Dear Carlos,

I wish that I could be in two places at the same time.

Isabel and I are leaving for England on May 28th and will then be on the continent between June 6th and June 26th and then back to the US on July 28th.

Is there any chance that we might get together in England in July?

With fond regards from house to house I remain

Yours sincerely,

Alfred Bader

Dear Alfred,

It's a long time since we last met.

I have to travel to California in June and one of the travel possibilities is via Chicago. I wonder whether an overnight stop could offer a possibility to meet, in case it is convenient for you.

I'm due to leave Madrid on June 24, and the flight would arrive in Chicago at 14:20h.

I could then leave for Los Angeles the following day, June 25, as I have a meeting in Irvine on June 26.

I would very much like to see you both again, but I wouldn't like to be a nuisance.

Please let me know if this is really convenient for you.

I look forward to your reply.

All the best,

CARLOS SEOANE

A Chemist Helping Chemists

May 9, 2001

TO: Professor Carlos Seoane, Vice Rector Page 1 of 4
Universidad Complutense de Madrid

FAX #: 34-91-394-6956

Dear Carlos,

You know so very much about how the European Union tries to help students and, hence, I would like to ask you for your advice about the Socrates scheme helping Czech students. The enclosed letter from Professor Kočovský will be self-explanatory.

As you know, we have tried to help Czech students in chemistry in many different ways. For instance, we are just establishing a second award, this one for young biochemists, and we established four fellowships, at Columbia, Pennsylvania, Harvard and Imperial College for Czech students to get their Ph.D.'s

But turning now to this request, it seems to me that the appeal should really go to whoever is in charge of the Socrates fund to help these students.

Naturally we could give two times £ 1800 per year, though I suppose that Glasgow is not the only university getting students under the Socrates scheme. But should those funds not really come from the EU?

With many thanks for your help I remain

Yours sincerely,

Alfred Bader

Dear Carlos,

Congratulations on winning that important award!

I very much hope that you and Dr. Roseann Runte, the President of Victoria University, will be able to get together with some important projects.

Isabel and I are leaving for England on November 2nd, will spend one week, from Sunday, November 5th to Sunday, November 12th in Holland, and will then be back in Bexhill until December 20th. Any chance of seeing you?

With all good wishes I remain

Yours sincerely,

Response to 341 394 6956

Dear Carlos:

Thank you so much for yesterday's fax, received today.

How nice that Margarita and Mrs. Puyol will join you, arriving at Gatwick on November 21st. I am sure that we will be able to arrange to pick you up, take you to the Castle and have really good discussions on Friday the 22nd.

As you know, we are not Orthodox Jews, and so we will be happy to spend some time with you on Saturday also. Of course, you may want some time in London.

Sadly, arranging for talks in Madrid is much more difficult. I will be happy to give five talks and having abstracts in Spanish will also not be much of a problem. However, finding the right time is.

In the past, Sotheby's and Christie's have always had their major Old Master auctions in the first week in December. This year, however, they will be on Wednesday the 11th at Sotheby's and Friday the 13th at Christie's. I understand that Sotheby's may have a very important Rembrandt. Also, just recently Marion, Isabel's sister, has accepted our invitation to come to Bexhill in December, and Isabel doesn't want to leave her alone, nor do I want to come to Madrid without Isabel.

The only viable alternative - if acceptable to you - would be to plan for next summer. But even that is filling up. I would very much like to go to the annual meeting of the Chemical Institute of Canada in the first week of June and to attend ChemSpec in Manchester from June 10th-12th. I will also want to attend the major Old Master sales in London, which are always in the first half of July. I will know the exact dates soon.

Professor Carlos Seoane
October 4, 1996
Page 2

Alternatively, would a satellite link from an English University, perhaps University of Sussex, be possible? We could then discuss dates that would be mutually acceptable.

I will try and telephone you this weekend to discuss all this.

With fond regards from house to house, I remain,

Yours sincerely,

AB/cw

Dear Carlos:

Kekulé's letter to Erlenmeyer, dated January 4, 1862 - that is, just months after Loschmidt's book appeared - is cited on page 305 of the first volume of Anschütz's 1929 biography of Kekulé. I enclose Xerox of that, as well as Xeroxes of Kekulé's 4-page letter. This is not easy to read, and I have taken out the relevant paragraph and enlarged it on one Xerox.

Fond regards, as always,

Fax: 34-1-543-3879

Rectoria
28040 Madrid

Dear Carlos:

Thank you so much for your fax of May 18th.

Regarding paintings, I have picked a very nice Whalley tempera because I think that his temperas are really his best works. Unfortunately, they take much longer to paint than oil paintings, but I think it is worth it. The painting we are taking with us is in a very simple line frame, 19" X 25". (No 14 in enclosed).

We plan to take the two paintings to England, but I would much prefer then to leave them in our house there until we meet and you could then easily take both paintings from Gatwick to Madrid.

Please find out from your dealer friend what she means by saying that she accepts responsibility for the deposit.

I trust you were joking when you wrote that the Spanish painting cost, "only" several times your salary.

We plan to be in England from May 26th to June 2nd and then again from June 22nd to July 26th.

We would love to be able to show you Herstmonceux Castle in July, not just because it is such a beautiful place, but because Queen's University really needs help. Economic times in Canada are not at all good, and not enough students have come to the Castle. Hence, the University is thinking seriously about the possibility of selling the Castle after next year.

Professor Carlos Seoane
May 21, 1996
Page 2

Hence, we would like to show you the Castle for the reason that you might well be able to think of some way of bringing Spanish students to Herstmonceux.

I am sending you this letter by fax but also by air-mail, and in the air-mail envelope I enclose a good photograph of that fine portrait of a 62-year-old man dated 1652. As I mentioned, the painting is either Spanish or north Italian, and the date of 1652 is certainly correct. Maybe some of your art historian friends will have the name of the artist. The condition of that painting is very good indeed.

Isabel and I will telephone you from Bexhill shortly after our arrival there.

With fond regards from house to house, I remain,

Yours sincerely,

AB/cw

Page 1 of 2

To: Professor Carlos Seoane
Vice-Rector for International Affairs
Universidad Complutense de Madrid
Fax: 34-1-543-3879

Dear Carlos:

In response to your fax of May 12th:

- (1) Do keep in mind that Aldrich overcharged by several million dollars and determining by just how much would not be very difficult. A competent attorney could get the sales figures and hence do the calculation.
- (2) It is really not worthwhile spending time trying to find out about Carlos Calpe. If he doesn't find it worthwhile to say "thank you", that's it.
- (3) Please don't worry about insurance - certainly not about a painting that cost us only about \$11,000. It would be different if we were dealing with a \$1 million painting.

Yesterday I acquired in New York a stunning portrait of a man, Spanish or North Italian, giving the man's age, 62, and dated 1652. I will have the portrait photographed this week and will then send you a photograph.

* It bears a label, Bentivoglio D'Aragona, which Isabel believes must be Portuguese rather than Spanish. The family's crest has nine points and so is likely to have been of the Counts of Bentivoglio. Is such a family familiar to you?

More important than any of this, I do hope that you received my letter of May 9th regarding the possibility of your visiting Herstmonceux Castle and seeing whether collaboration there might be possible. Mail can be slow, and so I attach a copy of that letter.

With fond regards from house to house, as always,

AB/cw/

Universidad Complutense de Madrid

Vice-Rector

Mr. Alexander Montgomery
Operations Manager
International Study Centre
Herstmonceux Castle
Hailsham, East Sussex BN27 1RP
UNITED KINGDOM

Madrid, June 25, 1996

Dear Mr. Montgomery,

Thank you so much for your kind letter concerning the International Study Centre at Herstmonceux Castle. I have also received the nice information pack.

My very good friend Dr. Alfred Bader also phoned me about it and I was trying to find the opportunity to pay you a visit to discuss the possibilities for cooperation.

Unfortunately, I have to chair this year the admission committee for Universidad Complutense. With our size (more than 130.000 students in all), you can imagine that I am rather pinned down for quite a while.

I will keep in touch with you and Dr. Bader and I am sure we will be able to find a mutually convenient time. As I followed the day to day story of the Castle with Dr. Bader, I have also a personal interest in the visit.

With kindest regards

CARLOS SEOANE
Vice-Rector for
International Affairs

CC.: Dr. Alfred Bader

CONCLUSIÓN

En el presente trabajo se ha analizado el comportamiento de un sistema de control de un motor eléctrico. Se ha observado que el sistema es estable y que el tiempo de respuesta es aceptable. Se ha demostrado que el controlador diseñado cumple con los requisitos establecidos en el enunciado del problema. Los resultados obtenidos confirman la validez del modelo matemático utilizado y la efectividad del algoritmo de control implementado. Se recomienda para futuras investigaciones el estudio de la robustez del sistema frente a variaciones de parámetros y la implementación de técnicas de control adaptativo para mejorar el desempeño del sistema en condiciones de operación no ideales.

February 28, 1996

Professor Carlos Seoane
Vice-Rector for International Affairs
Universidad Complutense de Madrid
Facultad de Ciencias Químicas
Departamento de Química Orgánica 1
Ciudad Universitaria
28040 Madrid
Spain

Dear Carlos:

Thank you so much for your letter of February 10th.

Isabel and I have been wracking our brains trying to think of someone who might help Carlos, Jr. in this country, but so far have not been successful.

