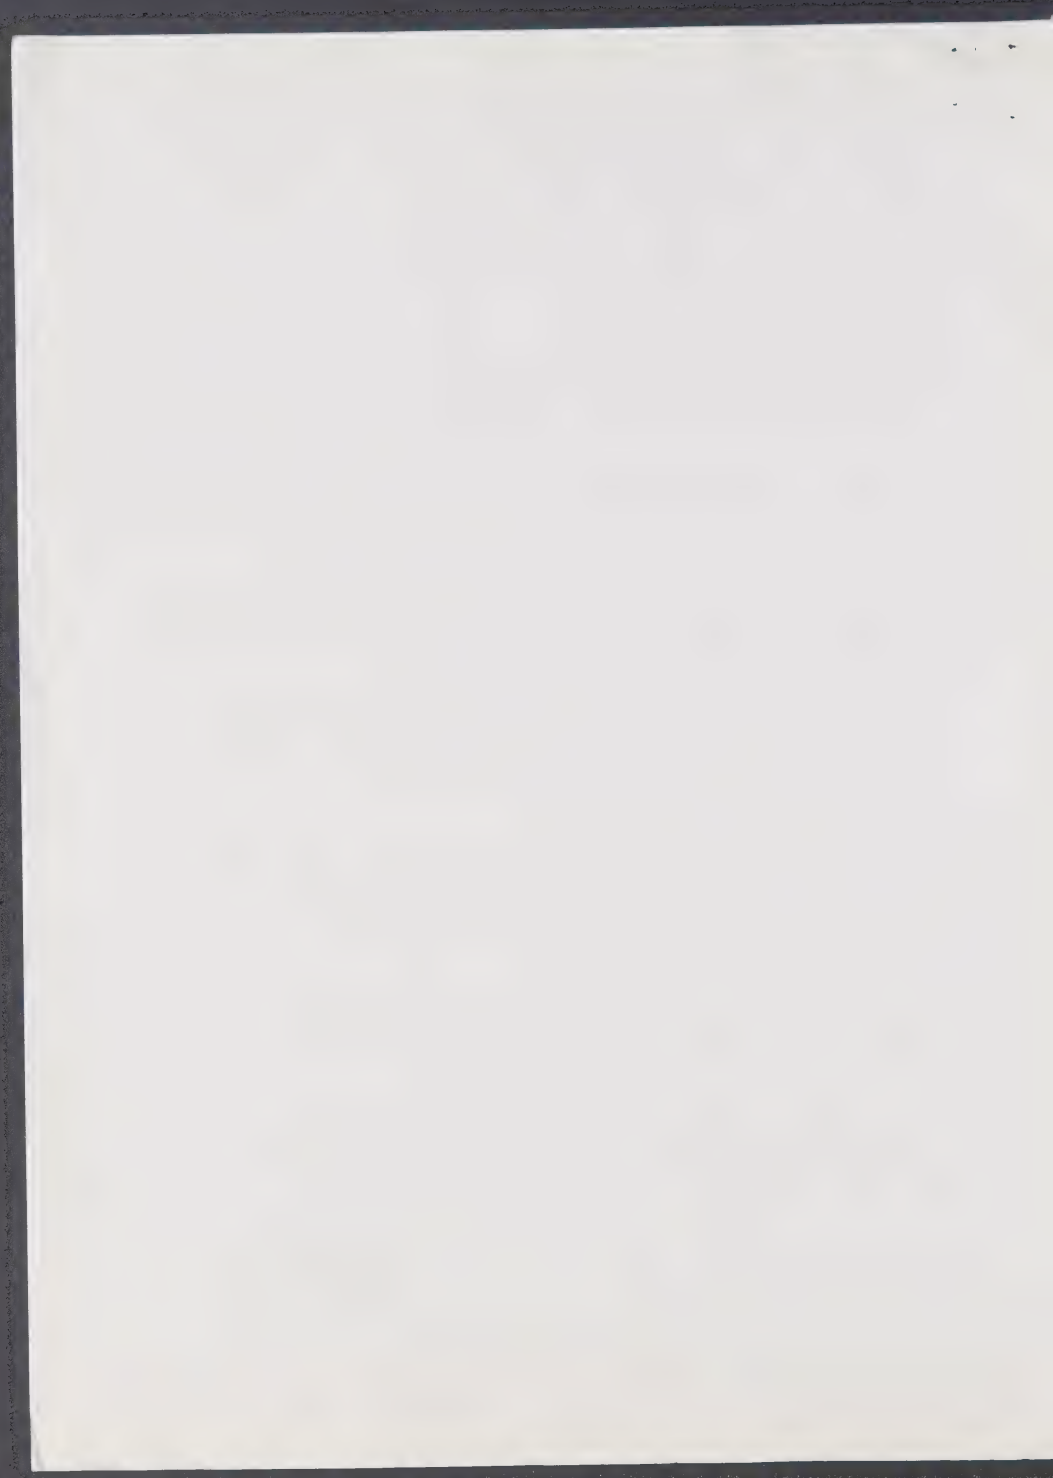

P.S. Mrs. Davidson can be reached by telephone at the Gallery - 705-672-3706 or at home 705-672-5048. The Gallery mailing address is P.O. Box 1090, Hailleybury, Ontario POJ 1K0. You can FAX her through Municipal Office in Hailleybury who FAX number is 705-672-3200.