Thank you for the information about that interesting book about Austrian Jews who survived concentration camps. Sadly, my mother did not.

You know that you are always welcome here in Milwaukee, and we would also love to meet you in England.

We plan on the Continent most of June and then fly to England on June 24th and then back to Milwaukee, probably on July 26th.

We now have a somewhat larger home in England and a guest room awaits you.

Enclosed please find the X-ray of the painting which you watched me buy in Madrid, as well as slides taken before, during and after restoration. These are my only slides, and I would like to have these back if you cannot find anyone interested in Spain. I also enclose a description of the restoration done and copies of the restorer's invoices. I also have the relining canvas which the buyer might want.

Professor Carlos Seoane
February 28, 1996
Page 2

It would be very simple for us to bring the well-framed painting to England in May and then give it to you whenever we see you. Alternatively, you might like to pick it up when you come to Milwaukee. Yet another alternative would be to send it by parcel post from England to Spain. As both are in the Common Market, surely there would be no duty.

The problems are greater with the Whalleys. Of course, when you come, you could pick one you really like and take it with you. But it certainly wouldn't be very practical to send quite a few to Spain in the hope that you might be able to sell some.

My autobiography has drawn a good deal of attention to Whalley's work, and a museum in Georgia, at the University of Georgia, plans to have an exhibition of his works later this year. We will send about 30 of his paintings to that exhibition.

With love to you and the family, I remain,

Yours sincerely,

AB/cw

Enclosures

Universidad Complutense de Madrid

Vice-Rector

Dr. Alfred Bader
Alfred Bader Fine Arts
FAX: 07-1-414-277-4709

10.2.96

Dear Alfred and Isabel,

Very many thanks for your nice congratulatory letter and my apologies for this delay. As you can see, life is getting somewhat difficult again. As you say, I will do my very best (and that means nights and weekends and.....) to keep my research going. With this, things in this respect are going well.

But still more important, contacts with friends will always have a high priority (even if a bit delayed, this time !)

Although the bookseller probably did not after all order the autobiography by itself, quite a few chemists here, (including Aldrich España's) did come to me to obtain the ISBN number to order the book.

Talking about books, I am sending you under separate mail information about a book on Austrian Jews that can be of interest to you.

Concerning your question, I really would like to meet you either in Milwaukee or England (Why not in Madrid?). I have a rather hectic agenda for the next few months, but I will let you know. Please, do the same and think about a trip to Spain.

One final point, Carlos H. Will spend 4 weeks in Germany, perfecting his German, but he also wants to keep his English in good shape. We wonder whether you know of somebody, in any part of the States, who could be interested in Carlos teaching Spanish or doing any kind of work for his/her

children for some time this summer. If you any idea about this, please let us know. Thank you so much to you both

Finally, for your records, my new numbers at the office (Rectory) are:

Phone: -34-1-394-6958

FAX: -34-1-394-6956

Concerning art, my dealer friend would like to have to show to potential buyers some pictures before and after restoration of the "Greco", including if possible the x-ray. Could you please send them? And do not forget our plans concerning this and Whaley when you come to England.

All the best to you both.

Carlos

Professor Carlos Seoane
Vice-Rector for International Affairs
Universidad Complutense de Madrid
Facultad de Ciencias Quimicas
Departamento de Quimica Organica 1
Ciudad Universitaria
28040 Madrid
Spain

Dear Carlos:

I am sorry that a couple of lecture tours have delayed my thanking you for your letter of April 4th.

We will be leaving for England on May 25th, and if you would like me to bring any paintings to England to be mailed to you, please do let me know before.

Of course, I was delighted to learn that Aldrich's Spanish prices are now only 15% above those in Germany. That is a reasonable differential to pay for the extra handling costs.

However, that leaves Aldrich's exorbitant Spanish prices over several years to be accounted for. Surely, Carlos Calpe and perhaps also his successor will be able to tell you what Aldrich's total sales in Spain were during the lives of the two catalogs with much higher prices. From those sales figures, you will be able to calculate pretty closely how much Aldrich over-charged.

If I were you, I would do that calculation very carefully and then demand that Aldrich establish a trust fund in the amount of that over-charge to help Spanish students in chemistry.

With all good wishes from house to house, I remain,

Yours sincerely,

4.4.96

Dear Alfred:

Thank you so much for your letter of March 15. I did receive the x-ray and it is now being examined by the Dean of Art History, who looked very interested. Then, I show it to my dealer friend. Let's see.

Thanks, also, for the information about the Historical Keyboard Society of Wisconsin. It is certainly most interesting and pleasant for a Spaniard like me, who knows the States and Milwaukee and who is a very good friend of a Jew. Is Joan Parsley also a Jew? If so, it is very encouraging to see such a wonderful effort to overcome five centuries of misunderstanding. Anyway, she deserves my heartfelt congratulations. I wish her the best of successes in her endeavour.

Very best regards from house to house. I very much hope that the health of you both is in perfect shape, as usual.

All the best to you both.

Carlos

PS: People from Janssen and Aldrich Spain are very interested in your autobiography.

Congratulations to the directors of the H. Bader Foundation for their contribution to the historical keyboard efforts, too.!

Dear Carlos:

I do hope you received that large air-mail envelope with the X-ray which I sent you on February 28th.

Isabel thought that the enclosed letter from the Historical Keyboard Society of Wisconsin may interest you.

With all good wishes from house to house, I remain,

Yours sincerely,

AB/cw

A Chemist Helping Chemists

November 7, 1995

TO: Professor Carlos Seoane
Universidad Complutense de Madrid
Departamento de Quimica Organica 1

Dear Carlos:

I am sorry that a long trip to Canada has delayed my replying your most interesting fax of October 26th.

My restorer is totally certain that the Spanish painting is 17th century and several very knowledgeable people who have looked at it have suggested El Greco. But of course, I know that it had looked closer to El Greco before the restoration than after.

My total cost in the painting is just a little over \$11,000; \$500 for the painting, \$10,000 for the restoration, and the balance for the frame.

The painting is stable, and the frame is sturdy. If you would like to take it to Spain when next you come to Milwaukee, that will be fine with me, and you could then show it to prospective buyers. I would, of course, suggest that you and I split whatever profit there may be.

I don't think that having a Whalley exhibition in Madrid is feasible. It just takes too much effort to ship paintings back and forth. But you could pick a Whalley you really like and I could then send it to you by parcel post from England. We take paintings to England all the time, and shipping from England to Spain is easier than from here. Also, Spain and England both being in the EEC avoids custom duties.

Have you been able to persuade a Madrid bookstore to order some copies from Weidenfeld?

Isabel and I are flying to England next Monday, November 13th, and I will call you from Bexhill shortly thereafter. Our telephone number remains 44-1424-222-223.

With fond regards from house to house, I remain,

Yours sincerely,

AB/cw

1210-115115 10A

1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that this is essential for the proper management of the organization's finances and for ensuring compliance with relevant regulations.

2. The second part of the document outlines the various methods used to collect and analyze data. It describes how this information is used to identify trends, assess performance, and make informed decisions about future operations.

3. The third part of the document focuses on the role of technology in modern business operations. It highlights how digital tools and platforms have revolutionized the way companies interact with their customers and manage their internal processes.

4. The fourth part of the document addresses the challenges of maintaining data security and privacy in an increasingly digital world. It discusses the importance of implementing robust security measures and staying up-to-date with the latest industry standards.

5. The fifth part of the document concludes by summarizing the key findings and recommendations. It stresses the need for continuous learning and adaptation in a rapidly changing business environment.

Dear Carlos:

There are two Aldrich Chemie catalogs, each with identical DM prices. One is in English, and one is in German. I was able to obtain one of each here and have today sent you the two with an American catalog, by book post. Hopefully all three will arrive this year.

You will probably also receive a catalog from Dr. Griesinger in Steinheim.

With all good wishes to you and the family, as always,

AB/cw

6.10.95

Dear Alfred and Isabel:

1.- First of all, many apologies for my delay in writing to thank you for your most kind (as always, by the way!) hospitality during my stay with you. My alibi is that we are in a quite complex process for electing a new Rector (as I told you in Milwaukee, the previous one was appointed Minister of Education) and I am finding myself much more involved in the process than I would like to be. This, together with a long official trip to LatinAmerica on behalf of the Organization for Iberoamerican States explain, although do not justify, my delay. I am sorry.

My stay with you was, as usual, both enjoyable in the personal plane and interesting in Chemistry and Art and you know how much I like visiting you both.

2.- Did you get any results about the Smithsonian Exhibit ? It would be a pity to miss such a good opportunity to improve the image of Chemistry and to promote *Chemophilia*. Please, let me know.

3.- The President of our Chemical Society agrees in principle to send a letter to D. Harvey concerning prices in Spain. He wants to look at some hard facts first and it would be most helpful if you could send me a copy of the American and German Catalog (not easy to get from here now) for comparison of current prices.

4.- I will need some more copies of your book. Would it be possible for you to send three copies ? People here are very interested when they see the book. (It includes all the top Aldrich España management !). Please, let me know the best way of payment to you from Spain.

5.- By the way, I assume you received the \$500 as a money order I sent you from Cambridge as payment for the nice painting I bought from you in Milwaukee. Please, confirm this point.

6.- About paintings: An art merchant I know, a former librarian at the University, is interested in the Greco with an asking price of Pts 4.5 million. We will have a meeting during the next few days and I will let you know.

She is also interested in John Walley's work. Could you send me some catalogues about Walley, with some price quotations?. There seems to be some opportunity for that kind of realism here.

Also, please send me 3 copies of the Greco's black and white photograph. Some other people seem interested.

7.- I tried to contact Carlos Calpe to know whether he had got the job with the British company, by with no success. Do you have any information on this?.

Once again thanks for everything
As always

Carlos

PS 1: I did not forget the question about Sánchez. I think I will get some data soon.

PS 2: According to our conversation in Milwaukee, I enclose some reprints of my recent papers. As you can see, I did not stop my Chemistry. The joint paper with Professor Abramovitch I told you about is also included.

PS 3: I also enclose an intriguing article about brothers of some interest to people like you and me with two, very different sons.

15.6.95

Dear Alfred and Isabel:

What a wonderful book!. Thanks for my copy, just received. But, above all thanks, on the behalf of chemical community, for the **book**.

The manuscript I read delighted last summer was beautifully written. But seeing it in the final form, nicely printed and with a wealth of interesting illustrations is a much better way of reading that thrilling story. Only Jorge was a bit disappointed : "I am the only member of the family not to appear in the book. I don't like being the Benjamin !". I am sure the book will be of great interest to many, many people. It is not only enlightening, but a joy to read, too.

A few days ago, I received the issue of C.&EN reporting the presentation to you of the Pearson Price A good "toping" for the story we are talking about, your story. And you certainly can say what an important Spanish philosopher and antifrancoist, Prof. Miguel de Unamuno, once said on a similar occasion: "Most people, when they receive an honor like this say that they are overwhelmed, because they do not deserve it. I cannot. I am not a liar".

Although I had not replied to it so far, I received some weeks ago your previous letter. In that you referred to the samples you gave to Bob Wandler. A few days after your letter, the check from him arrived. So all is settled now. You also included a magazine clipping concerning the beautiful painting you just bought "A repentant sinner turning away from sin". Did you think about sending it as a gift to Tom Cori ?.

All the best to you both

Dr. Alfred Bader

Departamento de Química Orgánica 1
Ciudad Universitaria
E28040 Madrid
Spain

Dear Carlos,

As you know from our telephone conversation, we received your thoughtful letter of November 12th only after returning home last week.

I suspect you will find life easier without so political a position as being Vice Rector of a great university. Certainly your chemistry and students will benefit.

I have seen galleys of my autobiography and they look very satisfactory. The book should be out by March, and I have passed the booksellers' addresses to Weidenfeld.

I don't know whether the British organization for the handicapped contacted the group at your university as we have not been in touch in Sussex who is involved.

I am so glad to know that the stamps arrived safely, and I have not forgotten the cigarette boxes, but that will take a little time.

The autobiography contains two photographs of the Seoanes, one complete letter and some detailed mention.

I have recently acquired a very beautiful Spanish impressionist painting of the early 1920s and as soon as I have a photograph I will send it to you.

All good wishes for 1995 to you and the family from both of us.

Sincerely,

Tel. 394 42 31

12.11.94

Dear Alfred and Isabel,

First of all, please accept our apologies for the delay in replying. We did receive your thoughtful fax of condolences for the death of Margarita's mother. Margarita is improving a little, but very slowly. It will take some time for her to recover fully.

We have already sent your mint blocks of American stamps to the postmaster. I am sure he liked them and he is looking forward to the cigarette boxes. You know how proud he was of his collection. I also look forward to the Aldrichimica Acta parcel. It will complete my treasured collection.

I assume your autobiography is now in the printer. I think that you told me that it should be with the printer by October. When will the copies be available?. Were you able to use the picture of you both taken by Carlos for the cover?. By the way, did you receive the address of the book shop at Complutense for your publisher to contact them?. Did the British organization for the handicapped contact the corresponding group at Complutense to organize the pilgrimage through Northern Spain?.

The final piece of news is that I just left my position as a Vice rector of Complutense. The Rector was reelected and he made a very political rearrangement of the governing team of the University. I did not fit very well in it. So, after four years in the administration, I am again a full time chemist. As I will have a little extra time for the family, we are planning a trip to London with the children next Easter. If you happen to be in England then, we will be delighted to meet you both.

All the best

12.1.95

Dear Alfred and Isabel.

0. I hope you are already safely back in Milwaukee after your stay in England and life is again business as usual (I mean, a lot of work !).

1. A few lines to inform you about some new data on the beautiful Spanish portrait you gave us and we enjoy more and more as a one of the best pieces of our modest art collection , more appropriately to be called the Bader-Seoane Collection. All the art I have and all I know about art, I received from you. (For your records, I am enclosing a photograph, as I think you do not have it). You surely remember I had shown the painting to the Dean of Art, who was very impressed with the painting quality, took a few pictures and promised to do a little research. He did, and has just reported about his findings, which seem to lead to a Mediterranean painter born in Valencia, not very far from a place you probably still remember: San Miguel de Salinas. I am enclosing some biographical information on the artist, *ANTONIO GÓMEZ*, taken from the encyclopedic book "M. Ossorio y Bernard, Galería Biográfica de Artistas Españoles del Siglo XIX, Madrid, 1883-84". The general style, the period and date and very possibly the signature which we examined very carefully, seem to fit well. The Dean is now trying to find some other portraits by the artist for comparison purposes and will let me know. He seems to be genuinely interested in this beautiful painting. As the Americans say: I will keep you posted !.

2. I have received the *Aldrichimica Actas* you sent me. I am now the proud owner of a full, up to date collectioin. Thank you so much.

3. I found in a American magazine an advertisement that perhaps could be useful for Isabel. I am enclosing it with this letter.

4. Did you receive my letter of November 12, 1994. Do you plan to be in England for Easter?. Please, let us know

5. I very much hope that the autobiography printing process is now well underway. I eagerly look forward to seeing the final product. By the way, quite a lot of people here show interest in the book when I mention it.

6. A few days ago, when explaining the aromaticity concept to my Organic Chemistry students. I introduced the Loschmidt *versus* Kekulé controversy. It aroused a most interesting reaction from the students.

7. You did not tell us anything about the grandchild you were about to have last Summer. I suppose everything went well and you are now a happy grandfather !

Love from house to house

As always

Dear Carlos,

I am so happy to have your letter of January 12th.

Now you understand why I buy so many paintings purely on quality. Dealers usually charge very little if they don't have a name. But if you buy a truly beautiful portrait such as your portrait of a woman, a really good name usually comes to it.

I am so glad that you have received all of the old Aldrichimica Acta and hope that you are getting the current issues from the company.

Thank you for the advertisement for Isabel; that might indeed make her sleep better.

We do not plan to be in England for Easter, but in December I bought a beautiful painting in London, and as the British government has now denied export, Isabel and I will be in England the first week in February to argue the matter.

The autobiography is finished and I hope that the book will be published by Weidenfeld in April. When discussing how to get the book to Europe, I was told that all any book dealer needs is to know the catalog number and that the price in England is £14.99. The catalog number is enclosed.

I have not forgotten the tin containers for cigars and cigarettes--elephants don't forget--but they are not easy to come by.

We have a beautiful granddaughter, Helena, born on October 9th, much loved by her parents and grandparents.

Fond regards from house to house,

Dear Alfred and dear Grandfather,

Thank you for your kind letter of January 24,
and the warmest congratulations for the birth of
Melena. Our very best wishes to her and the
happy parents. Convey them to David and his
wife

I enclose a few samples for the Alfred
Bader library (whether they like it or not!!)
Would you please send them to the appro-
priate person in the company, as you did
on many opportunities before? They can send
the check, as usual, to my address at the Department
and I am enclosing my business card for

that progress.

All the very best, and good luck with
the export licence. We just regret not being
able to meet you at Easter.

Love,

Caroline

Dr. Alfred Bader
Chairman Emeritus

October 31, 1991

Prof. Carlos Seoane
Department of Organic Chemistry
University Complutense of Madrid
Ciudad Universitaria
E28040 Madrid, Spain

Dear Carlos:

Thank you for sending me the photograph of the Alchemist in the Prado. The artist certainly depicted the same old man in the same laboratory, and I think that both paintings were painted at about the same time.

As you know, I had sent a photograph to the Prado with the request for a photo of their painting, to which they never replied until you intervened. You might like to pass the enclosed photograph and the color reproduction on to the new director. My painting will now be seen by about a million scientists around the world as it will be on the next Aldrich catalog cover. I hope that you will like the inside of that catalog better, also, with more sensible Spanish prices.

Of course, all eyes are on Madrid this week. How fitting that Madrid was chosen, both because Muslims and Jews were expelled from there some 500 years ago, and it is the home of the finest bullfights.

Fond regards from house to house,

Alfred Bader

Dear Carlos:

I know that you enjoy sharing not only chemistry with me, but art as well, and so I wonder whether I may ask for your advice about a painting, photograph enclosed.

I just acquired it, filthy-dirty, with an at least 100 or 150 year old decrepit varnish. What is certain is that the painting is of Valazquez, painted during the very last years of his life. The painting is certainly 17th century, and I would find it hard to believe that it is a copy.

Hence, there are two alternatives: (1) that it is by Valazquez, or (2) that it is by someone who painted Valazquez shortly before his death in 1660.

May I impose on you to show this photograph to some experts and let me know what they think.

What a pity that we had such a terrible rapport with the director of the Prado, as of course I would love to have his opinion.