January 18, 1992.

Dear Alf:

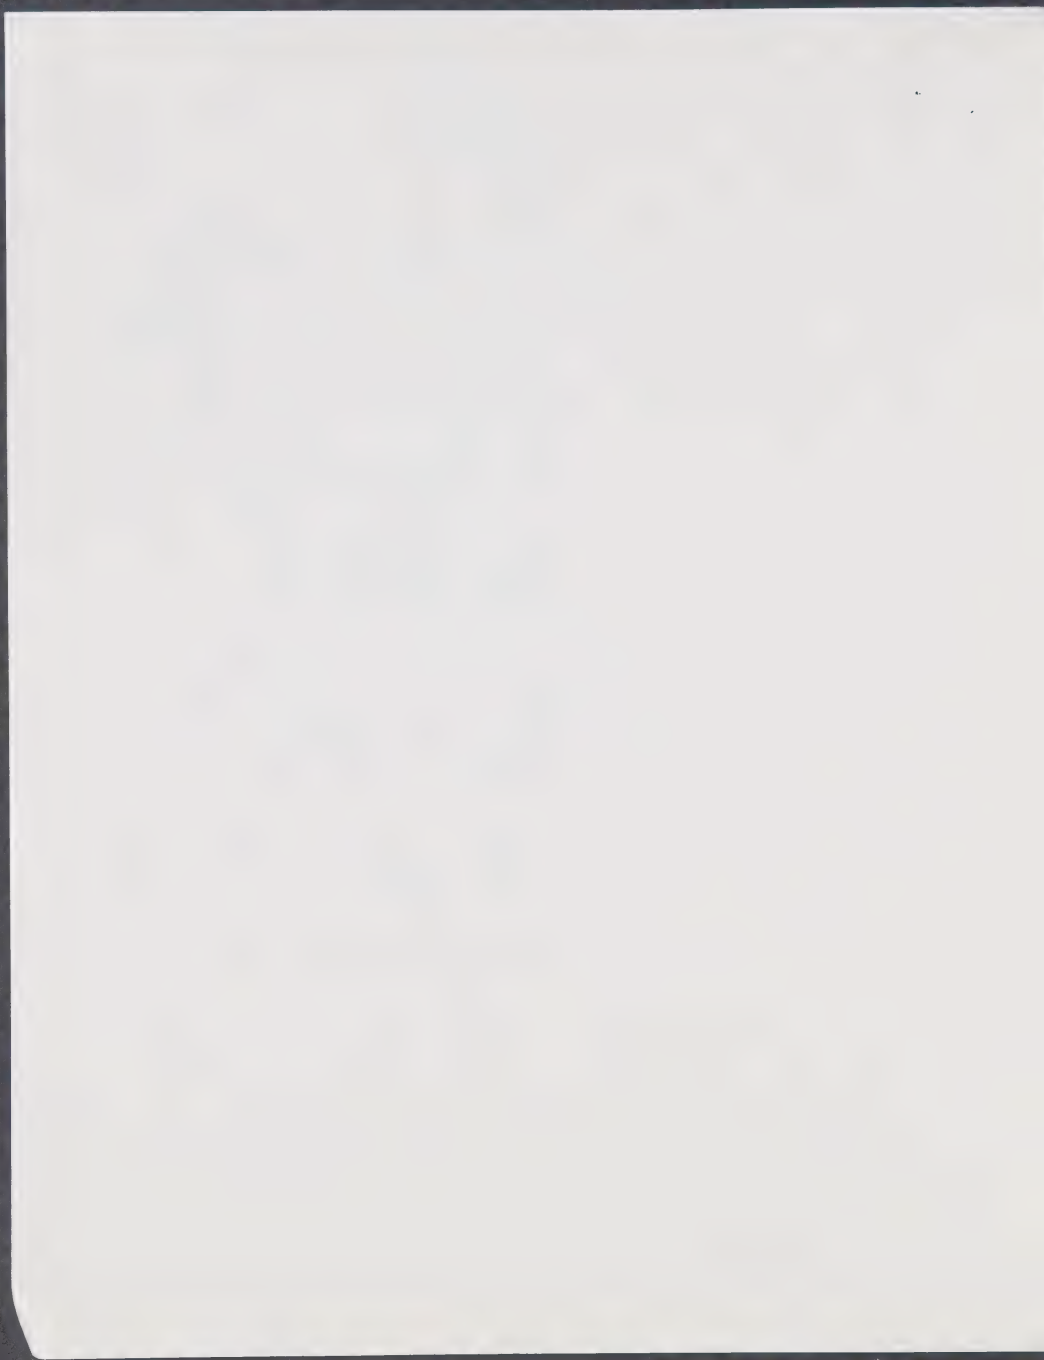

Your letter of the 10th arrived here on Thursday and brought another flood of memories, this time from outside of Queen's. Your wife was born in New Liskeard the north end of that hub of civilization known as the Tri-Town. I was born in Cobalt and my family have been associated with northern Ontario since the turn of the century.

Dad was a newspaper editor in Cobalt and in the 1940's was editor of the New Liskeard "Speaker". My aunts Mrs. Ellis and Miss Boyle (mother's sisters) kept a ladies wear store on the main street in New Liskeard for years.

To answer some of your questions King City is about 28 miles north of Toronto and I would love to see you and your wife if you get up this way. The telephone number is (416) 833-3751. I now live alone but keep busy with some consulting and working on the Science '44 Fortieth Year Fund. The fund is a new concept for class funds and you probably seen the publicity we have received from the Alumni Review and Ed. Pearce's development group.

Regarding my not being allowed to finish my degree, I could have said "no" to going to Port Radium to extract uranium but one must remember there was a war on which which we believed was a necessary horrible event. I had graduated from Haileybury School of Mines in 1935 and in the five years before going to Queen's had "worked" my way to metallurgist at the Paymaster Mine in Timmins. I had the start of a professional career before going to university.

Had it not been for my eyes I probably would have volunteered for active service but since I was trapped into staying in Canada and marching like the COYC I went to Queen's. The recovery of uranium minerals was rather crude in those days and some how someone thought I could help improve the gravity mill on Great Bear. Initially the offer was made by Eldorado Gold Mines and I said "no" but I was then asked to go to Toronto to meet Gilbert Labine the president. (he also of the Tri-Town) I told him I was not interested in gold mines and he explained their priorities were higher than the U.S. army in Canada and I volunteered. The rest is history.

My granddaughter Jennifer (Jenni) Lendrum is completing her second year in Fine Arts at Queen's and I know she would love to meet you and your wife. Her mother came from Kirkland Lake. It is a small world.