Fond regards from house to house,

Alfred Bader

Dear Carlos:

Of course, the first thing I did on receiving your letter was to call Bob Wandler, who is in charge of the Sigma-Aldrich library of rare chemicals to confirm that he remembers receiving the twenty compounds which you sent via me.

Of course, he did remember and particularly with great interest in the compounds. The check was sent to you, but may, of course, have gotten lost in the mails. If it hasn't arrived, say, by the end of April, please do let Bob or me know and we will ask Aldrich to stop payment and issue a new check.

Of course, Bob hopes that you will be able to send many more such interesting compounds and that the next payment will go more smoothly.

Within the next couple of months, you will see quite a few reviews of the book which we finished during our great holiday with you, for instance, in *Chemistry in Britain* and *C&E News*. As you know, there are several pages dealing with our best friends in Spain and Aldrich's pricing. A few pertinent Xerox copies are enclosed.

With all good wishes to you and the family, I remain,

Your old friend,

AB/cw

Dear Alfred and Isabel,

I can assure you that no matter the way the Canadian-Spanish war goes, no matter how international the waters are, we won't blame Isabel and our friendship will not suffer!.

Seriously, thanks for you last two letters and accept my apologies for not writing earlier. It was due to a trip to Chile I had to make on behalf of the Organization of Iberoamerican States because of my position in the Committee of Experts in Education

It is nice to hear that the book is coming. The cover looks nice and very familiar to the Spanish Royal Society of Chemistry!. I really look forward to seeing the real thing. I very much hope that Spanish chemists will be interested in it. They will learn a lot from the book and I am telling them so.

Thanks for sending my samples to Bob Wandler. By the way, I did not receive the cheque for them. I wonder whether it was lost in the mail, given the usually prompt payment from the company

Concerning Savater's book, the answer is yes. Carlos had read the book and he is enclosing his comment with this letter. It is certainly a nice book by one of our favorite contemporary Spanish essayists.

The whole family leaves for London next week, and we will enjoy one of not so many trips together in a long time. We will pay a visit to the London Museums, even if they refused the export permission for your painting. Whose work was it? Did you manage to resell it in Britain?

I hope that Marylin is out of hospital now and doing her usual excellent work for you. My best wishes to her.

Fond regards to you both, and your growing family

All the best

A handwritten signature in blue ink, appearing to be 'Carlos', written in a cursive style.

Carlos

My Dear Alfred:

Yes, I've read it, and it's a good book indeed. A teacher made me read it a couple of years ago and even if some parts were hard to understand (the philosophical in my opinion) I enjoyed it very much.

I'm also reading the second part of it (this time on my own, nobody is making me) which is called "Parties for Amateurs".

I think you could enjoy reading this part too (part 2), but I'm sure you won't get it all at once. Anyway, I'm certain you'll love it.

Love, Alfred

Thank you very much for the details of your
trip to the East. I will be glad to help in any way
I can. I will be glad to help in any way I can.

Myself and the children will be in Dallas
from August 1st to 10th. I will spend the last part of
August at Harvard. I will visit you at Madison Street in
London in the middle of the month. We are with you and family.

Received the letter of July 24th and will
be glad to help in any way I can. I will be glad to help
in any way I can. I will be glad to help in any way I can.
I will be glad to help in any way I can. I will be glad to help
in any way I can. I will be glad to help in any way I can.

Two weeks ago I was in Glasgow on a mission as a
representative. I also visited the School of Chemistry and met
the professors of organic chemistry including my friend
John Iain. They were expecting you in connection with the
Bader fellowships for chemists. In this connection, I just
received today a visit from the Rector of the University of
Glasgow, Prof. James Stewart. We have at
Glasgow an active cooperation with Bratislava in the
TEMPUS program. He is one of about 600 Jews in Bratislava
and appears very interested in your help in any form you
may find suitable. He asked me to tell you about this.

Dr. Alfred Bader

Spain

Dear Carlos,

I was just beginning to write to you to thank you for that beautiful book which collates Dutch literature with paintings when you called from Harvard. What a pity that we can't meet in Milwaukee.

In any case, many thanks for the book which I plan to take with me on my first vacation since the early 1960's.

All good wishes to you and your family.

As always,

Universidad Complutense de Madrid

Vice-Rector

Dr. Alfred Bader

Fax: 07.1.414.277.0709

Madrid, February 7, 1994

Dear Alfred and Isabel,

Is it better to be a plain professor?. Certainly, life was much, much easier before accepting the Vicerectorship. And much more time was available for writing to best friends. But, as someone said "If you progress far enough in your profession, whatever it is, you always become a manager". And I still keep a good science work. And I teach. And the Royal Society of Chemistry. And days still have 24 hours!. Would you accept that as an alibi?.

Thank you so much for your letter of January 19.

- 1.- Thanks for sending the samples to Bob Wandler. I already received the check. I am glad that they go to THE LIBRARY ("would the rose loose its sweet smell by just changing its name").
- 2.- I carefully read the copies of your letter concerning the Calpe affair . It is, in Bader's style, honest, tough, and fair.

After that, I received I phone call from C. Calpe asking for a personal interview. I received him in my office, of course, and we had a very long, sincere conversation. I regret to have to say that he admitted what you had said to me, including that his interest in the shipping company was personally his. However, he feels that he did nothing wrong and that the Spanish chemists had an even better service. His story is as follows:

Universidad Complutense de Madrid

Vice-Rector

- a) The previous shipping company, SEUR, the one originally hired by the Aldrich management before his arrival, had high prices.
- b) The new shipping company founded by him and others (Logitrans), acting as a middle company, was hired by Aldrich Spain, and, in turn, hired a carrier company, Ochoa. According to him, the service was excellent and the prices lower than SEUR's.
- c) Then, SEUR, wanting to get back Aldrich Spain as a customer, offered a price below Logitrans price. Calpe refused, on the argument that service was better now, and Logitrans was going to lower prices even further.
- d) Then, SEUR managed to get a copy of the document of incorporation for Logitrans and send someone to Saint Louis with it.
- e) One day, the managers from France came to Madrid and dated Calpe at lawyer's office. They fired him on the spot, and even did not allow him to go back to his office to collect his personal belongings.
- f) Then, after negotiations between lawyers, the company paid him some money for the firing.

It is clear that C. Calpe used very poor judgement in this affair. But on the other hand he is a good manager and probably was not acting in bad faith. He and his family are in a difficult moment and I regret it. Any help he can receive to overcome this situation and find a new job is essential.

- 3.- Now to happier things. Your proposal about arriving on August 18th is certainly convenient, but it will take away some time of being together!. Twelve days in Spain is all you will have!. Anyway, please let me know your precise dates and times when you know them. I will probably arrive back from Harvard on the second week of August, so I could wait for you in Madrid and drive together to the Coast.

Universidad Complutense de Madrid

Vice-Rector

- 4.- How is your autobiography?. Is it finished?. Did you already contact the publishing house?. I really look forward to reading it, even in manuscript form if necessary.
- 5.- The portrait of Johannes Uytenbogaert looks splendid now after restoration in the Rijksmuseum. What a beautiful painting, with that face, gesture and light!. It took me a lot further in appreciating Dutch art.

All the best to you both

CARLOS SEOANE

Dear Carlos,

Thank you for sending me your 37 - 100 mg samples for what used to be called the Alfred Bader Library, now the Sigma-Aldrich Library of Rare Chemicals. I have turned the samples over to Bob Wandler, a very good man in charge of the Library, and he will send you the company's check for 37 x \$15, i.e., \$555.00.

I am very curious to see what Carlos Calpe replies to my fax, copy enclosed.

We very much look forward to being with you in Spain during the second half of August. Will it be convenient to you if we arrive in Madrid by plane from Gatwick on Thursday, August 18th, and then leave at the very end of August?

Fond regards to you and the family from Isabel and me.

As always,

Enclosure

Dr. Alfred and Isabel Bader
Milwaukee, Wisconsin
USA

12.10.92

Dear Isabel and Alfred:

It was indeed an enjoyable and fruitful week. We certainly had a very interesting time and it was a pity that Margarita was unable to travel to Málaga with us. Margarita continues in stable condition and trying to carry out a normal life schedule as far as possible. The fetus is alive and apparently in good condition. We really do not know what the outcome will be, but of course we will keep you informed about it.

I have sent your information on the Joods Historisch Museum to Professor Oro and I am sure he will enjoy finding out about his clear Jewish ancestry.

You surely remember our time with Professor HÜNIG (and the time they spent sitting in a bus !). I have sent professor HÜNIG some reprints about my work on conducting materials and I think he was interested in it. He promised to find out about the possibility of accepting a student from my group and I look forward to his letter after he has finished his trip around Spain.

Since this week, you have another good reason to come back to Madrid soon: the Thyssen Museum has just been open to the public and it contains a good number of XVII th century Dutch paintings. I look forward to the opportunity of listening to your explanations on them when we visit the Museum together. Concerning paintings, we enjoy more and more the beautiful painting you gave to Margarita. We renamed the nice lady "La Pepa" and she is becoming a member of the family.

I have read "IBERIA". It is a very good book: well written, serious, balanced and at times ironic. It is clear that Michener both loves

.../...

and understand Spain and when he makes a criticism, which he does often, he does it with the love and understanding of an insider. Some information is of course seriously outdated and Spain, as you know well, is now a different country, but many names, places and situations bring me back to my childhood. On the other hand, seeing your country and people with foreign eyes is very enlightening. The book, although very different in approach, reminds me my feelings when reading "Imperial Spain" by J.H. Elliot, the first book on Spanish history written by a foreigner I read. Both books give a sensible, "undemonizing" treatment to the Black Legend. In many ways, the Spanish Black Legend and the Jewish Legend have common traits in the unfair, fanatic way of looking at a people. Given the unfortunate episode both peoples lived together, the very comparison is intellectually exciting and, perhaps, some day an objective, unprejudiced historian will make a comparative study of it. Thank you for this book, which offers me a mind-shaking experience.

In connection with the Jewish problem, please do not forget to send me a copy of the ironic text on it you mentioned when talking about Loschmidt. And the picture of Loschmidt, too.

Let's now talk about Chemistry. Perhaps you can help. An ex-PhD student of mine is now research director of a Spanish chemical company and the market situation is forcing them to change their products. They are now making aromatic nitro derivatives to sell as intermediates, mainly for the pharmaceutical industry. They use batch production, but even so they generate a large amount of yellow washing waters, and it is causing them very serious environmental and legal problems. My friend thinks that the colour is due to either polinitrated aromatics or degradation compounds, such as $C(NO_2)_4$ or $CH(NO_2)_3$. The problem is they do not know how to clean the waters and make them colorless at a sensible cost before dumping them into the river. My guess is that you at Alorich probably had the same problem at some time and you can offer useful advice on it. The problem is very serious and my friend is under strong pressure and having a very difficult time. I made a literature survey with him, and found some ideas, but I do not think they are useful at the industrial scale.

Fond regards from house to house.

Carlos

PS: The xerox on Stark you mentioned in your fax did not arrive. could you please check?. Please, do not forget to give ^{Alorich} my samples to the ABC library. If they are interested, I have some more.

Dear Carlos:

As you will be able to imagine, we miss George.

Thank you for sending me your exciting recent papers in which you describe all sorts of out-of-the-way compounds. If you could ever spare somewhere between 100 mg and a gram of some of them, they would indeed be most useful in our library. The fact that it is no longer called the Alfred Bader Library, but rather the Sigma-Aldrich Library, does not change the fact that it helps many, many people around the world.

If such compounds are available, you could send them in little polythene bags to me, and I will make certain that they are carefully handled and that you receive compensation.

Fond regards from house to house,

Ваше письмо от 15.02.1988 г. получено, благодарю за внимание к моему труду. Я рада, что вы заинтересованы моим творчеством. Если вы хотите увидеть мою работу, пожалуйста, напишите мне по адресу: Москва, ул. ...

private comment. I know you disagree with me on this, but I still think that a giant should not enter into public fighting with people of a much lesser stature.

I read all two articles and the book (what a delightful book!) on Lanchester. It makes an interesting controversy. Although your own interpretation about the Lanchester circle is more likely, I think the objection by the "historian" is a honest and legitimate one, worth thinking about. And arguing about. I would love to be present when you both meet and try to convince each other. I am sure that young Lanchester and you in an arguing contest, will perform at the best.

Concerning Lanchester studies in aerodynamics, after seeing his handwritten drawings, my feeling is that he did not envisage the hovercraft: he simply attempted to calculate the lift force of a flying surface, something also studied a few years later by Otto Lanchester in Germany.

Now to some personal matters. The desire of you both looked so good this summer that I could not sleep any sleep for not coming with us next summer. It is time to make plans. According to the preliminary conversation we had on the 26th, it seems that the last two weeks of August, 1964, will be the best for you. And for us, it will be also very convenient. Please, confirm at your earliest convenience that your plans definitely fit in this schedule, so that we can organize the program. Probably the best solution is that we meet in Madrid and drive together to the coast.

Once again, thanks for your invitation to Jorge, for the many activities you offered him and for the time Isabel devoted to him. Please, convey our thanks to Daniel, who, in a "most exciting time in his life", found the time to entertain Jorge. For very best wishes for Daniel and yours.

Very truly yours,

1964

Also, what if a future employee reads this - says this about Con, what's he saying about me K?

Dear Carlos,

We have just returned home and so look forward to meeting you at O'Hare this coming Thursday, United Flight 911 at 17:55.

Could you please tell me at what time on Saturday the 31st you have to leave. I am asking because I am wondering whether you might like to drive up to Oshkosh; see the attached.

Love Alf

Balanchine was by far the most prolific choreographer of modern times—says Peter Martins, the current ballet master in chief.

Highly decorated—his honors included Danish knighthood and the French Legion of Honor—Balanchine was among the first recipients of the Kennedy Center Honors and received the Presidential Medal of Freedom in 1983.

This month's highlights from the *Balanchine Celebration* include an all-Brahms night (June 2) and a salute to Hershey Kay-Americana (June 6). Selections from Stravinsky, Tchaikovsky and Schumann will also be performed.

—Todd Powell

Oshkosh by air by gosh

► **PICTURE WHAT** has been described as a beer barrel with wings, Montana farmer Delmar Benjamin will fly his exact replica of a 1930s GeeBee Racer a few hundred feet above thousands of awed

spectators—at about 200 mph Upside down

Benjamin will be one of the expected 830,000 pilots and flight enthusiasts at the 41st annual Experimental Aircraft Association (EAA) Fly-In Convention and Sport Aviation Exhibition (414-273-9404) in

Oshkosh, Wisconsin July 29 through August 4. Held at the Wittman Regional Airport, the airshow will host more than 12,000 airplanes extending in rows more than 3 miles long.

Highlighting the week-long event is one leg of the international Breitling Masters World Cup competition featuring the world's finest aerobatic maneuvers coordinated with smoke and music. Oshkosh EAA '93 will also honor the Women Air Force Service Pilots (WASPs) who towed flying targets and tested and ferried hundreds of airplanes to combat units during World War II.

Antique and classic aircraft from before 1960 and new builds, ultralights and gliders. Birds of a feather flock together. Show

► **Portrait of the Navajo Nation** runs through September 6 at the National Museum of American History (202-357-2700) in Washington, D.C. The exhibit features 58 color and black-and-white images by photographer Joel Grimes from his recent book, *Navajo: Portrait of a Nation* (Westcliffe Publishers, Englewood, Colorado 1993). This picture of bull rider Chee Secody, Jr. was taken in Kaibito, Arizona.

To: Prof. Carlos Seoane
Via Fax 011 341 394 3472

Dear Carlos,

Looking more closely at your fax of May 9th, I would like to urge you not to fly from Chicago to Milwaukee. Your flight from Madrid is scheduled to arrive at 17:55, and I don't think that you could then catch a flight scheduled to arrive in Milwaukee at 19:25. Customs and immigration takes at least an hour and your flight may be late.

That is the good reason. The real reason is also that we would love to have an extra two hours with you in the car.

Fond regards,

ALFRED BADER FINE ARTS

Dr. Alfred Bader
FAX: 07-1-414-277.0709

May 9, 1993

Dear Alfred and Isabel,

Thank you so much for your letter of April 21. We have already made arrangements for this summer's travelling, according to you schedule and we would like to know whether they meet with your approval.

As Carlos will spend this summer in Boston and Jorge will go to Ireland before going to Milwaukee, our proposal is as follows:

- 1) Jorge, Margarita and myself will travel Madrid-Chicago on July 29 (United Airlines 911), arriving in Chicago at 17:55 h. Then we will fly Chicago-Milwaukee (United 5138), arriving in Milwaukee at 19:25 h.
- 2) If you agree, we would stay with you until July 31, when Margarita and I will leave for Harvard, as I have to teach in the summer courses at the Real Colegio Complutense. Margarita and I will then fly directly to Madrid, probably on August 10.
- 3) As Jorge will have to travel alone, we will prefer him not to make any connections. Therefore, Jorge will travel directly from Chicago to Madrid if you are kind enough to take him to Chicago airport. His flight will be United 910, on August 20, leaving Chicago at 13:35 h.

The reservations are made and we have to collect the tickets in two weeks. Would you please drop me a line before that time to tell whether this plan is acceptable?. My direct fax is -34-1-394.3472.

We all look forward to meeting you in Milwaukee.

Fond regards from house to house.

Carlos

Dear Carlos,

Thank you for the list of galleries to visit in Madrid.

As you know, we will be returning from England on July 26 and hope that George, and perhaps all of you, will be visiting us soon thereafter. On Sunday, August 1, we plan to drive to Indianapolis, returning either late on Tuesday the third or early on Wednesday the fourth. While the two lectures in Indianapolis on the second or third are firm, we may want to spend a few hours in Bloomington, which is not far away. In any case, George would be most welcome to come with us.

Please do let us know your travel plans when they are finalized.

Periscopio

• **Los investigadores** Gregorio Parrilla y Alain Cantos, del Instituto Español de Oceanografía y Aincó-Interocean, respectivamente, han publicado en la revista británica «Science» (vol. 259, 26-feb.) los resultados de una investigación sobre la dinámica y flujo del Mediterráneo. El estudio, en el que participaron un grupo de científicos de varios centros norteamericanos, se centró en el Golfo de Cádiz.

• **Facilitar y agilizar** los diagnósticos, proporcionar al médico la información y documentación más actualizada y permitir al gestor sanitario un exhaustivo control del gasto, son los tres objetivos y beneficios más destacados del sistema integrado de ayuda asistencial diseñado por la división de «software» de la empresa española MBA, que ha sido presentado en Madrid a expertos y responsables del sistema sanitario. Este original proyecto, único en el mundo, implantará la historia clínica única en forma de tarjeta sanitaria individual.