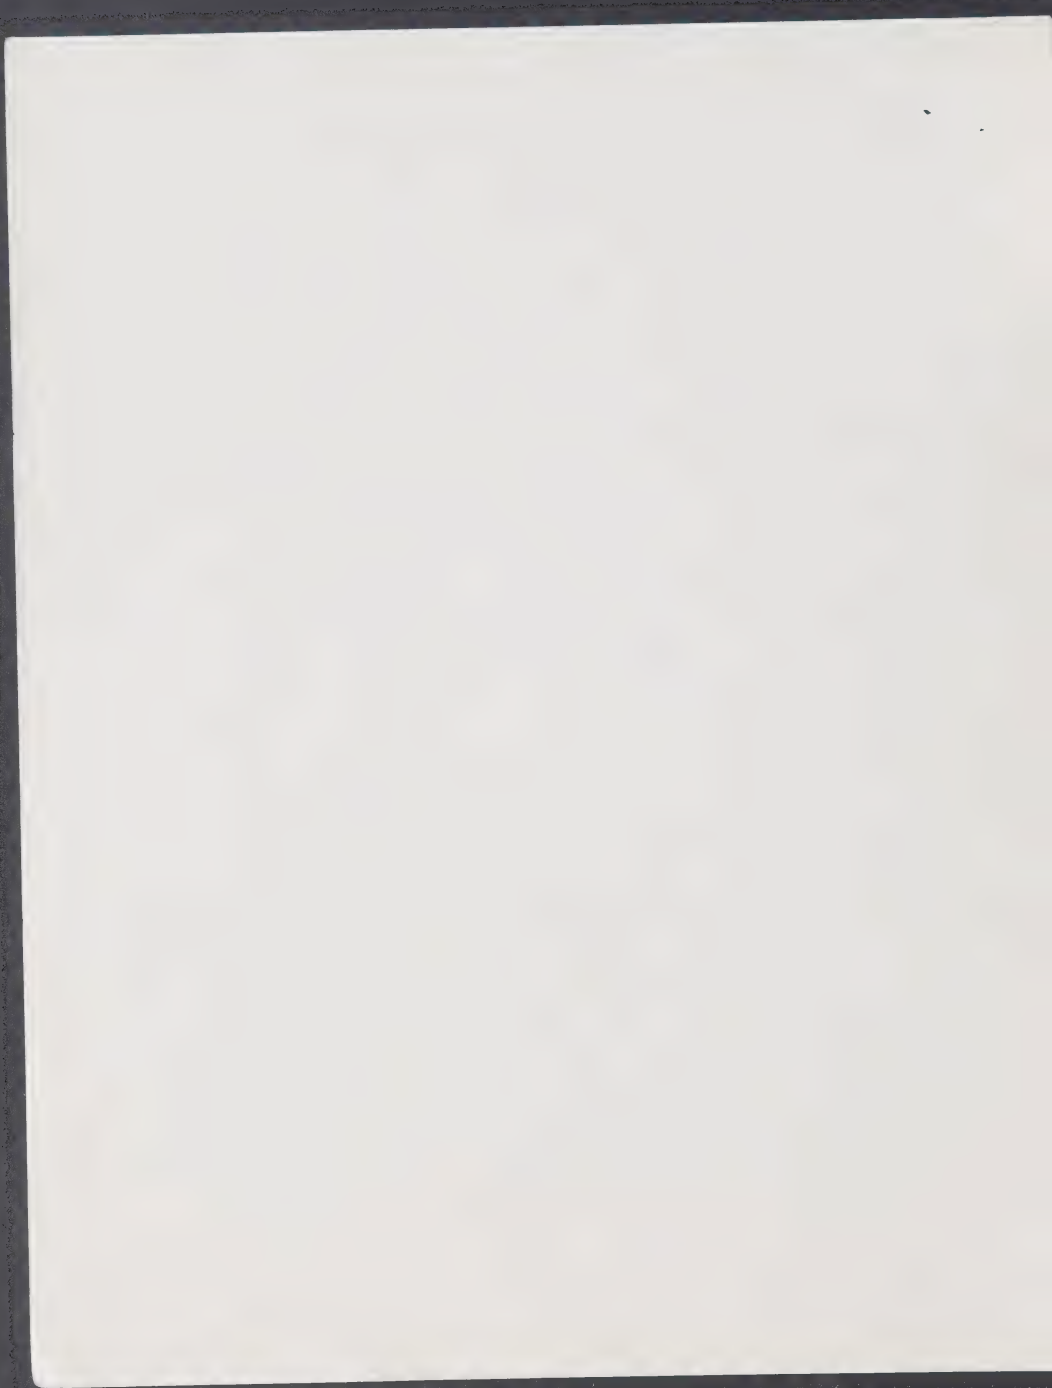

Today is a day your wife might appreciate. Two days ago we had a blizzard and this morning it was about -30 degrees C. Bright sunshine, no wind and the smoke from the chimney going straight up. A rare memory of northern Ontario. The city media complaining about the cold but my thoughts went back to catching the street car to Haileybury to go to school. I remember our survey professor at Haileybury on such a day saying if you were working for a living you would be out to-day - so out you go.

I expect to be home the rest of the winter except for a holiday in March/April when I plan on a tour taking a tour through the southwest states and part of Mexico. One of the few corners of North America I have not seen.

To write, I wonder what your wife maiden name was because we northerners were a small but closely knit group and we knew a lot of people.

To write again and visit next time you are in Toronto.

Sincerely
F. C. Lendrum

SUBJECT: Ernest Sawford-Dye.

OUR FAX NUMBER IS: 416-833-3751 (In Canada) If you have any problems receiving this message please call (416)-833-3751.

Dear Alfred:

Earlier I faxed you some information on Ernest Sawford-Dye but have not heard if you received it. With the coming of fishing season I may be going up to New Liskeard in June or July. If you did not receive the information or if I can be of further help please let me know.

My information was that there are many (+100) winter scenes of the area and the best source of information is Mrs. Karen Davidson, Curator of the Tomiskaming Art Gallery, P. O. Box 1090, Haileybury, Ontario P0J 1K0 telephone (705) 672 3706 or at home (705) 672 5048.

Kind regards to you and your wife,

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry should be supported by a valid receipt or invoice. This ensures transparency and allows for easy verification of the data.

In the second section, the author outlines the various methods used to collect and analyze the data. This includes both primary and secondary data collection techniques. The primary data was gathered through direct observation and interviews with key stakeholders. Secondary data was obtained from existing reports and databases.

The analysis phase involved using statistical software to identify trends and correlations within the data. The results show a clear upward trend in the number of transactions over the period studied. This is likely due to increased market activity and improved infrastructure.

Finally, the document concludes with a series of recommendations for future research and implementation. It suggests that further studies should focus on the long-term sustainability of the current practices and the impact of external factors on the data.