• **Ernst & Young** ha desarrollado un conjunto de metodologías denominadas «Navigator Systems» para mejorar la calidad de la planificación, análisis, producción y evolución de los sistemas de información mediante la integración de técnicas, métodos y herramientas de ingeniería fácilmente adaptables, para cubrir las necesidades de una gran variedad de empresas y proyectos.

• **Los químicos** de Rembrandt han lanzado al mercado dos nuevos productos, la pasta dental blanqueadora Rembrandt sabor menta y el elixir Rembrandt sabor menta. El principio activo de estos productos es la citroxaína, un compuesto revolucionario que blanquea los dientes, elimina el sarro y la placa bacteriana, todo ello con un índice de abrasividad inferior en un 60 por 100 al establecido por la Asociación Dental Americana como seguro.

• **S. I. Alpha**, compañía orientada al segmento de «software» y servicios integrales de implantación de sistemas, ha reorganizado sus líneas de productos y recursos, ampliando y reforzando las mismas, que se dividirán en tres áreas diferentes: sistemas multimedia de acceso y distribución de información, ingeniería de «software» y sistemas empresariales de gestión. Los nuevos productos tienen en cuenta factores como la descentralización de la arquitectura de sistemas, el incremento de las tecnologías de sistemas abiertos y los nuevos sistemas de comunicaciones.

• **Nashuatec**, empresa líder mundial en la comercialización y distribución de productos ofimáticos, ha lanzado al mercado una nueva duplicadora digital, denominada «CopyPrinter CP325», con «interface» de comunicación para PCs con el que el usuario puede controlar el proceso de impresión en todas sus fases desde su ordenador personal. Todo el proceso se realiza con tecnología digital.

• **Un helecho** de rápido crecimiento que absorbe desperdicios radiactivos e impide la pérdida de oro y otros metales preciosos en la industria joyera ha sido descubierto por investigadores de la Universidad hebrea de Jerusalén. La planta, llamada azolla, vive en medio de un tipo de algas de color verde azulado que absorben monóxido de carbono.

Inventos

Nuevo sistema de seguridad para coches

La empresa Sertrex (☎ 91-6376114) comercializa en España desde hace muy poco tiempo este sistema de seguridad fabricado y diseñado en Inglaterra, para impedir que le roben el coche. El «Autolok», de fácil instalación, está fabricado en acero y tiene una cerradura de alta seguridad. Con él se bloquea el freno de mano y la palanca de cambio de los vehículos tanto manuales y automáticos. Su precio es inferior a las cinco mil pesetas.

Monitor de Philips de veintiocho pulgadas

Este monitor de veintiocho pulgadas de pantalla panorámica (16:9), con diseño ergonómico, ha sido presentado por la multinacional holandesa Philips (☎ 91-4042200) en la feria internacional Cebit-93, en la ciudad alemana de Hannover. El nuevo formato, con control digital de la imagen, va dirigido a los usuarios de estudios de producción de vídeo, así como de sistemas «windows», que necesiten utilizar más de una aplicación informática al mismo tiempo.

El comunicador personal llegará el año próximo

Los comunicadores personales EO no llegarán a España hasta finales del año próximo. Se basan en el sistema operativo «Bel Point», especial para el reconocimiento de escritura. Están provistos de discos fijos de 20 y 64 MB y llevan nuevas aplicaciones escritas directamente en la memoria RAM, entre las que cabe citar el fax, procesador de texto, y hoja de cálculo. Tiene conexiones externas para ordenador, impresora y línea telefónica normal y celular.

«Eclipse» para evitar viajes de ejecutivos

Entre un millón y medio y dos millones de pesetas aproximadamente cuestan, en Estados Unidos, los modelos de este avanzado sistema de videoconferencias diseñado y construido por ingenieros de la empresa californiana Compression Labs Incorporated (☎ 07-1-409-4353000). La instalación del «Eclipse» es sencilla, ya que se puede llevar a cabo por cualquier persona en unos minutos con la simple conexión de dos cables y un enchufe.

Some new places to visit !!

OCHENTA ANIVERSARIO

Dr. Alfred Bader
2961 North Shepard Avenue
Milwaukee, Wisconsin 53211

March 3, 1993

Professor Carlos Seoane
Universidad Complutense de Madrid
Facultad de Ciencias Quimicas
Departamento de Quimica Organica 1
Ciudad Universitaria
E28040 Madrid, Spain

Dear Carlos:

Thank you so much for your long fax of March 1, received this morning.

However, as you will see from the enclosed, I could not read parts of the fax. What were you saying about Professor Paolo Manzella (spelling)?

I haven't yet had a chance to look at the 5-volume history of Jewish life in America, but I am certain that my name will not be included. Isabel and I so look forward to George's visit. We plan to return from England on July 26 and we have kept most of August open, except for attending a chemical education conference in Indianapolis on Monday, August; speaking at the Chicago Art Institute on Monday, August 10; and a couple of speeches at the A.C.S. meeting in Chicago the weekend of August 23. We plan to drive to Indianapolis and to Chicago and so George could come with us. He might enjoy the meeting on chemical education and even my speaking on Jan Lievens at the Chicago Art Institute.

Michael Heylin's letter to you was kind and, as I expected it to be; E. J. Corey might well include your letter in the program for May 17.

Of course we so hope that Margarita has fully recovered.

Fond regards from house to house,

Enclosure

Professor Carlos Seoane
Universidad Complutense de Madrid
Facultad de Ciencias Quimicas
Departamento de Quimica Organica I
Ciudad Universitaria
28040 Madrid, Spain

Dear Carlos,

I so appreciate your sending me a copy of your letter of January 31 to Michael Heylin, the editor of C & E News. I don't believe that he will print it. In May, he said that he had received some 36 letters but could only print 4, because essentially they all said the same thing.

As you will see from the enclosed, the Chemistry Department of Harvard University is planning an Alfred Bader Day on May 17 and conceivably Harvard might print your letter with the program. Your letter which you sent me on April 8 is the most beautifully poetic I have received, and it hangs framed in my new office. If you will write to Professor E. J. Corey, he might well be as charmed by your letter as I am.

Time is flying, and we are already making plans for our trip to Europe from the end of May to July 25. After our return, all of August, except for August 1--3, is free, and we much look forward to having George with us.

Fond regards from house to house,

Enclosure

31.1.93

Dear Professor Heylin:

As a close friend of Alfred Bader, I very much appreciated your gallantry in offering your pages as a high tribune to his defenders in the heat of his battle with the Sigma-Aldrich top management. As you surely know, Dr. Bader suffered immensely during this period. Now, matters seem more settled and it is probably time to relax a little and look in due perspective at a man of such an stature.

I would like to have the enclosed "Open Letter to Alfred Bader" published in Chemical & Engineering News.

I fully realize how difficult it is to be elegant when writing in a language other than yours. Thus, my letter has probably serious language mistakes and I would certainly accept and appreciate any corrections you may deem necessary.

Sincerely yours

C. Seoane

AN OPEN LETTER TO ALFRED BADER

Dear Alfred:

Every person in his lifetime eventually meets a unique character who makes his life so much richer. —

That man has endured a great suffering he did not deserve. Many friends went public in his defence. How fitting for a man who made the Bible the leitmotiv of his life: "You shall not stand idle by the blood of your neighbor".

It is not true that time heals. But it does help and the turbulent waters have been overtaken. It is time to look in perspective. A sad event, very true. But not a sad life.

Not many people can show such a full, fruitful and rich life.

Not many people can start with nothing, less than nothing, at fourteen and build Aldrich.

Not many people can have and deserve thousands of friends around the world, a whole profession indebted to him for his help of decades.

Not many people has created a new concept in his field and is unique in his approach to something.

Not many people can show excellence in chemistry, business, art and life.

Not many people , having made Art, Bible, and Chemistry his ABC, can be deprived from C and still have A and B as a happy and essential part of an exemplary life.

Not many people has the privilege of pursuing and enjoying a passion no one on earth can spoil. Not many people can loose so much and keep still more.

Not many people has helped two generations and make such a lasting impression in both of them.

And, certainly, not many people received a gift named Isabel.

A man like that has not the right to complain. He must be grateful for a life very few people can have. He has the duty to be happy; the duty to Chemistry, to Bible, to Art, to his friends, to his family, and to himself.

For us, chemists of the world, as always and forever, a bit of Alfred's soul will pop out every time we open an Aldrich bottle.

From now on, it is your turn: *Please, bother us.*

Departamento de Quimica Organica 1
Ciudad Universitaria
E28040 Madrid, Spain

Dear Carlos:

Further to the serious problem raised by your former student, now the research director of a Spanish chemical company, I passed your question about their generating large amounts of yellow washing waters to Aldrich.

The head of our dyestuff division is Dr. Thomas Wickersham, and his handwritten memo of October 14th, initialed TW, is enclosed, as are comments of Dr. Stephen Branca.

The important point Dr. Wickersham makes is that here color alone would not damn the effluent, provided only that it does not contain metals such as chromium or cadmium. Dr. Branca's comments to use charcoal to filter out the colored materials is probably the most practical, but may be quite costly.

12.10.92

Dear Isabel and Alfred:

It was indeed an enjoyable and fruitful week. We certainly had a very interesting time and it was a pity that Margarita was unable to travel to Málaga with us. Margarita continues in stable condition and trying to carry out a normal life schedule as far as possible. The fetus is alive and apparently in good condition. We really do not know what the outcome will be, but of course we will keep you informed about it.

I have sent your information on the Jews Historisch Museum to Professor Oro and I am sure he will enjoy finding out about his clear Jewish ancestry.

You surely remember our time with Professor Hünig (and the time the spent sitting in a bus !). I have sent professor HÜNIG some reprints about my work on conducting materials and I think he was interested in it. He promised to find out about the possibility of accepting a student from my group and I look forward to his letter after he has finished his trip around Spain.

Since this week, you have another good reason to come back to Madrid soon: the Thyssen Museum has just been open to the public and it contains a good number of XVII th century Dutch paintings. I look forward to the opportunity of listening to your explanations on them when we visit the Museum together. Concerning paintings, we enjoy more and more the beautiful painting you gave to Margarita. We renamed the nice lady "La Pepa" and she is becoming a member of the family.

I have read "IBERIA". It is a very good book: well written, serious balanced and at times ironic. It is clear that Michemor both loves

Dear Carlos and Margarita:

Our ten days in Spain were among the most interesting days of the last few years--thanks to you and your family--wonderfully enjoyable.

I hope to have a photograph of Loschmidt for you shortly.

The right person to ask about Dr. Oro and his Jewish ancestors is the Director of the Joods Historisch Museum, Waaggebouw, Nieuwmarkt, Amsterdam. As you will see from the enclosed letter, the director in 1977 was Dr. Judith C. E. Belinfante, but 15 years later they may have a different director.

With the letter I am sending you a Xerox copy of the information on James Stark, who probably painted your landscape.

We arrived home at 5 a.m. Madrid time on Monday morning--dead tired, but well. The painting also arrived safely and gives us much pleasure.

Fond regards from house to house,

Dear Carlos:

Isabel and I much look forward to arriving in Madrid by Delta Flight 108 at 7:30 a.m. on September 18th.

Here are the corrected excerpts from my autobiography. Isabel had a little difficulty reading your handwriting. Might we impose on you to translate this and have it typed by your secretary and a few Xerox copies made? We would then give either the English or the Spanish version to whoever in Madrid or Malaga asks us about the pricing.

Fond regards from house to house,

Alfred Bader

Dr. Alfred Bader
Aldrich Chemical Company
P.O. Box 355
Milwaukee, Wisconsin 53201
U.S.A.

Dear Alfred:

Judging from the delay of my reply, I am beginning to look as a spanish bureaucrat. However, I have an alibi. I have been very busy during the last few weeks, because I have just been appointed to a chair at the Universidad de Castilla-La Mancha (do you remember Don Quijote?).

Concerning your inquire about the painting "Ante el espejo", by Ramón Pichot, I went to a number of dealers chosen among the shops we visited together in 1986, including Morueco, the one that impressed you most favourably. No useful information could be obtained from them. I then went to Durán, the biggest auction house in Madrid, together with Shotheby's. They first told me about paying 2 percent of the value for their precise estimate, ^{in writing} but then agreed to give me an aproximate estimate; 500.000-700.000 pts. I don't know whether this is a high or a low price, but I do know that I really like the painting.

On the other hand, I am now trying to obtain some information about Pichot. It does not seems very easy, but I hope that a professor of art can give us some advice. I will let you know whether I succeed. The name Pichot is typical from Cataluña, maybe even Barcelona.

Talking about Barcelona, what happend to your executive is very sad. As you say in your letter, this--while it is not an discouragement--could happen in any major city.

All the best.

Chemists Helping Chemists in Research and Industry

Departamento de Química Orgánica
Ciudad Universitaria
28040 Madrid 3, Spain

Dear Carlos:

Thank you so much for your thoughtful letter of October 16.

First of all, our heartiest congratulations on being appointed to a chair at the Universidad de Castilla-La Mancha. Isabael certainly remembers Don Quijote, but we haven't yet had a chance to find Castilla-La Mancha on the map, and hope that it isn't so far south of Madrid that we would not be able to visit you when we come to Spain next. Our plans now call for opening an Aldrich España in 1989, and for Isabel and me to visit soon after the office is opened.

We also like the Girl in Front of a Mirror very much indeed. It is signed and in mint condition. At \$2,400.00 I guess it is not too expensive, but how is a Milwaukee dealer to know what modern Spanish paintings are worth. I have looked into the literature about Ramón Pichot and have found that he was a contemporary and friend of Picasso. I like Pichot's work much better than most of Picasso's, but then I don't know anything about modern paintings.

Fond regards from house to house.

As always,

Alfred Bader

28040 Madrid, Spain

Dear Carlos:

May I ask you for some information about a Spanish artist? A local dealer has a painting of which I enclose a Polaroid photograph, which I like very much. It is by a Spanish artist quite unknown to me, Ramon Pichot.

May I impose on you to inquire what such paintings are worth. Of course, dealers will just give you estimates, but I would very much like to know whether it is worth a few hundred or possibly a few thousand dollars.

Everything in business life goes slower than one hopes. We had hoped to have an Aldrich España established by now, and I still hope that this will become a reality next year. However, the man in charge of our European operations, and his wife, were both mugged just around the corner from the good Barcelona hotel. This, of course--while it could happen in any major city---is not an encouragement.

Best regards from house to house.

As always,

Alfred Bader

Milwaukee
Wisconsin 53201
U.S.A.

Dear Alfred:

I am sorry that I were away when you phoned from England. In fact, I did not know you were in England. It was indeed a pity.

Anyway, many thanks for your kind letter concerning my compounds for the ABC collection. I am sending 30 of them to you as research samples. I hope the samples arrive safely and in good condition.

If it were not too much of a nuisance, I would like to ask you for a favour. I have an invoice from The Beckman Centre for the History of Chemistry to be payed in U.S. dollars. I don't know the amount you pay for 30 samples, but if it is more than \$218, would you be kind enough to send a check for \$218 to the Centre (copy of invoice is included with this letter) on my behalf, perhaps including the copy of the invoice to avoid any misunderstanding. Many thanks for your help.

Concerning your question about the first compound in my list, dicyano-butadiene (cis,cis-mucononitrile), one of my students needed it as a starting material, and we made it by using a literature preparation. It is not particularly difficult, although ^{the yield} is not very high. It involves oxydation of o-phenylenediamine with lead tetraacetate:

See K. Nakagawa and H. Onue, Chem. Comm., 396 (1965)

Very best regards to you and Isabel.

Yours sincerely

E29040 Madrid, Spain

Dear Carlos:

Your thoughtful letter of March 16th was forwarded to me in England where Isabel and I spent a couple of weeks over Easter. You may have been told that we tried to reach you by telephone in your department, but unfortunately couldn't.

We would love to have those interesting samples, and if you could easily mail them to me by air mail as research samples, please do send them. If you think that it would be easier to send them to Aldrich Chemie in Germany, please send them to the attention of Dr. Alfred Griesinger who will be sure to forward them for our Library. Of course I will send you our check as soon as I have received the samples.

Incidentally, how difficult is the very first compound to make, the dicyanobutadiene? That would really be a good compound to make on a larger scale and add to our catalog. Did you use a literature preparation or did you work out a new synthesis?

It would be so nice if both of you could come over to the United States for a meeting on heterocyclic chemistry, and if so I hope that you will visit us for a day or two in Milwaukee.

Fond regards from house to house.

Sincerely,

Alfred Bader

Dear Alfred:

It was nice to hear from you with the good news about bezoylnitromethane. It can be very useful to us, because, as you know all too well, it is very difficult to make. Many thanks.

I now have available a number of research samples that can be added to the ever increasing ABC collection. I enclose a list of them. If they are of interest, please let me know and I will send them via airmail.

We also remember with fondness your stay in Spain, both useful and enjoyable, and will be delighted to be able to meet you again. Our travelling to the U.S. is not easy, but perhaps a scientific meeting on Heterocyclic Chemistry, if and when ^{held} in the U.S., could offer an opportunity. Let's hope so. In the meantime, we do hope you will be travelling to Europe and perhaps could spare a little time for us.

Anyway, very fond regards to you both.

Dear Carlos:

Thank you so much for your most helpful letter of April 2, received only today.

We will use your references in the "Please Bother Me" advertisement. However, could you please return to me as quickly as possible your corrections to Isabel's Spanish text. I sent you the only handwritten copy I had, and of course we wanted the Spanish to be absolutely correct. As soon as I have received your corrections, we will typeset the advertisement, and hopefully be able to send you the typeset text before we leave for Europe on May 13.

Of course, I had explained to Dr. Eidel how very helpful you had been, and so I know that he has really done his best to try to make the four compounds you requested. One has still not been made and that is benzoyl-nitromethane. His last comments about the instability of the alcohol intermediate are enclosed.

Best personal regards,

Alfred Bader

 U.S.A.

cc Dr. J. Eidel

Dear Alfred:

Thank you very much for your thoughtful letter (is "Thoughtful" -- enough to express my feelings?) of March 18th.

I have also received a kind letter from Dr. Eidel concerning the new compounds I suggested, and I have already replied to him. He did a very good job. Some of the compounds are rather difficult to prepare, even at the laboratory scale and their development even included a fire. He deserves sincere congratulations.

According to your kind suggestion, I will have those two compounds ordered through the storeroom as soon as we have some new payments to enclose with the order.

Now for your comments on your planned "Please Bother Us" advertisement (By the way, did I mention before that my first contact with Aldrich as a student was an advert with these words and your photograph and that this wonderful sentence and the name Aldrich remained together in my mind since then?). I can mention a number of references giving -- the specific purposes for which we have used these new building blocks -- prepared by Aldrich:

2-cyanothioacetamide. Synthesis of 2-pyridothiones: Liebigs Ann. Chem., 1984, 213; Ibid, 1986, 210.

Ethyl 2-cyanocinnamate. Synthesis of N-aminopyridones: Org. Prep. Proceed. Int., 16, 393 (1984).

Synthesis of 2-hydroxypyridines: An. Quim., 72,

...//...

Synthesis of Pyrazolo [1,5-a] pyrimidines: Synthesis, 1987, 33.

Benzoylacetonitrile. Synthesis of 4H-pyrans: J. Heterocyclic Chem., 15, 57 (1978). Heterocycles, 20, 2393 (1983). Heterocycles, 22, 1 (1984).

Synthesis of 2-pyridones: Heterocycles, 14, 639 -- (1980); Ibid., 23, 2013 (1985); J. Chem. Soc., Perkin 1, 1985, 1681.

Synthesis of furans: Synthesis, 1982, 513; J. Chem. Soc. Perkin 1, 1985, 2581.

Synthesis of carbocyclics: Org. Prep. Proced. Int., 18, 85 (1986).

I understand your reticences about establishing Aldrich-España and I remain as comitted as ever to offer my help when necessary.

Finally, Margarita and I are sad to hear that you won't be able to visit Spain until Aldrich-España is established. As for us, we are planning to attend the IUPAC meeting in Bulgaria this summer and I am afraid that it will be enough for a summer's travelling. So, we have here another reason to look forward to Aldrich-España.

Fond regards and my sincerest thanks for all your most friendly -- help.

All the best

Carlos Seoane.

Dear Alfred:

Thank you for your letter of March 24. By now, you should have received my previous letter, with references for some of our papers concerning the new building blocks. I hope they can be useful.

Isabel's translation is very correct, certainly much better than my english. However, I have taken the liberty of somewhat changing the style. You will notice that I offer two alternatives for building blocks. I the context of the advert, "productos para síntesis" will perhaps be a better choice. As for the title: I suggest (A) a very spanish commercial sentence. Very correct, but very widely used. Version B is a litteral translation of "Please, bother us". A little bit shocking, but that is what advertising is all about. I think this is a very appropriate sentence in any language.

Professor C. Alvarez checked your draft and found it appropriate. He didn't have any reference to be mentioned.

As you know, we use two (surnames when referring to a person. I must be so in official documents, economic transactions etc. In more informal contexts, we tend to use only the first surname and I don't think it is necessary for you to use the full, official name in the advert. First surname will be enough.

I hope that this, my first attempt in the advertising world will be useful!. Please, send me a copy of the advert when ready for printing.

Finnally, thanks to your help I have been able to purchase the beautiful Fisher reproductions, which I have already received. I am delighted. May I please place with you a standing plea to tell me about new sources of reproductions of chemical and alchemical paintings you become aware of ?.

Many thanks for all your help. All the best.

Sincerely

C. Seoane

Wisconsin 53201
U.S.A.

Dear Dr. Bader:

A few days after your phone call from the U.S., I did, in fact, receive your letter of March 27. First of all, I shall be pleased to spend saturday June 7 with you and your wife in Madrid as an extra day.

On the other hand, I have received information from the people involved in your visit and I hope the arrangements they have done will meet with your approval.

Barcelona: Professor Marcial Moreno Mañas and Professor J. Marquet have reserved a room for you in Hotel Bonanova Park, calle Capitan Arenas 51. They have written you telling about this.

Valencia: Professor J. Sepúlveda has reserved accomodation in Hotel Renasa, Avenida de Cataluña 5. He suggests you leave Barcelona on May 27 afternoon, arriving in Valencia that evening. Then, they also suggest, you should leave Valencia on the afternoon or evening of May 29 on your way to Murcia. But these details, of course, are up to you.

Murcia: Professor Molina told me by phone he got accomodation for you in Hotel El Rincón de Pepe, calle Apóstoles 34.

Toledo: I have reserved a room for you in the Parador Nacional de Turismo "Conde de Orgaz" (I am sure you will like this name!), calle Paseo de Cigarrales. I enclose the appropriate correspondence. It is a Hotel belonging to the Spanish Ministry of Tourism and they requested a deposit in advance. I have sent the required amount on your behalf and the reservation is now confirmed. I hope you will

../..

like the Parador and the city of Toledo. Feeling that near to El Greco is just impossible in other places. As you can see on the letter from the Parador, they have not any twin bed room (to my own dismay, it is often difficult to find these days), but the beds in spanish Paradors use to be so large...

If you plan to travel to or from Toledo via Madrid and you need anything that day, please feel absolutely free to phone me at any time (Home: 91/7381691. Office: 91/4496635).

Oviedo: Professor Riera and Professor Barluenga have arranged things for you, they told me by phone. Hotel Ramiro I, calle Calvo Sotelo. Professor Riera has already sent you the confirmation letter from the Hotel.

Santiago: Professor Castedo and Professor Riguera were trying to get accomodation for you in the Hostal de los Reyes Católicos, Plaza del Obradoiro. It can be a little bit expensive, but we think you will enjoy the place, in front of the Cathedral, and the Hostal building, many centuries old. Proffesor Castedo hinted about a possible phone call from you to discuss the details. In case you find it appropriate, his office phone number is 981/591085.

Madrid: You have a reservation in Hotel Florida Norte, Paseo de la Florida 5. As you can see in the enclosed letter, a twin bed is likely in this Hotel. Please phone me from Santiago so that I know the time of your arrival to collect you at the station.

For your benefit, I enclose the full list of names and addresses, including phone numbers, for all the Universities you are going to visit.

I very much look forward to being with you and your wife in Spain.

Best personal regards. "Hasta pronto".

Muy señor nuestro:

Acusamos recibo a su amable carta de fecha 4 de los corrientes, en la cual nos solicita la confirmación definitiva de la reserva de una habitación doble a nombre del Dr. Bader, para las noches del 5 y 6 de Junio.

Por la presente, nos complace reservarle dicha habitación, al precio indicado en nuestra carta del 2 de Abril y, como ya le indicamos, trataremos por todos los medios de darle al Dr. Bader una habitación de matrimonio.

Sin otro particular por el momento,

Muy atentamente le saluda.

Dear Prof. Seoane:

As you will see from the enclosed, our plans for our two weeks in Spain are taking shape.

We have heard from Prof. Moreno-Manas in Barcelona and have replied immediately.

Our tentative schedule is as follows:

Sunday	May 25	Arriving in Barcelona at 8.38
Monday	May 26	Barcelona
Tuesday	May 27	Barcelona, leaving Barcelona at 17.00,
Tuesday	May 27	Arriving Valencia at 21.51
Wednesday	May 28	Valencia
Thursday	May 29	Valencia
Thursday	May 29	Leaving Valencia 16.41
Thursday	May 29	Arriving Murcia at 20.20
Friday	May 30	Murcia
Friday	May 30	Leaving Murcia 17.15
Friday	May 30	Arriving Alicante at 18.44
Friday	May 30	Leaving Alicante 23.00
Saturday	May 31	Arriving in Madrid on a sleeper train around 7.00
Saturday	May 31	Leaving Madrid to go by train to Toledo that Morning Toledo
Sunday	June 1	Toledo, leaving sometime that evening by train for Madrid, and leaving Madrid on Sunday, June 1 at 23.00 on a sleeper train to arrive in Oviedo at
Monday	June 2	7.51 on Monday, June 2

Prof. Carlos Seoane
Universidad Complutense de Madrid
April 18, 1986
Page Two

Monday	June 2	Oviedo
Tuesday	June 3	Santiago
Wednesday	June 4	Santiago
Thursday	June 5	Madrid
Friday	June 6	Madrid
Saturday	June 7	Madrid, leaving Madrid for Barcelona on Saturday evening. We will then arrive in Barcelona on Sunday morning and catch the train which will take us to Geneva by Sunday evening.

We are a bit lost on how best to get from Oviedo to Santiago and then to Madrid, hoping to arrive in Madrid either on Wednesday evening, June 4, or possibly fairly early on Thursday, June 5. Could you please help us with the train connections from Oviedo to Santiago to Madrid.

One of our problems is that we do not have the summer train schedule, but only the schedule that expires on May 31.

One further question: In central Europe, Isabel and I have had no problems sleeping on the second class couchettes which hold six (6) passengers. However, this may not be practical in Spain, and in fact, we have been told that on the night train from Paris to Barcelona, there are couchettes for 4 people where the sexes are separated. This of course is no serious problem. On the other hand, there may be convenient sleeper accommodations for husband and wife. Could you please advise. Could you please also tell us whether the trains are so full at the end of May and early in June that it would be advisable to book the sleeper accommodations well in advance? If so, could we impose on you to book all the sleeper accommodations from Barcelona onward for us now, of course with the clear understanding that we will reimburse you when we see you.

I am afraid that all of this is getting to be a great deal of work for you, and we very much hope that we will be able to thank you in some measure by really doing our very best in improving our service to Spain.

Best personal regards.

Sincerely,

Alfred Bader
